GEORGE REINBERG

35 Randolph St., CHICAGO.

CORNING, N. Y.—W. J. Cheney has sold to Dr. F. H. Starr the two greenhouses at 256 West Pulteney street, for removal to the Reynolds property nearby. The work of removing the greenhouses has already been begun. Dr. Starr has arranged with Eugene Dusenberre to conduct an up-to-date florist's establishment, using the glass from the older greenhouses in the new structures. These will be fitted with every modern convenience.

J. M. PHILLIPS' SONS, Pittsburg, Pa.

DOWAGIAC, MICH.—Trade has been about as usual here this season. F. H. Woodruff has given up his down-town store and now carries on the business at his residence.

SPRINGFIELD, O.—The members of the Florists' club were pleasantly entertained by Thomas McBeth at his home in East High street. A dinner was served and addresses were made by Judge F. M. Hagan, Judge Walter L. Weaver, Rev. Dr. George W. Dubois, John M. Good and Roger Murphy. George H. Mellen, president of the club, acted as toastmaster. Harry D. Brydon sang and Miss Dora Crist gave several interesting readings.

LOOK OUT!

I Sting! Prices Down!

ROOM! ROOM!!

We Need Room.

LOOK! LOOK! LOOK!

In order to place our big importation of **Palms, Araucarias,** etc., we are slaughtering prices of **Bedding Plants** down to an almost shameful condition of affairs.

Just think? The best variety of **Scarlet Sage,** Clara Bedman or Bonfire, 4-in. pots, of which we generally never have enough at $12.00, that ugly bee above has now stung the price down to $5.00 per 100, $45.00 per 1000; no less than 100 at this price are sold in one order.

	Per 100
Begonia Vernon and Erfordi, 4-in.	$5.00
Fuchsias, 4-in.	6.00
Cannas, French, best well-known varieties, 4-in.	5.00

Clematis, the true Jackmani, 6-in. pots, 3 feet, 35c to 40c.

Cobea Scandens, 4-in., staked up, 2 ft. high, worth $15.00, cut down to $5.00 per 100.

Don't forget that we lead the world in **Moonvines.** Watch and be careful that you don't buy Morning Glories for Moonvines. 4-in., $12.00 per 100; 2½-in., $5.00 per 100.

GERANIUMS.

S. A. Nutt, John Doyle and some pink, 4-in. pots, $7.00 per 100; and mixed varieties.

Mme. Salleroi for borders, strong plants, 2½ and 3-in., $4.00 per 100.

The following plants are cut down to $2.00 per 100, 2½-in. pots:—Marigold (Eldorado and Gold Ring, 3-in.), Petunias (Inimitable and California Giant), Nasturtiums, Heliotropes, Phlox (Drummondi), Dusty Miller, Lobelia (blue compacta and trailing), Summer Chrysanthemums, Sweet Alyssum (Little Gem), Ageratum (best blue, 3-in.), Verbenas, Torenia Fourneri, Kenilworth Ivy.

Victoria Asters, 2½-in. pots, separate colors, $2.00 per 100.

Now is the time to plant **Cosmos.** We have the best improved strain in three separate colors, red, pink and white, three plants in one pot (3-in. pots) strong plants, raised in cold frames. Price: $5.00 per 100.

Solanum, or Jerusalem Cherries. We carry the best improved strain, called the Multiflorum, always laden with big berries. Price: 2½-in. pots, $4.00 per 100.

Boston and Scottii Ferns, 4-in., 20c.

Whitmani Ferns, 4 in., 25c.

Kentia Belmoreana, 5½ to 5½-in. pots, 22-25-27 in. high 50c to 75c; 4-in., 20 to 22 in. high, 35c to 40c. **Forsteriana,** 5 to 5½ in., 50c to 75c. Just received, per steamer Manitou, a consignment of larger **Kentia Forsteriana;** price, $1.00, $1.25, $2.00 to $2.50 each.

Araucaria Excelsa Glauca, spring of 1907 importation, suitable for the lawn and porches, only specimen plants left, 7-in. pots, 6 years old, 5 tiers, 25 to 30 35 to 40 in. high, same in width, $1.50, $1.75, $2.00, $2.50, $3.00 to $4.00 each.

Araucaria Excelsa Glauca, May 1908 importation, 3 tiers, 6-in. pots, $1.00 to $1.25.

Araucaria Rebusta Compacta, May 1908 importation, 3 tiers 6-in. pots, beautiful plants, $1.25 to $1.50.

Araucaria Excelsa, May 1908 importation, 3 tiers, 6, 8 and 10-in. 40c; 3 to 4 tiers, 5-in. pots, 5 tiers, 5½ to 6-in. pots, 10, 12 14 16 to 18 in. high, 50c, 60c, 75c to $1.00 each.

Bay Trees, just received, per steamer Manitou, 6 ft. high from top of tub, 30-in. crowns, $12.00 per pair.

All goods must travel at purchaser's risk only Cash with order, please.

GHENT, BELGIUM.

Bethlehem, Pa.

The first annual floral festival was held here June 10 and both in the attendance and the quality and number of exhibits was a decided success. There were over 200 entries and those in charge have every reason to be satisfied with this, their first attempt.

John E. Haines had a fine display, very attractively arranged. His name, John E. Haines, was formed on lattice work in crimson carnations, with a narrow border of sweet alyssum at the edge of each letter. Suspended from the name were three pretty baskets of red and blue asters and sweet peas. The border in the lattice work was covered with Crimson Rambler roses. The display consisted of palms and ferns for the background, large receptacles filled with the choicest and rarest carnations of every description grown by Mr. Haines, rubber plants, cannas just coming into bloom, fuchsias, maidenhair ferns, coleus, begonias and gloxinias, the latter being so arranged as to show the rich purple and red colors to perfection. Nasturtium vines in full bloom were trailed along the front edge of the display.

Jacob A. Fries had a display which was greatly admired. It consisted largely of beautiful and stately palms, for which the Fries greenhouse is noted. These formed a pleasing background. In front of the palm banks were rubber plants, variegated begonias, Norway pines and other pot plants. Very few flowering plants were shown.

GERANIUMS.

A CORDIAL INVITATION is extended to all interested in Geraniums to visit us in June, to inspect our new stock houses containing over 60,000 plants, and especially to see our new show house. In it there are over 300 varieties in full bloom, a splendid opportunity to compare the newer introductions with the old standards, and to select stock for next season. We will make very liberal special prices on all orders booked now for December delivery. We are at Cowenton on the B. & O. R. R., and at Chase on the Pennsylvania. We meet all trains.

READY FOR SHIPMENT FROM 2-IN. POTS.

Standard Sorts, at $2.00 per 100 and up. We will send 1000, 50 each of 20 varieties, our selection for $18.50; single or double, all good sorts; a splendid collection to stock up.

	Per 100
Smilax, strong plants	$2.00
Coleus, Golden Bedder and Verschaffeltii, 2-in., $2.00; 3-in	3.00
Begonia, Vernon and Gracillis, 2-in	2.00

Visitors always welcome

Newer Varieties, selected from the finest introductions of 1905-6, at $6.00 to $8.00 per 100.
Novelties, one each of 50 varieties, for $5.00. 1907 introductions from Bruant, Lemoine, Rozain-Boucharlat, Cannell, etc.

Hardy Chrysanthemums, $2.00 per 100; 500 in 20 varieties, our selection, for $9,00; 1000 in 20 varieties, our selection, for $17.50. Strong plants from 2-in. pots.

Cash with order.

HAMMOND'S SLUG SHOT

Used in water kills Worms and Caterpillars on the

Elm, Walnut and Catalpa Trees.

The Elm tree beetle is destroyed. The large gray and white caterpillar which defoliates Black walnut. This has been proved for over 25 years of constant service. We use a 5 lb. package to half barrel of water.

(Copy.) Connersville, Ind., June 10, 1908.

MR. BENJAMIN HAMMOND, Fishkill-on-Hudson, N. Y.:

Dear Sir:—I have just returned to Connersville, Ind., having spent several months, since Jan. 1st, in Alabama.

Two years of utter neglect have given the catalpa sphynx full control of the great L. & N. plantations, and I had to watch this terrible destruction from day to day, with no apparatus to apply the remedy.

Your generous supply of Slug Shot, etc., was on hand, but nothing except a small hand spray to work with. On my own place I used this hand machine, one nozzle, and hired a large force of men to hand-pick the worms. From the first the Slug Shot killed all the worms where we used it. The two barrels of Slug Shot, 600 lbs., were soon used up, and I ordered more from the purchasing agent, at Louisville, Ky.: at any rate we are using Slug Shot with most beneficial results this season. We use about 50 lbs. per day.

The leaves have come out, and from appearances no one would imagine that these trees had been entirely defoliated only a fortnight before, looking like dead sticks.

Yours truly, JOHN P. BROWN.

Shredded or Pulverized
Best and safest manure for florists and greenhouse use, absolutely pure, no waste, no danger. Write for circulars and prices.
The Pulverized Manure Co., 32 Union Stock Yards, Chicago

MACMINNVILLE, ORE.—S. H. Maris has handled more stock of all kinds and at better prices than ever before.

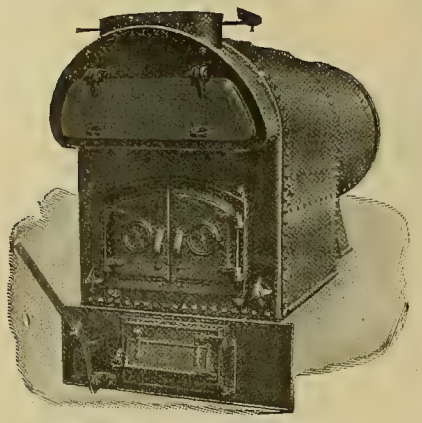
LEAD, S. D.—Alexander Rose, of the Park Greenhouses, says that Decoration day this season was a record breaker in all lines, over 100 per cent increase over last year. He says he could have sold double the amount of stock. Carnations were the favorite cut flowers, roses and Cape jasmine following. Pansies, geraniums and verbenas were the best sellers in plants.

MANSFIELD, MASS.—The greenhouses of Frank F. Shepardson were entirely destroyed by fire June 11. Loss, about $1,000.

WALTHAM, MASS.—F. A. Greenlaw has been absent from home some time and his absence is causing some uneasiness.

STEEL RETURN TUBULAR

Steam BOILERS Water



WHAT F. R. PIERSON SAYS:

JOHNSTON HEATING CO., New York City.
Gentlemen —The internally fired steel boilers which you installed last fall are giving us great satisfaction. They heat very quickly and are very economical. We are exceedingly well pleased with them and they have more than met our expectations. Very truly yours, F. R. PIERSON CO.

HEATING BOILERS.

1122 Betz Bldg.,
PHILA., PA.

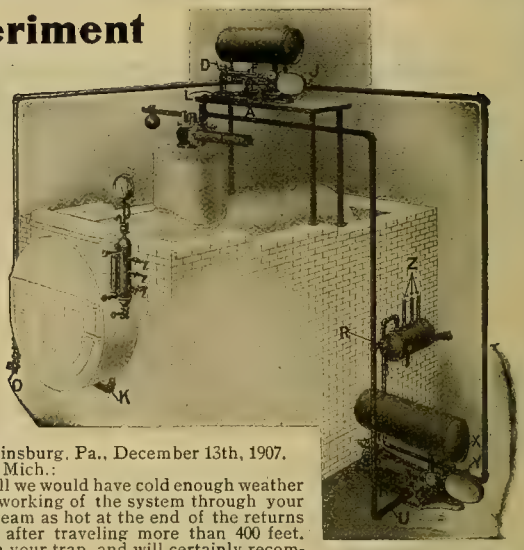
Denver.

The Decoration day trade was one of the best that we have had in the last 10 years. All of the florists had to discontinue retailing carnations over the counter about Thursday (that was two days before Decoration day), as the out-of-town orders were so heavy that it was impossible to fill two-thirds of them. Carnations were good this year; sweet peas were extra fine. Carnations brought from 75 cents to $1 per dozen, and in some cases $1.50; sweet peas, $1.50 per 100; Cape jasmines brought at least 50 cents per dozen; peonies for this spring only developed about one-third of a crop, as the buds were nipped by the frost. The growers report a great business in pot plants, especially geraniums, marguerites, petunias, etc. The floral business for June has been very good—lots of weddings, funerals and receptions. Carnations are very plentiful, although the quality is extra fine. We look forward to a good business about the first of the month.

The Morehead Return Steam Trap

Is No Experiment

Has Served The Florist Faithfully for 20 Years.



Wilkinsburg, Pa., December 13th, 1907.
MOREHEAD MFG. CO., Detroit, Mich.:
Gentlemen:—I have waited till we would have cold enough weather to have all the lines on, and the working of the system through your trap is perfect, as it carries the steam as hot at the end of the returns as it is when it leaves the boiler after traveling more than 400 feet. I am greatly pleased that I put in your trap, and will certainly recommend it to any florist who uses steam.
Very truly yours, WM. M. TURNER.

Write for Florists Booklet.

STENZEL GLASS CO.,
GREENHOUSE GLASS.
French and American "WHITE ROSE" Brand.
2 Hudson St., NEW YORK.

Worcester, Mass.

Decoration day business was very good, with plenty of material. Plants sold especially well. Made-up pans of geraniums, lobelia, etc., hydrangeas, Crimson, Pink and Baby Rambler roses and rhododendrons were very popular. Business in general is fair, several weddings helping to use up the supply.

There was a good attendance at the peony exhibition of the Worcester County Horticultural Society in Horticultural Hall, June 11, and there were some very good flowers shown. Especially interesting were the baskets by amateurs, which showed artistic arrangement and good blooms. The awards were:

Cut flowers—Allyne W. Hixon, Mrs. Percy G. Forbes, Mrs. Simon E. Fisher, James E. Draper.

Baskets, amateur—Ida J. Henderson, first; Mrs. Edward Warren, second; Mrs. A. E. Underwood, third; Mrs. Thomas Pollard, fourth.

Peonies—Dr. James P. Porter, first; A. J. Marble, second; Allyne W. Hixon, third; Mrs. A. E. Hartshorn, fourth; Walter D. Ross, fifth.

R.

TRENTON, N. J.—Stevens Bros. has incorporated with a capital of $100,000 to plant and grow flowers, etc. The incorporators are: Wm. K. Stevens, C. S. Stevens and G. W. Stevens.

Expressions From Men Who Know

Mr. J. G. Frisz, of Vincennes, Ind., writes as follows.
"Your No. 13 boiler is carrying 25,000 square feet of glass and I can keep it at 60° in the coldest weather without any trouble. I have three other types of boilers also heating a range of 25 000 square feet of glass, but the **No. 13 Kroeschell boiler only takes half the coal** and half the work to get the same results."
P. S.—Mr. J. G. Frisz, of Vincennes, Indiana, has the largest range of glass in Indiana devoted to vegetable forcing.

Damm Bros., Chicago, Ill., write:
"In 1894 we bought one of your No. 12 boilers to take the place of four smaller boilers of another make. Your boiler has done the entire work to the highest satisfaction. **Saving labor** and about **one-third of the fuel** we used to burn before. We had that boiler up to 1906, that is 12 years, having no repairs on it whatever, except one set of flues we put in in 1900. Last fall we installed one of your No. 14 boilers, having enlarged our plant. It takes care of 35,000 square feet of glass very easy. When firing we keep the ash door open only about one inch. We think your No. 14 boiler could carry 40,000 square feet of glass."

Mr. Nic Zweifel, North Milwaukee, Wis., writes:
"I have a range of 200-foot houses with a total of 27,000 square feet of glass **I can get all the pipes warm in 30 minutes** with one of your No. 13 greenhouse boilers and it is very easy firing. Can fire just as easy with screenings as with lump coal."

W. W. Allabaugh, Silverdale, Pa., writes:
"Your boiler gives entire satisfaction. You will notice the No. 4 boiler is rated to warm 10,500 square feet of glass and I have over 12,000 square feet of glass."

Theo. Diedrich, Anacostia, Washington, D. C., writes:
"No. 6 boiler carries 2 houses 20x172, and three houses 22x96; **this is 3,200 feet of glass more than its rating."**

Wm. Pinchbeck, Ridgefield, Conn., writes:
"I expect to enlarge my plant soon and when I do shall use another of your boilers. Now a few words about the boiler I bought of you in 1901. This is a **No. 1 boiler,** rated in your catalogue at 6,000 square feet. It is taking care of **7,000 square feet of glass** in carnation houses and works to perfection. No trouble whatever in cold nights; no night fireman; easy to work and easy to coal. I consider this the best boiler on the market and I have used a good many different kinds."

Jacob Phillips, Rogers Park, Chicago, Ill., writes:
"Have 20 000 square feet of glass. Can keep 60 degrees in coldest weather. Had one boiler 15 years, only expense one set of flues. Kroeschell boiler is so satisfactory that I do not care to try any other.

G. Basler, Buffalo, N. Y., writes.
Had different kinds of cast iron boilers. I am assured that I can **save about one-third fuel** with your boiler. I started firing October 10th and the fire never went out up to this time, May 12th, 1907. This boiler heats both my dwelling and greenhouses and gives the best of satisfaction. My dwelling is about 40 feet from the boiler. Can recommend your boiler to anybody. **It is the only greenhouse boiler."**

Chas. W. Unglaub, Springfied, O., writes:
"I had a cast iron sectional boiler before I got yours; would not give yours for a dozen of the others. Your boiler is the **quickest heating boiler I ever saw.** I hardly ever have the damper over half open and the draft shut most of the time. I wish I had gotten it four years ago, when I got the sectional boiler. I would be ahead now. In the four years I had to buy a new section and four heads that had cracked, and I had to be right with the cast iron boiler, and I would have to fire every twenty or thirty minutes. **It took more coal than your boiler.** The cast iron boiler took much more attention and more coal and would be leaking half the winter. I want no more cast iron sectional boilers."

THE KROESCHELL BOILER IS BUILT RIGHT FOR FUEL ECONOMY, DURABILITY, SAFETY

and is the most popular boiler made. During the season of 1906-1907 **The Kroeschell** boiler was installed to heat **4,286,000** square feet of glass. **1346 Cast Iron Boilers** were replaced by **The Kroeschell** in 1904, 1905, 1906, 1907. No other type of boiler has ever equaled such a record or made so many friends. Send for catalogue.

Kroeschell Bros. Co., 45 Erie St., Chicago.

Our Pastimes.

Announcement of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.
Address all correspondence for this department to A. F. Faulkner, 1133 Broadway, New York; Robt. Kift, 1725 Chestnut St., Philadelphia; or to the American Florist Co., Chicago.

At Chicago.

BOWLING.

The following were the scores of the local bowlers at the club's regular Tuesday evening gathering at Mussey's alleys this week:

E. F. Winterson	115	156	...	...
Geo. Asmus	170	167	166	180
C. W. McKellar	127	124	166	105
Chas. Balluff	144	125	135	192

The ladies' scores were as follows:

Mrs. Winterson	96	76	89
Mrs. Asmus	148	72	125
Mrs. McKellar	87	125	119
Mrs. Balluff	74	49	85

BASEBALL.

The Florists', W. P. Kyle's ball team, won their game Sunday from the Progressives by a score of 9 to 2. The battery for the Florists was Dillon, pitcher, and Connors, catcher. The remarkable feature of the game was the striking out by Dillon of 11 men and giving the opponents only three hits and two runs.

THE A. L. RANDALL CO.'S PICNIC.

R. Meyer, of Riverside, will entertain the A. L. Randall Co. and employes on his grounds, the Reisig grove, next Sunday.

SUNNYDALE, CALIF.—N. Krassman has about doubled the capacity of his greenhouses and is now going in for growing cut flowers as well as vegetables and plants.

Builds Bughouse.

Deputy State Horticultural Commissioner Carnes was standing on Thirteenth in Capitol park, Sacramento, Calif., watching the excavation work being done on the insectary site.

"What yu buildin' here?" asked a curious stranger, who carried with him the air of a hay field.

"A bughouse," answered Carnes.

"Think yur dum smart, don't you?" came back from Mr. Dairycow, as he moved away with his nose in the air. He ambled along, and his curiosity again got the better of him. He asked a workman, and the same answer came back. Mr. Dairycow went right up in the air and became real indignant.

Carnes' heart melted and he explained.

"Thot yu was plaguein' me," apologized Mr. Dairycow.

Louisiana Red Cypress

As described by Bassett & Washburn.

CHICAGO, Nov. 20th, 1906.

Dear Sirs:-- Replying to your favor requesting our experience with Pecky Cypress, we will say, we have been using this grade of Cypress in our greenhouses and plant benches for the last **ten or twelve years** and so far **have not found any of this wood that has all rotted out.** We formerly used Hemlock and Pine but found that 2-inch stock only lasted about four years while so far we have had no Pecky Cypress rot out in ten or twelve years. We use clear Cypress for all our roof work, ventilators, etc., and it is very satisfactory. **We think it is the only kind of lumber for the purpose.**

IT IS THE MOST DURABLE WOOD KNOWN. Ask about it at your local lumber yard or write

LOUISIANA RED CYPRESS CO. HIBERNIA BUILDING, **New Orleans, La.**

European Horticulture.

FROM THE GERMAN TRADE PAPERS.

TROPEOLUM FL. PL. DARMSTADT.—Double flowering nasturtiums continue to hold the German plantsman's undying interest in novelties of this class. And this, too, despite the well known fact, that these double forms, spontaneously appearing from time to time, bear no seeds and can only be propagated from cuttings, a process, in every instance, limiting the existence of the newly acquired variety to but a season or two. The latest introduction in novelties of this order is the variety Darmstadt, exhibited last summer at the international show held at Mannheim, and is declared to be the finest of double-flowering tropæolums, ever placed before admiring multitudes. The color of the flowers, produced in great numbers, is a shade of intense orange scarlet and their fragrance highly agreeable, while the plants, as was shown at Mannheim, may be made to serve many purposes, be used in screens and trellis effects, in vases and baskets, as a pot plant proper and as a creeper for the covering of a large space of ground in park or garden.

DAHLIAS.—The statement frequently made of late by prominent growers that the climax in the improvement of dahlias had now been reached and that any varieties finer than those evolved so far need not be looked for in the future, seems to be disproved by a survey of the novelties sent out last year or to be put forth this season. All types are represented in the imposing array of newest and but recently introduced dahlias and the end as yet is by no means in sight. The practical step, taken in the early part of this year by the German Dahlia Society in establishing trial grounds at Frankfurt with a view of thus learning the true merits of the newer varieties, deserves commendation.

AUSTRALIAN ACACIAS.—Riviera growers have hit upon acacias in their efforts to respond as far as possible to the widespread call for greater variety in their products, now forming the principal supply in cut flowers for northern Europe. Cut sprays of acacias have met with high favor everywhere and the demand for this particular item in orders from all parts has grown to unlooked for proportions. Of acacias, to be found in Australia, no fewer than 550 species exist. Of these, so far, but a small number has been subjected to test cultures in the Mediterannean coast districts, and this not without surprising success in nearly every instance.

NIGELLA DIVERSIFOLIA.—A new variety from Turkestan, forming compact little bushes 12 to 15 inches high, flowering very freely; blossoms are about an inch in diameter, light blue, with the fringed green collarette common to all the nigellas.

They Are Aluminum Finished

A heavy coat of glistening aluminum paint is given to all the interior iron parts A paint that will not crack, peel off, mildew or lose its lustre and that lasts for years. U-Bar houses are the simplest, strongest, lightest, most attractive, enduring and productive houses built, and cost less to maintain.

It Helps to Land the Winner.

He who seeketh after fame
Has to trumpet forth his name.
He that has some goods to sell
To the world the news must tell.
He that hopes to build a trade
Must not be of print afraid.
He that wants to catch the crowd
Has to call his wares aloud.
He that would new ventures float
Must induce folks to take note.
All this means, without disguise,
He who'd win must advertise.

SUGGESTIONS FOR PLANT GROWERS.

Pandanus Veitchi.

Side shoots of this useful plant root very freely now and it is seldom that there is an over abundance of it in the small and medium sizes. The newer P. Sanderi is not nearly as good a plant as the old form. The yellow tinge in the center of the plant is too suggestive of an unhealthy specimen of P. Veitchi, damping off. Older, larger specimens take on a deeper color that is more attractive, but as a small market plant P. Veitchi is decided superior. Grow the young stock on in a good light and a moderately poor compost, this bringing out the variegation better than a rich soil.

Chrysanthemums.

Constant attention is required now to keep the young stock for pot plants moving and prevent its getting starved on the one hand or too heavily potted on the other. The little plants must be stood in an open, sunny position and the shoots must be regularly pinched until a sufficient number are produced. Before they get pot bound in the small size pots shift them into 4-inch or 4½-inch, using a thin potting stick to firm the soil well between the pot and the old ball of soil. The very best of compost must be used for these plants, in order to keep the lower leaves in good condition, for if they lose these the plants cut a poor figure at flowering time. Keep them well apart and look over them regularly twice a day for water. Before repotting and when in the least potbound it is almost impossible to overwater the plants, but it is easy to do so when in the new soil.

Poinsettias.

It is necessary to do everything possible to keep poinsettias that are to be finished in pots dwarf and compact in habit, and for this reason, just as soon as they are established in their first pots, they must be stood well apart in the full sun. They soon take a good hold on the compost and need frequent watering. It does not matter where they are, provided they have ample light and air around them at all times. They will do just as well in frames outside as on the benches in the greenhouse; anywhere, in fact, as long as their needs in regard to watering the roots and maintaining a moist atmosphere around the leaves are looked after. Firm potting from the first is an aid to keeping them dwarf. The plants are not apt to be troubled much by insects, but should aphis or white fly put in appearance see that measures for their destruction are taken at once.

Forcing Roses.

While not advising keeping roses in pots all the summer generally, there is no doubt that for very early forcing it is an advantage to have some plants that have not been disturbed and can go into a moderate heat almost at once instead of—as in the case of plants lifted from the open—waiting until they are re-established. Such plants will have been cut back after flowering, are now beginning to push up long shoots and are just in the right condition for repotting. Give a good shift and place some rough bones over the drainage material. Use good sound loam and semi-decayed cow manure for compost and do not be afraid to use the potting stick, as a good growth cannot come from loose soil. Arrange the plants in a protector or bed and stand the pots on a hard bottom to prevent rooting through. Plunge the pots to the rim in ashes, soil or fiber and water and spray the growth regularly to encourage the production of long vigorous shoots.

Begonia Gloire De Lorraine.

Although the young plants do not make a very great amount of growth for another month or six weeks, they need the best of care. An important point is to watch the watering carefully, for too much moisture when the roots are not in a condition to make use of it closes the soil to the ingress of air and leads to an unhealthy condition at the root, which is soon reflected in yellow, thin textured leaves. Do not allow the little plants to remain in one position too long without giving them a new stand. The drainage holes in the pots get filled up, and, where the water used is at all inclined to breed slime, this grows over the pots and staging material, excluding air and preventing the proper drying out of the compost. When giving a new stand clean the

pots where necessary and loosen the surface soil, re-arranging the plants so that all the stronger are in one place and the weaker in another, this facilitating watering. Stock that has been shipped in from a distance out of small pots must be very carefully treated at first, and subjected to what may be termed convalescent treatment. Place them in pots a size or two larger than they were previously growing in and arrange them under a light shade, removing any leaves that may have become loose in transit and watering with extra care.

Cinerarias.

If large plants are needed an early batch of cinerarias may be sown the first week in July, but for ordinary sized plants it is best to wait another month. Cineraria seeds are not very large and require care in sowing, but given proper attention a very good percentage come through if the seed is good. Prepare flats or seed-pans carefully, with a good percentage of sand in the upper layers. Thoroughly soak every particle of soil before sowing the seed, as this prevents sinking and shifting of the soil afterwards and does away with the necessity of watering until the seed has germinated. The cineraria cannot stand heat at any stage of its existence and even the seed should be raised in a cool frame. Cover the seed with a little dry soil after sowing and use the bottom of a flower pot or a piece of smooth board to level this by gently tapping the surface. Sheets of brown paper cut to the size of the flats or pans may be placed on the top and the only attention necessary afterwards is to damp around the flats to maintain a moist atmosphere around them until the seedlings are up. The above sounds perhaps like a good deal of trouble, but a crop must be well started if it is to be a success and a good batch of cinerarias in spring is a valuable asset.

General Work.

The most important point of the plantsman's work in summer is to provide a suitable atmosphere for his plants under glass. Under a hot July sun, with the abundant air supply that must of necessity be given, the houses need constant damping to keep the air healthy and brisk. It is easy when entering a house to tell whether the proper balance of air, sun heat and moisture is present, and when it is right the plants practically need little attention beyond keeping the roots moist; they grow themselves. It is where the houses are left closed at night and until so late in the morning that the temperature begins to rise and a stuffy feeling is created that insects breed and plants lose health. The questions asked by beginners in plant culture nearly always refer to temperature, soil or watering the roots, showing that the treatment of the atmosphere, the most important of all, is quite outside their calculations. Another important point now is to see that all plants in the houses are kept in cultivation. If they are done with, throw them out; don't keep on watering plants that will never be any use. If they are potbound repot them or feed so as to keep them growing and healthy and, above all, never allow rubbish and dead plants to remain as a hiding place for insects. We have so often called attention to the absolute necessity of cleanliness that we will not further refer to it here beyond saying that without it all other cultural details are futile.

THE RETAIL TRADE

Keeping Cut Blooms of Oriental Poppies.

F. P. Dilger, the well known grower of Milwaukee, Wis., says that oriental poppies keep easily three days when cut in the morning soon after the buds open, then plunged in water to within five or six inches of the blooms and kept there over night.

Carnation and Rose Cross.

The cross depicted in the illustration is the work of W. L. Hundertmark of M. McAllister & Co., Passaic, N. J., and shows how good effects may be produced by working a few good flowers over a solid cross. In this cross white carnations were used in the ground work, the other flowers being Bride roses, interspersed with Asparagus plumosus. The ribbon was lavender.

VAUGHAN'S SEED STORE, Chicago, filled a telegraphic order recently from Alex. Graham Bell, of telephone fame, now located at Washington, D. C., for the funeral of the late Wm. H. Hubbard, of Lake Forest, Ill. It is said that Mr. Hubbard was the first person to hear the human voice over the telephone, the instrument being a very simple model which the original inventors had devised.

Good Funeral Work.

The accompanying illustration is of some fine funeral work turned out by J. F. Ammann from his new place at Alton, Ill., for the funeral of the late F. W. Grosh. The lady in the front, near the broken wheel, is Mrs. Al. Dietschy, now employed by Mr. Ammann, and a glance at the designs is sufficient to show that she is an artist in her line.

Summer Flowers in the New York Stores.

What is now generally understood in the trade as a summer flower is any variety of any family of flowers that is useful for the work of the designer and decorator, or to sell in bunches during the summer season. Doubtless the trend of thought among our originators and hybridizers, during the past 25 years, has been, for obvious reasons, more toward good winter or greenhouse flowers, but there has been some noteworthy exceptions. Some of our present-day buyers who, ever and anon, roar like the bulls of Bashan over poor stock, would do well to talk with some of the fathers in horticulture and learn what they in years gone by have had to put up with. Nothing better illustrates the great advancements in horticulture than the fact that, as a rule, really good stock is at

FLORAL CROSS BY M. McALLISTER & CO., PASSAIC, N. J.

FLOWERS FOR THE FUNERAL OF JUDGE GROSH, BY J. F. AMMANN, ALTON, ILL.

the command of the retailer every month in the year.

ORCHIDS.

Within a comparatively short time I have attended two funerals, both being of men of the great middle class. In both cases such a wealth of orchids as was there shown would have been impossible but a few years ago. The work of the orchid specialists has been so admirable that they have brought the proprietors of the metropolitan stores to look upon orchids as a staple in their trade and almost as necessary as roses, and it may be added that the cattleya occupies about the same relative position in the orchid family as does the American Beauty among roses.

ROSES.

It was long ago said, and has been frequently repeated, that American Beauty was in a class by itself and, notwithstanding the multiplication of new varieties, that saying is as true today as when first uttered. True, it is not suitable for all purposes for which some other varieties may be used, but that is more than counterbalanced by its vast superiority over all other varieties for purposes of display, and for what may be termed its body and staying qualities. It may well be placed at the head of summer flowers, for no leading metropolitan store can afford to be without it in summer, if it is to be had, and the specialists seldom permit a shortage. For a white summer rose nothing can now be seen in the New York stores that is comparable to Kaiserin Augusta Victoria. At various times there has been talk about summer roses that were just as good as Kaiserin. However that may have been, it is a certainty that just now summer is here, and so is Kaiserin with its fine qualities unimpaired; the just-as-good roses are not in evidence.

From the first time I ever saw Killarney, I have had great faith in it, and events have justified the judgment of its friends. It might be straining a point to call it an ideal summer rose, but it is the best pink of its class that we now have or are likely to see this summer. It opens quickly, but even when wide open it is not worthless, as some others are. There is no great summer demand for red roses, and those who want them must, as a rule, take Richmond or go without, and under these conditions it goes.

LILY OF THE VALLEY.

The specialists in lily of the valley forcing have brought their business to such perfection that a good supply of it is at all times available, and the designer who is after good stock no longer considers the outdoor crop. This is one of the stocks that can be effectively used for different purposes, and its continuous supply is a boon to the retail trade. The Longiflorum lilies are now always to be had throughout the summer and L. rubrum, if not particularly useful, has a place. There are many other flowers, such as gaillardia, coreopsis, delphinium, etc., that are frequently seen, but they are of minor importance.

Though sweet peas are now forced on an extensive scale they are essentially summer flowers, and now that an abundant field crop is coming, in a variety of colors, we are more and more impressed with their beauty and usefulness. Though it has been long considered a cheap and common flower, the daisy in its varieties not only holds a place in the large and small retail stores, but also seems to have a firm hold on the affections of the flower-buying public. My attention was recently called to an outdoor wedding decoration, where a walk 90 feet long was on each side roped with daisies, while thousands more were used in the altar decoration, the effect being fine. While this was an exceptional case, it goes to show that as a summer flower the daisy is still in business.

I have recently been much impressed with the value of the centaurea as a summer flower. It can be used for other purposes, but in none with better effect than funeral work, and now that the carnations are growing scarce, in the gap that intervenes between the carnations and asters it can be made useful and beautiful in combination with other larger flowers.

PEKIN, ILL.—Geo. A. Kuhl is making a fine display of gloxinias in the window of his retail store.

SUNNYSIDE, WASH.—The women of the Improvement Club have arranged for the purchase of one acre, one and a half blocks west of the main street, for a city park.

WILKESBARRE, PA.—Miss Jean Price, a clerk for A. W. B. Evans, escaped from a serious accident during the storm of June 24. Miss Price was standing in the front part of the store when the wind broke the large plate glass and scattered the pieces all around her.

THE ROSE.

FOLLOW up disbudding regularly and pinch the strongest shoots that spring from the bottom.

IF the benches are not ready for the young plants give them a shift before they get potbound.

CANADIAN QUEEN, a fine sport of the old Mme. Cusin is an excellent free flowering rose worthy of extended culture.

Notes in Season.

After planting out the young rose stock, the next thing in order is to have the plants staked and tied. A very substantial contrivance for fastening the running wires to at the end of the beds or benches can be made of 1-inch pipe. Place one at each side of bench on a line with the outside rows. These uprights should be driven firmly in the ground and fastened to the end board with galvanized clips. Before driving the uprights in the ground they should be threaded on one end and a 1x1¼-inch tee run on the threaded end; now cut a cross piece of 1-inch pipe just long enough to come fair with the outside of tees when the uprights are in position. A cut nail will wedge the 1-inch pipe in the 1¼-inch tee and the cross pipe can be quickly adjusted or removed. If kept painted, these wire supports will be neat in appearance and will last indefinitely. The uprights should be high enough to bring the cross-bar about 3½ feet above the soil. Use 5-foot galvanized wire stakes for the roses and by tying them 3½ feet from the soil the running wires will be up out of the way while cultivating or tying the plants. When tying the stakes to the wires, take two wraps of twine around one side of the stake, then bring the cord around the stake and once around the running wire and tie. This tie will prevent the stakes from sliding back and forth on the wires. If there are four rows of plants to the bed, stake, wire, and tie the two center rows first.

After the stock is planted and tied it is only a short time before there will be a crop of weeds to pull. We usually allow the weeds to get growth enough so that they can be readily removed by allowing them to grow to three or four inches. They can be cleaned out almost at one weeding, as there will be no small ones left. After weeding, the beds should be carefully cultivated, stirring the hollow places left at the base of the plants for watering first. Stir the surface evenly and pulverize any lumps that may be found on the surface, leaving this level. Some care must be exercised in doing this work as an uneven surface will make the watering uneven. Syringing twice a day is also in order, as early as possible in the morning and again early in the afternoon. Give the plants all the air possible day and night, but avoid draughts from open doorways. Keep the walks wet on bright days, but not too wet. They should be dry at night. See that there are no leaky faucets in any of the houses to form stagnant water in the walks or under the tables.

If the young stock shows any signs of green fly, choose a cool night and fumigate freely with fumigating paper. Syringe with all the force at command, as there are always some red spider lurking on some of the old foliage. It is also quite necessary to spray the old plants twice a day; also the indoor summer roses, as this encourages rapid, clean growth and helps wonderfully in keeping the buds up to a better size. Everything in and around the rose houses should be kept scrupulously clean and in no instance should the cultivating be neglected. Cultivate once a week until the surface roots appear, which will mean from now until the middle of August or beginning of September, according to the time the stocks were benched.

E.

Temperature for Roses.

ED. AMERICAN FLORIST:

About what temperature should be maintained for Enchanter and Killarney roses? L.

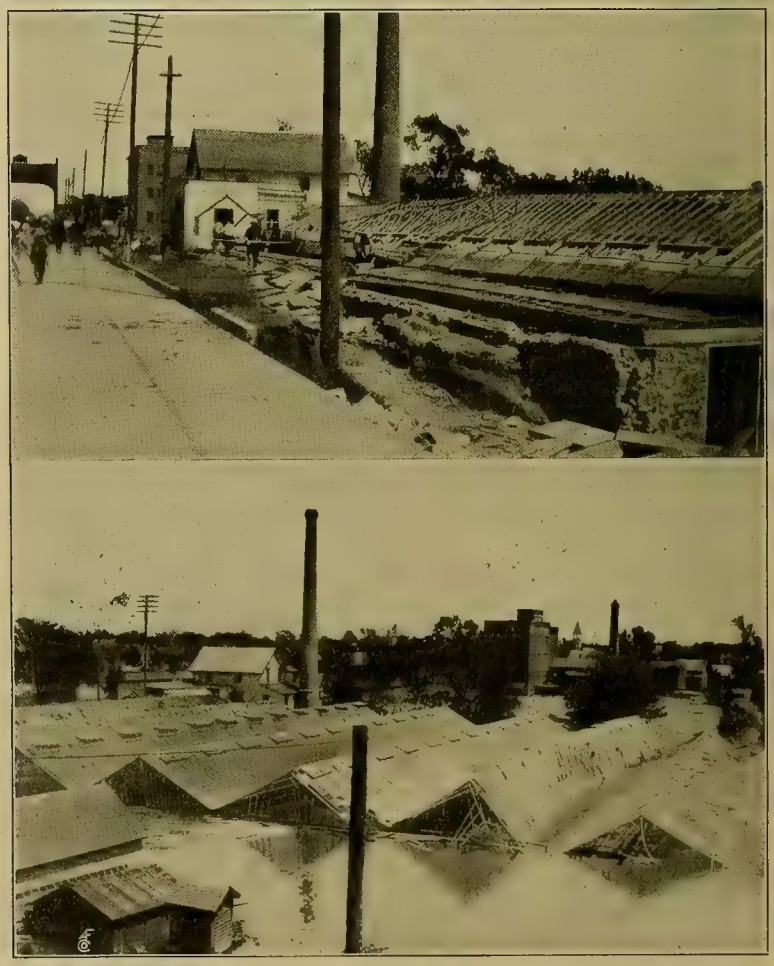
At this time of the year it is usually impossible to keep these roses too cool, but during the winter a night temperature of 58° is about right.

Storm Damage at Austin, Minn.

On June 20, Austin,, Minn., was visited by a severe wind and hail storm, which did a great deal of damage to trees and shrubbery. It also broke a great deal of glass for A. N. Kinsman. But this was as nothing compared with the flood which followed and which reached its height the following Tuesday, and which practically wiped out Mr. Kinsman's fine range of glass. Mr. Kinsman's houses are located on the west bank of the Red Cedar river, about 10 feet above the normal height of the water, and water had never been known to rise above this, but the continuous heavy rains swelled the river until it was about 24 feet above the normal stage of water and the accompanying pictures will only give a slight idea of the havoc it wrought to Mr. Kinsman's place.

The houses were all modern, two having just been completed (these are not shown on picture), and were nearly all newly planted to roses. The walls were of concrete and the gutters iron throughout, and it was considered one of the modern, well arranged ranges in this section. But it was all but wiped out; nearly everything was carried away, even the coal was carried out of the basement. Besides the destruction of the greenhouses there was the living house, which suffered considerably; also the stone sidewalk and embankment in front of the place. Some 7,000 fine carnation plants are also buried from three to eight feet under sand and mud.

Mr. Kinsman doesn't believe in giving up, though, and has a large crew of men clearing away the debris and will partially re-erect the houses as quickly as possible. It is a hard, sad blow both to Mr. and Mrs. Kinsman, as the place represents the labors of a lifetime nearly, by one of the squarest and most conscientious men in the trade today. He has the sympathy of all who know him in this great calamity. Anyone having rose plants to spare would do Mr. Kinsman a kindness by sending him a list of varieties with prices. The pictures do not show the flood at its highest stage, as it was impossible to get near enough, but they will give an idea of what it was like. O.



FLOODS AT AUSTIN, MINN.

Robert Craig, John N. May, Edwin Lonsdale, John Burton and W. J. Stewart are S. A. F. Ex-Presidents.

THE ALLIED TRADES

Greenhouse Construction for Carnations.

By Philip L. McKee, of the John C. Moninger Co., Chicago.

It is of the utmost importance that every greenhouse be built so that the plants will get an abundance of light. Light is the first consideration in every case and too much emphasis cannot be laid on this point: Be absolutely sure before building that a nice, light house will result and there will be no trouble in growing high class stock.

Probably nothing is so important, next to the amount of light, as the durability of materials used in constructing the house. There is absolutely no sense in building greenhouses that cost half of the profits to keep in repair. Get good, durable materials when building, but at the same time do not put all the money into one small house. In other words, do not put up houses that are so expensive that 10 years' profits will not pay for them.

With these two important questions settled, the next thing that confronts everybody is the cost of the materials needed for the house. Some of the unwise fellows believe in getting any old thing from a planing mill; pine, hemlock or whatever they can get for the least money. They build houses any style and some of them have fine results with the first year's crop but it is poor business at the end of five years when the houses must be rebuilt or torn down. The five years' profits are gone and nothing to show for it. The fellow who goes at the thing this way is a failure in the florist business before he starts and, if by good luck he does hold out, he makes but a very small profit and works hard to get it. This is the man who wants to "build cheap." The man who goes to the other extreme is just about as foolish for, although he grows good stock and makes good money, the interest on his investment eats up all he makes.

THE CYPRESS GREENHOUSE.

The florist with a keen sense for business will think carefully before building his greenhouse and put up structures that are not too cheap or too expensive. There is always a happy medium and we believe that in greenhouse construction this medium is the cypress house. Be it understood here, however, that we are talking to the commercial florist or the florist who is growing plants and flowers for the money there is in it and not for pleasure. It is unnecessary in this article to go into details regarding the advantages of the cypress greenhouse but here are two things to think over: If by using any old lumber, second hand or what not, a house is built that will last eight years for $600, thereby saving $200 on the cost of a house that would last 25-30 years; how much is saved in the end? These houses would be torn down and rebuilt three times at a cost of $1,800, and the grower would be out $1,000, to say nothing of the difference in the profits, the time, the worry, and the hard work. On the other hand if this up-to-date cypress house can be bought for $800, or two of them for $1,600, why put up just one house of a more expensive construction that at the outside will last only about 10 years longer than the cypress house?

As before stated, the first thing is plenty of light, the next, durability of materials and then, the cost of the house. To help solve these very important questions we have asked some of the best known carnation growers to give us their idea of how a house should be built to grow the best carnations. We have also asked for opinions on houses for other purposes but this will be left for another time. A sheet of questions covering every feature of importance was sent to each of these growers and when these sheets were returned they were carefully gone over and compared with one another. Wherever opinions differed we supplied the correct data and the following is the carnation house in outline. In our opinion the houses should be built along the lines of the up-to-date cypress construction or the semi-iron construction.

STYLE OF GREENHOUSES.

Houses should be built connected.

Width of each house to be 27 feet using 14-foot bars on the south and 16-foot bars on the north. This makes the house uneven span and eliminates a great amount of shade.

Width of house, if even span, 28 feet.

Length of house if steam heat is used, 150 to 500 feet; if hot water is used, 75 to 100 feet.

The length of house should run east and west if uneven span using 16 and 14-foot bars.

If length is run north and south the house should be even span.

The walls should be seven feet high. (Not less than six or more than eight feet.)

About one-half of each outside wall should be arranged with movable sash to get side ventilation; the amount of sash depends on size of glass used and the height of benches.

Roof ventilation to be arranged so that one row of glass runs to the ridge between each sash.

Depth of sash to be three feet down the roof.

Sash are to open at the ridge and hinge to the header.

Sash are to be placed on both sides of the ridge.

Raised benches to be used and to be five feet wide.

VARIOUS GROWERS' OPINIONS.

Two of the growers stated that they had no objection to detached houses provided one had plenty of land to build on. These houses should be about 40 feet wide with space enough between each house to prevent one shading the other.

Only one grower mentioned the solid bed and stated that it should be well drained if used.

Everyone agreed on steam heat, with two exceptions, on account of quick circulation and being able to heat or cool quickly.

Nearly all of the growers agreed on the width, the side ventilation, roof ventilation, height of walls and width of benches.

It is our opinion that a house built along the lines mentioned will give the very best results for carnations. Many of the largest growers have houses built on this plan and they are having great success with their stock in every way. Of course, in many cases there are special conditions to be met and it is possible that some of the features may need to be altered one way or another to meet these conditions, but in the main we think this plan will answer for most florists. We haven't the space here to go into details regarding the merits of this house but depend on it such a house will give plenty of ventilation, the greatest amount of light and, if careful to get durable, up-to-date materials, there will be no trouble with the growing end. Many florists argue that a good grower can grow good stock in almost any kind of a greenhouse but this is not true.

A GOOD JUNE ADVERTISEMENT.

New Patent Pipe Joint Clamp.

We have received from Henry Stuttle, Batavia, Ill., samples of his newly patented pipe joint clamps, which will meet a want often felt by steam and hot water engineers. The illustrations give a good general idea of the new device, which has been tested and is highly thought of by many experienced engineers. The invention, as described in the specification provided for letters patent, is an improved method of clamping the meeting ends of pipe sections, providing a simple, convenient and efficient device that may be easily and quickly connected in position and removed with equal facility. The clamp consists of semi-circular companion members which, when joined by the bolts through the lugs, form a tight joint. The clamps are fitted with a lip and a corresponding recess, each recess being fitted with walls to prevent lateral movement or displacement of either member. An annular raised rib covers the joint closely and when the device is used with molten metal this rib prevents the metal from flowing into either pipe.

The joint is so arranged as to extend sufficiently to allow of expansion and contraction, while the raised rim edge forms a chamber for whatever packing material is used and allows of the use of rubber, cement, or other substance suitable for the purpose of jointing steam, water or gas pipes. Apertures are left in one of the semi-circular clamps to allow of molten metal being poured in if this is to be used. In short, the inventor, who is a practical engineer of many years' standing, appears to have studied out each point with great care and provided for all emergencies, while his clamp will not only save time but also money to the users. It is especially adapted for joining old boiler tubes now so largely used in hot water heating of greenhouses; also for utilizing old cast iron pipe, which otherwise would be consigned to the junk pile. This is one of the inventions that have a use; such a device is needed on every job tackled by engineers and we venture to predict for it a ready sale.

PICNIC OF THE PITTSBURG FLORISTS' AND GARDENERS' CLUB, JUNE 25.

1—One of the conveyances from the depot. 2—James Lasky, Julius Ludwig and P. J. Demas. 3—The lamb roast—E. C. Ludwig and wife in center. 4—Geo. and Mrs. Polites, two visitors, E. C. Ludwig and wife, Mrs. Demas, Mrs. Fuchs and P. J. Demas.

The Fertilizer Problem.

These days when so much is written and said about fertilizers it is hard to get a clear view of the subject unless one can sift the matter down to suit his own case. At this time I wish to point out the necessity for doing this. There are several classes of producers using fertilizers and each has peculiar needs. We have the farmer, the trucker, the fruit grower, the florist, the vegetable forcer. The farmer has to consider first cost very much, then maximum results, and time the least. The florist does not need to bother about first cost, but the effect upon the quality of his goods and upon the health of his plants is of great importance. The vegetable forcer need not consider first cost, nor the effect upon the constitution of his plants. With him maximum results and speed is everything. A few days gained means an enormous advantage sometimes, and the plants being cut down and used up at once, hard forcing can be resorted to.

Again, different parts of the country have different sources of supply. In the south, cotton seed meal is used to supply nitrogen. In the west, sheep manure is often available. In the east, near the sea board, imported elements, such as sulphate of potash, nitrate of soda and guano, are cheaper than inland. Yet often it would pay to ignore freight charges and get what produces the goods. Florists have learned to depend heavily upon cow manure, sheep manure and bone meal. Yet at times these are too slow for the vegetable forcer. The formula that has given us the best results so far in this line is a base of Peruvian guano, with additions of nitrate of soda and sulphate of potash, making about 12 per cent potash, 10 per cent of phosphate, and 6 per cent nitrogen. This in addition to manure, and at the rate of about one-half ton per acre, will make things jump.

MARKETMAN.

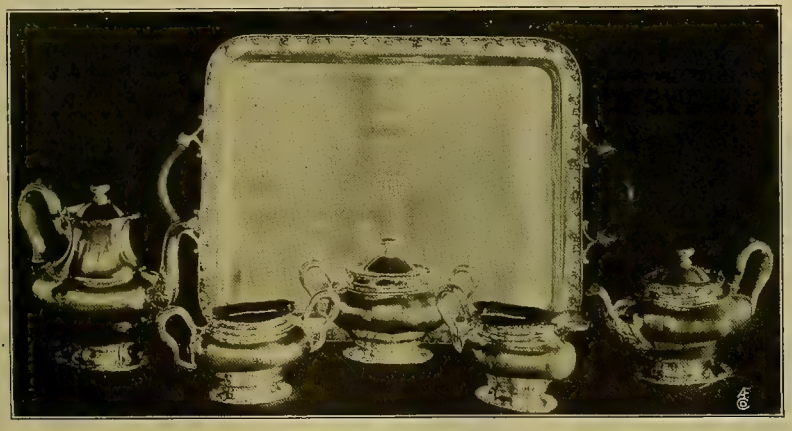
Albert T. Hey.

Wilson Presentation.

The employes of Vaughan's Greenhouses, Western Springs, Ill., surprised the retiring superintendent of the establishment, James S. Wilson, June 24, by presenting him with a beautiful silver service of six pieces, each piece bearing his monogram, as a farewell gift. Mr. Wilson severs his connection with Vaughan's Greenhouses July 1 and goes to Des Moines, Ia., to take charge of his own greenhouse business at that place. A handsome address in green and gold accompanied the silver set bearing the names of Mr. Wilson's 68 co-workers, not a few of them trusted employes of many years' standing.

Mr. Wilson was very perceptibly affected when he thanked the employes for this token of their good will and esteem and he urged them to extend their aid to his successor, Albert T. Hey, in full measure.

EMPLOYES OF VAUGHAN'S GREENHOUSES, WESTERN SPRINGS, ILL.



SILVER SERVICE PRESENTED TO JAMES S. WILSON.

James S. Wilson.

Thrips on Carnations.

ED. AMERICAN FLORIST:—

Oblige me by giving some information through your valuable paper regarding the disease on the enclosed carnation petals. The plants get plenty of air and water, and I syringe them on every bright day. Do I syringe them too heavily overhead? Any information will be welcome.

J. S.

The white marks on the petals look like the work of thrips, though no insects were present. The burnt appearance of the tops of the petals is probably from syringing or spraying the plants under a bright sun or owing to their not having got rid of the night moisture before the sun was shining brightly upon them. Dry up the atmosphere before nightfall to prevent any further injury from the latter, and do not spray when the sun is very bright; just damp around the plants. For the thrips spray with nicoticide according to directions and fumigate regularly twice a week until they are got rid of. You will have, of course, to consider whether at this late date your benches of carnations are worth taking the trouble with or whether they cannot be spared and thrown out to make room for a more profitable crop.

G.

Friedley Goes to Gasser's.

Frank A. Friedley, for the past two and one-half years foreman of the establishment of Miss Bell Miller, Springfield, Ill., has been appointed superintendent of the extensive greenhouse establishment of the J. M. Gasser Co., Rocky River, O. Mr. Friedley's numerous friends in the trade wish him every success in this new and arduous undertaking, the place being much more comprehensive than any he has been engaged at heretofore in managerial capacity, producing a great variety of stock for shipping as well as for the retail store in Cleveland.

Mr. Friedley is a native of New Albany, Ind., and started his greenhouse career under E. G. Hill, of Richmond, Ind., in March, 1897, remaining at that well known establishment five years. Later he was engaged with the Miami Floral Co., Dayton, O., Frank Huntsman and Wm. Murphy, Cincinnati, O., and the Chicago Carnation Co., Joliet, Ill. He was three years with the late James Hartshorne at the latter place and had charge of an important section of the carnations there for a considerable time.

Mr. Friedley is now visiting his sister, Mrs. A. C. Padgitt, Littleton, Colo., on a brief vacation.

Ground Limestone for Acid Soils.

This subject is discussed in Circular 110 issued by the University of Illinois Experiment Station. A great deal of the soil in Illinois is sour or acid and deficient in lime, especially the level prairie, as distinct from the rolling timber lands. As humus or organic matter decays in the soil acids are given off; carbonic acid is given off by plant roots and also brought into the soil by means of rain. Again, nitric acid is formed by bacteria and thus all soils with growing plants upon them tend to become acid. Where limestone exists in large quantities in the soil the acidity is destroyed as it develops, but no Illinois soils are rich in limestone and the application of this material is likely to prove of advantage more and more as time goes on.

KINDS OF LIME.

There are two distinct kinds of lime—freshly burned, or caustic, and natural, as limestone, marble and shell marl. None are fertilizers, but all act beneficially on such soils as are indicated above. Their province is to correct acidity in the soil and to aid in its decomposition. The former is necessary on soils that are to be used for leguminous crops generally, which will not thrive on acid soils. Decomposition of soil is equally important and tends to the liberation of elements necessary as plant food, as potassium and phosphorus, held in inorganic form. This effect is produced by fresh burned or fresh slacked lime, and this treatment seems especially commendable for peaty and swamp soils, rich in organic matter. It is wrong to apply freshly slacked lime to soils deficient in organic matter, as it would exhaust its already meager supply of these elements, though at first the immediate effect would be quite opposite. Gypsum or land plaster has a similar effect on the mineral elements, but not on the organic matter, as the caustic or fresh lime.

The author of this circular says that ground limestone is the best and most economical form of lime to use wherever it can be easily obtained. If caustic lime is used especial care must be taken to maintain the humus or organic matter in the soil, as it acts as a soil stimulant or soil destroyer by decomposing its mineral constituents and destroying the organic matter, thus producing an increase in the first few crops, but ultimately leaving the soil in a more impoverished state than before the lime was applied. Lime is not a fertilizer, but an active agent in forcing the soil to give up its plant food rapidly.

PENNSYLVANIA EXPERIMENTS.

Extended experiments and investigations have been carried on by the Pennsylvania Experiment Station. Four plots

Frank A. Friedley.

were treated with fresh slacked lime at the rate of two tons per acre once in four years. Four others were treated with two tons of ground limestone once in two years. A four year rotation crop was practiced, each crop being grown once on each plot. Twenty years' trials have shown that the plots treated with limestone have shown a greater total yield than those given burned lime. With

J. A. Peterson.

President Cincinnati Florist's Society.

every product whose total yield had been greater in the last than in the first years of the trials the limestone again had the advantage, thus showing that fresh burned lime tends to exhaust the fertility of the soil more than limestone. Analyses of the soils showed the nitrogen content of the four plots treated with limestone to be considerably higher than that of the soils treated with burned lime, while the humus content was still more in favor of the limestone, a difference, in fact, that would be represented by about 37.6 tons of fresh farm manure to the acre.

MARYLAND EXPERIMENTS.

The experiments at the Maryland Experiment Station cover a period of 11 years, 1,400 pounds of burned lime and equivalent amounts of ground oyster shells and shell marl having been applied per acre at the beginning. In commenting on the results of these tests Director Patterson, of the above station, says: "It will be noted that the carbonate of lime (i.e. the shell marl, etc.) gave decidedly better results than the caustic lime" (burned lime). Incidentally we may mention that a plot treated with soft coal ashes gave practically nothing more than soils untreated and, under a hay crop, less.

ILLINOIS EXPERIMENTS.

As an average of 50 tests during the last three years the value of the increase produced by lime or ground limestone has been $2.69 per acre per year, when counting cereals and hay at a comparatively low value. The yield both of corn and wheat grown in rotation with leguminous plants on limed and unlimed land by applying limestone, and the quality, both of grain and hay, has also been increased. The soil may be tested for acidity by placing blue litmus paper between soil layers and removing and drying after 20 minutes. The paper will turn pink or red if the soil is acid. The tests should be made in different parts of the plot. One ton of limestone to the acre is sufficient to destroy the acidity usually contained in the plowed soil if the limestone is thoroughly ground, but as a rule it is cheaper to apply more limestone and allow the mixing to go on more slowly by the necessary processes of harrowing, plowing, etc., in the regular farm operations.

TIME TO APPLY.

No definite time need be given to apply limestone; in fact, it may be said that any time is good when the condition of weather, roads and land are right, and the time can be spared, summer or early fall being probably the most convenient. The limestone should be hauled direct from the car to the field, a pile of 100 pounds every 33 feet, making two tons to the acre. Although these experiments refer to farm crops, they are just as applicable to the crops grown by the florist or gardener. Not to repeat any of the above, we can advise all to study it as it applies to their own cases, and also to send for the circular, which devotes more space to the subject than we can. This question of soils is becoming increasingly important and very valuable hints may be obtained by those who will take the trouble to alter the conditions to suit their individual circumstances.

Flower Gardens on a Liner.

The "Rotterdam," the newest vessel of the Holland-America Line, left Southampton, Eng., recently for Rotterdam, previous to making her maiden voyage to New York. She is the heaviest vessel afloat, her gross tonnage being 25,000, and she has accommodation for 3,535 passengers, while the crew consists of 475 men. Many striking features have been introduced, the most novel of which is the palm court. Here, says the Daily Chronicle, flower beds, palms and ferns abound, and the center of the court is surmounted by a majestic dome of stained glass. The number of bath rooms in the first-cabin section alone exceeds 100, while the two spacious dining rooms for the third-class passengers comprise 6,230 square feet of floor space, enabling 581 persons to be seated at the same time.

To Be Done Now.

IN THE GREENHOUSES.

Feed the old beds of Asparagus Sprengeri liberally and keep the seeds picked off.

Pot up the rubber plants from mossed specimens as soon as the roots show through the moss.

Pot the young poinsettias firmly and when established give less heat.

Feed calanthes as soon as the roots have taken a good hold of the soil in the pots.

Keep the flowers constantly picked out of bouvardias, Gloire de Lorraine and other winter flowering begonias.

Stake or tie young grafted roses directly they are planted or many will be snapped out when spraying.

Thin the shoots when necessary on cut back gardenias and remove flowers as they form to get a good growth in the plants.

If extra early mignonette is wanted sow seed in small pots in a cool house.

Keep the old flowers cleaned off the rose benches and follow up the disbudding regularly twice a week.

IN THE STORE.

Yellow California poppies and cornflowers arranged with suitable foliage make a beautiful table decoration.

The trailing shoots of Boston ivy are fine for mixing with cut flowers.

Plenty of green is necessary with all kinds of decorations now.

It is folly buying the cheapest, thin petalled, loose roses as they never give satisfaction.

Good Ficus pandurata is cool looking and very suitable for window decoration in hot weather.

Natural scenery well carried out in the windows is very attractive but it must be well done.

OUTDOORS.

Keep after the weeds everywhere and on all possible occasions.

Allow a few shoots on budded standards to develop a little foliage. These act as stem thickeners.

If the field carnations have been well looked after they will not need much more pinching now.

Manure water will be of great assistance now to asters if the soil is well moistened before applying it.

Any manure that cannot be spread should be very firmly packed and, if possible, mixed with soil to prevent heating.

Keep the runners regularly pinched off the young violets and spray when possible.

Avoid injury to the vines when gathering the flowers of sweet peas.

The shrubby spireas may be somewhat heavily pruned after the flowers are over.

Note any Lilium candidum that may be diseased and mark the clumps for lifting and drying later.

Remove all superfluous and stock shoots on recently grafted trees.

Calceolarias.

Herbaceous calceolarias, when well grown, make a brave display during April and May if the seed is sown during the month of July of the year previous, says a correspondent of the Gardeners' Magazine. The earlier the better, as then one may expect good specimen plants at the period indicated above. Pans are the best in which to sow the seed, and let them be clean and well drained. Over the drainage place a thin layer of half-decayed leaf-soil or moss, and then on this put about two inches of the coarse loam and leaf-soil that will not pass through a quarter-inch mesh sieve in preparing the soil for the seed to be sown on. The mixture should consist of equal parts loam and leaf-soil, with a moderate amount of silver or clean river sand. Fill to within half an inch of the top, pressing well the soil, which must be made quite level on the surface. If at all dry it should be watered through a fine rose a few hours previous to sowing the seed. This requires but scant covering, a mere sprinkling of sand sufficing.

Place the seed pans under a north wall, covering the pans with a piece of slate or glass; in the latter case a layer of moss should be put on the top. In a week or 10 days germination will have taken place; when the seedlings make their appearance, light and ventilation must be given, but the tiny seedlings must not be exposed to the rays of the sun or they will quickly succumb. See that the surface does not become dry, and guard against slugs by frequent dusting with lime, or place the pans on an inverted pot standing in a pan or saucer of water. As soon as large enough to handle prick out the seedlings into shallow boxes filled with a similar mixture to that advised above, though it may be a bit rougher, allowing a distance of three inches from plant to plant, giving abundance of air after a few days, and regularly shading from the sun.

Ferns Preserve Food.

Consul-General Richard Guenther, of Frankfort, advises that a newspaper of that German city states that ferns, which grow almost everywhere, form an excellent preservative for packing articles of food, fruit, etc. A summary of the article follows:

People who have lived in England know that the English have used it successfully for many years. Valuable fruit, fresh butter, etc., are no longer seen in English markets packed in grapevine leaves, but almost always in fresh fern leaves, which keep the articles excellently. This is done where grapevine leaves are to be had in abundance. Everyone posted well in botany knows the high preservative power of fern leaves with reference to vegetable and animal substances.

On the Isle of Man fresh herrings are packed in ferns and arrive on the market in as fresh a condition as when they were shipped. Potatoes packed in ferns keep many months longer than others packed only in straw. Experiments made with both straw and fern leaves in the same cellar showed surprising results in favor of ferns. While the potatoes packed in straw mostly showed signs of rotting in the spring, those in ferns were as fresh as if they had just been dug. Fresh meat is also well preserved by fern leaves. It would seem as if the highly preservative qualities of fern leaves are due to their high percentage of salt. No larvæ, maggots, etc., approach ferns, as the strong odor keeps them away.—Consular Trade Reports.

Soil Fatigue Caused by Fodder Plants.

The continued cultivation of such fodder plants as clover and lucerne on the same land is accompanied by a progressive decrease in the crop. This phenomenon, says the Scientific American, has been called "soil fatigue," and various explanations of it have been given. The recent experiments of Pouget and Chouchak prove that soil fatigue is not caused by the exhaustion of the supply of plant food alone, but that clover and lucerne, like hops, excrete poisonous substances which accumulate in the soil and finally arrest the growth of the crop. Rich soil that had never borne a crop of lucerne produced a crop smaller than the normal on the addition of the dried aqueous extract of the soil of a lucerne field, but no such decrease in crop was observed when the extract was roasted before it was mixed with the soil. On the other hand, the application of an extract of soil that had never borne lucerne and had been abandoned to spontaneous vegetation for two years caused an increase in the crop of lucerne. These results indicate that lucerne excretes substances which are detrimental to its own growth. The action of these substances is analogous to that of toxins. Alcoholic extracts of the soil of a lucerne field exerted no injurious effect upon the growth of lucerne and soil that had been sterilized by heat yielded larger crops than unsterilized soil.

OBITUARY.

David Gindra.

David Gindra of Poughkeepsie, N. Y., known as the dean of the Dutchess County Horticultural Society died at his home on Delafield street June 19. He was the father of Conrad Gindra who is well known in Poughkeepsie in the trade and who recently purchased the Fricker greenhouses on Main street. Mr. Gindra had been in failing health for some time and growing feebler daily, finally passed away at the age of 75 years. He lived on the Bech estate for 45 years. As a horticulturist his ability was widely recognized.

Carl Anderson.

Carl Anderson, of Marion, Ind., head gardener at the Mountain Branch soldiers' home, died June 12. Mr. Anderson was a native of Denmark, coming to this country about 12 years ago, after serving some time in England. After working some time in Chicago and other towns, he had charge of the laying out of the Mountain Branch, planting the shrubbery and flowers and looking after the greenhouses. He did excellent work here and his many friends in Seattle,, Wash., Chicago and other parts of the United States, will be grieved to hear of his death, which followed an operation for appendicitis. Mr. Anderson leaves a widow.

Marcus Ellis.

Marcus Ellis, the well known senior partner in Ellis Bros. Co., 203 Winchester street, Keene, N. H., died at his home of heart trouble, June 20, at the age of 62 years. Mr. Ellis was born in Royalton, Vt., September 1, 1845, and when 19 years of age came to Keene, where he afterwards lived. He entered the iron foundry of his half brother, the late Moses Ellis, of Keene, where he learned the trade, and went into partnership with his brother, remaining there until 1880, when he left that business to take charge of the greenhouses which he had established with his brother, Albert, in 1874, the firm being Ellis Bros., florists and seedsmen. Over four years ago Mr. Ellis suffered a shock of paralysis which left him in a much enfeebled physical condition, and later he took into partnership Frank Chapman and formed the Ellis Bros. Co., which still continues. Besides his widow, Mr. Ellis leaves four children.

Wm. B. Leeds.

Wm. B. Leeds, known as the tin plate king, and once prominently identified with the Rock Island R. R., died in Paris two weeks ago. His first commercial venture, we believe, was in the floral business. His father, Noah M. Leeds, bought out the interest of A. K. Williams in the old Cascade Nursery, Richmond, Ind., hoping to interest his sons in the business for which he himself had a very strong liking. Under Wm. B. Leeds' management, with E. G. Hill as foreman, he worked up a very large catalogue trade. Mr. Hill remained with him for only three years and two years later Mr. Leeds filed a petition in bankruptcy which ended his career as a florist. His older son, R. G. Leeds, is living in Richmond and editing the oldest daily in the city, the Palladium. He is a fine young fellow with political aspirations and an ardent enthusiasm in the newspaper business. His friends in Richmond all hope to see him inherit an equitable portion of his father's large estate, which is currently reported to amount to $35,000,000.

THE AMERICAN FLORIST

1885 TWENTY-THIRD YEAR. 1908

CONSIDERABLE losses of field carnations are reported from various Massachusetts points.

THE official flower of the Alaska-Yukon-Pacific exposition has been definitely selected. It is the cactus dahlia, a flower which grows profusely around Puget Sound.

SPRAY underneath the foliage.

SOON it will be time to think of coal contracts.

GROWERS of Christmas plants will have to get busy now.

CONSIDER the question of concrete benches in the new houses.

THERE are many tributes to the worth of the late Wm. Scott, of Buffalo, N. Y., in the English papers.

A BRITISH exhibitor of pansies has been getting good results by showing them with sprays of hawthorn (Cratægus Oxyacantha).

THE merits of the single peony, both as a cut flower and a handsome plant on the lawn, are not sufficiently appreciated by florists.

SPOT cash for wire designs and other requisites during a dull time like the present often tempts manufacturers and their agents.

IF the supply of smilax was short last Christmas the present is a good time to plant more benches to prevent it from occurring again.

MONTANOA BIPINNATIFIDA, recently figured in The Garden, is a promising looking winter flowering plant with white, single, composite flowers.

THE reports of damage from wind and hail from so many points again this week make very unpleasant reading but they should serve to remind the owners of greenhouses of the absolute necessity of covering probable losses as far as possible by hail and other insurance.

THOSE who feed heavily carnations and other plants grown in the field for transplanting to greenhouse benches in fall, all through the growing season, seem to lose sight of the fact that moderate sized, well consolidated plants are much better than large, bloated and overfed ones.

A LITTLE consideration for employes working under glass at this time of year should be shown, and it pays, anyway. As long as the requisite watering and spraying is kept going, disbudding and other detail work can be done mornings and evenings and in the middle of the day, when the heat is most intense, the help can usually be found a job either in the potting shed or outside, and this will be appreciated.

Brooklyn Retail Florists' Association.

At the last meeting of the Brooklyn Retail Florists' Association we had over 35 new members, which brings our membership up to over 100. The first reading of the constitution and by-laws were read and partly approved. The next regular meeting will be held at the Imperial rooms, Brooklyn, N. Y., July 13.

WM. A. PHILLIPS, Secy.

For Greenhouse Builders.

The trustees of the Massachusetts Agricultural College invite proposals for furnishing material and erecting complete a range of greenhouses on the college grounds at Amherst. Bids should be accompanied by a certified check for $500, this check to be payable to the treasurer of the Massachusetts Agricultural College; the check to be forfeited if the bidder accepted fails to sign and enter into a contract within 10 days of the acceptance of his estimate. The proposal should be enclosed in an envelope marked "Proposal for Greenhouse Range," and delivered at the office of Fred C. Kenney, Treasurer, Massachusetts Agricultural College, Amherst, Mass., not later than 12 noon, Monday, July 13, 1908. The right is reserved to reject any and all bids. Plans may be seen on and after Monday, June 29, at the office of the treasurer, Amherst, Mass., or will be furnished by mail on application to him.

Death of James Cole, Sr.

As we go to press we regret to learn of the death, June 30, of James Cole, Sr., a pioneer florist of Peoria, Ill., surrounded by his children. Mr. Cole was one of the oldest florists in Peoria, having settled there in 1863. He was born at Buckfastleigh, Devonshire, Eng., in 1821, and acquired there his first knowledge of horticulture. Leaving England in 1857, he came to Toronto and four years later removed to Chicago. When the civil war was nearing its end he with his family moved to Peoria, where they have resided ever since. Mr. and Mrs. Cole celebrated their golden wedding a few years ago. Mrs. Cole died in 1892 and Mr. Cole is survived by two children, and one grandchild, James, Jr., and Nelson, a daughter having died 12 years ago, and Joseph N. Funeral services will be held at 2 p. m., Friday, July 3, at his late residence, 1602 North Perry avenue.

Meetings Next Week.

Butte, Mont., July 10.—Montana Florists, Columbia gardens.

Chicago. July 8.—Gardeners' and Florists' Union No. 10615, 10-12 Clark street.

Cincinnati, O., July 11, 8 p. m.—Cincinnati Florists' Society, Jabez Elliott flower market.

Our Pastimes.

Announcement of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to A. F. Faulkner, 1133 Broadway, New York; Robt. Kift, 1725 Chestnut St., Philadelphia; or to the American Florist Co., Chicago.

At Chicago.

BOWLING.

The regular Tuesday evening bowling matches were played off this week in Powers & O'Brien's alleys, 170 E. Madison street. The scores were as follows:

Asmus	91	136	151	148
Balluff	146	160	167	186
McKellar	148	141	144	138

The ladies scored as follows:

Mrs. McKellar	116	121	111	91
Mrs. Asmus	122	111	119	105
Mrs. Hauswirth	92	128	139	110
Mrs. Balluff	99	81	68	—

After the regular game Mrs. Hauswirth and Mrs. McKellar bowled a match game: Mrs. Hauswirth, 179; Mrs. McKellar, 103.

A. L. RANDALL'S EMPLOYES AT RIVERSIDE.

The employes of the A. L. Randall Co. on Sunday last were entertained by R. Meyer, a grower for that firm, at the Reisig grove at Riverside. About 30 employes left the city at 10:30 a. m. over the interurban electric road, and all pronounced the affair a most enjoyable one. A ball game and other sports filled in the afternoon hours. Mr. Meyer served both dinner and supper to his guests, and is was not until late in the evening that the merry party returned to their various homes.

BASEBALL.

W. P. Kyle's Florists failed to follow up their victory of the week previous in their game last Sunday with the West Side B's, losing this week by a score of 13 to 5.

At New York.

The outing of the New York and New Jersey Association of Plant Growers, was held at Huguenot park, Staten Island on June 25, being attended mainly by members of the association and their families. There was a good dinner, bowling contests for both men and women and other amusements. Noteworthy among those present were the representatives of two of the leading Barclay street seed houses. It has sometimes been feared that the multiplication of societies would cause enstrangement among the various branches of the trade but the harmony now prevailing is good to see.

Next comes the outing of the New York Florists' Club, July 1, and the indications are that it will be a most enjoyable affair, providing Jupiter Pluvius favors it.

The Greek-American Florists' Association's outing is planned for July and the foregoing comments may also be applied to it.

Springfield, O.

"We had a great time," said Chas. Schmidt of Schmidt & Botley's greenhouses, on the night of June 20 upon the return from Eicholtz park, where the annual outing of the proprietors and employes of the Schmidt & Botley's and the George Mellen Co.'s establishments was held.

There were about 38 in the party, They made the trip to and from the park on the Springfield, Troy & Piqua interurban line, returning to the city about 9 o'clock in the evening. The florists went prepared to have fun and they certainly had it. There was plenty to eat and a varied athletic programme to suit all tastes. The ball game was one of the features. The score was so large that no one could remember just what it was.

Pittsburg.

The picnic of the Gardeners and Florists' Club was held June 25 at Bakerstown. There was a nice turn out and everyone seemed to enjoy themselves very much. The usual programme of sports was very much missed by the younger element. The feature of the outing was a lamb roast by P. J. Demas, who personally took charge of same. It was so well done that those who came around late did not get a chance to taste it.

ST. LOUIS, MO.—Pitchers, catchers and others are now practicing for the great game, July 15, between wholesalers and retailers. Umpires are to be put under bonds to secure a square deal and to show no favoritism; this game will be for blood.—W. F.

H. R. AKERS, Chatsworth, N. J.

WORCESTER, MASS.—Roses and strawberries were well shown June 25 at the weekly exhibition of the Worcester County Horticultural Society in Horticultural Hall. Handsome roses were shown by W. A. Baisley, of Uxbridge, who also had beautiful showings of sweet williams and foxgloves. Mrs. E. A. Underwood displayed sweet williams and campanulas, while E. W. Breed had a fine collection of sweet williams. Roses were also exhibited by Addison Bemis.

Summer Roses

Am. Beauties, Kaiserin, Carnot, Killarney, Richmond and Perle.

All grown in solid benches, with roots down deep in cool soil. These plants are from three to six years old. They produce by far the best flowers in summer.

Asparagus, Smilax, Sprengeri, Adiantum, Lilies, Choice Auratum, Field-Grown, Strong Stems.

BUY YOUR FLOWERS DIRECT OF THE GROWERS, and get the freshest possible stock Our cooling rooms and shipping facilities are unexcelled. **GIVE US A TRIAL ORDER.**

TRADE FAIR.

Trade holds up very fair although flowers are beginning to show the effects of the warm weather. Roses, carnations, sweet peas, Shasta daisies, with a limited quantity of lily of the valley and Longiflorum lilies constitute about the supply of stock received at the wholesale houses with a bountiful supply of green goods.

FLORISTS' SOCIETY MEETING.

One of the best meetings the Florists' Society has held in several years took place at the home of J. A. Peterson in Westwood last Friday afternoon. There were over 50 members present and considerable business of importance was transacted. After an inspection of the greenhouses and stock which were found to be in the usual good state, the boys got together and elected the following officers to guide the destinies of the society for the ensuing year:

J. A. Peterson, president.
Gus. Adrian, vice-president.
Clarence Ohmer, secretary.
D. Rusconi, treasurer.

The above with C. E. Critchell composed the board of directors.

The next thing to be considered was the sixteenth annual outing and President Peterson appointed the following committee to take charge: Ben George, Albert Sunderbruch, C. E. Critchell, Wm. Murphy and J. W. Rodgers. This committee got busy immediately and secured Coney Island for Thursday, July 23. Don't forget the place and date and everybody come for we want to make this the best ever. After the outing question was disposed of the most important question of the meeting was brought up, viz.: "Shall the florists of Cincinnati invite the Society of American Florists to hold its twenty-fifth annual convention in our city in 1909?" All present were under the impression that this should be done and a subscription list was started with the result that nearly $1,000 was subscribed within 15 minutes which certainly looks very encouraging. Now, brother florists in other cities, don't fail to vote for Cincinnati, as your meeting place in 1909. Al. Brunner, George Tromey, Wm. Gear, Max Rudolph and Robt. Murphy were elected to membership in the society. The meeting then adjourned to partake of an elegant repast provided by President Peterson's estimable wife and to say that full justice was done to the supper is placing it mildly. It was getting dark when a vote of thanks was tendered to the Petersons by the assemblage, all those present going to their homes with the feeling that it was an afternoon well spent.

NOTES.

The J. M. McCullough's Sons Co. was quite busy the past week with out-of-town orders for supplies. It seems as though the florists in the smaller cities as soon as the spring rush is over get their stock of wire designs and supplies in order for the fall trade which undoubtedly is the proper thing to do and makes matters more pleasant for all concerned.

The Roughton-Ramsey wedding at the Wesley chapel and the Weakley wedding at the Avondale M. E. church were the two most prominent affairs of the past week and used up considerable stock, Miss Edith Kyrk of Avondale having charge of the decorations and bouquets of both jobs.

Robt. Boeck, who conducted a small greenhouse establishment on Madison and Erie avenue, Hyde Park, met with an accident last Friday evening that resulted in his death. While walking through his greenhouses some boards covering an old cistern gave way and before help could reach him he was drowned.

Jimmie Allan of the firm of George and Allan was around the wholesale houses last Monday shaking hands with his friends. Jimmie does not get around very often and the boys are always glad to see him.

The Bloomer funeral created quite a demand for flowers for nearly every florist in the city had an order or two for the same.

Chicago.

GOOD STOCK SCARCE.

Trade last week was very good, and last Saturday and Monday of this week even witnessed a shortage of stock of shipping quality. Tuesday of this week saw quite a material decrease in orders, although regular customers were in with something like their regular orders for this season of the year. Carnations are very poor, and most lines of roses are little better. Some fair stock is seen, but the summer sun is opening the buds so fast that they have not time to fully develop. Killarney and Kaiserin are the best. Cold storage peonies are in the market, but many have to be thrown out, due to not having kept well in storage. Large cuts of candidum lilies have come in, too many for the market to absorb easily; consequently prices have been very low. Daisies in any quantity are still seen, both Shasta and wild being shipped to this market. Sweet peas of all colors are being received, but the quality of the majority is rather poor. Green stock is abundant, and fancy common ferns are down to $1 to $1.25 per 1,000.

FROM A GROWER'S STANDPOINT.

C. L. Washburn, of Bassett & Washburn, on Monday had the following to say of the market conditions: "A great shortage of stock has developed, owing to growers throwing out their plants and replanting. During April and May it rained so continuously that the soil became too wet to handle for mixing, and the result was that the majority of growers put off replanting two weeks later than usual. When they did start, extra forces of men were put on and the work of clearing the houses proceeded much faster than usual, thus causing a sudden shortage. The bench rose stock which is usually replanted early in the spring to be used for summer cutting has not on account of the delay caused by the wet weather yet come into bloom. Also the fact that Kaiserin, Carnot and Killarney are off crop, all at the same time, has contributed to the scarcity. The rose stock now being cut, with the exception of American Beauty, is rather poor, due to the very changeable weather of the past two weeks. Carnations have given such poor returns that these have been replanted earlier than last year when the old stock was not thrown out of the houses until after July 4. Growers say this past month they have been hardly repaid for the labor of cutting. Both smilax and Asparagus plumosus have sold very well."

NOTES.

A recent call at J. C. Mulder's place, 7923-7 Normal avenue, known as the Auburn Park Greenhouses, was interesting as bringing out reminiscences of the early days in local floriculture. Mr. Mulder's father, Carl Mulder, a hearty old man of 86 years, came to this city from Groningen, Holland, in 1866, and started in the florist business at 868-872 West Lake street. In 1886 J. C. Mulder moved to his present location. He remembers the ocean trip to this country, taken when he was a lad of four years.

An informal gathering of florists of the Second congressional district was held at the White City Casino Monday night to talk over the advisability of supporting a horticulturist for congress. It was agreed that under certain conditions the effort would be worth making.

Peter Sroczyniski, of 804 N. Harding avenue, sailed Tuesday with his wife and son for New York on S. S. Kaiser Wilhelm der Grosse to visit his mother who still lives in Germany. He expects to be back by September 7.

John P. Degnan, of the E. F. Winterson Co., read a paper on "The Early History and Growth of Commercial Cut Flower Business of Chicago" before the Lake Forest Horticultural Society the evening of June 24.

E. E. Pieser, of the Kennicott Bros. Co., says that cold storage peonies are not keeping as well this season as usual. The other wholesalers having large cuts in storage make the same report.

PRICE LIST.

PETER REINBERG,

51 Wabash Ave., CHICAGO.

Mrs. J. W. Ensweiler, 5325 Morgan street, who has been sick at St. Bernard's hospital four weeks, is home again improving rapidly and hopes to be able to attend to business soon.

Peter Reinberg at the end of this week goes to Denver as a delegate to the national democratic convention. He will be accompanied by his wife and son.

Chas. W. McKellar is still receiving fine gardenias. He also says Cattleya Gaskelliana is now coming in heavily.

W. N. Rudd read a paper at the Illinois Cemetery Association at Danville, June 30.

Vaughan & Sperry report having had a good demand for their candidum lilies.

A. L. Randall left Monday for his fruit farm at Benton Harbor, Mich.

H. N. Bruns is building a new house, 25x125 feet.

Visitors: C. B. Knickman, representing McHutchison & Co., New York; Wm. E. Hand, Argus, Ind.; W. G. Matthews, Dayton, O.; Joseph and H. O. Bock, Burlington, Ia.; — Hill, of Hill Bros., Geneseo; Theo. Meyer, Waukegan.

Springfield, Ill.

Frank A. Friedley, for the past two and one-half years superintendent at Miss Bell Miller's, has resigned his position to take a more responsible one as superintendent of the J. M. Gasser Co.'s greenhouse plant at Rocky River, O. Mr. Friedley is succeeded by David Allchin.

Wm. W. Thomas, formerly with A. C. Canfield, is starting out on his own account with two acres of land and is building two new houses, each 16x100 feet. His address is R. R. No. 2.

Lake Forest Horticultural Society.

We are advised that the annual exhibition of the Lake Forest Horticultural Society will be held July 15. According to present plans it is expected the show will be much more extensive than that of last year.

BLOOMINGTON, ILL.—A meeting of the florists' advisory committee of the Illinois Experiment Station has been called by Prof. J. C. Blair, chief of horticulture, to meet here Wednesday, July 1, at 2 p. m. A full attendance is expected.

FUNERALS MAKE PRESENT BUSINESS.

Business is at a standstill, except the large amount of funeral work on hand. Almost every florist was busy in this line, otherwise there would be but little outlet for the flowers coming in. Good stock, however, is scarce and anything coming in that is any way fair can be sold at good prices. This is the case with roses and carnations except, perhaps, of long stemmed American Beauty, which has been plentiful, but many of the blooms opened up quickly and went to waste. Sweet peas do not seem to improve and evidently this will be a very poor season for outdoor stock. Hollyhocks and other outdoor flowers, including many daisies, help to fill up the counters at the wholesale houses.

NOTES.

Guy L. Stewart of the Department of Agriculture at Washington, D. C., visited this city last week to investigate the raising and marketing of horse radish. He stated this is the largest horse radish producing center in the United States. The variety chiefly grown is the Maliner Krens. Mr. Stewart will also investigate the raising of water cress, endive and chervil for all of which there is a good market.

A movement is now on foot, since the high water, to establish a park on the levee front, several buildings having been condemned. This movement will surely meet with success as several of the buildings are owned by the Shaw estate, who will assist the city in every way to make an imposing river front.

Mrs. M. Eggeling and her assistant, Miss Nellie Broe, delighted a large audience at Forest Park Highlands, by a duet entitled "Juanita Dreaming," which received an encore and was followed by the "Last Rose of Summer," these ladies having tendered their services to the police relief association.

Many of the florists were busy Sunday with designs and bouquets given the manager and individual players of the Browns baseball team on its return from Detroit as leader in the race in the American league.

A meeting of the trustees of the Florists' Club was held at the store of Chas. Schoenle. Arrangements were perfected for the picnic and these will be brought up at the next meeting.

Ostertag Bros. are out with their new catalogue, a very tasteful affair. This firm had a big decoration Monday at St. Charles. Julius Koenig, Henry's right bower, was overseer.

John Burke will close his store at Sixth and Locust streets this week and will reopen September 15, and in previous years has found it pays physically and financially.

Notices are up in the four wholesale houses announcing early closing for July and August, Saturdays and Sundays at noon, other days at 5 p. m.

We regret to announce the indisposition of Robt. Beyer. It is hoped he will be all right by July 15 so he can run a race or two at the picnic.

A. Gumz, assistant at Geo. Angermueller's, will take a two weeks' vacation. Al intends to have a good time but will show up for the picnic July 15.

HARTFORD, CONN.—The exhibition of roses at the meeting of the Horticultural Society, June 19, was said by President Huss to be the best display the society had had in years in point of varieties and perfection of bloom. The blooms were displayed separately in glass bottles to good effect. The judges awarded the exhibit of Peter Zuger, superintendent of Elizabeth park, 90 points on his collection of more than 100 different named kinds; J. F. Huss, of the J. J. Goodwin greenhouses, was awarded 75 points on his collection of 75 varieties.

SCHOOL CLOSINGS HELP.

Considering the fact that much of the weather of the past week was sizzling hot, business was very fair. This was in part accounted for by a continued decrease in the supply of stock. The closing exercises of various educational institutions caused a considerable demand and there was a large amount of funeral work. At any other season, with so little good stock coming in, the scarcity would have caused inconvenience. Aside from a few good Kaiserin, American Beauty and Killarney are now about the only roses that can be depended on to stand up over night, and many of these are poor. The time of the carnation's departure was at hand but the hot wave hurried it some. There may be a few stray lots of passable blooms come in yet, but finis is written to the season's crop.

June 29.—The market is quiet and the price of American Beauty roses has fallen off. Arrivals are light in all stocks and as the weather continues warm and dry there is little prospect of a surplus. It must be considered, however, that we are now almost in July, when the period of weddings and commencements is ended, therefore there are no great expectations.

NOTES.

J. H. Small & Sons made up a number of very noteworthy designs for the funeral of Ex-President Cleveland. One was a large Roman wreath on an easel, the lower part of the wreath being covered with cattleyas to the number of 150. Another was a large standing wreath in which a still larger number of orchids were used, the base being of lilies. While these pieces were being made up in the store they caught the eye of the Broadway crowd and at times the sidewalk was blocked with interested onlookers. These designs were made on the order of high officials of the government of Brazil.

As an incentive to steamer business the Fleischman Floral Co. displays in one of the large show windows of its Hoffman House store a beautiful model of the new Holland-American Line steamship "Rotterdam." The model is about 15 feet in length and is a constant drawing attraction for the crowds that frequent the Madison square district.

The funeral tributes from the Cleveland family for the ex-president were executed by J. W. Hauser, of 571 Madison avenue, who has long been the family florist. Among his orders was one for several hundred of the old fashioned field pinks. It is said that these had been Mr. Cleveland's favorite flowers.

The seventy-fifth annual fair of the American Institute will be held at the Berkeley Lyceum, September 22-24, and the list of premiums to be awarded for plants, flowers, fruits, vegetables, etc., is now ready. Copies may be had on application to Robt. A. B. Dayton, 19-21 West Forty-fourth street, New York.

S. Halfing, of the supply firm of Russin & Halfing has just returned from Europe, where he has sojourned for about six weeks. He says that he spent $799.50 and considers it very cheap for the fun he had. Mr. Halfing brings back a large stock of florists' supplies, among which are all the latest novelties.

Visitors: J. H. Small, Jr., Washington, D. C.; Wm. F. Kasting, Buffalo; W. W. Castle and W. J. Stewart, Boston, Mass; Daniel B. Long, Buffalo; Frank McMahon, Seabright, N. J.

EARLY ASTERS SELL WELL.

The best rose now on the market is the imported American Beauty; in fact with the exception of Kaiserin it is the one and only, when anything of quality is desired. Bride, Bridesmaid, Killarney and Richmond are pleasant memories and a few respectable flowers of Liberty are occasionally seen but these will also soon pass out of sight. John Burton is sending in some Chatenay that is good for the season. Sweet peas are still plentiful but show signs of the finish, with the exception of the late plantings which will hold over into July. The first of the asters have made their appearance the past week, Charles Hartley bringing in an early sort which he tried this season for the first time. He says it sells on sight. There is an abundant supply of small white flowers such as candytuft, pyrethrum, double petunias and the like for the design men. Fancy pond lilies are also kept in stock by the commission houses and find a good sale, as many of the stores fit their show windows with miniature lakes and stock them with gold fish and pond lilies. Vases of yucca spikes with their showy white flowers are also used for window and store decorations. Double cornflower and larkspur have been popular for the past two weeks, the colors being much in demand for school closings.

NOTES.

Jacob D. Eisele, of the H. A. Dreer Co., in company with his daughter, Miss Bertha, sails July 4 for an extended European trip, to be gone until early October. The itinerary of the journey includes the romantic spots of Scotland, a visit to Dickson's rose nursery in Ireland and a tour through Belgium, Germany, Italy, Switzerland and France. This is more of a pleasure than a business trip and will give Mr. Eisele a well deserved vacation. He will probably look over the continental azalea and palm stocks for this season's importations. He will also keep his eyes open for novelties. There is no better judge of the merits of a new plant than Mr. Eisele, whose long experience enables him to say at once whether it will take in the American market. Cibotium Schiedei is now in good demand with this firm, the stock going mostly to retailers for window decorations.

S. S. Skidelsky says that of the new carnations, Afterglow and Winona will be largely planted as these varieties have proved of standard worth. He also says that Beacon is clearly first in red, with Victory second. Winsor is also a winner and will be the leading pink. Lawson, pink and white, Enchantress, White Enchantress, White Perfection and Lady Bountiful will also be largely planted.

J. W. Colflesh of the Merry Heights Nurseries is about erecting another house 17x100 feet. He says the season has been all right; a recent sale of 200 strings of asparagus and another 100 the same week boosted the green goods considerably.

The Leo Niessen Co. has been handling an exceptionally fine lot of sweet peas. Some new crops of American Beauty roses are appearing but the stems are a trifle short as yet. Some very choice orchids were seen here the past week.

There was an exceptional demand for American Beauty the day of the girls' high school closing, last week. Wm. McKissick handled 2,500 of the eastern stock in two days. He says the summer business is quite up to expectations.

John W. McIntyre is handling green goods now, with as much ease as during the winter season. He says he can sell all he can get. Double cornflowers and larkspur have been a specialty the past two weeks.

Geo. Anderson and J. W. Colflesh took an auto ride to Thornhedge, H. H. Battles' country place, one day last week, and they were much pleased with the appearance of the stock both inside and out.

The paper of Arthur Niessen is to be further discussed at the next meeting of the Florists' Club, the short business session of June cutting off the debate just as it was getting interesting.

K.

Madison, N. J.

The Morris County Gardeners and Florists' Society will hold no meetings during July and August. This has been the custom for several years. The evening of June 10 was devoted to ferns, and Frank Eskeson, the fern specialist of this city, had a fine collection of ferns in salable sizes, just the kind to help make an effective decoration. He had also a set of fern dishes filled to show his taste and to invite criticism. His essay on "Fern Culture and Fern Decorations" was well received. Frank can write as well as work. There was also an exhibition of hardy herbaceous flowers which was creditable. Frau Karl Druschki was there in fine shape from Wm. Duckham, A. Herrington and C. J. W. Ottolander of F. & F. Nurseries. Mr. Ottolander had also an exhibit of flowering shrubs and herbaceous flowers to his credit. J. C. Elliott, gardener to John J. Waterbury, had a large vase of a carmine rose of the habit of Crimson Rambler, but 10 days earlier. The club has decided to get as many of its members as possible to join with the New York Florists' Club in its outing. C. H. Totty, R. M. Schultz and J. A. Minder form the committee of arrangements. A good time is anticipated and Totty is training for the fat man's race.

NOTES.

L. A. Noe is putting in cement benches in many of his houses. They are all cement, sides, bottom and supports—practically indestructible so far as one can see. The cost of wooden staging has not been a bug-bear to Mr. Noe. The genial manager, J. Ruizicka, showed some benches that had been used 15 years. Stock looks in splendid condition. Everything is done thoroughly and with system.

Percy Herbert, president of the Gardeners and Florists' Society, sailed for Europe June 20 with his family. He expects to be gone three months, and intends to do England, Scotland, and, if possible, a part of Ireland.

Robt. M. Schultz has rented his greenhouses on Rosedale avenue and has signed a contract with Vaughan's Seed Store as traveling solicitor. Bob ought to make a good one.

Wm. Duckham is beginning to prick up his ears, and none of us will be surprised should he take a notion to "sail the seas o'er," at any time.

A. R. Kennedy is intending to take a little vacation soon. We will no doubt be able to tell the details of his trip when he returns.

C. H. Totty is busy just now supplying the trade with chrysanthemums and other stock; roses in particular.

E. R.

Baltimore.

BUSINESS VERY DULL.

There is a continuance of the almost phenomenal drought for this season of the year in this section and gardens and plantations of almost every kind, unless exceptionally favorably located, are feeling the effects of lack of moisture. The hay fields and pasture lands are almost brown and gardens are at a standstill. One of the consequences is the absence of outdoor flowers. Phloxes are drying up and there is little in the way either of perennials or annuals adapted to florists' use. Last week, the time of year and conditions of supplies considered, trade showed some little activity, but material was scarce if quality was at all to be thought of. Carnations are about done for; sweet peas are done and roses feel the untoward influence of hot air and burning sun. The temperature, except for one or two days when the mercury reached very near the 100° mark, has not been abnormally hot, and the nights have been distinctly cool, going down once or twice to about 55°. The street merchants are scattering, going to the seashore and convention cities, and the market men stay at home. Foreign shipments, meaning those from growers in other states, have practically ceased and demands for lily of the valley and American Beauty roses if they became apparent, could be filled with great difficulty. The commencements are all things of the past, the wedding season is closed, and the customary dullness of July is upon us. The store windows show little bloom and all in the trade now must follow the example of the animals of hibernating habits and for several months (in their case in winter), live off their own fat.

NOTES.

Black Bros. at Lutherville are building two new houses, about 18x100 feet, one for roses, the other for chrysanthemums. Their father, Andrew L. Black, now one of the oldest of the florists here and long active in trade and public affairs, is a confirmed invalid, and seldom leaves his room.

Nothing is heard yet of the convention of the Society of American Florists, but the convenience of access of the meeting ought to attract many from this point.

S. B.

GRANDVILLE, MICH.—The plant of the Stover Floral Co. has been torn down and will be rebuilt at once.

BEARDSTOWN, ILL.—The banana plants, in flower and fruit, at Frank Bros.' greenhouses have attracted considerable attention among their customers and visitors.

CELINA, O.—Jesse Ernsberger is giving the residents of Mercer county demonstration of the art of cucumber raising. Jesse is harvesting cucumbers from his indoor plants at the rate of thousands a day.

SCHOOL WORK BETTER.

Graduation work was much better this year than last and, despite the prohibitive restrictions placed upon flowers by school masters and school committees some few years ago, the business increases steadily and bids fair to soon equal that of seasons past. The grammar school masters particularly take action to discourage the use of flowers for that occasion, and if flowers are sent addressed to the schools they are put in a faraway room until the exercises are finished. In the high schools there seems to be no objection, and bouquets and baskets are willingly accepted by the ushers and placed conspicuously. The private schools and commercial colleges furnish a greatly increased call over that of a few years ago. Carnations, roses and sweet peas were mostly used in the work, and as prices ruled low, there was a good margin, the only drawback being the poor quality of carnations. Bouquets at $1 to $2 and baskets from $2.50 to $4 were the usual order.

M. M.

Rhode Island Horticultual Society.

The annual June exhibition of roses and strawberries by the Rhode Island Horticultural Society was held June 19 at Elks hall, Mathewson street. Considering the lateness of the season, the showing was a creditable one. In strawberries the display was confined to two exhibitors, but as each showed more than a dozen plates the whole made a very attractive and appetizing effect. In roses the several tables were well supplied, but with the exception of the exhibition made by the Roger Williams park there was no distinctive feature. The park entered the collection class with 100 bottles of named varieties and the table which this collection occupied at the right of the entrance proved one of the most interesting.

The hall was arranged somewhat differently from the usual plan. On the front platform was an artistically banked collection of foliage plants, including palms, ferns and variegated decorative plants, which formed a picturesque background, and the long fronds of the kentias and the ferns drooping over the tables in front of the platform made a cool bower. The hall was arranged and the exhibits were staged under the direction of William Appleton, who officiated as superintendent of the hall. Charles Smith, secretary of the society, had general supervision of the exhibition.

Aside from the roses and strawberries one of the most attractive exhibits was that made by Miss L. M. Mullin of an immense bouquet of wild laurel, which, though extremely late, was so carefully selected as to be just flowering. The effect of the hexagonal-shaped flowers of pink and white amid the glossy deep green leaves was one of the conspicuous objects in the hall. Another beautiful display was a table containing a dozen pots of vari-colored gloxinias in full bloom belonging to Mrs. E. C. Hill.

KAISERIN ROSES GOOD.

The most quiet months of the year are at hand again. Business no doubt will remain dormant until late into the fall, with an occasional funeral and a few midsummer weddings to relieve the dull monotony of the hot months. Even now the early morning purchases are extremely light, and the rest of the day is very quiet. The past week was the hottest we have had for several years and therefore was a bad one for shippers. Some stock arrived in very poor condition. Sweet peas are coming in great quantities, they bring $2 $3 per 1,000. Short stemmed roses are plentiful, while the better grades are a little scarce. Every morning sees someone out hustling for long stemmed white roses. The quality of Kaiserin has never been equaled; there is an increasing demand for this rose. Carnations are deteriorating very fast, but it is surprising to notice how well Lady Bountiful, Vesper and Melody hold their own. Water lilies are in abundance and sell readily. Shasta daisies also enjoy a good demand. The price of common fern has dropped and galax advanced both to $1.50 per 1,000.

NOTES.

The James Eadie Co. reports a busy week in funeral work. This firm has a number of luncheons booked for the coming week, given in honor of the National Educational association.

The annual outing of the Florists' Club will be held on the last Wednesday in July, at Cedar Point. Full particulars will be given later.

Milford Parks has closed his stand in the Citizens building for the summer.

The Seed Trade.

American Seed Trade Association.
Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres,; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention, June, 1909.

"S. P. Q. R." is the motto of one of our seed trade correspondents.

A. J. BROWN and J. Chas. McCullough are on a fishing trip in Michigan.

COLLECTIONS are reported slow at this time by many wholesalers and florists.

FRENCH growers are offering flesh colored (incarnata) trefoil by circular letter.

CONNECTICUT onion seed growers report good prospects, but not quite so favorable as last year.

FROM Detroit L. L. May and Mrs. May with J. E. Northrup and son returned home via Steamer Northland.

LOUISVILLE, KY., June 30.—Onion seed crops are looking well in this vicinity, but onion sets are suffering some from lack of rain.

THE next London exhibition of the National Sweet Pea Society of England will be held at Royal Horticultural Hall, July 24.

CONSIDERABLE anxiety is expressed regarding late varieties of sweet corn. One large dealer is said to have purchased 1,000 bushels at the convention.

TROY, N. Y.—The Nott Seed Co. has been incorporated with a capital of $2,500. The directors are P. K. Nott, Ella M. Nott and C. Howard Trovell, all of this city.

MILFORD, CONN.—Dora E. Clark, only daughter of Albertus N. Clark, was married June 17 to A. N. Walker of Chicago. They will live at Hinsdale, a suburb of that city.

CHICAGO.—Grass seed prices on the board of trade July 1 were noted as follows: Prime timothy, $4.10 (nominal); choice white clover, $15.—A. H. Goodwin has returned from Asheville, N. C.

IN the list of new members elected at the Detroit convention of the American Seed Trade Association we gave the name of Bromfield-Colvin-Ries Co., Bay City, Mich., and we are now informed that the name of this firm has been changed to Bromfield & Colvin.

PROF. N. E. HANSEN of the Agricultural Experiment Station, Brookings, S. D., is making an investigation of forage plants in Siberia, where climatic conditions are similar to those of the semi-arid lands of Wyoming, Colorado, Montana and the Dakotas.

A LARGE number of seedsmen visited the trial grounds of D. M. Ferry & Co., and the Jerome B. Rice Co. Pea trials were in good shape and many very fine new sorts were noted. Among the best may be mentioned Little Marvel, Laxtonian, Westfield, and Alderman, all English introductions.

A Blue Grass Pool.

LEXINGTON, KY., June 22.— Growers who represent the world's supply of blue grass seed met in Winchester today and pooled the entire crop of Kentucky. An organization was formed on lines similar to those of the Burley Tobacco Society. No permanent organization was effected, matters being as yet fully in the hands of the authorized sales committee.—Cincinnati Inquirer.

American Seed Trade Association.

DETROIT CONVENTION JUNE 23-25.

The proceedings of the first two days at the annual convention were given in our last issue. At the morning session of Thursday, June 25, the third day of the meeting, the Albert Dickinson Co. presented some correspondence with the manufacturers of a stamp perforating device and showed some examples of the work. The official ruling of the postoffice department relating to the use of the device was also given. Many of those present thought well of its use.

A letter was read from a member who has many times suffered from the apparent unjust ruling of the internal revenue department in the importation of seeds. The communication opened up a general and spirited discussion, many members citing experiences similar to those of the correspondent. It was disclosed that some of the collectors at the larger ports of entry were the greatest offenders in this respect, their excessive appraisements being general and continuous and the burdens and penalties placed upon the seed importers most severe and unjust.

It was pointed out that one firm alone unsupported was continually seeking redress and defending its right and that the time had come for the association itself, as an organized body, to enter its protests with the internal revenue department at Washington, and carry the fight to a successful issue, demanding the department consideration to which each member of the association is entitled. A resolution to this effect was offered, which, being amended, left the entire matter in the hands of the association's present committee on customs and tariffs.

The election of officers for the ensuing year resulted as follows:

Watson S. Woodruff, Orange, Conn., president.
J. C. Robinson, Waterloo, Neb., vice-president.
M. H. Duryea, New York, second vice-president.
C. E. Kendel, Cleveland, O., secretary-treasurer.
Leonard H. Vaughan, Chicago, assistant secretary.

Invitations for the next convention were extended by Niagara Falls, N. Y., Portland, Ore., Atlantic City, N. J., Put-in-Bay, O., and Louisville, Ky. An informal ballot cast for the guidance of the executive committee in the selection of place of meeting resulted as follows: Niagara Falls, 42; Louisville, 11; Atlantic City, 3; Put-in-Bay, 2; Baltimore, 1; Lawrence, Kans., 1.

C. N. Page offered a resolution, which carried unanimously, voicing for the association highest appreciation of the hospitalities of the local seed trade through D. M. Ferry & Co., and the Jerome B. Rice Seed Co.

Wm. Meggat, Wethersfield, Conn., first honorary member of the association, in a letter which was read, acknowledged his thanks and appreciation of the honor conferred upon him.

Before adjournment feeling reference was made to Albert Plant, Everett B. Clark and D. M. Ferry who died during the past year.

The installation of President-elect Watson S. Woodruff was next in order, H. W. Wood escorting him to the chair. He thanked the association for the high honor conferred upon him, but thought it should have been given to one of the older members. He placed a high estimate on the feeling of friendship between the members because it insured a permanent foundation for the co-operation of all in the true interests of the association.

J. C. Robinson on behalf of the association presented Retiring President Green with a beautiful fruit bowl and spoon, the recipient acknowledging the compliment with expressions of gratitude and appreciation.

At 2 p. m. the whole party with their friends took the boat provided by D. M. Ferry & Co., for a ride on the beautiful Detroit river. A sumptuous luncheon was served and music and dancing engaged the happy party until 6 o'clock. Many attaches of D. M. Ferry & Co. were aboard, making everything pleasant for the visitors.

Copies of the AMERICAN FLORIST containing report of the proceedings up to 5 p m. Wednesday, were handed to the members Thursday and the publishers' enterprise was highly commended by the pleased recipients.

Col. J. D. Carmody, who visited the city during the convention, surprised the party on the boat by his nimble and graceful dancing, and he was a guest of Park Commissioner Breitmeyer on an automobile trip through the city parks. The daily papers early discovered his title.

The excessive heat of the first day of the convention was a great disappointment, especially to the southern members who expected a more comfortable climate here.

Most of the eastern contingency left at the termination of the boat ride Thursday at 6 o'clock, taking the steamer Eastern States as far as Buffalo.

The McFarland Publicity Service had an extensive exhibit of lithographic work and catalogue printing in charge of E. R. Thomas.

Dr. W. W. Tracy was warmly greeted by his many friends here, where he lived so many years previous to going to Washington.

The ladies were not prominent for their numbers and few were seen until the occasion of the boat ride Thursday afternoon.

E. H. Cushman, of gladiolus fame, attended the meeting Thursday and with the party enjoyed the boat ride.

ADDITIONAL VISITORS.

In addition to those mentioned last week, the following were present or represented:

A. J. Brown, Grand Rapids, Mich.
E. W. Conklin & Son, Binghamton, N. Y.
F. H. Ebeling, Syracuse, N. Y.
Hogg & Lytle, Port Hope, Ont.
Chas. Lohrman, Detroit, Mich.
J. Chas. McCullough, Cincinnati, O.

J. F. S.

The Spring Business.

Northrup, King & Co., Minneapolis, Minn.—Our season does not close until July 1, and it always take an inventory to tell the story. Trade generally has been very good and values have been quite well maintained. We think that those engaged in the seed trade are awakening to the realization of the cost of doing business. When trade is at its height, in our anxiety to get orders and do business, we are apt to forget the long dull season in which expenses are by no means met by incoming business. It has been said that the seed trade no longer attracts ambitious and capable men, for in it they do not find the reward for their efforts that other lines of business offer. If this is true we should be even more careful in making our prices to consider these expenses, for there is no reason why the seed trade should not be attractive to young and energetic men if the profits are what they should be. There will be no such profits unless we keep these expenses constantly in mind.

Holmes Seed Co., Harrisburg, Pa.—We are pleased to state that we are experiencing the best year's business in our history; this holds good in every branch, including wholesale and retail seeds and supplies. We attribute this to the great care that we have exercised in supplying our customers with only the very purest strains of the highest quality of seed stocks. This, we believe, has more to do with the continued growth than any other cause.

Barteldes Seed Co., Lawrence, Kans.—We close our business year on July 1, and therefore cannot tell exactly how trade has been with us, but we can say that our trade has been fully as good as last year in regard to volume, and we think it has been considerably better in regard to profits. There has been no falling off of trade in any of the varieties of seeds with us. To the contrary, we think there has been an increase in most of them.

L. L. May & Co., St. Paul, Minn.—January, February and March showed a splendid and satisfactory increase over last season. April and May did not keep up as well as we expected at the start of the season, but, all in all, general results to date over last season are very satisfactory and show a net gain over last year's business in all departments, both seed, greenhouse and nursery.

Henry F. Michell Co., Philadelphia, Pa.—Our business, as a whole, has been entirely satisfactory and has shown a large increase over that of 1907. There is no particular falling off and, if any exists, it seems to be in the demand for the higher-priced goods. It is true, on the other hand, that there is a large increase in the sale of goods of a moderate price.

Wood, Stubbs & Co., Louisville, Ky.—Our business for the spring of 1908 is about 15 per cent better than that of 1907. The trade on small seeds has been exceedingly good. We are very well satisfied with this year's business.

John Lewis Childs, Floral Park, N. Y.—Our retail seed and bulb business has been about 5 per cent greater than that during the same period of last year. We are well satisfied with the season's showing.

Imports.

During the week ending June 27 imports were received at New York as follows:

H. F. Darrow, 39 pkgs. seed.

To others, four tubs bay trees, 35 bags seed.

Stokes' Standard Pansy Seed.

Stokes' Standard Mixed Pansy

Is the finest strain of Giant Pansies it is possible to produce. It is a blend of all that is finest in Pansies from France, England and Germany. It is absolutely unrivaled in range of magnificent colors, size and substance.

Trade pkt (2000 seeds) 50c, ⅛-oz. 85c; ¼-oz. $3 25; 1-oz $6 00; ¼-lb. $20 00.

Kingly Collection of Giant Pansies Mixed

A most excellent strain, the same as has been sold for years by the late firm of Johnson & Stokes and has given great satisfaction.

Price ½ trade pkt. 30c; trade pkt. (2000 seeds) 50c; 5000 seeds $1.00; per oz, $5 00; per ¼-lb $14 00.

MARKET GARDENS.

ST. LOUIS BUTTER HEAD lettuce is said to be an excellent variety for outdoor as well as indoor culture.

TEXAS vegetable shipments over the St. Louis, Brownsville and Mexico railroad amounted in the week ending June 1 to 23 cars of cucumbers, three cars of cabbage, and one of mixed vegetables. This does not include more perishable vegetables which are sent by express. Thirty-five cars of onions and cucumbers left Donna, a small station on the San Fordyce branch, in one solid trainload the present week.

Horse Radish.

Guy L. Stewart, of the Department of Agriculture, Washington, D. C., visited St. Louis last week to investigate the raising and marketing of horse radish. He stated St. Louis is the largest horse radish producing center in the United States, the variety chiefly grown being Maliner Krens. Mr. Stewart will also investigate the raising of water cress, endive and chervil for each of which there is a good market.

TO THE TRADE
HENRY METTE QUEDLINBURG, GERMANY.

I ALSO GROW LARGELY SEEDS ON CONTRACT.
List of my novelties in flower seeds for 1908 sent on application.

working people, but they have been compelled to meet the demands of the commission men in grading and packing.

This observant broker also informs us that while the price of decorative plants offered on the produce markets has not materially increased during the past five years, the demand has grown over 50 per cent. This is attributed to the fact that such stock can be seen before purchase.

THE CHENEY FARM, SOUTH MANCHESTER, CONN.
Fig. 2.—House of Cucumbers and Seedling Tomatoes.

Grading and Packing.

HONESTY THE BEST POLICY.

A well-known wholesale broker in produce says that Chicago prices on market gardens stock have decreased 30 per cent in the past three years and attributes the decline to the increase of trucking greenhouses in the smaller outlying cities and also to improper grading and packing by Chicago growers. He says, for example, that in packing, Chicago growers, following the advice of commission men, have packed cucumbers with the small ones at the bottom and the best at the top of the boxes. In packing loose-leaf lettuce, sold by weight, the lettuce and boxes have been water-soaked overnight, and this is the cause of decrease in price on the Chicago product. Dixon, Ill., cucumbers have a great reputation all over the northwest, due very largely to proper grading. The Chicago growers, he claims, are usually honest and hard-

The Cheney Farm, South Manchester, Conn.

In our issue of June 13, page 1050, we called attention to the fine, well managed greenhouse plant at the Cheney Farm, South Manchester, Conn., and the accompanying illustration is of a portion of a cucumber house there. It shows the cucumber vines on the south side of the house, with dwarf Stone tomato plants in the foreground. At the date the photograph was taken, May 2, these were being put out into cold frames.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points June 20 were as follows: New York—Tomatoes, 10 cents per pound; mushrooms, 25 cents to 75 cents per pound. Chicago—Mushrooms, 25 cents to 50 cents per pound. Cincinnati—Mushrooms, 50 cents to 60 cents per pound. Pittsburg—Cucumbers, $3.50 to $4 per box.

The prices of indoor vegetables at leading points June 27 were as follows: New York, cucumbers, $2 to $2.50 per basket; mushrooms, 12 cents to 75 cents per pound. Chicago, mushrooms, 25 cents to 50 cents per pound. Cincinnati, mushrooms, 50 cents to 60 cents per pound. Boston, cucumbers, $2.75 to $3.25 per box. Pittsburg, cucumbers, $3.50 to $4 per box.

Vegetable Plants.
Cabbage, Wakefield, Early Flat Dutch, Early All Head, Early Drumhead, and other early varieties, Surehead, Late Flat Dutch, Danish Round Head, and other late varieties, 20c per 100, $1.00 per 1000, $8.50 per 10,000.
Tomato, Stone, Favorite, Paragon, etc., at 20c per 100, $1.00 per 1000, $8.50 per 10,000; Dwarf Stone and Champion, June Pink and Early Jewell, 40c per 100, $2.00 per 1000.
Celery, White Plume, Giant Pascal, Gol. Heart, and other varieties, at 20c per 100, $1.00 per 1000, $8.50 per 10,000.
Beet, Eclipse, Crosby and Egyptian, 25c per 100, $1.25 per 1000.
Cash with order.

WHITE MARSH, MD.

FLORISTS have a splendid opportunity of raising Mushrooms by utilizing the waste space under the benches, and then utilizing the waste material of expended mushroom beds in growing flowers. Lambert's Pure Culture MUSHROOM SPAWN, the best spawn in the market, is sold by all leading seedsmen. A fresh sample brick, enough for a trial bed, together with illustrated book on "Mushroom Culture," will be mailed postpaid upon receipt of 40c in postage stamps. Address American Spawn Company, St. Paul, Minn

If You Want a Really Successful Crop of Mushrooms use only
JOHNSON'S
MUSHROOM SPAWN
NOTE THE ADDRESS
JOHNSON'S LTD.,
44 Bedford Row, LONDON, ENGLAND.

BURLINGTON, IA.—Joseph Bock will build three new houses this year, each 27x210 feet.

WHITMAN, MASS.—Mrs. S. A. Moir will continue to conduct the florist store in the Snow block, which she recently fitted up. The store here was not included in the sale that she made of her Brockton establishment.

SPRINGFIELD, O.—Another substantial impetus has been given to the park extension project which is occupying the minds of the Commercial club now. It comes in the form of a check for $75 from Geo. D. Leedle, president of the Florists' Club, as the latter organization's contribution in the plans for the Springfield Beautiful. In the pushing of the extension project a great deal of preliminary work must be done before the club can get its plans sufficiently well before the public and to present them in such a way as to convince that the system is what the city needs.

Lilium Harrisii

We offer a selected stock of the original true Harrisii for early forcing. These bulbs have been grown from the original pure Harrisii, and will be found to be splendid stock for early forcing, for which purpose Harrisii is so valuable. We have had the stock inspected, and are assured that it is almost absolutely pure and almost entirely free from disease. This is not stock picked up indiscriminately from different sources, but is grown from one stock, and will be found very superior to the ordinary Harrisii usually offered, both in regard to freedom from disease and purity, and not the late type now so often furnished.

Lilium Harrisii has been deteriorating slowly for years, and in order to get back to the true type of the original Harrisii, we have had our stock grown from the original pure stock, and it will be found very superior to the Lilium Harrisii usually offered. While the stock is A No. 1, our prices are as low as, or lower than, the prices asked for indifferent stock. We have only a limited quantity of this stock to offer, so it will be advisable to place order without delay in order to ensure securing this stock. Bulbs ready for delivery middle to last of July:

6-7 in. bulbs, 350 to the case, $6.00 per 100; $ 50.00 per 1000
7-9 in. bulbs, 200 to the case, 9.00 per 100: 80.00 per 1000
9-11 in. bulbs, 100 to the case, 18.00 per 100; 170.00 per 1000

Full case lots at thousand rates.

Freesia Refracta Alba Bermuda grown, finest selected bulbs ½-in. up, $1.00 per 100: $ 7.50 per 1000
French grown, mammoth size, ¾-in. up, $1.50 per 100; $12.00 per 1000

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.

Dayton, O.

Local florists never before felt the burden of Decoration day as they did this year. Almost everybody wanted flowers and all the help efficient and inefficient which could be obtained was hired beforehand. But the trade was such that it was simply impossible to keep up with it. Now, numbers of the people who were insistent in their demands for flowers on Decoration day will not go near the graves of their relatives for another year. They merely follow the fashion. The fashion is a beautiful one, but it is too much for one or rather for a few hours of one day.

In many cases the people who buy the flowers do not trouble themselves to attend ceremonies at the cemeteries leaving it to the florists. They are expected to know where every grave is, whether it be marked with a monumental stone or not. They do know, but it takes time to learn, and this time has to be taken from their legitimate tasks.

Sometimes a purchaser thinks that he facilitates matters by throwing down a $2 bill with the remark, "Give me anything you have; almost anything will do." But flowers are flowers on Decoration day, and $2 do not look very large. The rich who have to buy flowers in quantities because fashion so decrees, cry out they are ruined by the expense, while the less well-to-do sometimes try to wheedle a bouquet for baby's grave out of the dealer on the plea of love and affection. Florists sympathize with the ills and griefs of humanity, but they cannot express their emotions in dollars and cents. They would get no gratitude if they did.

Something should be done to relieve the pressure on this day. A very practical way of relieving the situation would be to set apart a day, say about the middle of June, for the fraternal organizations. This might be called Organization day or Fraternity day. It might also with peculiar appropriateness be called Rose day or the Day of Roses. From time immemorial the rose has been the symbol of inviolable secrecy. A thing said or done "under the rose" must never be disclosed. No flower festival could therefore be more suitable for the various secret fraternal orders than one in the month of roses, dominated by the rose itself.

One of the most beautiful of the June weddings was that of Miss Ruth Magdalene Matthews, the charming daughter of Warren G. Matthews and wife, of Floral avenue, and Herbert E. Githens, a popular and well-known young business man of this city, which occurred June 24. The rooms throughout their cozy home, given to the young couple by the bride's father, were beautifully decorated for the occasion, the parlor, in which the ceremony was performed, being in white and green, with smilax gracefully arranged on every hand, while the decorations in the dining room were in pink.

Proceedings

Of the Congress of Horticulture held at the Jamestown Exposition, September 23, 1907.

Linen Bound. 108 pages. Price 25c.

This publication includes the formal adddresses and discussions of the papers read at the meeting which covered the various phases of Horticulture This meeting was pronounced by Horticultural authorities as one of the greatest Horticultural meetings ever held in a single day. For copies address

The Nursery Trade

American Association of Nurserymen

J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C. Seager, Rochester, N. Y., Sec'y. Thirty-fourth annual convention to be held at Rochester, N. Y., June, 1909.

VISITED CHICAGO: C. B. Knickman, of McHutchison & Co., New York.

A SILVER spotted or mottled variety of Catalpa syringæfolia is reported from England.

ROCKLAND, MASS.—W. H. Wyman is opening up a good deal of land here for the growth of trees and shrubs.

THE recent hot sun has been very trying to newly planted trees and shrubs and, whenever possible, the hose should be kept going on the roots freely and the surface soil mulched or at least cultivated.

RUBUS DELICIOSUS has again been very showy and beautiful. It is worthy of more attention than it gets as a pretty white flowering shrub at its best before the mock oranges, or even the snowballs and lilacs.

ROSE IRISH ELEGANCE is prettily figured in a recent number of the Journal of Horticulture. An accompanying note says it is a vigorous hybrid tea, with single flowers. In the bud state the color is bronzy orange scarlet, while the open flowers contain varied apricot hues. It flowers from June until late autumn.

WE were much interested at the Peterson Nursery, Chicago, in a beautiful specimen of a Swedish ash planted some years ago by the late Mr. Peterson. It appears perfectly happy, forms a fine spreading tree with a distinct bark and fine foliage. Stock of it, it appears, is not grown, but the tree is certainly worthy of extended culture.

BRIGHAM, UTAH.—The Intermountain Nursery Co., with A. L. Patterson, president; F. T. Troxell, vice president, and E. M. Tyson, secretary and treasurer, has filed articles of incorporation with the secretary of state. The company is capitalized at $100,000, divided into $1 shares, and will conduct a general nursery business in Boxelder county.

TREE SURGEONS are mostly tree butchers, and the owners of trees should be warned against them generally. We would prefer the advice of a reputable, practical nurseryman on all tree and shrub matters to that of the landscape architect, landscape engineer, tree surgeon or plant doctor who chops down splendid tracts of sylvan beauty to enable him to book an order for unsuitable and costly nursery stock, supplying same from his own nursery or that of a confederate.

Taxation of Nursery Stock.

At a recent meeting of the American Association of Nurserymen it was stated that the comptroller of Tennessee in a recent decision, held that nursery stock, like other growing crops, is not taxable and his decision was upheld by the supreme court. In Georgia it is claimed that the same condition prevails.

In Nebraska nursery stock, growing or otherwise, is taxed by state law.

Hydrangea Paniculata Grandiflora.

The illustration herewith shows a plant of Hydrangea paniculata grandiflora in standard or tree form showing the way it is grown by the Jackson & Perkins Co., Newark, N. Y.

American Ass'n of Park Superintendents.

PRELIMINARY CONVENTION PROGRAMME.

The American Association of Park Superintendents will hold its annual convention in Minneapolis, Minn., August 11-13, and the park board of the convention city has appointed a special committee of five members and the superintendent to work out an interesting programme and provide for the welfare and entertainment of its visitors.

Hydrangea Paniculata Grandiflora.

The association has never met further west than Buffalo, and Minneapolis will spare no pains to justify its claim as the ideal convention city of the great northwest. As a park city Minneapolis stands second to none in the country, and while its system of parks and parkways is far from completion and perfection as compared with the systems of the older cities of the east, the possibilities offered by its present park possessions and through contemplated extensions will convince every visitor that Minneapolis will have one of the grandest systems of parks, parkways and boulevards in the country. The many fine lakes, the grand drives along the wooded banks of the Mississippi river and Minnehaha falls and creek, the many parkways through the residential parts of the city and the many smaller parks, must of necessity attract and gratify every visitor interested in park work and development. The following preliminary programme has been prepared and will, in the main, be carried out. The headquarters will be at the West hotel, Hennepin avenue and Fifth street. Rates, $1.50 up.

FIRST DAY, TUESDAY.

Opening of session, 9:30 a. m., park commissioners' office, city hall, Third avenue and Fifth street. Address of welcome by Mayor James C. Haynes and Hon. Jesse E. Northrup, president of the board of park commissioners. Response by J. F. Cowell, president of the American Association of Park Superintendents. Business meeting. Adjournment at 12 noon.

Automobile ride, 12:15 p. m., to Minikahda club, Lake Calhoun, by way of Park avenue, to Powderhorn lake park and Lake street. Luncheon at clubhouse, 12:45 p. m. Reading of essays and discussions at the clubhouse, 2 p. m. (An interesting programme for this session is being prepared, and the names of the essayists and the subjects of the essays will be sent out with the final programme some time in July. The Minikahda clubhouse grounds offer a splendid view over Lake Calhoun, Lake of the Isles and the city, and it is an ideal meeting place for the discussion of park matters and landscape study.) Adjournment, 5 p. m. Return to headquarters. Start from hotel, 7 p. m., by trolley car for Lake Harriet. Concert and sail on lake.

SECOND DAY, WEDNESDAY.

A 35-mile automobile trip around the park system, starting from headquarters at 9 a. m. Farview park, Glenwood park, Loring park, Kenwood parkway, Lake of the Isles (inspect orange peel, dipper and hydraulic dredges at work), Lake Calhoun, Lake Harriet, Lyndale, Farmstead (greenhouses and administration plant), Minnehaha parkway, Fort Snelling and Minnehaha park. Luncheon at Minnehaha pavilion, 12:30 p. m. Photo taken at foot of Minnehaha falls. Stroll through glen and park, 1:30 p. m. Continue automobile ride at 2:30 p. m., to River road west, Riverside park, Franklin avenue bridge, River road east, university, Van Cleve park, Columbia park, Logan park, and arrive at headquarters at 5:30 p. m. Banquet at 8 p. m.

THIRD DAY, THURSDAY.

A trip to Minnesota's finest lake—beautiful Lake Minnetonka—at 9 a. m., by special cars from front of West hotel headquarters. Arrive at Excelsior, 10 a. m. Special boat for two hours' sail around Lake Minnetonka. Luncheon at Big Island or Tonka hotel at 12:30 p. m. Rest awhile. Final business session, 3 p. m. Steamer to Excelsior, 4 p. m. Special cars for return trip, 4:30 p. m. Arrival at headquarters, 5:30 p. m.

Lake Minnetonka, with its water area of 30 square miles, its 110 miles of wooded and open shores and background of rolling land, its numberless bays, narrows and islands, is the most picturesque of the thousands of named lakes in the state of Minnesota. It is one great park, attractive and fascinating from every point of view. To visit Minneapolis without seeing Lake Minnetonka cannot be permitted.

The park board and different organizations of the convention city will act as hosts of the society, providing for the entire entertainment herein outlined. The morning trains from all directions arrive between 8 and 9, and the evening trains leave between 8 and 9, so that it will be possible for all members coming to the convention to attend the programme from beginning to end. The West hotel, selected as headquarters, is a first-class hotel with ample accommodations. It is centrally located, within

10 blocks of all the railroad stations and five minutes' walk from the city hall.

It was originally intended to make this convention a Twin City affair, but the St. Paul authorities withdrew from participation, and may extend a separate invitation to visit their park system. For that purpose the fourth day of the originally mapped out four-day meeting would be available. The officers of the A. A. P. S. and the Minneapolis people are in hopes that this convention will be well attended, and the fact that the convention city is about half way between the two coasts should be an inducement to all park superintendents and other officers of park administration to meet for deliberation, study and advancement of park development and maintenance in all its many branches and needs. We want the easterners to come and see the possibilities of the northwest, and we want the westerners to meet the easterners, join the association and help along the good work mapped out by our national association. Therefore get ready for Minneapolis, the city that "makes good."

Desirable Fruits for South Dakota.

Geo. H. Whiting of Yankton, in his address under the above title, delivered at the nurserymen's convention at Milwaukee, Wis., June 10-12, said in part:

Fruit growing in South Dakota is not all sunshine. Changes of temperature are sudden and severe. We are also subject to extreme dry spells and extreme wet ones. Our soil is very deep and rich, our trees make a very rapid and often a very heavy growth, so that they are not in the best condition to endure the severe winters when they come. The winds sweep almost unchecked from one end of the state to the other, giving us one day the temperature and air from the hot plains of Texas and within 48 hours thereafter the chilly blasts of Manitoba. It is true that we have already numerous small belts of comparatively small trees that are having some effect on the climate. I can see quite a marked change in the climate and aridity of the atmosphere in the 29 years that I have lived in Dakota, but this is a mere nothing to what I hope the next 29 years will bring forth. The good work of tree planting for shelter belts has just begun in the west, and I predict that the next 25 to 30 years will witness great changes in our climatic conditions, and I believe that the present and near future work of our nurserymen should be largely the production of the class of trees suitable for shelter belts and forests and the encouragement of planting the same by our farmers.

For the present we must confine ourselves to certain hardy classes and varieties of fruit trees. It does not pay us to grow the peach, the pear or even the foreign plum or the sweet cherries, and this year we feel as though we are not in it at all on any of the tree fruits. With an extremely warm April, with the mercury up to 94° in the shade, and then going down to 20° early in May, after our fruit trees were in full bloom and many of them in full leaf, our trees looked rather tired, and I can assure you our fruit growers felt just a little tired, too.

We do, though, in ordinary seasons, grow quite successfully apples, native plums, sour cherry, compass and sand cherry and such small fruits as strawberries, currants, gooseberries, red and black raspberries, dewberries, juneberries, hardy varieties of grape and, in wet seasons, some fine blackberries, also the little red buffaloberry, which makes a very delicious jelly. In apples we must confine ourselves to such ironclad varieties as Duchess, Wealthy, Patten's Greening, Hibernal, Anisem, N. W. Greening and others of like hardiness. In crabs and hybrids we have quite a list that succeed quite well. In fact, the crabs do better, I think, than they do farther south. In plums such varieties as DeSoto, Forest Garden, Wolf, Hawkeye, Cheney, Surprise, Wyant and Miner all do well. The Compass plum or cherry is also entirely at home with us. This is a hybrid supposed to be a cross between Miner plum and our native sand cherry. It is in reality more plum than cherry, but we choose to call it a cherry because we can grow it in the northern part of the state where we cannot successfully grow other cherries. In the south part of the state we grow quite successfully Early Richmond, Wragg, Ostheim, Montmorency, the Morellos and others of like hardiness. In grapes we grow Concord, Worden, Martha, Moore's Early, Janesville, Beta, etc., in the south part of the state, while in the north part of the state it is not safe to try anything except the Janesville, Beta and native wild varieties. In currants the Red and White Dutch, Victoria, North Star, White Grape, Fay's Prolific, Crandall, etc., all do well. In gooseberries we confine ourselves mostly to Houghton, Champion and Downing. Raspberries: Turner, Louden, King, Minnetonka, Ohio, Tyler, Older and Gregg are best. In blackberries we plant mostly Snyder, Stone's Hardy and Ancient Briton, and when the season is just right we sometimes get an excellent crop, but we fail more times than we succeed with blackberries. In strawberries we are very successful with the Warfield, Crescent, Bederwood, Brandywine and Senator Dunlap; the latter is everybody's berry and does well anywhere, and we sometimes think that it would be about as well if we only had this one variety, except for the sake of prolonging the season by growing early and late sorts.

Desirable Fruits for North Carolina.

J. Van Lindley of Pomono gave a list of the best and most suitable apples for various seasons, peaches for market and private use and plums for market, also Japan plums, in his paper read June 12 at the recent convention at Milwaukee. In his introduction the essayist called attention to the climatic and other conditions of the state which, in the 600 miles east to west, vary greatly. Consequently there are few kinds of fruits known to the American trade but that do well in some of the sections of the state. In the valleys the pippins, Spitzenbergs and Northern Spy flourish, and anyone interested would be well advised to obtain a copy of his list, which, we regret, owing to lack of space, we are unable to print.

S. J. REUTER & SON, Inc.,
WESTERLY, R. I.

Glen Cove, N. Y.

The Nassau County Horticultural Society held a rose show in Pembroke hall June 23, which brought together not only roses but nearly all other flowers in season. Special prizes were given by Ernest Pester, Glen Cove, a silver cup, silver medals by President Jaenicke and Chas. Bertanzal, Roslyn, besides a number of prizes offered by the society. Some things were put up for exhibition only, including a fine display of conifers from West Island, by J. F. Johnston, superintendent to Paul Dana, Esq. The exhibition committee, of which S. J. Trepess was chairman, deserves great credit. President Jaenicke and Chas. Bertanzel acted as judges to the entire satisfaction of all.

AWARDS.

Collection of roses.—(Silver cup) Geo. Wilson, gardener to Mrs. B. Stern, Glen Cove, first; Alex Lothian, gardener to E. R. Eldridge, Esq., Great Neck, second.

Collection of sweet peas.—(Silver medal) C. W. Knight, gardener to Mrs. E. R. Ladew, Glen Cove, first; S. J. Trepess, gardener to J. R. Maxwell, Esq., Glen Cove, second. Certificate of culture, Geo. Ashworth, gardener at Queen estate, Glen Cove. Honorable mention, Henry Gant, gardener to H. I. Pratt, Esq., Glen Cove.

Collection of outdoor flowers.—(Silver medal) Valentine Cleres, gardener to F. S. Smithers, Esq. Vote of thanks, Ernest Pester, Glen Cove.

Collection of rambler roses.—Certificate of merit, Henry Gant.

Vase of rambler roses.—Oscar Adder, Roslyn.

Delphiniums.—Cultural certificate, Alex Mackenzie, gardener to Percy Chubb, Esq., Glen Cove.

Lilium candidum.—Geo. Wilson.

Japanese iris.—A. Lothian.

Phlox Drummondi.—Oscar Adder.

Gloxinias.—C. W. Knight, first; V. Cleres, second.

Orchids.—A. Lothian, highly commended.

Clerodendron.—Certificate of culture, C. W. Knight.

At the close of the exhibition the members met and discussed some important matters. It has been decided to make Pembroke hall the headquarters of the society and to hold its regular meetings on the second Wednesday of each month, as formerly. J. K.

Rose Bugs on Grape Vines.

ED. AMERICAN FLORIST:

Kindly give me some information how to get rid of rose bugs on grape vines. They are at times so numerous that they ruin the blossoms.

SUBSCRIBER.

"Subscriber" will find it rather a difficult matter to rid his grape vines of rose bugs, as the use of different insecticides doesn't seem to check them to any extent. However, a very satisfactory way is to cover the vines with mosquito netting, which may be considered rather expensive, but if removed carefully and preserved it will last for several seasons and consequently prove to be quite a cheap and effective protection for the vines. E.

ALBERT M. HERR,

LANCASTER, - PA.

European Horticulture.

FROM THE BRITISH TRADE PAPERS.

ARSENIC IN WEEDKILLERS.—At a meeting of the Botanical Society of Edinburgh J. Rutherford Hill made a statement regarding the use of arsenic in weedkillers in which it appeared that long after the rains had washed away the other chemical constituents the arsenic remained in dangerous quantities and had resulted in the death of fowls though its effect as a weedkiller was gone, the walks being covered with a vigorous growth of weeds. The indications were that caustic soda, common salt and other chemicals killed weeds but that it would be no loss to horticulture and a distinct gain to the community if the use of arsenic was prohibited by legislation. He mentioned the fact that in France, animals pastured under olive trees treated with arsenical preparations had died from the effect of the poison.

DIMORPHOTHECA AURANTIACA.—One of the most interesting of novelties exhibited at the Temple show was one recently introduced by Barr & Sons, from Namaqualand, belonging to the compositæ. It is a half-hardy annual, and requires the same culture as other half-hardy annuals, viz., sown in gentle heat in March or April, or outdoors during May and early June, in a sunny position. The dazzling apricot-orange flowers of Dimorphotheca aurantiaca, with glossy surface and black central disc, are very pleasing.

LOOK OUT!

I Sting! Prices Down!

ROOM! ROOM!!

We Need Room.

LOOK! LOOK! LOOK!

In order to place our big importation of **Palms, Araucarias,** etc., we are slaughtering prices of **Bedding Plants** down to an almost shameful condition of affairs,

Just think? The best variety of **Scarlet Sage,** Clara Bedman or Bonfire 4-in. pots, of which we generally never have enough at $12.00, that ugly bee above has now stung the price down to $5.00 per 100 $45.00 per 1000; no less than 100 at this price are sold in one order.

	Per 100
Begonia Vernon and Erfordi, 4-in.	$5.00
Fuchsias, 4-in.	6.00
Cannas, French, best well-known varieties, 4-in.	5.00

Clematis, the true Jackmani, 6-in. pots, 3 feet, 35c to 40c.

Cobea Scandens, 4-in., staked up, 2 ft. high, worth $15.00, cut down to $5.00 per 100.

Don't forget that we lead the world in **Moonvines.** Watch and be careful that you don't buy Morning Glories for Moonvines, 4-in., $12.00 per 100; 2½-in., $5.00 per 100.

GERANIUMS.

S. A. Nutt, John Doyle and some pink, 4-in. pots. $7.00 per 100; and mixed varieties.

Mme. Salleroi for borders, strong plants, 2½ and 3-in., $4.00 per 100.

The following plants are cut down to $2.00 per 100, 2½-in. pots:—Marigold (Eldorado and Gold Ring, 3-in), Petunias (Inimitable and California Giant), Nasturtiums, Heliotropes, Phlox (Drummondi), Dusty Miller Lobelia (blue compacta and trailing), Summer Chrysanthemums, Sweet Alyssum (Little Gem), Ageratum (best blue, 3-in.), Verbenas, Torenia Fourneri, Kenilworth Ivy.

Victoria Asters, 2½-in. pots, separate colors, $2.00 per 100.

Now is the time to plant **Cosmos,** We have the best improved strain in three separate colors, red pink and white, three plants in one pot (3-in. pots) strong plants, raised in cold frames. Price: $5 00 per 100.

Solanum, or Jerusalem Cherries. We carry the best improved strain called the Multiflorum, always laden with big berries. Price: 2½-in. pots, $4.00 per 100.

Boston and **Scottii Ferns,** 4-in., 20c.

Whitmani Ferns, 4 in., 25c.

Kentia Belmoreana, 5¼ to 5½-in. pots, 22-25-27 in high 50c to 75c; 4-in. 20 to 22 in. high, 35c to 40c. **Forsteriana,** 5 to 5½ in., 50c to 75c. Just received per steamer Manitou, a consignment of larger **Kentia Forsteriana;** price, $1,00, $1,25, $2.00 to $2.50 each.

Araucaria Excelsa Glauca, spring of 1907 importation, suitable for the lawn and porches, only specimen plants left, 7-in pots, 6 years old, 5 tiers 25 to 30 35 to 40 in. high, same in width, $1.50, $1.75, $2.00 $2.50, $3.00 to $4.00 each.

Araucaria Excelsa Glauca, May 1908 importation, 3 tiers, 6-in. pots, $1 00 to $1.25.

Araucaria Robusta Compacta, May 1908 importation, 3 tiers 6-in. pots, beautiful plants, $1.25 to $1.50.

Araucaria Excelsa, May 1908 importation, 3 tiers, 6, 8 and 10-in. 40c; 3 to 4 tiers 5-in. pots, 5 tiers, 5½ to 6-in. pots, 10, 12, 14, 16 to 18 in. high, 50c, 60c, 75c to $1.00 each.

Bay Trees, just received, per steamer Manitou, 6 ft. high from top of tub, 30-in. crowns, $12.00 per pair.

All goods must travel at purchaser's risk only Cash with order, please.

LARGEST STOCK OF ALL

Belgian Plants

AZALEAS, ARAUCARIAS, SWEET BAYS, PALMS, BEGONIAS, GLOXINIAS, ETC.

LOUIS VAN HOUTTE, PERE,

GHENT, BELGIUM.

Davenport, Ia.

Business is rather dull at present, but of course that is to be expected at this time of the year with all kinds of roses and other flowers outside. Better and more roses are seen around the city than for years owing perhaps chiefly to the mild winter. Several large weddings the past week have helped some, and several are billed for the next week. Rose planting is well under way, and will be completed within the next few days. Carnations in the field are looking fine—having all the rain and warmth to assure a good healthy growth.

The fourth annual strawberry feast took place at the house of Ewoldt Bros. on the evening of June 18. A good number were in attendance and all had a fine time. The evening topic was "Suitable Soils for Roses, Carnations and Chrysanthemums," the president calling on each member for his experience, which brought out some very valuable suggestions. It was decided to hold the annual picnic July 21, and the committee appointed at the June meeting will continue and make all the arrangements. It was decided to hire a boat and make a 10-mile trip down the Mississippi to Linwood park; baseball, racing, dancing, tug of war, etc., will be features of the day.

H. H. Hensly has leased the Meyer place at Fifteenth street, Rock Island, Ill., formerly run by Henry Meyer. (Another florists' paper has it that he will now have the largest establishment in the Tri-Cities. Not yet Mr. Hensly.) There are 10 places larger by a good bit.

An event will take place on the evening of June 24, that will interest a large number of florists throughout the country, the marriage of John Staack of Moline, Ill., to Miss Goenne of Davenport. The bachelor club hates to lose you John, but our best wishes are yours.

A 5-10-cent store here had a sale on ferns the other day, selling 5-inch plants at 10 cents. These same plants would sell at a flower store at 50 cents and would be cheap at that.

Adolph Arp has sold his interests in the Davenport Nursery Co. to Miss Waltman, and will devote his time to landscape gardening.

— Fortman, of Behring and Fortman, has sold his interests to Henry Behring and will retire from the florists' business.

It is reported that Henry Behring is to fall a victim of leap year in the near future. Don't surrender too easy Henry.

CARRILLO & BALDWIN, **Secaucus, N. J.**

Negaunee, Mich.

Work on the erection of the new greenhouses for the Cleveland Cliffs Co., proprietors of the Negaunee Nursery and Greenhouses, has been started and will be pushed as rapidly as possible. The site is the vacant space south of the old Mackinaw depot, between Gold and Silver streets. Grading for the foundation and for the shrubbery gardens, which was started some weeks ago, was finished last week, and the first carload of material has arrived.

The new greenhouses were made necessary by the growth of the business within the past few years. The plot occupied by the present greenhouse has not been large enough for the additions deemed necessary. Besides the old houses are beginning to show signs of dilapidation and within a few years they would have had to be entirely rebuilt. The new greenhouses will consist of six buildings, each 21x115 feet, connected by a common passageway. The entrance will be on Gold street.

Outside of the glass the principal material used in construction will be steel. The little woodwork that will be used will be red cypress, which withstands natural decay better than other woods. The material used is made by the Foley Manufacturing Co., Chicago, which makes a specialty of greenhouse construction, and all of the steel and most of the woodwork will come ready for setting in place, so the job will take a comparatively short time. The building for the power plant and the office will be located just south of the Mackinaw depot, but a start will not be made on it until the greenhouses are completed, as there will be no urgent need for it until fall.

GERANIUMS.

OUR SPECIALTY

We are preparing to grow Geraniums on quite an extensive scale next season, and are making very interesting prices on orders booked now for delivery during the fall and winter; send us a list of what you can use and when you will be ready for them and see what we can do for you. Only plants from 2-in. pots; we do not send out rooted cuttiugs.

We have a splendid lot ready for immediate shipment from 2-in. pots, in fine shape.

Standard Sorts, at $2.00 per 100 and up. We will send 1000, 50 each of 20 varieties, our selection for $18.50; single or double, all good sorts; a splendid collection to stock up on.

	Per 100
Smilax, strong plants	$2.00
Coleus, Golden Bedder and Verschaffeltii, 2-in., $2.00; 3-in	3 00

Those Red Pots
"STANDARDS"
FULL SIZE AND WIDE BOTTOMS,
BULB PANS AND AZALEA POTS.
DETROIT FLOWER POT M'F'Y.
HARRY BALSLEY, Rep. DETRIOT, MICH. 490 Howard St.

London.

At an exhibition of the Royal Horticultural Society of England held in London June 9, Pryethrum Langport, a large crimson reflexed variety, was given an award of merit, as was also Veitch's Magenta strain of stocks, a grand selection exhibited by R. Veitch & Son, Exeter.

R. H. Bath, Ltd., of Wisbech, exhibited their fine single pyrethrum, Favorite, still the best for cutting. P. Gen. French, a shade darker scarlet than P. James Kelway, seems the best for market work

H. Cannell & Sons, of Swanley, exhibited fine specimens of Rose Minnehaha three feet high.

The rambler roses are selling well now in Covent Garden market. Dorothy Perkins is a special favorite and Tausendschon grown by J. Sweet is very beautiful, a superb rose. Among ivy leaved geraniums Galilee is the leader.

THE BEST WAY TO COLLECT AN ACCOUNT

is to place it with the

NATIONAL FLORISTS' BOARD OF TRADE
56 Pine St., New York.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

FRESH WATER

WITHOUT STORAGE—DIRECT FROM

the source of supply, throughout the nursery, by using the Perry Pneumatic water system. A new and simple solution of the water problem. Write for particulars.

UNITED PUMP & POWER CO.
Old Colony Building, CHICAGO.

ALLIANCE, O.—The greenhouses of the Lamborn Floral Co. were badly damaged by wind in a storm June 19.

NEW CASTLE, IND.—A Greek laborer employed at a local greenhouse died of Bright's disease June 19, and his fellow countrymen fled in a body, believing his death was due to working in glass-covered houses.

HAMMOND'S SLUG SHOT

Used in water kills Worms and Caterpillars on the

Elm, Walnut and Catalpa Trees.

The Elm tree beetle is destroyed. The large gray and white caterpillar which defoliates Black walnut. This has been proved for over 25 years of constant service. We use a 5 lb. package to half barrel of water.

(Copy.) Connersville, Ind., June 10, 1908.

MR. BENJAMIN HAMMOND, Fishkill-on-Hudson, N. Y.:

Dear Sir:—I have just returned to Connersville, Ind., having spent several months, since Jan. 1st, in Alabama.

Two years of utter neglect have given the catalpa sphynx full control of the great L. & N. plantations, and I had to watch this terrible destruction from day to day, with no apparatus to apply the remedy.

Your generous supply of Slug Shot, etc., was on hand, but nothing except a small hand spray to work with. On my own place I used this hand machine, one nozzle, and hired a large force of men to hand-pick the worms. From the first the Slug Shot killed all the worms where we used it. The two barrels of Slug Shot, 600 lbs., were soon used up, and I ordered more from the purchasing agent, at Louisville, Ky.: at any rate we are using Slug Shot with most beneficial results this season. We use about 50 lbs. per day.

The leaves have come out, and from appearances no one would imagine that these trees had been entirely defoliated only a fortnight before, looking like dead sticks.

Yours truly, JOHN P. BROWN.

HAMMOND'S SLUG SHOT KILLS ALL KINDS OF INSECTS

Sold by Seed Dealers all over America.

FROM THE FRENCH TRADE PAPERS.

ASPARAGUS BLANCHED IN TUBES.—Experiments in blanching asparagus shoots in tubes of pottery, eight inches long and about three and one-half inches in circumference are said to be successful. These tubes are slipped over the shoot as it first appears, filled lightly with fine soil, so that the asparagus reaches the top of the tube in darkness, is then cut and is found to be as finely blanched as if grown in the deep beds, with the advantage of being much earlier.

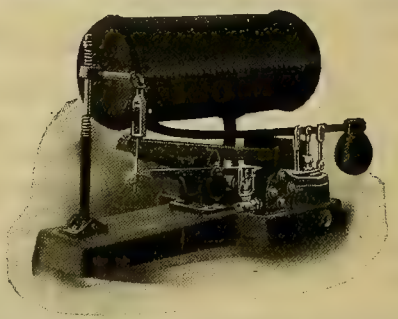
ARBOR DAY IN FRANCE.—The Touring Club of France is doing a notable work in aiding the re-foresting of France and encouraging local plantings. About $1,000 in prizes have been offered this year for work done in various districts; arbor days have been instituted in schools, and money set aside to furnish young trees in cases where the government commission is not ready to meet the demand.

THE LYONS ROSE.—A new hybrid ever-blooming tea rose of Pernet of Lyons. The flower is a superb shrimp pink at the extremity of the petals, center a coral or salmon-shaded red, toned with chrome yellow; very large, globular, very fragrant, and a vigorous grower. It is surely destined to a great success.

"DETROIT"
Automatic Return Steam Traps
FOR STEAM HEATED GREENHOUSES.

A Great Coal Saver.

An Economical Boiler Feeder.



Worth Double the Price.

Ask Frank Holznagle, Florist, Detroit, Mich.

"Detroit" Traps will keep entire system free from water at all times, making every foot of heating surface hot and efficient, returning automatically all water of condensation directly into the boiler—hot—and without a pump or injector.

Write us number of feet and size of pipe in your greenhouse.
IT WILL PAY YOU.

Passaic, N. J.

The spring trade has been of the best. Bedding and general planting has been good, while graduation and high school exercises kept retailers busy last week, the same dates being selected by many schools. June weddings have not been as plentiful as usual. The rose growers have nearly all stopped cutting now, but so far stock of most kinds has been plentiful enough to go around. Collections are extremely bad.

M. McAllister & Co. have been busy with weddings and other decorative work including a large decoration at Hackensack.

ST. CATHERINES, ONT.—The flower show of the Horticultural Society, held at the Armory June 20, was attended by large numbers, almost 100 members of the Toronto society coming over on the morning boat for the occasion. The display of roses was probably the best ever seen in Ontario, certainly the best yet displayed in this city. Roses are almost two weeks earlier this year than last. The exhibits of strawberries and early vegetables were also very encouraging.

Here Is What The Man From Pennsylvania Thinks

Conshohocken, Pa., March 26, 1908.

Lord & Burnham Co.

Dear Sirs:

The "Burnham" Boiler I purchased from your Agent, is here to stay.

No more getting up at night. No watchman required —it takes care of itself.

I have with one coaling, kept steam for 24 hours.

I heat with this boiler a greenhouse 240 x 20 feet, and my nine-room house, with the greatest satisfaction.

I have used six boilers in my experience, but none can touch the "Burnham."

Yours truly.

WINFIELD S. HARRY.

Send Your Advertisements Early.

Fredericton, N. B.

Another few days and we will consider the volume of business for the spring about closed. In some lines we were short and in others we had a surplus. We find that flower growing is declining here and I find in speaking to florists in St. John they have the same experience. Last year we had a surplus of tomato plants; this year we were short; so one cannot just gauge the demand and supply of any one article in any season. Altogether trade has been satisfactory since February or March. We have had tropical weather with the exception of a few days, for two weeks, so that crops are well advanced. We never remember in our experience of 35 years seeing better prospects for a coming harvest. Our peonies are in bloom; snowballs and other shrubs are about matured and the city looks beautiful clothed in living green. We are highly favored in not having a surplus of unemployed here as in large cities. J. B.

HEAT AFFECTS FLOWER SUPPLY.

The increasing heat of the past few weeks has cut short the flower supply, and local florists have been obliged to depend to some extent upon shipped-in stock. The trade in funeral flowers continues very brisk. The death of Miss Mollie Lynam, a young woman well known in busines circles and very popular, has made an unusually large call, exhausting the supply for the time being. Miss Lynam was a great flower buyer herself and sent many funeral pieces. Her funeral was noticeable for the unusually number of large handsome pieces, as well as for the quantity of smaller designs. Seldom has the death of any citizen called for a more profuse floral display. Already the growers have prepared their beds and planted the winter roses. These have broken away nicely and are in good condition for the season. Both carnations and roses are short in crop; the old stock is about done. Sweet peas, which we have had in such profusion, are also through flowering.

NOTES.

Florists in this part of the country seldom indulge in an outing and were never known to have a picnic or excursion of any kind. "Don't you know a Nashville florist never takes a holiday?" said a well known grower in answer to the question. There is no florists' club or organization of any kind, and there never has been, though there are any number of growers, large and small, around the city.

Albany, N. Y.

TRADE EXCEPTIONALLY GOOD.

Business during the past week or two has been exceptionally good owing to the numerous social functions that have taken place in the city and vicinity. Whittle Bros. had about a week's work for the commencement at Williams' college at Williamstown, Mass. The college is an old and well established one and has numbered among its graduates President James A. Garfield and other men of note. One of the societies connected with the college during commencement week celebrated its fortieth anniversary. Fred A. Danker received an order for the table decorations on the occasion. A novel center piece supplied by him consisted of a straw hat of the style worn by the students in the college when the society was founded in 1868. The hat was filled with American Beauty roses and made a novel design. The table was also decorated with American Beauty and Adiantum Farleyense laid on the cloth. At each plate was a buttonhole bouquet of American Beauty buds. Each guest had also an engraved card showing the straw hat and with his name written upon it.

The republication ratification meeting on June 23 and the reception to graduates of the state normal college furnished Eyres with considerable work. Eyres also supplied two designs for the funeral of Hon. Grover Cleveland, formerly president of the United States. The two pieces sent to Princeton, N. J., were a large wreath of bronze galax with Cattleya Trianæ tied with cattleya ribbon and two large fronds of Cycas circinalis with a bunch of 500 lily of the valley. The wreath was contributed by Mrs. Daniel Manning, widow of a former secretary of the treasury in President Cleveland's cabinet. The cycas fronds were the contribution of Mrs. J. V. L. Pruyn, widow of a former very prominent and influential citizen.

Fred Goldring, president of the local Florists' Club, was in attendance at the dedication of the new Oddfellows' home at Stuyvesant on June 24 as one of a joint committee from the local lodges in this city appointed to act on the gala occasion. The event was a notable one in the local annals of the fraternity.

The Rosery, Maiden lane, was called upon to furnish decorations for a wedding at Central Bridge, Scoharie county. The order called for large numbers of American Beauty roses for the house decoration and eight arm bouquets of Killarney roses tied with Killarney ribbon.

The Florists' Club held its monthly meeting on Thursday of this week at Fred Goldring's establishment at Slingerlands. R. D.

SALINA, KANS.—Edward Tatro will erect new greenhouses in the near future.

They Admit More Light

Because they have wider glass, fewer and smaller framing members, and no gutter at eave.

What is the state flower of Delaware? S. S. T.

Peach blossom, chosen by the public school scholars.

In every flower that blooms around
Some pleasing emblem we may trace.
Young love is in the myrtle found,
And memory in the pansy's grace;
Peace in the olive branch we see,
Hope in the half-shut iris glows,
In the bright laurel, victory,
And lovely woman in the rose.

—Chazet.

SUGGESTIONS FOR CUT FLOWER GROWERS.

Herbaceous Phloxes.

Given a moderately cool soil and a moist position the hardy herbaceous phloxes need little attention beyond ordinary division every few years, but on thin, hot soils it is difficult to keep the plants growing until the stems and flowers are complete. Mulching with a couple of inches of semi-decayed manure, or even cut grass, if no manure is at command, is a great help along this line now, and a light shading, if it can be arranged, will result in flower spikes much better filled up in the center than those growing without this aid. Good whites and deep reds are the best for cutting, and those with round flowers are much superior to the older, somewhat starry forms. Plant out any young stock from cuttings and keep them growing freely as long as they will. There are often young shoots push up from the base of the old plants now, and these may be rooted if stock is short. Phloxes should be cut dry and placed in a cool room for 12 hours before shipping, and they need very careful packing.

Gardenias.

Keep up a brisk and very moist atmosphere where the young gardenias are, whether in pots or planted on benches. To be healthy, these plants must grow freely; they soon become overrun with insects if stunted in any way. Never allow the young stock to get badly pot-bound before planting, and if necessary shift them on. But they should not be shifted into very large pots, as the bench soil should not be deep and planting is not easy in this case. Keep the buds picked out on sight as they form, and keep the plants well sprayed, to keep insects in check. Healthy established plants will stand almost full exposure to the sun, but those that are not fully established and all newly planted stock must be shaded. Old plants cut hard back two months ago will now be getting well into growth again. Thin the shoots when necessary and treat them similarly to the young stock. A thin top-dressing of rich soil may be given now, and, as the benches are full of roots, see that they get plenty of water and an occasional dose of liquid manure. If scale or mealy bug puts in appearance see that it is checked at once by sponging or spraying, for no plant can be healthy or satisfactory with the drain on its resources that the presence of these and other insects entails.

Delphiniums.

Where there are beds of seedling delphiniums flowering now it is good policy to select and mark all the best and most telling colors for propagation. It is just as easy to grow good, clear, light and dark blues as it is the washed out looking colors sometimes seen, and a gradual weeding out of all the latter will result in an excellent strain of good varieties. A numbered stake may be put to the center of the clump and a record kept of the characteristics of the variety. Young seedling stock should not be allowed to flower, as this is weakening to the plants. Keep the soil around them well cultivated and clean to allow the growth to keep green as long as possible, as the more growth made this season the stronger the shoots will be in spring. It is just as well, too, to save seed from the best forms if any is saved, for although it will not always come true, good varieties are most likely to produce seedlings of good quality, and vice versa. Seed should be sown as soon as ripe and the flats in which they are grown kept under observation as they have the true herbaceous habit even in the youngest stages.

Callas.

When the California bulbs arrive they may be potted at once and stood outside in the full sun. It is not necessary to water them much, beyond the first soaking to settle the soil, until they commence to grow, when the soil will be gradually moistened as the new roots develop and occupy it. Where there are still some green plants left, lose no time in getting them outside in the full sun to get a thorough baking before being potted. Where stock is short and the bulbs are to be grown on at home save all the small pieces and corms that get broken off in handling and plant them upon a bench in some house, where they are out of the way as much as possible. The plan, still followed, of turning the plants out of the pots and laying them out in the full sun is not as good as laying the pots containing them on their sides in a

similar position to dry off a little more gradually. This treatment is weakening to the bulbs and it is important that these are kept as strong as possible. In some cases money is wasted in this way, owing to the bulbs running out before their time, though it cannot be denied that in some localities and soils these bulbs do deteriorate rapidly. In others they may be grown on for an indefinite period and improve annually, and young healthy stock is easily worked up by means of the side bulbs and offsets mentioned above.

Bouvardias.

Where the young bouvardias were planted in the open border recently they will now be getting a good hold. Any others that have to be planted should be got out as soon as possible, but any small plants that are not yet fit for planting outside may as well be kept under glass for this season. An ideal situation for these plants inside is a house that has the glass taken out of the sides and plenty of top ventilation night and day. In such a house, planted on firm soil in the benches and sprayed three times daily, the plants give very little trouble and make a strong, solid growth that later on will produce flowers in abundance. The tendency in the early part of the season to produce flowers is very marked, especially in such varieties as Davisoni, Hogarth and the beautiful doubles, Alfred Neuner (white) and President Garfield (pink). The erect growing Humboldtii and Jasminoides do not give quite so much trouble in this direction, but the old coral red Leianthe is perhaps the worst of all in this respect. In all cases the shoots must be pinched as soon as they are seen to be heading for flower and the effect of the constant pinching will be a bushy plant with plenty of shoots and also a number of stout strong shoots from the base. These vigorous shoots must be pinched when they reach about 10 or 12 inches in height to balance the plants a little, much as rose shoots are pinched in early spring. And this is all that need be said about them now. Quite cool, airy conditions and exposure to every ray of sun will produce plants like privet bushes from which a great quantity of the valuable flowers may be cut in winter. Constant spraying, pinching and feeding is also necessary for the outdoor plants.

Mignonette.

It may seem rather early to be giving instructions about mignonette, but it is better to do this in time and then anything needed and not to hand may be obtained. The first sowing may be made at the end of the month. Fill a sufficient number of 2½-inch pots to within a little of the rims very firmly with sandy soil, and stand these level on a bench. Although drainage is not absolutely necessary in these small pots, a crock in each, hollow side down, is an advantage, as it is along the line of keeping the soil sweet, a very important point in the culture of mignonette. Give the pots a thorough soaking of water so as to reach every part of the soil, and allow them to drain. Have a little fine dry soil and the seed and place about four seeds in the center of each pot, covering them with a little of the soil and giving this a tap with the bottom of another pot to level it. In a cool house, covered with mats, paper or some other material, the soil will need no more water until the seeds have germinated, when the covering should be removed at once before the little plants turn color. Early in their life they should be thinned to two in a pot and eventually to the stronger of these, one being sufficient to leave. Further notes on this important crop will appear in due course, but we would like to recommend all growers to clean their pots before filling. There are many who think the time is wasted, but it is not. The plants will turn out of them clean instead of all broken up at the balls, and such plants start much better. Washing is not always necessary. A rub with the hardened hand of the potter or with a wisp of hay or old cloth will do the business in most cases, and this little trouble is well worth while. Stand the pots perfectly level and as thick as they will go, as this renders it easier to keep them watered. New York Market is an excellent variety to grow for cutting.

A Good Early Aster.

Florists who can use an extra early aster, should try the new June flowering strain sent out this year. It is as good, if not better, than Queen of the Market and much earlier. The proper way to grow these, is to sow rather late, say April 11 and, as soon as well up, dibble out three inches apart either in cold frames or on greenhouse benches and let each plant produce one good flower. That is let them stay there and make the crop.

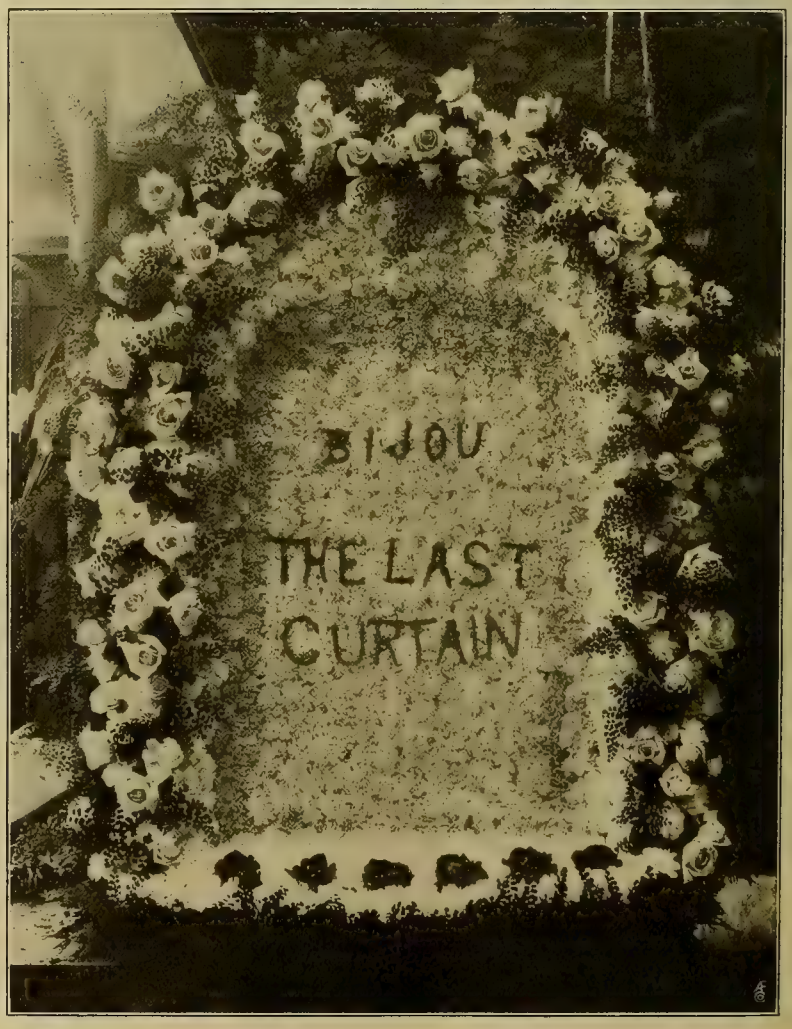
MARKETMAN.

THE RETAIL TRADE

Summer Flowers in the New York Stores.

The gladioli were about 10 days earlier this year than they were last. Though they cannot be used for all purposes, at their best they are always beautiful and interesting. If they served no other purpose they would be worthy of a place in any first class store for show window purposes, at the time when most of the other summer flowers go into a melting mood when placed in the windows. The gladioli, however, are useful for other purposes and, in the high state of perfection to which the specialists have brought them, they take a prominent place among the summer flowers mentioned in previous notes.

A few asters have appeared but they are not of the quality as yet that attracts much attention. No forecast of summer business would be complete if the asters were omitted, as they occupy about the same relative position in the work of the designer that the carnations do in winter. In the eye of the floriculturist, the aster crop is important as, in the event of its failure, there is no adequate substitute, in the season. The feverfews and candytuft are very useful, particularly to the smaller stores, and both fill a niche, but they, useful as they are, but comprise a part of that



DESIGN BY R. A. LATHAM, MINNEAPOLIS, MINN.
For Employes of the Bijou Theater.

Mrs. Walter Wright Sweet Peas and Mauve Ribbon.

Lily of the Valley With its Own Foliage.

TWO GOOD WREATHS BY W. L. HUNDERTMARK, OF M. McALLISTER & CO., PASSAIC, N. J.

great collection that is classed as minor stock.

Gypsophila is now seen in quantities in the wholesale and retail stores. While of itself it is but an illusive quantity, mixed with bright colored flowers, notably cattleyas, the effect produced is very fine. This is commended particularly to designers who use cattleyas in funeral work.

Two Good Wreaths.

The two excellent wreaths illustrated herewith are the work of W. L. Hundertmark, Passaic, N. J. The one with the ribbon bearing the word "Mother" is of mauve sweet peas Mrs. Walter Wright, the ribbon being of the same color, the letters painted on in water color rather a deeper tint, shaded with fine white lines. The other wreath is of lily of the valley used with its own foliage and a few sprays of adiantum. Both are very simple, but of excellent workmanship and very artistic.

The Water Hyacinth Again.

In the battle which has been waged against the water hyacinth which chokes up many of the rivers in the southern part of the United States, the matter has been complicated to a serious degree by the fondness which cattle exhibit for this plant. It is almost without food value, but there is something about it which attracts the animals, and they have been known to be lured to death in the efforts to secure the hyacinth.

Plant Perspiration.

A sunflower four feet high, with the usual leafage, gives off in 12 hours from 20 to 30 ounces of water in the shape of perspiration. It has been calculated that an acre of cabbage plants, 18 inches apart, gives off every 12 hours over 10 tons of water through their leaves. Most agricultural plants exhale during the period of their growth more than 200 times their dry weight in water.

HERBACEOUS PERENNIALS.

Herbaceous Perennials for Cut Flowers.

It cannot be denied that many of the finest perennials and bulbous and herbaceous plants generally, have been, in the past, considerably neglected by American growers of cut flowers. Fortunately there are signs that the lack of interest in these beautiful plants is becoming less marked. Nurserymen are finding a much better demand for the best class of herbaceous perennials than formerly; they are more frequently seen and in greater numbers in retail stores and the flowers grown are better. When we consider that the great majority of these are perfectly hardy excepting in the coldest localities and flower abundantly and well every year without the aid of expensive greenhouses and, morever, include some of the most showy and beautiful flowers in existence, it is a wonder that the average cut flower grower treats them with such scant respect and allows them, when he grows them at all, to get along as well as they can in poor soil year after year, whereas, by occasional division or by raising seedlings and giving them good fresh soil, far better results might be obtained. Only those who have given these plants proper attention know how easily they are grown and how profitable they are and it is seldom that anyone taking up their culture relinquishes it. We have in preparation a series of articles bearing on this subject the first of which appears below.

Campanulas.

A very large genus numerically, campanula includes many species not well adapted for cutting though very beautiful as garden or greenhouse plants. Probably almost every species is a perennial but, as will be noted, some of them are better raised from seed or divisions every year and treated as biennials. All the strong growing kinds do well in any good, well cultivated garden soil properly enriched with manure. On poor thin soils the plants keep alive but do not show their true beauty.

Campanula pyramidalis is one of the best in existence and, though not probably as hardy as some other species, it gets along well in many localities. Perhaps the best way to treat this, the chimney campanula, is to raise it from seed in summer, winter the plants in cold frames or plant protectors and plant the seedings out in early spring where they are to flower. Seed may be sown in May and June and the young plants soon make their appearance. Sow the seed thinly and as soon as the seedlings are in the rough leaf prick them out two inches apart to gain strength previous to placing them in their winter quarters. If possible let the bottom of the frame or protector be concreted or floored in some way that the roots cannot get down too deep. The plants will not then suffer from the transplanting in spring. Treated this way hundreds of fine plants may be raised at very little expense and trouble. In warmer localities the plants winter outside with only a little protection of leaves and litter. There are several varieties of C. pyramidalis, the best and most useful being the ordinary blue and white kinds, though some of the intermediate colors and the deeper blues than the type are good.

C. Medium (Canterbury bells) is an excellent species for cutting and possibly the most popular today of all the campanulas. The varieties of this plant are practically endless but here again the deep and light blues and the whites are the best. The flowers have a lower ring of petals standing out from the campanulate or bell-shaped center and this varies in size in the different varieties. In some it is so extended as to resemble a cup and saucer but here again good forms of the old fashioned types

are far prettier and better for the cut flower man. C. Medium may be grown exactly as described above for C. pyramidalis but the Canterbury bells are hardier than the chimney campanula. Both like a moderately light rather than a heavy soil. The plants are hardier in such soils and flower earlier. C. Medium probably comes nearer to being a true biennial than the majority of species.

C. persicæfolia is a very fine species, its beautiful, pure white flowers showing up well against the deep glossy green of the narrow foliage which, as its name implies, has a similarity to peach leaves. There is a double form of this with flowers like miniature camellias, produced on tall spikes and also a blue and a double blue form. The spikes grow about three feet high and are not so much branched as those of C. pyramidalis and C. Medium though perhaps more graceful than either and as a cut flower it is especially beautiful. It may be propagated from seed, but where there are good forms of it these are best perpetuated by dividing the plants in spring or, preferably, by striking cuttings of the young growth. Wait until the young shoots from the base are about two inches in length and root these in a cool frame or greenhouse. The resulting plants must be hardened off and eventually planted in nursery beds to gain strength. Many of them will flower more or less the first year but they will make fine stock for planting the succeeding spring. This is one of the very best perennials and should be much more grown as it would be if its good qualities were better known.

C. Carpathica is a very beautiful bellflower, especially in its white forms. It is a very variable species but in all its forms the flower spikes are loose and graceful, each branchlet being terminated by a large and well displayed open flower. This bellflower is very free and, flowering as it does from June all through the summer months, at a time when indoor flowers are scarce it should be in all collections. C. Carpathica is a true perennial thriving in any good soil and may be propagated by division just as the young shoots are getting leafy in spring. Some of the best of the white flowered forms of this plant bear flowers almost as fine as eucharis and they are excellent for make-up work.

C. glomerata, although not a showy species, has its merits as a cut flower. The spikes rise to a height of two feet or more and are leafy the whole distance the flowers appearing in roundish heads and, occasionally, in the axils of the upper leaves. There are some varieties of this plant that are dull in color and not very showy but there are deep colored and double blue and white flowers that are extremely pretty and useful as cut flowers. The plant is of the easiest possible culture and when once planted it goes on reproducing itself from underground runners that soon make fine clumps. It may be divided at any time when not in active growth, preferably in autumn except in very cold localities where spring division may be practiced. C. Bononiensis, C. latifolia, C. nobilis, C. Sarmatica, C. speciosa and several others may be added to the list if a representative collection of tall flowering sorts is needed, but the above are the best for cutting. There are, however, many dwarf growing beautiful kinds that are excellent for small work or for a display in the borders including the lovely little harebell, a flower as precious as the violet.

BULBS IN THE PARKS OF TACOMA, WASH.

Park Notes from Tacoma, Wash.

The illustrations herewith show some of our spring flowering bulbs at Point Defiance park, Tacoma, Wash., which were simply grand last month when thousands of people enjoyed these gems of the floral kingdom. We have four parks; north, south, east and west of this wonderful city. Each park has a flower garden. We treat all the same, spring, summer and fall, by planting varieties of plants and bulbs, so as to have flowers from the beginning of April until November, sometimes almost up to Christmas. This last winter we had daisies (bellis) in bloom all winter.

This is really a wonderful climate for flowers, if the varieties are carefully selected. All the hardy varieties of bulbs are at home on Puget Sound. We plant our bulbs in October and over 100,000 were planted last fall, 75,000 of these at Point Defiance park. No such number was ever planted in any other park on the Pacific coast. The pictures show what kind of a display of flowers we can get in the far northwest. Before we plant the bulbs in the beds and borders we plant Arabis alpina. This gives a carpet of white the same time as the hyacinths and tulips are in flower. We have 12 varieties of hyacinths, 10 of tulips and 12 of narcissi. We planted 10,000 crocuses in three colors, which we left in the ground permanently, where they will increase.

We have now thousands of pansies in bloom; and we plant great numbers of English primroses for spring blooming and they give great satisfaction. All should see our spring flowers, not on paper, but on the ground. It is one of the grandest sections of country on the face of the earth. Mountains, woodlands, lakes, waterfalls, valleys and the great inland sea. God help all the poor flat-footed gardeners, who always have a hole in their pocket. That's the trouble or I would certainly send all the specials needed and bring you all out here and have your pictures taken on the top of Mt. Tacoma, almost 15,000 feet in the heavens.

All the citizens were in their glory recently decorating the city to give a grand welcome to the boys in blue. The Park Department built a floral arch 56 feet wide and 35 feet high using 30,000 feet of evergreen garlands stretching from pillar to pillar, along the electric wires for 25 blocks. About 15,000 flags were used in this line of march. Our citizens claim the title of "The Gateway to the Orient." Every city has a gateway, but our oriental gate was wonderful, 100,000 people having marched through to greet the sailor boys.

Wright park will soon have a very attractive conservatory, the gift of the Hon. W. W. Seymour. The dome will be 41 feet high; two wings on an angle so as to conform with the landscape, 50 feet long by 20 feet wide, and a large corridor. Statuary will be placed on each side of the walk leading to the cor-

NEW YORK FLORISTS' CLUB OUTING, JULY 1—See Pastimes.

ridor from the streets which we have named "The Court of Honor." We have also just completed the work of placing the statuary of the old Egyptian sphinxes, 10 feet high, the gift of E. J. Bowes, of this city. We have 10 parks, all improved, and numerous city triangles, comprising over 1,150 acres.

R.

Illinois' New State Greenhouses For Floricultural Experiments.

The accompanying illustrations show the plans of the new greenhouses being erected at the University of Illinois, Urbana, for the experiment work in floriculture, by the Foley Manufacturing Co., Chicago. These houses were made possible by a special appropriation for the floricultural interests of the university. In planning for these new houses it was intended that they should be model ones and they were designed especially for experimental work.

The new range will be located on the horticultural grounds in close proximity to the present horticultural building and will be provided with its own heating plant. The plans, as are now being carried out, consist of a service building, a corridor or connecting house and two greenhouses. The service building will contain a large boiler room 49½x26 feet, a work room 25x26 feet, a hallway connecting with the corridor house, an office 13x20 feet, a laboratory 9½x12 1/3 feet and a room for the foreman 10x12 feet. Under the workroom and offices will be a cellar divided into three rooms. One of these will be used as a cut flower room, another for storage of bulbs and plants and the third for general storage purposes. This building will be one story high and of frame construction finished on the outside in rough cement plaster.

Extending south from the service building, as shown on the accompanying plans, will be the corridor house. Extending to the east and west from the corridor house will be the two greenhouses. This connecting house may be extended to the south at any time and additional houses added as required.

The two greenhouses will be of the same size, having inside measurements of 27½x105 feet. They were designed to contain four benches each. All benches will be four feet wide and 100 feet long. The walks between the outer benches and walls will be 24 inches wide and those between the benches will be 30 inches wide. The walks were made wider than are usually found in commercial establishments in order to admit the use of special apparatus if necessary and also to give each bench the maximum amount of light and air.

The houses will be provided with King gutters supported upon 2-inch wrought iron pipe set into concrete. Every other post will serve as a downspout. The side walls will be 5½ feet high and will be composed of concrete with 24-inch stationary glass below the gutters. The construction of these walls will differ from that usually employed. Large reinforced slabs of the required height and a little shorter than the space between two posts will be cast upon a flat surface. After thoroughly hardening, these slabs will be set into position with their ends resting upon the concrete footings of the posts and then lined up. A boxing will then be built about the posts including the ends of the slabs and filled in with concrete. The concrete, which will fill in the spaces between the slabs and the posts and extend on each side in the form of a T will bind the slabs thoroughly into place. The drawings will show this form of construction very clearly. This method was chosen for two reasons: First, it was found to be cheaper than the old method of using boxing, and, second, the joints formed between the slabs and pilasters will prevent any cracking due to expansion or contraction.

The ridge, ventilating sash, sash bars and all other woodwork of the roof will be of gulf red cypress. The roof will be supported by two lines of purlins and tied with wire cables. All glass used in the buildings will be 16x18 and 16x24 D. S. A. and will be lapped. Ventilation will be secured by two lines of interrupted sash hinged to the ridge bar.

The greenhouses and service building will be heated by steam furnished from a 60 h. p. tubular boiler run under high pressure. The setting of this boiler was especially designed to reduce the amount of smoke to a minimum. Ample room has been provided for two additional boilers. A 70-foot brick stack which will be large enough to accommodate three boilers of 60 h. p. each, will be located between the boiler room and greenhouse. From the boiler the steam will pass through a pressure regulator to the feed mains which will be carried under the floor of the corridor house. From these mains 1¼-inch pipes will branch off into the houses. Each house will be provided with 24 lines of 1¼-inch pipe, carried along under the benches and along the side walls. The condensation will pass back to the boiler room where it will be returned by means of Morehead traps as the floor level of the boiler room is only two feet below the grade level of the greenhouses. All buildings will be furnished with water and electric lights from the university water and lighting plants.

Although these greenhouses are especially designed for experimental work it is intended that they shall also be used for instruction purposes. A complete course in floriculture is being offered and it is hoped that it will be of advantage to those intending to follow this line of work. The subjects offered will include, beside general ones, special lines of work such as greenhouse construction, plant propagation and commercial floriculture. These subjects will be presented both as lecture and laboratory work and will include the practical as well as the theoretical side.

The carnation will be the principal subject of experiment this season, covering fertilizers, diseases and insect pests, with H. B. Dorner, son of the veteran carnation grower of La Fayette, Ind., in immediate charge of the work.

Number of Roses per Plant.

ED. AMERICAN FLORIST:

Kindly inform me through your paper the number of roses per plant that may be obtained from plants benched before July 15 from varieties such as American Beauty, Killarney, Golden Gate, etc.

W. P. S.

In reply to "W. P. S." For American Beauty planted from July 10 to July 15, up to the following June an average of 15 to 18 roses per plant will be doing quite well, as this is planting too late. Killarney, Golden Gate, Bride, Bridesmaid and Richmond should produce an average of 40 blooms per plant if benched by June 15 and well cared for throughout the season. This includes nine months of cutting.

E.

CHRYSANTHEMUMS

Virginia Poehlmann.

A chrysanthemum that takes up even less room on the benches than Ivory, yet produces large, fully developed flowers from every shoot, is something every grower will want to know about and these are some of the good points of Virginia Poehlmann, a variety that has been under observation at Poehlmann Bros.' plant at Morton Grove, Ill., for several years and is being distributed this season. The benches now being planted are treated a little different from the usual. Six inches in the rows is space enough for this variety, but to facilitate cultivation the plants are put out two at each station and these are one foot apart. Stock planted at the middle of July last year produced splendid flowers in October, and every flower was good, even from the smallest shoots. The flower is a finely incurved well filled up white with splendid petals and good keeping and shipping qualities, as the flowers from the same bench noted above were shown at the chrysanthemum show in Chicago in November. It has been named after August Poehlmann's daughter.

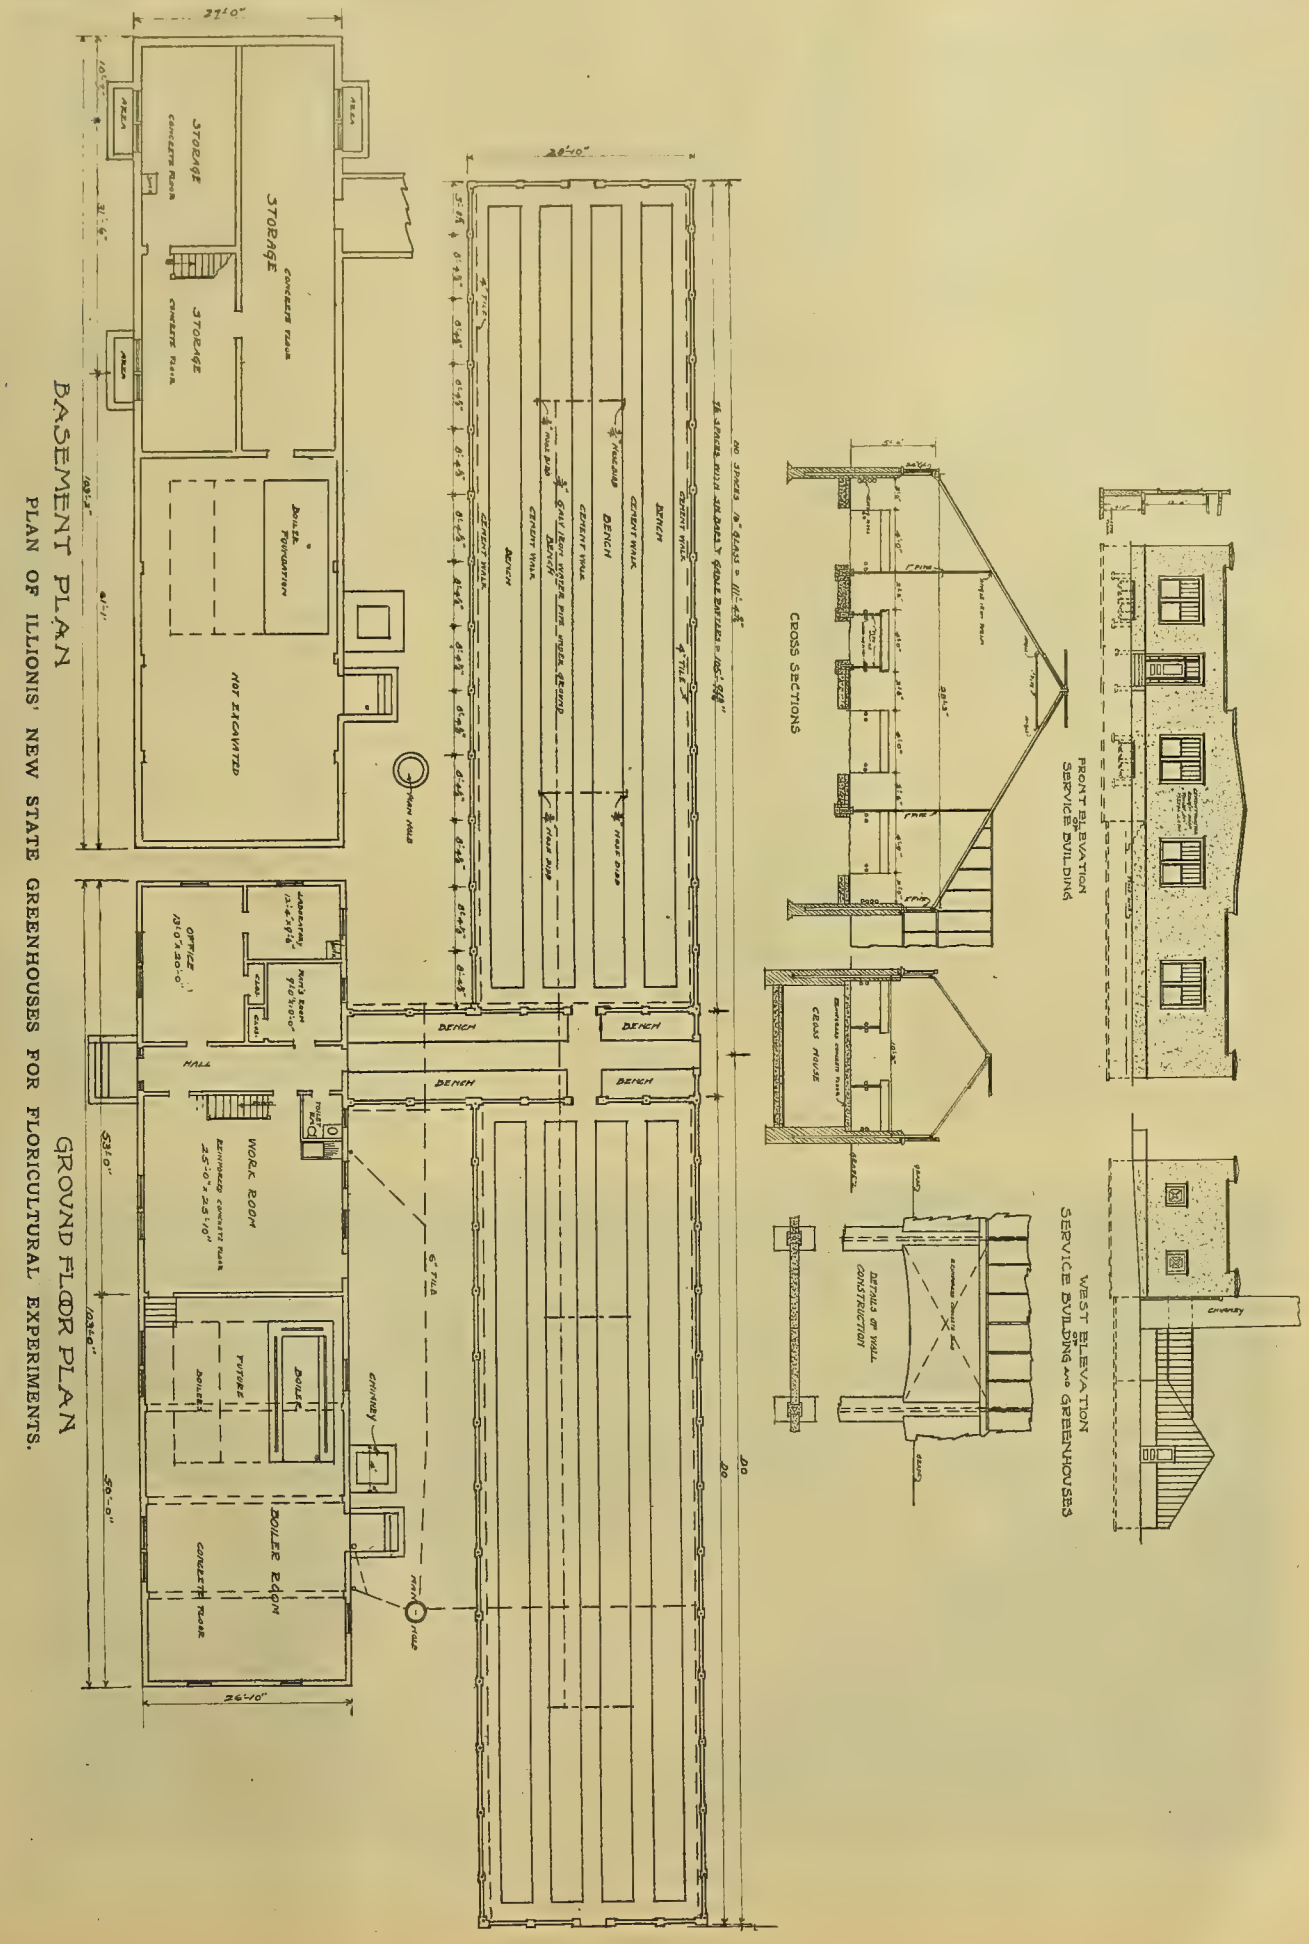
Notes on Culture.

Early July should see all the chrysanthemums intended for bench culture planted. There is time yet to plant a few of the later varieties, especially if the plants are in good shape, but no time must be lost. Keep them well watered and syringed through these hot days; go through them two or three times a day and moisten the plants and walks if they need it and water well at the roots at least once a day. One of the main things in chrysanthemum growing under glass is to get a strong growth on the plants before the buds appear. Stir the surface of the soil frequently, clean off the weeds and, above all, destroy all aphis.

During the latter part of July a light topdressing will be beneficial to the early planted and early flowering varieties and a little bonemeal or soot mixed with some good old manure will be found to be very beneficial and will help to get that dark glossy green color to the foliage which we all admire. There are a good many different ways of tying now in use, but the best, cheapest and easiest to apply, is to run wires lengthwise three feet above each row with a few cross-wires to stiffen them and secure them on two or three places to the pipes or the wood structure of the house to keep them perfectly tight; these wires once put up and properly adjusted will stay for years without being in the way and they are always there ready and as soon as the plants are in the bench they can be tied if they need it. Take a ball of common white twine and tie a double knot around the stem between two leaves; tie it loose enough so the plant or stem has room to expand and draw it up tightly to the wire and make a double knot again. If the plant is crooked to start with this will soon straighten it and all the tying afterwards necessary is in about a month's time from the first tying. Cut the twine clear off with a sharp knife, at both ends, and make a new tie in the same way.

G. T.

SAN DIEGO, CALIF.—The Floral Association has arranged to hold its annual show in October.



PLAN OF ILLINOIS' NEW STATE GREENHOUSES FOR FLORICULTURAL EXPERIMENTS.

The Culture of Gladioli.

A paper read by Arthur Cowee, Berlin, N. Y., before the Florists' Club of Philadelphia, July 7.

Doubtless some, if not all, of you are familiar with the exceptionally rapid development and improvement of the gladiolus during the past 10 years or so. Especially do I refer to the artistic form and coloring of the enormous flowers properly arranged on a gracefully bending spike. The time was not long ago when practically the only gladioli bulbs commercially offered were of one type, Gandavensis, with stiff, straight spikes, comparatively small flowers arranged closely together, all of the buds developing at about the same time. The variety of colors also was limited and it is no wonder that, except for massive decorations, the average florist has been slow to take up the culture of this flower.

To such hybridizers as Groff and Lemoine we are indebted for the many types of beautiful and artistic flowers which have been recently introduced and upon which improvement is constantly being made. These modern hybrids, from their cheapness and adaptability to any kind of decoration either large or small, are yearly tempting more and more the artistic, critical and exacting florist. I do not wish to appear in the light of condemning the entire Gandavensis family, for among the hosts of named varieties of this class are many which I value highly on account of some particular attribute or attributes which render them invaluable for certain purposes.

CHOICE VARIETIES.

For instance I have found the varieties Shakespeare, May, Augusta, and Brenchleyensis the most reliable for forcing purposes one year with another. With a succession of plantings also, this type can be massed with splendid results on extensive lawns, where the contrast in colors is most pleasing. As my task has been principally in the direction of collecting, selecting, classifying and growing commercially this bulb, my talk will be more on this line rather than from the scientific or hybridizer's standpoint, although I have had considerable experience with hybridizing in my early work.

Ever since I knew anything about flowers the gladiolus has been my favorite, the growing of which I called a fad up to a few years ago, when, realizing the possibilities of the development and consequent demand for these modern types, I concluded, if possible, to make a business of the growing of these bulbs, convinced also that the soil and climatic conditions of my section of the country were especially adapted to the development of a strong, vigorous bulb which, in the gardens of the amateurs and professional growers, would give most satisfactory results. How well I have succeeded is indicated by the harvest of 1907 of about 16,000 bushels of bulbs, bulblets and corms, all of which stock has been disposed of during the season of 1908 with the exception of such as we were obliged to retain for further growing. This stock is made up of selections from unnamed seedlings and named varieties placed in mixtures and color sections, also named varieties of recent introduction as well as novelties not yet introduced and of course some old varieties which, by reason of some particular attributes, are still in demand, and retained.

HISTORY.

Comparing the wild species with the modern hybrids one could hardly believe that the latter were offsprings of the former. Of the wild species referred to there have so far been discovered 140 or more, a few being natives of Europe and western Asia and a few from the mountains of tropical Africa; most of them, however, are from South Africa (Cape Colony and Natal). The leading parents of garden sorts are the species psittacinus, cardinalis, Saundersii, purpureo-auratus, papilio, dracocephalus, Cooperii, Adlami and cruentus. But few of them are of value to the gardener and only as curiosities. In addition to the use of wild species many domestic kinds have been produced which have been of incalculable value in securing new types and colors, as far as the general habits and constitution are concerned.

The gladiolus is quite an old flower, for we find as far back as 1596 G. segetum was cultivated, and, in 1629, G. byzantinus was quite popular, also during the last half of the eighteenth century many species were introduced causing a great deal of interest in this flower. At one time G. segetum and G. communis were highly prized for their medicinal properties, but for what ailment I have been unable to ascertain. The starchy bulbs of some African species were also used by the natives as food. In 1823 Colville of Chelsea, Eng., brought to notice the variety Colvillii, a cross between G. cardinalis and G. tristis and which, by later breeding, has shown some beautiful hybrids especially adapted for early forcing, although the flowers are quite small.

It seems, however, to have been left to Van Houtte to start the ball rolling, when in 1841 he introduced to the trade the Gandavensis type, said by some authorities to be a cross between G. psittacinus and G. cardinalis, while others claim it is the result of crossing G. psittacinus and G. oppositiflorus. I am inclined to the former theory, although in some so called Gandavensis hybrids the blood of G. oppositiflorus is recognized; especially is it prominent in that old variety, Ceres.

The Lemoinei type, a hybrid of G. purpureo-auratus and G. Gandavensis, was first introduced in 1878 by Victor Lemoine and Nanceanus, a hybrid from G. Lemoinei and G. Saundersii was introduced in 1889 by the same hybridizer. About this time, or perhaps a little earlier, a cross between Gandavensis and Saundersii was obtained by Max Leichtlin of Germany, which strain came to America and was named Childsi. About the year 1887 I happened to see a small planting of gladioli in the garden of a personal friend, which, comparing quality, vitality and multiplying functions were a revelation to me. I found upon inquiring that they were hybrids from the trial grounds of H. H. Groff of Canada and immediately I made it my business to stock up as rapidly as possible from that source, so that today I have between 15,000 and 20,000 seedlings of exceptional merit, the result of crosses made by that hybridizer.

CULTURE.

The methods employed in the successful cultivation of the gladiolus are too well known to all of you for me to go into full details, hence I will touch lightly upon this subject. One of the principal points is to select proper soil, for, although this bulb will bloom in almost any kind of soil and under adverse conditions, still, the same as most flowers, it has its choice of soils. Sandy loam is

TRI-CITY FLORISTS' CLUB STRAWBERRY FEAST AT EWOLDT BROS.', DAVENPORT, IA., JUNE 18.

President Knees at extreme right in front; Secretary John T. Temple at right in back row.

preferable, but if this cannot be supplied, heavy soil may be much lightened by the application of sand. The soil also should be well drained, for the gladiolus will not thrive well where there is excessive moisture. The soil should be well fertilized in the fall and thoroughly plowed, and in the spring should be well pulverized, at which time the lightening process with sand should take place if required. The planting can be made in rows or masses according to the uses which are to be made of the flowers. If space is limited the rows may be as close as 18 inches apart; such planting of course is intended for cut flowers.

Four inches is shallow enough to plant in any soil for the bulb to take strong root and permit of sufficient space for the new bulb or bulbs to form on top of the one planted. By planting this depth, and even a little deeper in especially light soil, the spike from the old corm to the top of the ground is a help toward supporting the mass of flowers which are sure to follow proper cultivation and, as a general rule, no stakes are required except under extreme conditions, such as continued high winds sometimes accompanied by driving rains. Gladiolus bulbs may be carried through the winter year after year in good condition, if stored in a dry place, with as low a temperature as possible above the freezing point.

PROPAGATION.

The multiplication of the same variety is accomplished in two ways: First, by division; the old bulb producing from two to as high as 10 new flowering bulbs. Second, by offsets or corms which are formed among the roots between the old bulb planted and the new bulb or bulbs, which form on top. A large percentage of these require two years' growth in order to secure flowering bulbs, and the first year may be sown in rows one inch deep and about 12 inches apart. New varieties are secured only from seed, and there is no argument which would convince the modern grower that chance seedlings (by bees, butterflies and other insects) are as good as those produced by hand hybridization, especially when hybridized by one whose experience and knowledge of the habits and constitution of the parent plants as well as the proper methods to secure color results, has taught him when and how to make such crosses. Sports now and then appear in my fields, but so far, I have been unable to establish and reproduce them.

USES OF GLADIOLI.

The flowering of the gladiolus, coming as it does at the time of the year when there is comparatively a dearth of other flowers, is a boon to the florist. With its new forms and coloring there is no decoration for which it is not eminently adapted and the absence of perfume as well as the odor from decomposition, which takes place with many other flowers, places it in the lead for table decoration. Beautiful and artistic wedding, funeral and other designs can be made with the individual flowers while the spikes can be arranged with green foliage in sprays, and other forms lasting much better than roses, carnations or in fact any other flower, which by reason of such use must remain some time without water.

No florist, whether growing for the general or local market, should neglect to force each year at least a few gladioli. Very few are so fortunate as to have their carnation houses entirely free from stem rot and consequent bare spaces, in which the gladioli may be planted with excellent results and returning ordinarily a reasonable profit for the space occupied. Then, too, there are other house crops, among which are chrysanthemums, which can be economically and profitably followed by the planting of gladioli. The temperature in which the best results can be secured is that under which the carnation thrives. Bulbs after being harvested from the fields in the fall should be given a reasonable resting period, after which they may be planted in the bench midway between the surface and bottom of the soil; sufficient root depth is thereby given and the necessity of staking is also avoided.

The gladiolus is well called the people's flower and I hope by careful selection and combination of those varieties best adapted to the use of the craft, that the day will not be far distant when it will be a necessary asset to florists in general and in due time receive the additional title of the florists flower.

To Be Done Now.

IN THE GREENHOUSES.

In cultivating the soil on the benches devoted to young roses see that the depressions around the plants are not filled up.

The Late James Cole, Sr.

Death recorded last week, page 1178.

Feed and water the old carnations, that are still flowering, liberally, or the flowers will be poor.

Attend to all painting inside and repairs of benches, heating apparatus and boilers as soon as possible.

Watch for cut worms when topdressing old benches of smilax with new soil from outside.

In localities where there is no coarse sand to be had, crushed stone is a useful addition to plant composts.

Sow early herbaceous calceolarias and cinerarias in quite a cool frame or house, allowing plenty of air.

Keep the faucets repaired; the leaks may do no damage now but there may be more to do later in the season.

See that all supports on the rose benches are very firm before attaching the wires and tying the plants.

Watch for cool nights for fumigating or sulphuring the pipes if mildew is present in the rose houses.

IN THE STORE.

Deep green foliage should always be used with yellow flowers.

Boston and other ferns and caladiums make a good window decoration when too hot to show cut flowers.

Pandanus Veitchi, with small ferns around it in azalea or other shallow pots has a pretty, fresh appearance and sells well.

Dorothy Perkins roses from outdoors make a beautiful table decoration now.

Have all cleaning and necessary alterations to the store carried out early before the busy season again commences.

OUTDOORS.

Plow all vacant land that is weedy before the weeds go to seed.

Top the shoots of grape vines in order to thicken out the stems and swell up the buds at the base.

Treat the peonies well after flowering to ensure the production of good crowns for next season.

Weedkillers should be applied to walks after rain when there is a likelihood of a few dry, hot days.

Spray the Indian azaleas that are outside regularly during hot weather.

Feed rambler roses to encourage the production of long vigorous shoots from the base.

Prick off seedling campanulas in a frame or sheltered position where they can be well looked after.

Some New Plants.

The following new plants have been recently shown in England and are a few selected from a more lengthy list recently published in the Gardeners' Magazine:

Pæonia decora alba.—A charming, free flowering single peony with large, rounded, white, pink-tinted flowers of beautiful shape. The central bunch of stamens is pale yellow and it shows well against the very palest pink tint of the surrounding segments. The ample foliage is light green with a dull instead of a shining surface. It was given an award of merit at the Royal Horticultural Society's meeting May 26, having been exhibited by R. Wallace & Co., Colchester.

Croton Fred Sander.—A handsome, elegant and effective croton, a little too dense perhaps for a table plant but of great beauty for general decoration. The three-lobed leaves are very densly set on a yellow stem and they have yellow footstalks. The ends of the three lobes and the margin of the narrowing basal portion of the leaf are all deep green and within this color the whole area is bright, but not very deep, yellow. It was given an award of merit at the Royal Horticultural Society's meeting May 26, when exhibited by Sander & Sons, St. Albans.

Dracæna Doucetti de Groatei.—This is unquestionably a very fine form of the beautifully variegated variety of D. indivisa. D. Doucetti has now been before the public for several years and its narrow, yellow-striped leaves and light graceful appearance have made it a desirable, though still a comparatively rare, plant. D. Doucetti de Groatei has rather broader and longer leaves than D. Doucetti and the marginal stripe is a deeper yellow. It is a very fine dracæna for grouping or for large vases and hall decoration. It was awarded a first-class certificate at the Royal Horticultural Society's meeting May 26, when exhibited by J. Veitch & Sons, Chelsea.

The Late James Cole, Sr.

Hundreds of old settlers, friends of the late James Cole, Sr., Peoria, Ill., gathered at his old home, 1621 Perry avenue, on the day of his funeral, and took a last look at the features of the venerable pioneer florist. The casket containing the remains was embowered in a profusion of flowers. Banked about the base were dozens of floral offerings, woven into beautiful designs, the tokens of many loving friends and relatives. Thrown over the casket, like a huge mantle, was a blanket of woven sweet peas, while on the mantle above the fireplace, reposed a wealth of roses, carnations and other flowers, which the aged florist had grown himself and in which he had taken especial interest and pride.

The impressive Episcopal service was said by the Rev. Edward T. Munns. Henry Velde and Charles Burdick and Mrs. Francis and Mrs. Kintzer sang "Some Time We'll Understand," and "Abide With Me." Following the ceremony the remains were borne by loving hands to Springdale cemetery, where they were laid to rest. A short service was repeated at the grave side.

THE AMERICAN FLORIST

1885 TWENTY-THIRD YEAR. 1908

Subscription, United States and Mexico, $1.00 a year; Canada $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From its first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

We do not assume any responsibility for the opinions of correspondents.

THE PROFESSOR: "I can't find the chameleon, Harris." Harris: "No, sir; we've 'ad an accident with 'im. I put 'im on the lettuce and 'e turned green. Then I put him on a tomato and 'e turned red. Then I set 'im on a piece of tartan plaid, and 'e busted."—Philadelphia Inquirer.

FAIRLY hard pruning is best for Richmond rose.

THE early morning bath is a great institution for all plants.

FRESH BLOOD is said to be a remarkably good fertilizer for foliage plants.

KEEP the flowers picked off stock geraniums planted in the field if they are not making a free growth.

GREENHOUSE INVENTORY.—Perhaps you paid $6, or more, per box for the glass in your greenhouses. What is it worth now?

THE preliminary list of premiums of the fall flower show of the St. Louis Horticultural Society has been issued and copies may be had on application to Secretary Otto G. Koenig, 6473 Florissant avenue, St. Louis, Mo.

PHILLIPE DE VILMORIN will give an address on "The Retardation of Flowering Plants and the Preservation of Flowers by the Application of Cold" at the international congress of the refrigerating industries to be held in Paris, France, October 5-10, 1908.

MANAGER H. KEITSCH of the S. A. F. trade exhibition, to be held at Niagara Falls August 18-21, advises us that 5,468 square feet of space are already taken, divided between 39 exhibitors. Mr. Keitsch is of the opinion that this will be the banner year for the exhibition end of the convention.

AT the international exhibition to be held at Turin, Italy, in 1911 three horticultural shows will be held, in May, September and October, under the auspices of the executive committee, with the co-operation of the Regia Societa Orto-Agricola del Piemonte and the patronage of King Victor Emmanuel III. Greenhouse and garden plants, cut flowers and floral arrangements, fruits and vegetables are all to be included in the exhibits.

American Carnation Society.

CARNATION REGISTERED.

By Bassett & Washburn, Hinsdale, Ill., Orland P. Bassett, parentage Crane and Prosperity; color deep red; size of flower 3½ to 3¾ inches; calyx long and never splits; stems, strong, stiff and long. Very strong grower, every shoot producing a flower.

ALBERT M. HERR, Sec'y.

Netherlands Horticultural Federation.

At a meeting held at Utrecht, May 14, 1908, at which all the principal horticultural societies of the Netherlands were represented, the Netherlands Horticultural Federation was formed. Some 49 societies, embracing all branches of horticulture, with nearly 18,000 members, have joined the federation, which will be the representative center of all Dutch horticulture. R. P. Bonthuis, The Hague, is secretary.

National Council of Horticulture.

The sixteenth and seventeenth installments of the press service of the National Council of Horticulture have been received and contain the following excellent articles: "Zinnias," "Juneberry," "Squash," "Asters," "Planting Strawberries in July," "Designing a Planting Scheme for Next Year," "Red Hot Poker Plant" and "More About the Hibiscus." All are good readable articles and are free to editors of local papers anywhere on application to J. H. Burdett, 1720 West One Hundred and Fourth place, Chicago.

Reduction of Foreign Parcels Post Rates.

Postmaster-General Meyer has announced that on and after July 1 parcels having a weight limit of 11 pounds (a gain of seven pounds over present limit) may be sent from the United States by parcels post to England and Italy, August 1, at the rate of 12 cents per pound; also to France, July 1, weight limit four pounds, six ounces. The present rate is 16 cents per pound. Coming as this does soon after the announcement of a two cents per ounce letter ocean postage to take effect October 1 next, it is safe to predict a large increase of trade will take place in seeds, bulbs and plants between the respective countries in a way more convenient and quicker than the usual express and freight method. The convenience of postal transportation is that a parcel is delivered directly to each party by the postal agent without delay.

In England where postal rates are on a practical basis, parcels are sent to any of its possessions by mail at the rate of three pounds for 24 cents, according to the Scientific American, seven pounds for 48 cents, 11 pounds for 72 cents, a rate of 8 cents per pound, which is the general world rate and is one restricted in the United States only to printed books. The entire cost of transportation of merchandise through the mails has been ascertained to be but 4½ cents per pound.

Meetings Next Week.

Baltimore, Md., July 13, 8 p. m.—Gardeners' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Buffalo, N. Y., July 14, 8 p. m.—Buffalo Florists' Club, 383 Ellicott street.

Cleveland, O., July 13, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit street.

Detroit, Mich., July 15, 8 p. m.—Detroit Florists' Club, 38 Broadway.

Lake Geneva, Wis., July 18, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

New Orleans, La., July 12, 2 p. m.—Gardeners' Mutual Protective Association, 118 Exchange alley.

New Orleans, La., July 16, 8 p. m.—New Orleans Horticultural Society, 125 St. Charles street.

New York, July 13, 7:30 p. m.—New York Florists' Club, Murray Hill lyceum, Thirty-fourth street between Third and Lexington avenues.

Pasadena, Calif., July 17, 8 p. m.—Pasadena Gardeners' Association, G. A. R. hall, East Colorado street.

San Francisco, Calif., July 18.—Pacific Coast Horticultural Society.

Scranton, Pa., July 17, 7:30 p. m.—Scranton Florists' Club, Guernsey building.

OUR PASTIMES.

At New York.

The eighth annual outing of the New York Florists' Club was held at Witzel's Point View Grove on Long Island sound, July 1. There was a splendid representation of all branches of the trade and the allied trades. The weather was faultless and, as proof of this statement, the fat men's race, conceded to be the swiftest event on the programme, left all the fat men in apparently better condition than they were at the start.

The steamer Isabel carried over 250 excursionists to the grove and that number was augmented by those who took various other routes, to 345 that were seated at dinner. On the arrival of the steamer at the grove the party was photographed in a group. The baseball game was the first event, the contestants being benedicts vs. bachelors, with Chas. H. Totty as umpire and Frank Traendly as generalissimo of fans. Though the game was exciting, thanks to the absolute fairness of the umpire's decisions, there were no fatalities. Credit is due Chairman Marshall and the members of his committee for their untiring efforts to make everybody happy. President Weathered, Secretary Young and Treasurer Allen, of the club, were also kept busy, going about doing good, and their entertainment of strangers was appreciated.

LADIES' BOWLING MATCH.

The following are the scores made by the ladies for the seven prizes offered: Mrs. Dupuy, 70; Mrs. Lentz, 62; Mrs. Schultheis, 54; Mrs. Fosberg, 52; Mrs. Voeke, 50; Mrs. Langjahr, 49; Mrs. Matthews, 48.

The men's bowling match (5 prizes) was not completed.

BASEBALL, BACHELORS V. BENEDICTS.

The bachelors, team consisted of Messrs. Dupuy, Cantillon, Turney, Rickards, Sheanan, Rogers (captain), Westermann, Kukler, J. Manda.

The benedicts were Messrs Hoenecker, Schreiner, Wilson, Chadwick, Foley, Lutz (captain), Phillips, Rickards (Al.), Irwin. The game was won by the benedicts; score 5 to 1.

Baby Prizes.—Martha Schmutz, daughter of Louis Schmutz, Jr., of 47 Flatbush avenue, Brooklyn, first; Evelyn Rickards, daughter of A. J. Rickards, of Rickards Bros., second. Numerous consolation prizes were distributed.

Girls' race (50 yards).—Jeannette Marshall, first; Belle Scott, second; Dorothy Bolles, third.

Boys' race (50 yards).—Joe Sullivan, first; Al. Schmutz, second; Howard Skard, third.

Girls' race (50 yards).—Gertrude Shinmel, first; Mary Walter, second; Viola Lind, third.

Boys' race (50 yards).—Jos. Walter, first; James Sullivan, second; Willie Weber, third.

Girls' race (75 yards).—Katie Miesen, first; Ellaise Schmutz, second; Margaret Wagner, third.

Young ladies' race (100 yards).—Lulu Wittman, first; Anna Guttman, second; Emma Holobek, third.

Married ladies' race (75 yards.)—Mrs. Horneke, first; Mrs. Handel, second; Mrs. Went, third.

Married men's race (100 yards).—W. A. Phillips, first; L. Trask, second; D. Ciacci, third.

Club members (150 yards).—Joe Manda, first; Al. Wheeler, second; W. A. Phillips, third.

Fat men's race, 200 pounds and over (100 yards).—F. H. Traendly, first; W. A. Manda, second; Wm. Hopwood, third.

Though the men's bowling match at the outing was not finished it seems that the prizes were awarded as follows: Fred Lentz, first, 104; J. McArdle, second, 96; R. Smith, third, 76; J. Miessen, fourth, 71; John Scott, fifth, 70.

Joe Fenrich is the only one of the contestants for the Niagara Falls trip who will get there at President Traendly's expense, though Joe Manda came so near it that the genial president will probably forego the old saying that a miss is as good as a mile.

NOTES.

Noteworthy representatives of the retail trade present were E. E. Burque, manager at Dards' Madison avenue store, and his bride of a month.

Chairman Marshall found his duties more laborious than selling seeds.

We can supply fine halftone proofs of the Florists' Club outing at 40 cents each. See reproduction on page 1217.

At Philadelphia.

Considerable interest is taken in bowling matters as the time for the convention draws nigh. The average number of those who use the alleys has fallen off gradually the past two years, owing probably to a general decline of interest in bowling, which has resulted in the closing of many public alleys. The chances of a good team to represent this city are, however, fairly well assured as all the men of last year's team have participated in the tryout tournament in June and 10 men have qualified for the games, the result of which will determine the team, to be played during Thursdays in July commencing at the home alleys July 9. There will be four other matches of three games each, three on outside and the last on the home alleys. The scores made in the preparatory games of June follow, the conditions being that each player had to bowl at least 15 games and make an average of 150 or over to qualify.

K.

At Baltimore.

So far there is not much activity in bowling matters. Two weeks ago the Gardeners' Club team, Messrs. Moss, Seibold, Richmond, Perry and Lehr, went to Washington but failed to come back with honors and trophies. On Saturday next at the Diamond, N. Howard street, the Washington boys will give them an opportunity to glut themselves with revenge.

S. B.

At New Orleans.

The Horticultural Society gave its annual outing July 8, this time at Mandeville, across Lake Ponchartrain, including a delightful boat ride of two hours and the same back, and a fine dinner at the most popular hotel of the place. The balance of the day was spent in the woods where games and refreshments took place.

BUFFALO, N. Y.—Now that spring work is past the bowling club will resume practice and get in shape for the convention.

At Chicago.

The annual picnic of the employes of Vaughan's Seed Store was held at Evanston, July 4, and J. C. Vaughan and Mrs. Vaughan made it a very pleasant day for those who participated. Boats were provided and most of those in attendance had an excursion on the lake.

BOWLING.

The bowling scores on Tuesday evening at Bensinger's alleys, 118 Monroe street, were as follows:

Asmus	179	192	160	177	160	160
Balluff	136	158	150	184	178	145
Winterson	141	163	187	153	146	—
McKellar	156	148	166	157	177	—
Ayers	141	106	147	124	129	—

The ladies scored as follows:

Mrs. Winterson	93	118	114	116
Mrs. Kreitling	105	84	150	129
Mrs. Asmus	91	129	103	115
Mrs. Hauswirth	99	111	99	115
Mrs. Balluff	61	68	63	77
Mrs. McKellar	114	108	89	152

Arrangements have been made for bowling at the same alleys next Tuesday.

THE PICNIC.

Arrangements for the Florists' Club picnic at Morton Grove, July 19, are now practically completed, and tickets can be had of the secretary, T. E. Waters, 19 Randolph street. Trains will leave this city over the C., M. & St. P. R. R. from the Union depot at 9:30 a. m. and 12:40 p. m. Tickets will cost $1, which will include carfare both ways and coupons for 50 cents' worth of refreshments on the grounds. Children's tickets will cost 35 cents and will include railway fare and 10 cents' worth of refreshments. A ball game of two picked teams will be a feature of the day.

The club extends an invitation to all florists of nearby towns to join in the fun of the occasion.

At Pittsburg.

The florists' bowling club had a very pleasant time last Monday, Capt. Schulz's team defeating Capt. Doerr's hustlers three straights. The following are the scores:

	1st	2nd	3rd
Fred L. Schulz	153	142	156
William Walker	126	151	119
Joseph Wettle	137	113	109
Jacob Schulz	125	130	130
*Henry Fuchs	130	131	136
Total	671	667	650
James Doerr	139	122	147
John Hattinger	148	152	118
Brand	134	143	131
John Skrobanek	87	80	90
George Stark	139	146	107
Total	647	603	593

*Fuchs not in first game. Stark sold for 130.

GOOD CUT FLOWERS

In summer it is even more important than at other seasons that you order from those who have the facilities for supplying GOOD stock, for no other kind will pay to ship. Call on us—we have the best the season affords.

We handle **FANCY VALLEY** in large quantities daily. **FANCY FERNS,** new crop, specially good, $1.25 per 100.

Chicago.

FAIR SUMMER TRADE.

Trade was not half bad for Fourth of July week. Usually this is anticipated as about the dullest time of the year. But the first three days of the month witnessed a better money return for the market this year than did those of last year. Stock also was somewhat scarce, which resulted in good clean-up sales. In the line of roses, Kaiserin, Killarney and good American Beauty were the best sellers. Roses are now at their lowest ebb as concerns quality, and a steady, though slow improvement is to be looked for from now on. Carnations are a small feature of the market these days, few good ones being cut. Those that can be secured of shipping grade are selling fairly well at quoted prices. Few Harrisii lilies are now seen, their place being largely taken by L. auratum. Good gladioli in the light colors are in good demand. Sweet peas are nearing their end. There is a big call for asters, but there are few good ones as yet in the market. Most of those seen are of short stems. Green stock is selling very well, the demand keeping up better than usual.

A NOTABLE WEDDING DECORATION.

Canger & Gormley, 27 State street, had the decoration on Wednesday last at Lake Geneva, Wis., on the occasion of the marriage of the daughter of C. R. Crane to Professor Bradley of the University of Wisconsin. On Monday a carload of palms, furnished by the Geo. Wittbold Co., was sent, and on the following day J. Canger and J. J. Gormley left to take personal charge of the floral work. The wedding took place on the lawn under an arch of Shasta daisies and Asparagus plumosus. Garlands of the same material formed the aisle which led from the house, 200 feet away. The bride carried a shower bouquet of white sweet peas, while the bridesmaids carried shower bouquets of pink sweet peas. The table was decorated with Cattleya Gaskelliana and dendrobiums.

NOTES.

Bassett & Washburn report having had a very heavy demand for their Easter lilies and that they are cut out for the present, but anticipate another crop by the middle of the month. They are now cutting some very fine auratum lilies.

James S. Wilson, the retiring superintendent of Vaughan's Greenhouses, was entertained at a farewell luncheon at the Union restaurant July 3 by J. C. Vaughan and others.

N. J. Wietor and John Sinner left July 6 for a fishing excursion among the small lakes of Wisconsin. W. J. Kidwell promises to join the party next week.

Radke & Vogt is the title of the retail firm at 4136 Cottage Grove avenue, succeeding Frank Vogt, who has maintained the place for the past five months.

Tickets for the Florists' Club picnic have been printed and may be purchased from T. E. Waters, secretary, or other club officers.

Frank Farney, traveling salesman for the A. L. Randall Co., is in from a fairly prosperous trip, and left Monday on his vacation.

Geo. Reinberg is cutting fine Richmond roses. The cool weather of last week helped materially to fully develop the buds.

The A. L. Randall Co. reports a better trade the first three days of July this year than for the same period last year.

The Kennicott Bros. Co. is receiving some very fine auratum lilies, also very good summer Bride and Bridesmaid roses.

Wietor Bros. are cutting fine blooms, with fairly long stems, from their young American Beauty plants.

Geo. E. Conomopoulus, of the Alpha Floral Co., left Tuesday for Des Moines and other western cities.

Jensen & Dekema's indoor aster plants are a fine sight and promise a good crop in another week or so.

Herman Schau, a grower of Morgan Park, has leased a stand on the Flower Growers' Market.

C. M. Dickinson, of E. H. Hunt's, goes to Wisconsin on his vacation this week.

Geo. Reinberg is cutting a limited quantity of Cattleya Gaskelliana.

E. C. Amling reports a good demand for his fine Shasta daisies.

Visitors: President Peterson of the Cincinnati Florists' Society, his topic the 1909 convention; Martin Reukauf, Philadelphia, Pa.; Dean O'Connell, of the Stuppy Floral Co., St. Joseph, Mo.; Paul C. Schulz, Vincennes, Ind.; C. H. Crabb, of Crabb & Hunter, Grand Rapids, Mich.; F. L. Tornquist, Benton Harbor, Mich.

"THE BUSIEST HOUSE IN CHICAGO."

J. B. DEAMUD CO.,
51 Wabash Avenue,
CHICAGO.

Chicago to Niagara Falls, N. Y.

F. F. Benthey, of the transportation committee of the Chicago Florists' Club, announces that arrangements have been completed with the Wabash R. R. as the official route from this city to the S. A. F. convention. The convention party will leave on Monday, August 17, at 3 p. m., and the fare for the round trip will be $19.50. The party will go direct to Niagara Falls, with the privilege of a 10-day stopover in that city. Those who wish can, without additional charge, take the Gorge route to Lewiston, and thence by boat to Toronto. Parties so desiring can, at Toronto, have their tickets exchanged for all rail, returning to Chicago via the Canadian Pacific to Detroit and thence by the Wabash.

LEMARS, IA.—John Atwood sustained a heavy loss June 22 by falling plaster in his store, which ruined a number of valuable plants.

LEXINGTON, KY.—E. Kinney, of the State Experiment Station, left July 1 for an inspection trip to the various nurseries of the state. This is a branch of work which is of vast importance to the people of this state and the trip will take about two months.

JULY STARTS WELL.

June ended in a blaze of glory from a florist's point of view, everyone being busy the last few days, and July has started in with good trade. This is funeral work. As to other parts of the business things are quiet. Vacations are in order now. Each store is working short handed.

NOTES.

The city forester has entered upon his new job and has a force at work spraying the city trees and from them to those on the streets owned by private parties. There was a question raised as to whether the city forester could enter private premises and spray trees that were covered with caterpillars, etc. The corporation counsel says no. Your correspondent made the inquiry in one of the best kept cities as far as trees and shrubs are concerned, namely, Toronto, and the law does not allow them to enter premises but it does compel owners to do it or have it done; either way is good. Probably the latter way is the better.

The death of Geo. Maltby, a marble dealer who built the McKinley monument in this city and Canton, also the beautiful Albright art gallery, died last Monday. The floral display was very large and beautiful, orders being sent from several cities and nearly all the local florists. The house arrangements were all in charge of S. A. Anderson.

Superintendent Keitsch of the convention at Niagara Falls is busy making arrangements and allotting space. It is safe to say that as far as he is concerned everything will be in readiness on the day the convention opens.

S. A. Anderson has a fine lot of gloxinias.

Visitors: Harry Balsley and Harry Breitmeyer, Detroit, Mich.

BUSINESS AND STOCK POOR.

Warm weather has prevailed all week and trade in general is very poor. The quality of stock is also poor and anything of fair quality finds ready sale. The demand is mostly for funeral work, which has been plentiful. Sweet peas are over, heavy rains shortening their season. Asters are slowly coming in, many of the growers complaining of rust. A few tuberoses are to be seen but not in sufficient quantity to be quoted. Shasta daisies are coming in with fine long stems. Good fancy ferns are now to be had.

NOTES.

Otto G. Koenig, secretary of the Horticultural Society, is seeking contributions to the premium list for the exhibition to be held the first week in November. Mr. Koenig is determined to improve upon the show of last year and prompt and liberal response is desired to that end. Care will be taken to secure a first class hall in the very best location.

John H. Kahrs and Vincent Gorley had a joint celebration at the garden in the rear of the store Thursday evening, July 2. Mr. Kahrs celebrated his thirty-fifth birthday and Mr. Gorley his departure for Europe this week. Among those present were Wm. C. Smith, Ed. Garlich, Otto Bruening and Frank Dwyer. A delightful evening was spent.

Final arrangements for the picnic will be announced at the next meeting of the Florists' Club. A large attendance is expected, as the picnic is very widely advertised and all florists are requested to close up at least half a day so that their employes may have an outing.

Andrew Hoffman, manager at Geo. Waldbart's, will go on a fishing tour next week. Andrew certainly deserves a rest as he has been very steady at the store during the past year, having charge during Mr. Waldbart's recent visit to Europe.

M. F. Widmer, Highland, Ill., paid us a visit with his wife and baby girl. He is making an addition to his plant and grows roses and carnations for home use.

It is rumored that Oscar Hurtemann, captain of the retailers' nine, will shortly be married. His lady being a great base ball enthusiast, Oscar will pitch his arm off picnic day to beat the wholesalers.

F. H. Weber will sail July 11 for Europe. He goes to visit his mother, also to join his wife, who left 10 days ago. Mr. Weber expects to return the latter part of August. Alex. P. Geranios will have charge during his absence.

Wm. C. Smith is working hard these days and doing double work owing to the absence of his partner, Will Osseck, who is away on his wedding tour.

The death of Julius Lesser, vice-president of the city council, caused a big demand here Monday, everything being cleaned out at time of writing.

Chas. Yuengel had a fire on the Fourth caused by a balloon falling on his greenhouses. Fortunately the damage was slight.

The E. G. Hill Co., Richmond, Ind., is shipping in some good carnations and roses H. G. Berning handling the stock.

Otto Bruening, with H. G. Berning, has left on a vacation. He will visit New York and other eastern resorts.

A. Goebel, Kirkwood, has completed one house, 32x125 feet, and has it planted with carnations.

M. M. Ayers & Co. will next week start to paint and remodel their store and greenhouses.

Adolph Brix and his daughter will leave shortly for Hot Springs to be gone a month.

Ostertag Bros. are out with a finely illustrated catalogue well arranged.

ENOUGH SAID

New York.

TRADE VERY QUIET.

Yes, it is hot, but no hotter than in Chicago, Boston and other places that advertise themselves as summer resorts. Trade during the past week was very quiet, the people who remained in town being apparently more interested in fireworks and cooling drinks than in the wares of the florists. The club outing helped many of the wholesalers and their assistants in driving dull care away and there seems to be general satisfaction over its success. There is no large supply of any stock arriving, which is just as well as there is no great demand for anything. The hot wave has landed heavily on all stocks; even those that are supposed to be hot weather flowers have taken on a mushy and wilted appearance.

NOTES.

Chas. McCauley, for many years a trusted employe of the government at the propagating gardens, Washington, D. C., was in the city on July 5. "Mac," as he is affectionately termed by his Washington friends, is also secretary of the Washington Florists' Club, and is deservedly popular among the florists of the capital city. He believes that a good delegation will attend the S. A. F. convention from Washington.

Edward E. Bogan, a retailer of East Twentieth street, is one of the interesting members of the craft in this city. Though now 80 years old, or more, Mr. Bogan is hale and hearty and retains his faculties to a marked degree.

Harry Riedel, head salesman for A. J. Guttman, sailed for Europe July 1, to be absent about two months. A vacation has been due Harry since Christmas, being the fulfillment of Mr. Guttman's Christmas present.

D. J. Pappos has recently been doing very fine work in wedding decorations. His last large decoration was on June 30, practically closing the wedding season. In this he used a great amount of fine stock.

Reed & Keller have just placed on the market a striking novelty in the shape of a shower or cascade wreath, which is bound to attract the attention of designers.

We can supply fine halftone proofs of the Florists' Club outing at 40 cents each. See reproduction on page 1217.

Boston.

NOTHING DOING.

The flower market is in very poor condition just now, there being very little call for anything in flowers. Roses and carnations are poor and they are mostly bought up by street fakirs, or find their way to rubbish barrels. The summer dull season has quite set in in the stores.

Ransom & Co. are showing samples of all their new varieties of sweet peas in Galvin's Hamilton place window, quite near to both flower markets.

Galvin's windows on Tremont street look very cool and attractive with their fine display of water lilies.

B.

PORT CHESTER, N. Y.—The business conducted for many years by Emil Leonhard has been dissolved and a new firm, under the style of E. Leonhard & Son, has been established. Considerable increase in the volume of trade rendered this necessary.

SOCIETY OF AMERICAN FLORISTS

Diagram of Spaces for the Trade Exhibition in Cataract House, Niagara Falls, N. Y., August 18-22, 1908.

Twenty Thousand Square Feet of Floor Space.

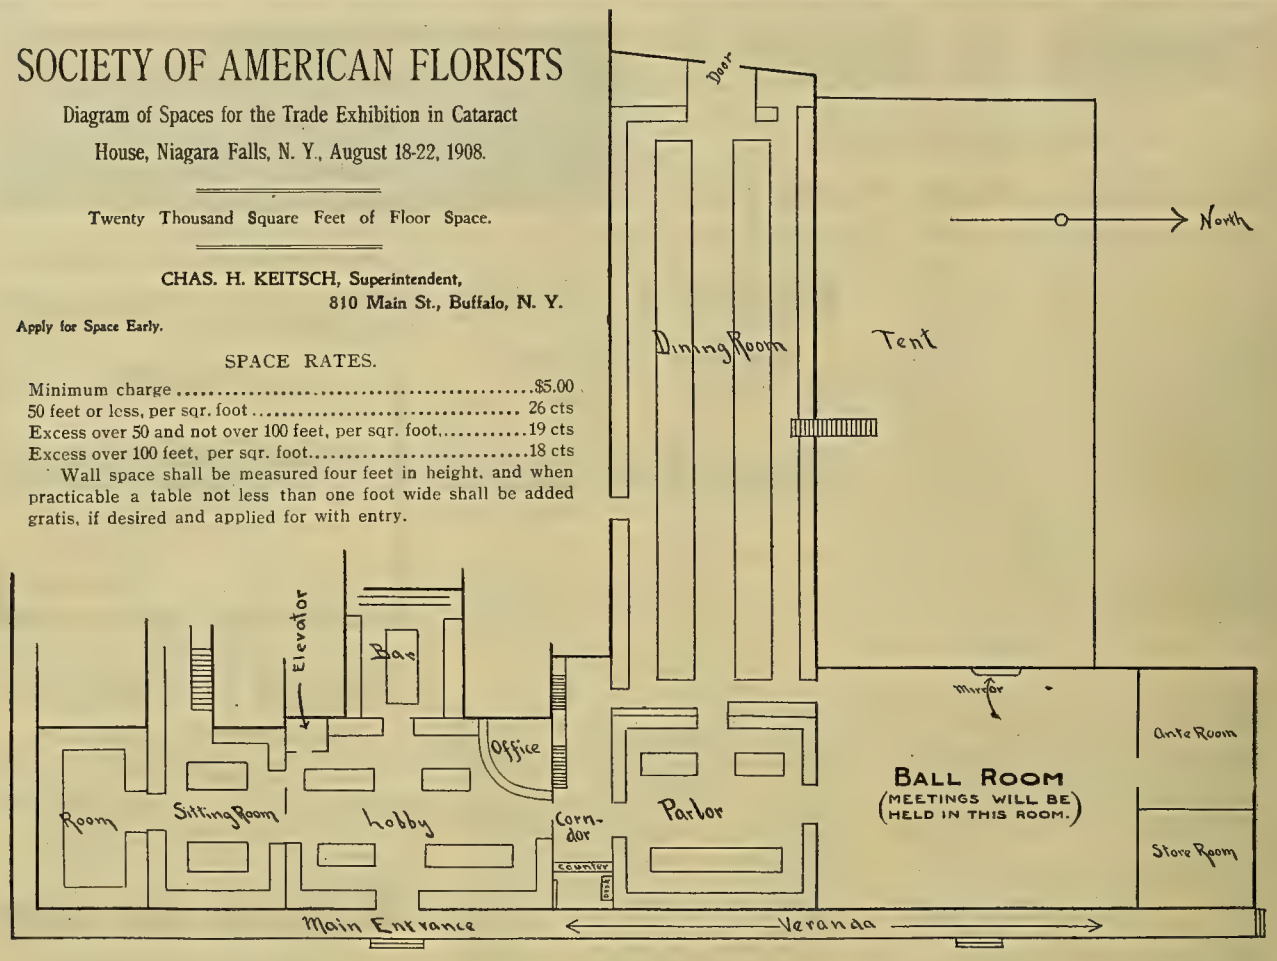
CHAS. H. KEITSCH, Superintendent,
810 Main St., Buffalo, N. Y.

Apply for Space Early.

SPACE RATES.

Minimum charge $5.00
50 feet or less, per sqr. foot ..... 26 cts
Excess over 50 and not over 100 feet, per sqr. foot ..... 19 cts
Excess over 100 feet, per sqr. foot ..... 18 cts

Wall space shall be measured four feet in height, and when practicable a table not less than one foot wide shall be added gratis, if desired and applied for with entry.



Philadelphia.

VACATIONS IN ORDER.

Business is now down to a summer basis; carnations are about done with the exception of a few white. All the tea roses are very small with prices accordingly. American Beauty is the only flower for important orders with the exception of orchids and lily of the valley which ignore weather conditions at all times. There is very little business, although it is quite as good as usual for the season, there being about the ordinary demand for funerals. Several weddings the last few days of June helped out and with the seashore trade about covers the ground. There is heat and more heat with lots of humidity and altogether we are very uncomfortable. Some of us try to get away from it.

FLORISTS' CLUB MEETING.

The feature of the July meeting of the Florists' Club which was held in the lower foyer of the hall, was the illustrated lecture by Arthur Cowee, the gladiolus specialist, on his favorite flower. The paper read was a very instructive and valuable addition to the literature of the gladiolus. The colored slides were the most beautiful example of such ever seen here, the colors of the flowers being so true to nature. Taken altogether it was a great pleasure for those present, the audience being comparatively small on account of the great heat now prevailing. Convention matters were discussed and it is thought that this city will send its usual large representation. E. A. Seidwitz of Baltimore, Md., was present and eulogized the street flower merchant as being a great factor in the handling and sale of flowers, in sowing seed that brought returns many times over later on.

NOTES.

Stephen Mortenson is adding largely to his range of glass; the section now under construction by the Lord & Burnham Co. under the direction of its local representative, D. T. Connor, is 50x300 feet. This addition of 15,000 feet does not now attract as much attention from the trade as a house 20x100 did 10 to 15 years ago, when 2,000-5,000 feet additions, it was thought by some, would certainly flood the already crowded market in the spring and fall. Thus do we grow.

H. Weiss & Son of Hatboro, whose large range is devoted to carnations, are now firm believers in the indoor culture and the houses are now filled with splendid looking stock, much of it as large as is often seen in the field in the fall. There are 9,000 Winsor, showing faith in this sterling variety. These and other growers ship their entire crops to the Leo. Niessen Co., from whom I received this progressive report.

The Jos. Heacock Co., having no more room to erect new houses, is taking down intervening walls and roofing over the spaces between the houses, also divisions that divided long houses into sections, so that a very large space is now under one roof, nearly all of which is to be devoted to Killarney rose, which variety proved a money maker for the company last season.

John McIntyre is laid up with pleurisy, for which trouble he blames an unwise visit to a cold storage plant. Quite a number of allied complaints have affected the members of the craft who, having occasion to visit these cool rooms on hot days, and tarry a little too long, have to pay for their indiscretion in colds or other troubles that sometimes take weeks to eradicate.

Beavis & Son are devoting their whole establishment, with the exception of two houses of Kaiserin, to Richmond, which was their star producer the past year. Bride and Bridesmaid were done exceptionally well for years by the Messrs. Beavis but the returns from the prize red were so much better that it is now crowned king with them.

Charles Fox of the Sign of the Rose sailed last Saturday for a trip through the European flower centers and will keep a sharp lookout for new ideas for his next season's trade. His souvenir postcard, bidding farewell to his friends in the business, made quite a hit.

The Leo. Niessen Co. is now receiving in quantity summer American Beauty roses with stems up to three feet in length, choice lily of the valley and cattleyas, which latter, by the way, are a bit scarce in this market.

The Robert Craig Co. is finding a good demand for Ficus pandurata at the seashore resorts, large shipments being made the past week to Newport, R. I., Atlantic City, N. J., and other like resorts.

Edward Towill's latest addition is a house, 35x150 feet, built by the King Construction Co. This is to be planted with American Beauty roses which variety Mr. Towill succeeds with admirably.

Edward Reiger of Twentieth street is booked for an early western tour with the Yosemite Valley as the destination. Edward is the best natured of the whole bunch.

Wm. McKissick is strong on eastern American Beauty roses, which sell very well, as it is now the only really choice rose in the market, the others being so small.

Thomas Mitchell, John Kelly, Wesley Clark and Wm. Barton, of the wholesale district, have taken to the woods and the shore for their summer vacation.

W. K. Harris has taken his family to his Ocean City cottage, where they will spend the summer.

John Westcott and family are spending a couple of weeks at Atlantic City.

Eugene Bernheimer and family are summering at North Wales.

The Florists' Club held its July meeting on Thursday at the establishment of President Frederick Goldring at Slingerlands, a pleasant country village about eight miles southwest of the city. Over 40 members were present, the majority of whom arrived at the meeting place in two large carryalls. The party arrived a little late in the evening and only a hasty inspection was made of the 22 houses in which Mr. Goldring grows stock for the trade. In the fields, however, the members of the club found over 12,000 carnations of new varieties growing and nearly ready to be taken into the houses for winter flowering. Over 1,000 Crimson Rambler and Dorothy Perkins roses were growing around the establishment and all were in bloom, making a most attractive array. At the meeting, held in one of the large sheds, Fred A. Danker of the committee appointed some time ago to draft a circular on the care of plants for distribution to customers, reported progress. Mr. Danker read the contents of the proposed circular, after which a discussion was held at some length and suggestions offered.

Chas. Sanders, a practical grower of many years' experience, brought up the subject of yellows in asters. Fred A. Danker suggested that one way to overcome the disease is to select soil made from well rotted sod and plant the young asters in that. President Goldring suggested that the disease is to be found more frequently among the new varieties than among the old and well known sorts. It was the consensus of opinion that very little is known about the disease or its cause and that at present about the best thing that can be done is to plant the seedlings in new soil and to watch them carefully after that. At the next meeting it is proposed to look into the subject further and see if more information cannot be gleaned. The views of readers of the AMERICAN FLORIST will be read with interest by members of the club.

Some discussion was had on the subject of half holiday closing on Saturday afternoons during the summer. One or two members related their experience in the past and it was agreed that concerted action is necessary to make the movement a success. Wm. C. Kurth and Wm. J. Roche were appointed a committee to visit the retailers to induce them to act in the matter. The entertainment committee was instructed to look into the matter of holding a clam bake and outing some time during the summer and to report at the next meeting as to plans and cost.

Following the meeting, refreshments were served and a very enjoyable hour was spent on the wide lawn in front of the Goldring residence. For the occasion the lawn was lighted with many Japanese lanterns suspended from the wide branched white oak trees in front of the house. Following the evening's programme the members rode back to the city through a slumbering country district tired but well pleased with the outing.

TRADE STAGNANT.

The drouth continues, though there have been some spasmodic showers, very partial in their distribution and not at all sufficient to wet the parched earth to any depth. Outdoor stock is very scarce and very inferior. A few sweet peas and some poor Maman Cochet roses with achillea, about makes up the stock. Some gladioli arrived in fair condition, but the use to which they can be put, especially the darker sorts, is very limited. Trade is stagnant as is natural, and some of the summer stores will soon be closing. We are informed we were in error in saying the shipments of lily of the valley and American Beauty roses had been discontinued. They are still arriving and in such quantities that the market does not absorb them. Roses from indoors are unusually abundant for the season, but many are poor. Yet a larger proportion than usual are fairly good flowers and long stems. Carnations are scarce, that is of qualities that fill the requirements of the better trade, and many go to waste.

Notwithstanding generally unfavorable conditions and pecuniary stress the Florists' Exchange is reported by John J. Perry, the manager, to have done the largest six months' business of any corresponding period since its existence. Of course this involves a greater volume of business than the figures would represent in normal years, the average of prices being in almost all classes of products far below the average. This is very gratifying and shows some energetic measures have been taken to get business. S. B.

The Seed Trade.

American Seed Trade Association.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention, June, 1909.

Two Per Cent, Not 98 Per Cent Pure.

Are God and nature then at strife,
That nature lends such evil dreams?
So careful of the type she seems,
So careless of the single life;

That I, considering everywhere
Her secret meaning in her deeds,
And finding that of fifty seeds
She often brings but one to bear.
—TENNYSON.

EARLY seed potatoes in the Red River Valley are reported as very promising.

ONION SET crops around Chicago show considerable improvement in the last two weeks.

WE can supply fine halftone proofs of the Detroit convention group at 40 cents each. See reproduction on the opposite page.

THE market gardeners in the middle west have a considerable acreage of onions for seed. The crop at present looks fine.

FOREIGN seed travelers report large spot sales for beet. Detroit, Crosby and Crimson Globe promise to be very short and large dealers are covering.

BULBS IN ENGLAND.—The plowing up of bulbs has begun in the Wisbech and Spaulding districts and the bulbs are turning out much heavier than last season.—S.

THE new pea Laxtonian, which has been carefully tested by American experts two years, gives every indication that it will become a standard variety in this country.

ROMAN HYACINTHS, according to reports dated June 26, do not seem to be as good as those of last season and as a whole the bulbs are not so large this year as they were in 1907. This also applies in greater degree to Paper White narcissi.

KENTUCKY BLUE GRASS for immediate delivery experienced a big drop this week owing to the unloading of large lots by the combine. The market closed Saturday at Chicago large lots $16.50. Monday the price was $8.50, 19 pounds 1907 seed.

CHICAGO.—Grass seed prices on the board of trade July 8 were noted as follows: Prime timothy, $4.10 (nominal); choice white clover, $15.—J. C. Vaughan was one of the numerous members of the Iroquois club who left Sunday forenoon for Denver. Mr. Vaughan will return by way of Minneapolis, staying over there a few days with Mrs. Vaughan.—Peter Hollenbach returned Monday from Mackinac, Mich., whither he had gone from the seedsmen's convention at Detroit.—Visitor: H. A. Johns, Sioux City, Ia.

Braslan Seed Growers' Co.

Growers for the Wholesale Trade Only.

SAN JOSE, CAL.

President Woodruff.

Watson S. Woodruff, the newly elected president of the American Seed Trade Association, was born at Orange, Conn., April 8, 1869. His father, Stiles D. Woodruff, was one of the pioneer seed growers of Connecticut, starting in the seed growing business on his return from the Civil war in 1865.

Watson S. Woodruff graduated from the New Haven high school in 1889 shortly after which he went actively into the seed business, associating himself with his father and his brother Frank C. Woodruff under the firm title of S. D. Woodruff & Sons. Mr. Woodruff married Harriet Hotchkiss January 4, 1893, and to them has been born five children, three girls and two boys, all of whom are living.

Stiles D. Woodruff died in April, 1906, and the present firm of S. D. Woodruff & Sons is made up of Frank C. Woodruff and Watson S. Woodruff. The firm makes a specialty of market gardeners' seeds, and does a large growing and wholesale business as well. The firm operates at Orange, Conn., and 82 Dey street, New York, with a branch also at Queens, L. I., N. Y.

California Seed Crops.

June 27.—John Bodger & Sons write: "Sweet peas are now being harvested, and although ours have done well for a bad season, with no spring rains, many varieties will fall very short of a full crop, and of the most popular varieties, of which we booked up close in the early part of the season, we will fall short on our contracts. Singularly the earliest planted are turning out less than those planted later, as we had a very dry blasting wind in March, which stagnated the growth of the most forward ones, while it did not injure the later planted. On the whole we hope to harvest a little over half a crop.

"Asters and other flowers are fairly good. Tomatoes, on account of the cold nights during the past month, have not made much growth, but are starting out now with the warmer weather; too early to give any idea of crops."

German Flower City.

ERFURT'S SEED AND PLANT INDUSTRY.

Writing from Weimar, Consul Will L. Lowrie says that Erfurt, a thriving commercial city of southern Prussia, with more than 100,000 inhabitants, is known throughout Germany as the flower city. It has a world-wide reputation for flower and farm seeds and plants, the trade in which the consul portrays as follows:

The declared exports of these products to the United States in the last 10 years amounted to $561,741, last year's shipments being worth $53,888. The origin of the industry dates from the tenth century, and it was developed by the monks of the Peters monastery. The growth to the present large proportions is of much more recent date. Since 1880 the business of raising flower and garden seeds and plants in Erfurt has increased rapidly, until it is now five times as large as it was a quarter of a century ago. When the land failed to produce good wine grapes, the people turned their attention to the seed industry as a means of saving their waning fortunes. In former years the hills about Erfurt and Jena were famous for their vineyards. The wine was sold mostly at Weimar, about halfway of the distance between those two cities, giving this place its original name of Weinmarkt, which was changed later to Weimar.

EXTENT OF INDUSTRY—WAGES PAID.

The soil about Erfurt is especially adapted to the culture of vegetables and plants. It is deep, rich, and well watered. The annual rainfall is heavy, and the surrounding hills afford good protection from the cool winds which sometimes sweep down from the Thuringerwald. There are 108 concerns engaged in the seed industry, also 35 seed exporters and 24 florists. An idea of the extent of this business may be gained from the area of glass employed. The total is 113,735 square meters (square meter=10.764 square feet), of which 30,867 square meters cover propagating houses, and 82,858 square meters are used over specially fertilized beds. Nearly 3,000 people are employed in various capacities.

While there are no statistics available in regard to the total annual output of the Erfurt seed and plant concerns, a single firm produces each year 70,000 to 80,000 cyclamens, 400,000 lily of the valley, 60,000 apple sprouts (in pots), 20,000 pear sprouts, 10,000 plum, apricot, peach, and quince sprouts, 30,000 strawberry plants, 300,000 short-stemmed and 40,000 long-stemmed roses. This concern has a dozen large greenhouses and salesrooms, packing rooms, blacksmith shop, carpenter shop, and bindery where the cut flowers are arranged and the dried plants and mosses are put together in wreaths or bundles. Garden products raised in Erfurt may not be peddled in the city. This business is mostly of an export nature to various parts of Germany. The annual shipment of cauliflower amounts to 6,600,000 pounds.

Compared with the standard in the United States, the wages in Erfurt are small. A superintendent receives annually 3,000 to 4,000 marks (mark=23.8 cents), a technical man 2,000 to 3,500 marks, office superintendent 900 to 2,000 marks. Experienced workmen are paid weekly and receive 800 to 1,800 marks a year. Inexperienced men receive 800 to 1,000 marks and the same class of women labor for from 500 to 600 marks. Women employed in the binderies are paid 700 to 800 marks a year. Office men work from 7 to 12 a. m. and from 2 to 6 p. m. The working hours for the other employes are, in summer, 6 a. m. to 7 p. m.; winter, 7 a. m. to 7 p. m.; rest periods are one-half hour for second breakfast (Germans take only coffee and rolls early in the morning and eat a heartier meal later on), one and a half hours at noon, and a half hour at vespers.

GARDEN LAND—VARIETIES OF SEEDS.

About 2,000 acres of land in the city and the immediate vicinity are devoted to gardens. This land is owned by the crown, the city, and private individuals. It is leased to the various concerns at rentals depending on the location and on the productiveness of the soil. Owing to the rapid growth of the city, which rivals the percentage of a western boom town in the United States, quite an area of the best garden land has been plotted into city lots and is fast being covered with fine villas and houses.

The cultivation of the gillyflower in Erfurt dates from 1810. It first appeared in the window of a citizen, and from this one pot hundreds of thousands of these flowers have been propagated. The estimated annual production is 680,000 plants. To the same extent, or nearly so, is the cultivation of the calceolaria, verbena, petunia, gloxinia, zinnia, pansy, carnation, balsam, phlox, hollyhock, pelargonium, fuchsia, azalea, etc., in almost endless variety. It is estimated that the annual output of flower seeds is not much under 1,000,000 marks ($238,000). Vegetable and farm seeds are cultivated in large quantities and in great variety. Among them are included 101 kinds of peas, 168 of beans (700 bushels shipped this year to Boston to help make up the deficit in its staple food), 269 varieties of kitchen herbs, 38 kinds of radishes and 30 of other roots, 34 of onions, etc., 65 of grass for fodder, 30 of clover, 320 species of potatoes. There are 1,542 varieties of vegetable seed cultivated in Erfurt.—Consular Trade Reports.

MARKET GARDENS.

In the Kaw valley in Missouri the potato crop has been reduced 50 per cent.

THE end of June showed a great demand for tomatoes in Cincinnati, O., Tennessee stock selling around 75 cents per crate.

IT is estimated that about 1,200 acres of onions are standing well in the Sciota valley, Ohio. A far larger acreage was planted, but deep sowing, cut worms and other causes have led to a thin stand in some places and total loss in others.

Summer Treatment of Cucumbers.

Many growers have learned how to produce a good crop of cucumbers under glass, yet some do not succeed in holding up such a crop and lose the whole thing when about half way through for which there is no need. There are several causes. The worst one is probably red spider. The second, lack of water at the roots, deep down. The third may be too high temperature and light and dry atmosphere; still another is starvation. When a house of cucumbers is in full crop, there is an enormous demand upon moisture and fertility. It is a case of water and feed. Dig down in several spots and find out conditions a foot or so under the surface.

Red spider is hard to fight after it gets a hold. Shade the house lightly with a spray pump; damp the walks and ends several times a day, and every clear morning syringe the foliage from below with as much force as the leaves will stand and use cold water. Stale warm water is not desirable for this purpose. Here is where our mechanical watering is a little lame; a good man with a good hose and fair pressure will soon move the spider where the overhead mechanical spray is hopelessly ineffective. Cucumber growers should not depend upon the overhead water system entirely—use it as a help. Then there are some men who advanced from lettuce growing to cucumber forcing, who do not know red spider. They should call on some good florist and get posted. Very often the midsummer crop sells well and costs little to produce. MARKETMAN.

The Asparagus Beetles.

These destructive insects are discussed by F. H. Chittenden in a circular issued by the bureau of entomology, Department of Agriculture, Washington, D. C. The author notes that the asparagus was cultivated in this country for 200 years before being troubled with any insects, and the beetles that are now attacking them are, he considers, importations from Europe. The common species, Crioceris asparagi, appeared first at Astoria, N. Y., and soon spread to the extensive asparagus plantations at Queens county, where in 1862, two years after its introduction, it did damage estimated at $50,000.

This beetle works mischief both to the young shoots, rendering them unfit for market, and the old growth, which it destroys by defoliation. It has since greatly enlarged its field of destruction and is known in most parts of the United States and Canada. It passes the winter in the adult state in piles of brushwood or rubbish or under loose bark on trees and fence posts, the beetles issuing in May and June, laying eggs which hatch out in a few days, the grubs starting to feed at once. Hand picking is of value in small beds, and chickens and ducks are also helpful. Lime and pyrethrum dust destroy all insects with which they come in contact, if dusted on the stems when wet with dew. Arsenate of lead at the rate of one pound to 16 gallons of water, used as a spray, is also recommended, as well as brushing the beetles off the stems and allowing the heat of the earth in the summer to kill them.

The other beetle described is the twelve-spotted beetle (Crioceris duodecimpunctata), a rarer and less destructive insect. Its depredations are chiefly confined to the injury of the young shoots in spring by the hibernated beetles. Later generations attack the foliage, living, for part of the larval stage, in the ripening berries. This beetle first appeared in the vicinity of Baltimore and is now well distributed over the United States and Canada. The same remedies as for the common beetle are recommended, except the lime, and the collection and destruction of the ripened berries is also advised.

Potatoes Scarce.

Owing to the heavy rains and washouts in Oklahoma, Texas and Kaw valley, potato shipments ceased, and western buyers came east and gathered in the best of the Virginia stock, says the Country Gentleman. New York was neglected, and her supply was so short that prime stock readily brought $3.50 a barrel. Last year old stock kept prices down in June as low as 30c a bushel. At Cape Charles, Va., one day 7,000 barrels went west, price paid being $3.25 to $3.60.

PLANTS PLANTS

500,000 Celery Plants.

White Plume, Winter Green, Giant Pascal, Perle le Grand, Many Heart, $2.00 per 1000.

JESSE HILLBORN, Newtown, Pa.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points July 4 were as follows: New York, cucumbers, $1 to $2.25 per box. Chicago, mushrooms, 35 cents to 45 cents per pound. Cincinnati, mushrooms, 50 cents to 60 cents per pound.

NEWELL, W. VA.—Chas. Cassiere, who lately resigned his position with the Lake Newell Floral Co., left July 1 for his home at Chicago, where he has accepted a position. Mr. Cassiere is succeeded by Albert E. Radke, of Pittsburg, who, with his family, has removed to this city.

Lilium Harrisii

We offer a selected stock of the original true Harrisii for early forcing. These bulbs have been grown from the original pure Harrisii, and will be found to be splendid stock for early forcing, for which purpose Harrisii is so valuable. We have had the stock inspected, and are assured that it is almost absolutely pure and almost entirely free from disease. This is not stock picked up indiscriminately from different sources, but is grown from one stock, and will be found very superior to the ordinary Harrisii usually offered, both in regard to freedom from disease and purity, and not the late type now so often furnished.

Lilium Harrisii has been deteriorating slowly for years, and in order to get back to the true type of the original Harrisii, we have had our stock grown from the original pure stock, and it will be found very superior to the Lilium Harrisii usually offered. While the stock is A No. 1, our prices are as low as, or lower than, the prices asked for indifferent stock. We have only a limited quantity of this stock to offer, so it will be advisable to place order without delay in order to ensure securing this stock. Bulbs ready for delivery middle to last of July:

6.7 in. bulbs, 350 to the case, $6.00 per 100; $ 50.00 per 1000
7-9 in. bulbs, 200 to the case, 9.00 per 100: 80.00 per 1000
9-11 in. bulbs, 100 to the case, 18.00 per 100; 170.00 per 1000

Full case lots at thousand rates.

Freesia Refracta Alba Bermuda grown, finest selected bulbs ½-in. up, $1.00 per 100: $ 7.50 per 1000
French grown, mammoth size, ¾-in. up. $1.50 per 100; $12.00 per 1000

Fancy Cut Valley Always on Hand.

H. N. BRUNS,

1407-1411 W Madison St. CHICAGO

Pittsburg.

Although there is not much business to report, every one is well satisfied as the quality of stock in general is so poor that one hates to touch it. Lilies, lily of valley and Kaiserin roses are the only flowers that show good form. Carnations are practically over with and asters are not in yet. A few outdoor gladioli are showing up in colored stock.

C. Betcher, Canal Dover, O., sent the first lot of outdoor gladioli to The Pittsburg Florists' Exchange July 4; E. J. McCallum of the latter firm left for the east on the same date.

J. B. Murdoch & Co. report a very satisfactory business in lily of the valley for June.

Karl Klinke, of The Pittsburg Cut Flower Co., left for the east July 6.

RIDGEFIELD, CONN.—Geo. I. Haight has closed out his place of business on West lane. His greenhouses have all been removed and he will superintend the erection of his new greenhouses this summer, on Danbury avenue.

CHATHAM, N. J.—A slight fire occurred in the greenhouses of J. R. Littlejohn, June 26, caused by a spark from a passing locomotive.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-Presdent; George C. Seager, Rochester, N. Y., Sec'y. Thirty-fourth annual convention to be held at Rochester, N. Y., June, 1909.

UPWARDS of 2,425,000 trees have been planted in Pennsylvania by the state since it undertook tree planting on an extensive scale.

ATLANTA, GA.—P. J. Berckmans Co., Augusta, has been given the contract for beautifying the grounds around the academy for the blind.

THE landscaping of the grounds of the Alaska-Yukon-Pacific exposition has been begun and the site is beginning to take on the appearance it will have in 1909.

AUSTIN, TEX.—Fourteen acres of the battlefield of San Jacinto will be purchased by a commission appointed by Governor Campbell and the tract will be known as the San Jacinto State park.

NEWARK, N. Y.—C. W. Stuart, of C. W. Stuart & Co., met with a painful accident June 25 while out driving. A runaway horse collided with the buggy in which he was riding, and broke his collar bone and two ribs, on the left side.

J. J. LEVINSON, of the Brooklyn park department, recommends the use of carbon bisulphid to kill borers in trees. A few drops are injected into the cavity by the use of a syringe and the opening is closed with soap to keep the gas inside the cavity. The gas generated is certain death to the borer.

BUFFALO, N. Y.—Four new spraying machines have been ordered by City Forester Filer. Two machines are already in operation on the east side of the city, Glenwood avenue being the point where work was started. The machines have a capacity of about 100 ordinary trees per day, when properly handled.

LOWELL, MASS.—J. J. McManmon, whose grounds and nursery at Brookside are most beautifully laid out, has recently purchased from the proprietors of the Essex Co., at Lawrence, the land along the river bank fronting on his property. He intends to lay out the space between the river and the railroad tracks as a park with lawns and various kinds of shrubbery and trees.

WE have received the seventeenth annual report of the St. Paul, Minn., Board of Park Commissioners, this being for the year 1907. It describes in considerable detail the many improvements carried on in the various parks and open spaces during the year and other reports of a financial character and inventories. Considerable alterations to the greenhouses were made and much good work carried out in all departments.

WATERLOO, IA.—The Waterloo Nursery Co. will be incorporated with a capital of $25,000. A large part of the capital has already been subscribed. The company has 75 acres two miles east of here on the Illinois Central and it plans to carry on a wholesale and retail nursery business similar to the large industry for which Charles City is celebrated. The Swift Nursery Co. of Cedar Falls is largely interested and several local men are among the incorporators and will have the management of the new company.

Ampelopsis Lowii.

The accompanying illustration gives a good idea of the new Ampelopsis Lowii introduced by the well known firm of Hugh Low & Co., Bush Hill Park, near London, Eng. This will undoubtedly, when better known, supersede A. Veitchi for the reason that its beautifully cut leaves are finer than the older form and the apple green spring shades turn just as readily in autumn to the bright red hues of Ampelopsis Veitchi. The habit of the plant is a finer growth than the old species and it would appear to grow even more quickly. The young growths cling closely and give a very lacy effect. Having reached the extremity of its climb, this variety has a peculiarity of not clogging the gutter, as is often seen with A. Veitchi, but hangs over in the form of a shower of young growths, which give a splendid effect.

John W. Adams, Springfield, Mass.

VETERAN'S EIGHTIETH BIRTHDAY.

John W. Adams, Springfield, Mass., head of the famous nursery firm bearing his name, celebrated the eightieth anniversary of his birthday, June 20. Time has dealt kindly with Mr. Adams, and he appreciates it. He is as active and alert today as many men 20 or more years younger. Some 50 years ago he commenced business in a small way with his father's aid and this business he has enlarged from time to time, until now he has 13 acres of land under cultivation and a number of large greenhouses run in connection with the business. Mr. Adams comes of a long-lived family, for his father died at the age of 91, having reaped the benefit of his own foresight by gathering hundreds of bushels of apples from trees which he raised from seed.

Mr. Adams has naturally many interesting reminiscences of the past to relate and he tells of the time when coal was $14 per ton, flour $19 per barrel, sugar about three times its present price, and other commodities in like ratio. He also tells of the inception of the horse railroad at Portland and, having an eye to increased values of the land, did all he could to induce the people to sign petitions for its charter. Regarding his business Mr. Adams says that new England is the natural home of forest growth and in addition the soil of his nursery, is very carefully cultivated which accounts for the splendid trees grown there.

AMPELOPSIS LOWII.

The firm does a very large business in ornamental planting and shrubbery. In 1865, Mr. Adams married Miss Sarah Frances Waterhouse, at Portland, Me., and six children were born to them, four sons and two daughters. We trust that his birthday may be many more times repeated and tender our best wishes to him.

Spirea Canescens.

For giving a pleasing display of flowers during early June, this species is one of the most desirable of the shrubby spireas, but at present is not met with to any extent in gardens. It forms a neat, compact, twiggy shrub, three to six feet high, with arching branches covered in the upper parts and on the under sides of the leaves with softly tomentose or pubescent hairs. It is a native of the temperate Himalayas from Kashmir to Kumaon, and in Sikkim at altitudes of from 6,000 to 12,000 feet. The flowers are one-quarter inch in diameter, pure white in the forms which are at present in cultivation, but pink varieties are recorded from its native habitat. They are clustered together in short, lateral, compound corymbs on the ripened shoots of the previous year, the inflorescences all turning upwards in the form of a long spray. The leaves are simple, shortly petiolate, and vary considerably, both in size and shape, on a single shoot, being mostly obovate, ovate, or elliptic-ovate in shape, entire or toothed, and from one-half to one inch in length, and one-quarter to three-quarters inch in diameter. It is a near ally of both S. hypericifolia and S. arcuata, and has been known under the name of S. caneifolia.—Gardeners' Chronicle, Eng.

Notes on Nuts.

Dr. Van Duzee, of Minnesota, said at the last convention of the National Nut Growers' Association: "The growing of nut trees is a business which responds to intelligent effort in exact measure with the amount of brains and energy employed, and is also as ready to prove unsatisfactory if same are not forthcoming. Rightly managed and vigorously followed, I believe it offers greater posibilities of success and more sure reward than any other business with which I am familiar."

The consumption of nuts is increasing rapidly, as is evidenced by the large and regular increase of importations. The demand for nuts and nut products is evidently growing much faster than the home supply is increased.

There are in the United States about 25 kinds of nut-bearing trees which are notable for their beauty as well as for their valuable products, not only of food, but of the high priced timber they furnish as well.

Dipping Trees in Lime Sulphur Wash.

EXPERIMENTS GIVE DOUBTFUL RESULTS.

Many experiments have been carried on at the New York Experiment Station with a view of determining the value of the lime sulphur wash as an insecticide and fungicide, more especially with regard to its effect upon the San Jose scale, and to ascertain its effect both upon the scale and the trees. For the experiments many apples, plums, peaches and pears were used, the trees selected being three years old. The trees were immersed singly and the temperature of the wash was 60°. Half were wholly immersed, the other half were dipped with the exception of the roots. The trees were quite dormant beyond a slight swelling of the buds. They were heeled in after dipping and on May 6 were planted 18 inches apart in the rows, the latter four feet apart, and cultivated in the usual way. On July 5 active lice were seen and most of the trees had some scale on them, though there were some that were free of scale. The trees treated in a wash at a temperature of 212° were perfectly free of insects, but were much injured, especially the young growth.

The trees whose roots were immersed, frequently sustained injury and this was apparent about two weeks after they came in leaf. The first indications of trouble were the wilting and curling of the leaves, the trees soon becoming entirely defoliated, from which condition they did not revive, the growth made being apparently entirely from the stored up food in the tree and unable to stand any sun. The roots, of course, were injured by the wash. Cross sections of roots that externally showed no signs of injury had discolored cambium and the tips of the older and the young roots entirely were killed. In the field experiments with oil emulsions, no injury was apparent, but in laboratory tests where the trees were immersed in a 20 per cent emulsion of oil the injuries were even more severe than from the lime-sulphur wash. The purpose of the experiments was to determine the merits of the lime-sulphur wash and its safety, and in view of the results obtained it is thought that this method of disinfecting trees is a very doubtful practice, both for nurserymen and fruit growers. As immersion of the tops at temperatures of from 60° to 120° for short time periods is unattended with important injury, it is possible that these may do good if the roots are kept out, but the general idea is that fumigating with hydrocyanic acid gas is a better system, especially for dry dormant stock infested with San Jose scale.

Scoring Trees.

The Lazy Club of Cornell University, Ithaca, N. Y., suggests the following scale of points for nursery stock, and invites criticism:

1. Trueness to type	10
2. Size, neither overgrown nor stunted, and to be of specified age and height	15
3. Root system well balanced, with abundance of roots	30
4. Condition, freedom from disease and pests, moist condition of roots and bark	25
5. Uniformity as to the characters of the variety	20

HARRY HEINL, West Toledo, O.

WANTED.

600 Victory field plants, good stock, about August 1.

FURROW & COMPANY, Guthrie, Okla.

Louisville.

BUSINESS VERY POOR.

Business conditions the past week were very poor and stock was very plentiful. Roses are of good quality and in great supply, with a slow demand. Carnations are not to be had in such large quantities but are plentiful, as the demand is slow. The quality is fair for the season. Sweet peas are a great glut on the market, it being impossible to move them at any price. The quality remains very good, considering the hot weather. Daisies have a fair demand and are in good supply. Other stock is in good supply and finds a slow demand. Green goods are now in fair supply.

NOTES.

A son of Wm. Walker's met with a bad accident on the Fourth of July, a can of powder exploding. While the accident was a bad one, his life is not considered in danger.

Jacob Schulz had a very attractive window for the Fourth of July. He is keeping busy remodeling greenhouses.

Reynolds & Struck are sending in some of the finest sweet peas seen locally.

Anders Rasmussen continues to send in lots of good roses.

F. L. S.

CHAS. H. TOTTY, Madison, N. J.

KENILWORTH, D. C.—W. B. Shaw, an old soldier, has great success in the culture of water lilies here and gathers often as many as 1,500 lilies daily.

LONDON, ONT.—The flower show held in the city hall, under the auspices of the Horticultural Society, June 24, was successful in every respect. The exhibits were numerous and beautiful. A Black Spanish fig tree, the property of Albert E. Roberts, attracted much attention. The tree was about six feet in height, and bore several figs. A large pot of water-lilies, which was near the entrance to the hall, was also a popular exhibit.

PLEASANT HILL, MO.—Geo. M. Kellogg has gone to the Kellogg sanitarium at Battle Creek, Mich., for a period of rest and recuperation and hopes to meet many of his old friends at the Niagara Falls convention next month.

BAYNES, B. C.—E. H. Stanley, son of W. S. Stanley, managing editor of the Fernie, B. C., Ledger, has bought several tracts of Kootonia irrigated lands here, on which he will start a large nursery. Price of the land was $1,000.

Now is the time to place your orders for

Begonia Gloire de Lorraine, Cyclamen and Poinsettias.

I am well equipped to supply the above in any quantity at the following prices:

Begonia Gloire de Lorraine, 2½ in. pots (leaf cuttings), **$15** per 100; **$140** per 1000.

Cyclamen, per 100, 2½ in., **$5**; 3 in., **$7**; 4 in., **$15**; 5 in., **$20.**

Poinsettias, 2½ in., **$5** per 100; **$45** per 1000.

Satisfaction guaranteed.

S. S. SKIDELSKY

1741 N. 18th St., Philadelphia, Pa.

J. J. LAMPERT, Xenia, O.

New Orleans.

C. R. Panter, now weighing in the neighborhood of 250 pounds says he can hold his own against any florist in the United States at ten pins.

James Newsham has returned from central America and Mexico and expects to flood the market with orchids.

H. A. Despommier, Jr., gardener to J. P. Blair, expects to become a benedict in the near future.

R. A. Chopin has had an increase in his family by the arrival of a son and feels quite happy.

E. Baker has got tired of the commercial end and has gone back into the gardening business.

H. A. Despommier has been quite sick for the past two weeks, but is now fast recovering.

John Rinck thinks of taking a trip to Chicago with his friend H. A. Despommier.

R. Reinecke is quite busy with his new Fishtail fern.

J. H. Menard is taking things easy until fall. D.

GODFREY ASCHMANN

Of Philadelphia, the well known Araucaria Specialist, is not dead, but still alive and more active than ever.

1907 Was the 12th Anniversary since he began the importing and shipping of **Araucarias** He never had such a record-breaking year. **7,000** were imported sold or shipped This, in spite of panic times, has given him new strength in his **Importing Araucaria Business.** His business is now so well established that every person in the trade, from ocean to ocean, has heard of his **Araucarias. This year, 1908, is our 13th anniversary.** What do you think? Will we be behind last year? Oh, no! Don't look like it.

WATCH US GROW.

8,000 were imported this spring and can be seen and inspected growing in our greenhouses, in all sizes and prices, potted up into 5 5½ and 6 inch pots They have now sufficiently recovered from their voyage to be shipped safely into every state and territory of the United States, Canada or elsewhere Now is the time to order. Fill your empty houses now and put something in them that will grow into money for you.

Look! Plants worth 75c now are worth by Sept. or Oct., $1.50 to $1.75 up to $2.00 each.

Araucaria Excelsa, 5-in. pots, 2 years old, 3 tiers, 8-10 in. high, 40c; 5¼-in. pots, 2 years old, 3 to 4 tiers, 10-12-13 in. high, 50c; 5½ to 6-in. pots, 3 to 4 years old, 4, 5 and 6 tiers, 14-15-16-20 in. high, 60c, 75c to $1.00 each.

Araucaria Robusta Compacta, 6 in. pots, 3 years old, 3 tiers, very beautiful plants, $1.25 to $1.50 each.

Araucaria Excelsa Glauca, 6 in. pots 3 years old, 3 tiers, very handsome plants $1.00, $1.25 to $1.50 each.

Araucaria Excelsa Glauca, specimen plants (something extra), spring of 1907 importation, suitable for lawns and porches 5 to 6 years old, 7-in. pots, 5 tiers 25 to 30, 35 to 40 in. high same in width, $1.50, $1.75, $2.00, $2 50 $3.00 to $4.00 each.

Kentia Forsteriana, 6 to 7 in. pots, 36 in. high, $2.00 each: 40 to 50 in. high, $2.50 to $3.00 each; 6-in. pots, 30 in. high $1.50; 6-in. pots, 25 in. high, $1.00; 6-in. pots, 20 to 25 in. high, 75c, 5 to 5½ in. pots 50c.

Kentia Belmoreana, 5¼ to 5½ in. pots, 22 to 25 in. high, 50c, 60c to 75c; 4-in. pots, 20 to 22 in., 35c.

Begonia Gloire de Lorraine, 3-in. pots raised from leaf cuttings, ready to shift into 4-5 in. pots, 25c.

LOUIS VAN HOUTTE, PERE,

GHENT, BELGIUM.

Washington.

It will cause general regret among those who are familiar with the horticultural features of this city, to learn that Geo. H. Brown, superintendent of the U. S. propagating gardens, is in poor health. He is now at White Sulphur Springs, Va., where it is hoped a marked improvement in his condition will be speedily brought about. During his long tenure of service with the government he has made hosts of friends, and kept them, and his work as a landscape gardener has for years been among the noteworthy features of this city, while his genial and kindly disposition has endeared him alike to his associates and subordinates. The veteran W. R. Smith is also in poor health, but it is hoped that he will soon be himself again.

There have recently been reports from New York and other cities of a movement to place the name of Adolphus Gude before the convention of the S. A. F. at Niagara Falls as a candidate for president. Mr. Gude is a very busy man and it is doubtful if he could be induced to make the race, but the convention could make no mistake in selecting him. The writer has no personal prejudice for or against any candidate but from long and intimate knowledge of Mr. Gude as a florist and business man, as a citizen and head of a family, he is constrained to state that he is a man eminently fit for the office.

Chas. McCauley, secretary of the Florists' Club, has been visiting New York.

Brampton, Ont.

We hear from Georgetown, that Wm. Downing, who has been foreman for H. L. Janzen & Son, of Berlin, for the past three years, has taken over the management of the Georgetown Floral Co., Ltd. Mr. Downing was with the Dale Estate for some time before going to Berlin. We hope that he will be successful in his new position.

Alex. Stewart and W. H. Thompson are leaving the Dale Estate to go west July 21. They have taken tickets for Edmonton, Alberta, but will stop off at several places on the way out to have a look around the country.

The new houses at the Dale Estate are going ahead rapidly and will be ready for the glass in a short time. There are five houses 300 feet long, and they will make a magnificent range when completed. L.

Also others in a few days.

ORDONEZ BROS., Madison, N. J.

Toronto.

PRICES LOW.

Business has assumed the usual summer proportions, with the new price list just issued quoting stock at the lowest price of the season. Roses are not so good in quality with the prices lowered, and only a few varieties to cut from. There are only a few American Beauty, Bridesmaid, Bride and the summer cut of Kaiserin, the other varieties having been discarded until the fall. Carnations are in fair supply and good quality at present, but indications are that they will not hold good much longer. During the last two weeks there has been an unprecedented demand. There was more used than anticipated, but the difficulties are overcome and there is plenty for all. In lilies there is a nice quality of good stock of Longiflorum at present, and as these are storage stock they will evidently be procurable for the balance of the season. In green goods, smilax has been very scarce, but other varieties are abundant. In orchids, special attention is called to the superior varieties which are grown here; at present they are being sold at very moderate prices.

NOTES.

Wm. Bowers has severed his connection with Dunlop and is conducting an establishment of his own on McDonald avenue. At present he is cutting some very good Kaiserin and has material on his place for the addition of several more houses, and will go into other varieties of roses.

The prize list for the Canadian national exhibition has been issued and there are inducements which should appeal to all florists, the prize money in the floral section being thousands of dollars.

Wm. Reggall, of the Rosedale Florist's, has some attractive oddities in the shape of poultry that happened to be well trimmed boxwood plants, and meet with ready sale.

Harold Mills, of the Bedford Park Co., has severed his connection and is at present with J. H. Dunlop. H. G. D.

GERANIUMS.

OUR SPECIALTY

We are preparing to grow Geraniums on quite an extensive scale next season, and are making very interesting prices on orders booked now for delivery during the fall and winter; send us a list of what you can use and when you will be ready for them and see what we can do for you. Only plants from 2-in. pots; we do not send out rooted cuttings.

We have a Splendid lot ready for immediate shipment from 2-in. pots, in fine shape.

Standard Sorts, at $2.00 per 100 and up. We will send 1000, 50 each of 20 varieties, our selection for $18.50; single or double, all good sorts; a splendid collection to stock up on.

	Per 100
Smilax, strong plants	$2.00
Coleus, Golden Bedder and Verschaffeltii, 2-in., $2.00; 3-in.	3.00
Begonia, Vernon and Gracillis, 2-in.	2.00

Newer Varieties, selected from the finest introductions of 1905-6, at $6.00 to $8.00 per 100.
Novelties, one each of 50 varieties, for $5.00. 1907 introductions of Bruant, Lemoine, Rozain-Boucharlat, Cannell and other specialists.
Hardy Chrysanthemums, $2.00 per 100; 500 in 20 varieties, our selection, for $9.00; 1000 in 20 varieties, our selection, for $17.50. Strong plants from 2-in. pots.

Visitors always welcome. Cash with order.

R. Vincent, Jr. & Sons Co., White Marsh, Md.

AUTOMOBILES PLENTIFUL.

Although one hears complaints of business being none too good, nevertheless if one should judge from appearances and style he could not help but think the past year one of the most prosperous in the history of the city for florists. Five of our florists own large touring cars and the sixth is contemplating buying one. No doubt other business men envy our prospering craft.

The place of Fred Moritz, Edmonds avenue, was entered by burglars the morning of July 3. His plucky wife happened to see one of the robbers at work. She was upon him before he had time to realize that some one was in the office. Mrs. Moritz had the fellow by the collar and called for help, but thinking his wife was calling him for breakfast Mr. Moritz did not respond at once; consequently the intruder escaped, much to the disappointment of Fred.

F. C. Bartells, of the Essex Greenhouses, North Olmsted, sent the first asters of the season to the Florists' Exchange. Mr. Bartells says he expects to have a large crop throughout the entire season.

P. J. Probeck, Morrison avenue, had an accident last week. While driving down East Ninth street his horse became frightened and ran away. No serious damage was done.

FORESTER.

MONSON, MASS.—G. L. Fuller is now giving his entire attention to flowers. For a few years past Mr. Fuller has been building up a business as a florist in which he has been successful.

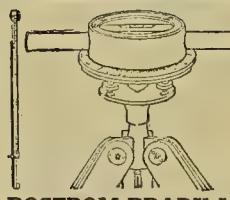
THE BEST WAY TO COLLECT AN ACCOUNT

is to place it with the

NATIONAL FLORISTS' BOARD OF TRADE

56 Pine St., New York.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.



Bostrom's Improved Builders' Levels and Farm Levels

For Parks, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level $25.00. Farm Level $12.50.

If you do not find what you need in our Ready Reference Department, write us about it.

St. Paul.

STOCK VERY POOR.

Business has now dropped off to the summer dullness. The only thing doing to speak of is a few belated wedding orders and an occasional spurt in funeral work. All cut flower stock outside of lilies is very poor, roses especially, and scarce at that. Peonies are practically all gone except for some cold storage stock, which is not very satisfactory. Outdoor sweet peas are late, owing to the wet dark weather, and a great many have been destroyed by grub, worm, etc. A few asters have made their appearance, but not good enough except for design work. The week of July 12 is being looked forward to as a busy one, owing to the Shriners' conclave, which is booked for here then. Some good sized orders have already been received. The parks have all been planted with the different Shriners' emblems, such as pyramids, fezes, crescent, star and scimitars, etc., and attract a good deal of attention. The work has been done under the direction of Fred Nussbaumer, who was lately made a member of the order, and the designing is very well done.

NOTES.

The flower exhibition of the Minnesota Rose Society was a big success this year. There were over 200 entries, comprising all sorts of garden flowers. The campanulas, delphiniums and sweet williams were worthy of especial mention. There was also an exhibit of English and Spanish irises which was unusually fine.

Frank Gustafson has nearly completed rebuilding a part of his houses. When finished this plant will be one of the best in this vicinity.

There is very little sport among the members of the trade here now, a few of them contenting themselves with a day or two of fishing.

F. & W. Topel have dissolved partnership, Fred Topel continuing the business. O.

Spokane, Wash.

At the recent rose show at All Saints parish house Mrs. J. P. Graves showed some very lovely Ulrich Brunner roses, which received first prize. Mrs. Crombie was also a successful exhibitor, showing La France. H. W. Axtell was first for the largest variety from one garden, showing 48 varieties and an urn from the garden of H. M. Richards, containing roses, was second. Other fine exhibits were noted in the cut flower classes and the table decorations.

The Delamothe Natural Art Decorating Co., of Spokane, was recently incorporated for $150,000, with the following officers: L. G. Delamothe, president; Col. A. M. Dewey, vice-president; Joseph A. Borden, secretary; Dr. A. Starke Oliver, treasurer; E. J. Hyde, general manager. Its purpose is to make this the rose city of America.

DENVER, COLO.—A beautiful new dahlia has been named Mrs. W. K. Jewett by W. W. Wilmore. The color is apricot.

Rates on Greenhouse Building Material.

The following communication will be of interest to greenhousemen and greenhouse builders at this time:

June 19, 1908.

F. O. BECKER, Chairman,
Western Classification Committee,
Great Northern Bldg., Chicago.

Dear Sir: In making shipments of our goods throughout the west we are having considerable trouble owing to the fact that there is no way of shipping mixed carloads of what we term greenhouse material. We are shut out of a great field due to the fact that we cannot ship mixed carloads on a sufficiently low rate to get the business or to make it interesting for the prospective buyer of our class of goods. We respectfully request that you give us a fifth-class rating on carloads of our material, and pursuant to our application for a fifth-class rating on what we term "greenhouse material" in carloads would state that the average carload of this material or commodity would be made up about as follows:

Common pine lumber, 10,000 pounds (fourth-class L. C. L.).
Common pine mouldings, 4,000 pounds (third-class L. C. L.).
Common unglazed sash, 1,000 pounds (second-class L. C. L.).
Iron castings (rough), 1,500 pounds, fourth-class L. C. L.).
Iron pipe (wrought), 1,000 pounds, fourth-class L. C. L.).
Common window glass (small), 10,000 pounds, (fourth-class L. C. L.).
Putty, 500 pounds (fourth-class L. C. L.).
Average weight of car 25,000 to 30,000 pounds.

In many instances we can, by the application of the carload lumber rate, plus one cent per 100 pounds for articles taking higher than lumber rate, and the application of fourth-class L. C. L. rate on balance of the items enumerated above, make a lower rate than would be assessed on a fifth-class rate on the entire consignment, figured on a basis of a minimum weight of 30,000 pounds for the car. However, it would be possible to do this, and these conditions would obtain, to only such nearby points as have a comparatively low rate on lumber, say seven or eight-cent rate.

To points on western trunk line territory, and to points west of this territory, we have found by experience where we have been obliged in making up carloads to apply the L. C. L. rates of second class on the common unglazed sash, the L. C. L. rates of third class on the common pine mouldings and the L. C. L. fourth-class rates on balance of the list, that it makes shipping prohibitory, resulting very frequently in loss of sales by us and loss of revenue by the transportation lines. To all these points we cannot successfully ship and compete with local dealers, and the result follows that the man who is going to put up greenhouses builds them with locally improvised materials on which interested lines did not get a revenue or handle as freight. Far western points cannot be reached, as they use cedar, fir and other local woods for the houses, having the material made by local planing mills, whereas with a fifth-class rate we could get the business. Our class of goods are the goods that the greenhouseman wants for his houses, and if it were not for the excessive freight charges he would buy them rather than put up something inferior in construction and in quality of materials used. A fifth-class rating on "greenhouse material" would result in increased tonnage for the railroad lines and would tend to educate the people in the territory mentioned toward buying goods in this market. It would lessen their dependence on local industries that are not equipped to furnish the goods that a man wants, but which he is forced to buy on account of the excessive tariff on this class of goods. The application of a fifth-class rate would enlarge our business along with the business of several other firms in this market who are making and selling the same class of material as mentioned in this letter.

Reference to classification 44 shows that in a number of instances mixed carloads made up for the benefit of dealers in a particular and special line of business are permitted; notably among them is creamery supplies and cooling room material and machinery, which, by the way, is much higher grade of freight than the class of goods which we are shipping. Creamery supplies, cooling room materials and machinery, while a higher grade of freight, can be shipped at a lower carload minimum weight than we request you to establish on our greenhouse materials. We would further point out that under the Illinois and official classifications we are enabled to ship mixed carloads at the carload rate and at the highest minimum for any article contained therein. We give here two specific cases where shipments were made and these will show at a glance the difference between shipping as mentioned in the first part of this letter and shipping under the official classification. A carload of greenhouse materials made up as follows is to be shipped to Denver, Colo.:

	Pounds.	Rate.
Lumber	10,000	$0.97
Mouldings	3,000	1.25
Sash	600	1.65
Castings	950	.97
Glass	10,500	.97
Putty	500	.97
Pipe	1,250	.97

With these rates it is almost impossible for us to get much Denver business, but if we had the fifth-class rates on the carload we could send it at 77 cents and get the business. This would save the consignee 20 cents per 100 pounds, you would get the haul and the revenue and we would increase our sales. Take the same car to Columbus, O., and we could ship it on a 15-cent rate on the basis of a 36,000-pound minimum. We respectfully request that you consider our petition for a fifth-class rating on greenhouse materials.

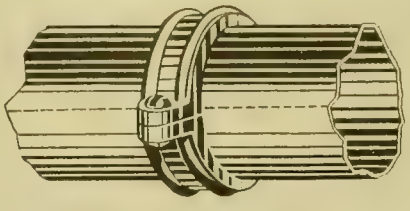
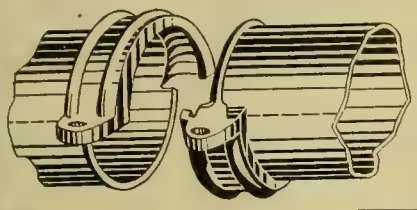
SANDUSKY, O.—The board of public service has practically decided to locate the city greenhouse upon Monroe street, facing the Ninth ward school. The decision of the board means that the original plans of the greenhouse will have to be altered, but it is thought that the cost of the building will be materially reduced.

Stuttle's Patent Pipe Clamp



Especially adapted for joining old boiler tubes now so generally used in hot-water heating of greenhouses. Also it is invaluable for utilizing old cast-iron pipes which otherwise would be consigned to junk pile.

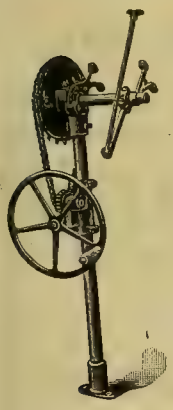
Easy to put on in any position and even more easily removed.
Cheap as the cheapest joint in use and 100 per cent superior.



HENRY STUTTLE,

Inventor and Patentee.

BATAVIA, - ILL.



The Advance Ventilating Apparatus

It is what our line does, the ease with which it does it, its neatness, lasting qualities, all at fair prices, that makes friends of our customers and brings us the orders. Why not give us a trial? Write us about our new pipe couplings. Best thing on the market.

THE ADVANCE CO.
RICHMOND, IND.

Tacoma, Wash.

We have experienced unusually cold and backward weather and consequently all outdoor flowers, as well as garden vegetables, are late. Roses are weeks later than usual and sweet peas are nearly a month late. Lateness of season has extended the season of good business in the stores and while some complaint is made of poor business the trade has kept up fairly well and good flowers are plentiful. Outdoor planted stock has started poorly after transplanting to the open but now that it is started we look for good stock. Among carnations Lawson is a failure and most growers are not going to put in many. It does not sell and Enchantress still leads. White Enchantress and Lady Bountiful are always good and White Perfection is fine. The outdoor two-year-old roses were not so much in demand as in past seasons for bedding. Caroline Testout leads them all in beauty except Kaiserin and General Jacqueminot.

TACOMA.

FORT DODGE, IA.—Articles of incorporation were filed June 28 with the county recorder by officers and stockholders of the North Floral Co. The company is incorporated for $10,000, $3,000 of which is already paid up, the remaining $7,000 to be converted into stock. Otto Hansen is named president, in the articles of incorporation, J. H. Schaffner, vice-president, and Elmer E. Nordwall, secretary and treasurer. The work of preparing the grounds for the site of the greenhouses at the corner of Eighth avenue north and Sixteenth street, has been completed, and the erection of the buildings started. Messrs. Hansen and Nordwall have been connected with the P. L. Larson greenhouses.

JUNE BUSINESS GOOD.

Business has now settled down as usual in summer, and all one hears is satisfaction. While many complained earlier in the season trade was not up to last year, the volume as looked at now, has been bigger, June turning out unexpectedly. Our boys are now all busy cleaning up and planting chrysanthemums; new houses are going up and old ones that needed repairing getting attention.

NOTES.

J. L. Schiller's new house is ready and planted almost entirely with Golden Glow chrysanthemum: his cyclamens and primroses are looking very well in frames, while on his farm half an acre of asters will be ready to cut very shortly.

Peck's two houses are all ready but the glass. His youngest daughter, Grace, was married June 29, to O. F. Holloway; the church was elaborately decorated, a big crowd attending.

The Florists' Club seems to have lost its starch during these hot days; no one appears on club nights and we intended to have a long talk about our first picnic.

Chas. Schramm and F. Schoen both lost their mothers recently through death and have the sympathy of the trade.

S.

Cypress Hot Bed Sash, 90c

This Hot Bed Sash is absolutely brand new and first-class in every particular. We bough 5000 of them at a sale and give you the benefit of our low purchasing price. This sash is 3x6 ft., 1¾ in. thick. 4 rows 7-in. glass dozen lots, 90c each. When ordered in single lots, 95c each.
We can also furnish glazed sash $1.60 each, in dozen lots, or $1.65 each in single lots.
We offer 2,000 **Western Pine Hot Bed Sash,** brand new, unglazed, in single lots, at 90c., or in lots of one dozen, each, 85c. Glazed, in single lots, $1.60; dozen lots, $1.55.

5,000 ft. of 3-4 in. GARDEN HOSE
4c per ft. Brand new **"Competition" Garden Hose,** size ¾-in., 50 ft. lengths with couplings, per length, $2.00. Louisiana Red Cypress

As described by Bassett & Washburn.

CHICAGO, Nov. 20th, 1906.

Dear Sirs:-- Replying to your favor requesting our experience with Pecky Cypress, we will say, we have been using this grade of Cypress in our greenhouses and plant benches for the last **ten or twelve years** and so far **have not found any of this wood that has all rotted out.** We formerly used Hemlock and Pine but found that 2-inch stock only lasted about four years while so far we have had no Pecky Cypress rot out in ten or twelve years. We use clear Cypress for all our roof work, ventilators, etc., and it is very satisfactory. **We think it is the only kind of lumber for the purpose.**

IT IS THE MOST DURABLE WOOD KNOWN. Ask about it at your local lumber yard or write

Newport, R. I.

THE ANNUAL ROSE SHOW.

The exhibition of plants, fruits, roses and other cut flowers under the direction of the Horticultural Society opened June 23. The show, although not as large as other years, was an excellent one, the variety and quality of the exhibits surpassed all former shows, and it was a decided success.

Some of the most interesting features of the show were the following: A table of begonias, gloxinias and thunbergias exhibited by Mrs. W. G. Weld, of especial interest because of the excellency of the begonias; a very attractively arranged group exhibited by Mrs. Robert Goelet. Two specimen ferns shown attracted much attention. Nothing like them has ever been seen here in competition before.

Mrs. E. J. Berwind in the special exhibits showed the new rose, Princess Marie of Salm, which had been cultivated by her gardener, Bruce Butterton. The rose came originally from Germany, and is not considered especially beautiful, being valued only as something new and uncommon.

The following special awards were made: Mrs. T. O. Richardson, certificate of merit for vase of dahlias.

Mrs. Winthrop Chanler, gratuity for vase of seedling delphiniums, honorable mention for a sweet william Newport Pink, a bronze medal for Sutton Queen, a new sweet pea.

J. G. Leikens, gratuity for specimen kentia.

Mrs. E. J. Berwind, certificate of merit for new rose Princess Marie of Salm.

Mrs. W. G. Weld, gratuity for table exhibit of begonias, certificate of merit for gloxinias, and silver medal for excellency of begonias.

Mrs. H. D. Auchincloss, honorable mention for cauliflower, gratuity for water lilies and collection of annuals, and honorable mention for display of Canterbury bells.

A. McLellan, gratuity for vase of delphiniums, digitalis, and lychnis.

W. S. Sisson, gratuity for a cactus.

J. Harriman, certificate of merit for display of Canterbury bells, and Mrs. E. C. Post a similar award.

Miss A. Keteltas (Wm. Matson, gardener) certificate of merit for seedlings of sweet william, Canterbury bells and cosmos, Lady Lenox.

Mrs. S. B. Fay of Wood's Hole, Mass. (M. H. Walsh, gardener), gratuity for vases of Mrs. John Laing, Clio, and Mrs. Sharman Crawford hybrid roses.

Mrs. Robert Goelet, gratuity for specimen kentia.

The judges were, Bruce Butterton, Paul Volquardsen and John Baumgartner. Z.

SUGGESTIONS FOR PLANT GROWERS.

Asparagus Plumosus.

The seedling plants in flats should be getting strong now and a few hundred may be potted to grow on for Christmas, when they will make useful little stock for use in fern dishes, small baskets and other popular devices. Avoid breaking the roots when potting and also take care of the young shoots that are springing from the base, as these form the new plant. Keep the pots small, as they may be more easily worked into the dishes, etc., and the plant does not need a great amount of root room in a small state. Stock now in 2½-inch pots may be repotted into 4-inch, and, given good culture from now on, will make elegant little stock by Christmas.

Pentas Lanceolata.

To save labor in watering, this pretty little plant is sometimes set out in summer and potted in fall, but where it can be kept in pots all the season the plants keep more compact. Spring struck cuttings may now be potted into 5-inch and grown on in a light, cool house, with full air on night and day, or in frames or protectors similarly treated. Keep the flowers picked out as they appear and pinch the young shoots to maintain a bushy habit. About November let them go to flower and by midwinter they are splendid little bushes. The flowers are pure white and the plant is much better in habit than the old P. carnea, which is too loose to make a nice pot plant.

Primulas.

Never allow seedling primulas to be checked by remaining in the seedbed too long. As soon as they are in the rough leaf and strong enough to stand transplanting, prick them out two inches apart in flats to gain strength before potting. The seedlings are very brittle and must be carefully handled, as if the leaves are broken the plants are checked at the outset. In pricking them out or potting when necessary avoid covering the crowns or allowing the plants to swing. The shading must be judiciously used, and as the little plants develop they must be kept well apart to prevent drawing. After they are established shading is only necessary on the brightest days and for a short time in the middle of the day. If the lights are left off or tipped to admit plenty of air they will stand the sun for the greater part of the day. Keep the dead leaves picked off any old plants that are being held over and do not allow them to flower.

Araucarias.

Why some growers have their benches empty at this time of year is difficult to understand. Araucaria excelsa is always a good seller, especially around Christmas, and stock purchased now and grown on will be worth almost double its price by the end of the year. This araucaria does not want heat and is not particular as to situation as long as it is sufficiently shaded from sun to prevent injury to the foliage. Lath houses for the summer or even well ventilated frames are suitable growing quarters. Stock is offered by advertisers sufficiently re-established to travel safely, and a few days in a rather close, moist atmosphere will insure their taking no harm. Keep up a moist, cool atmosphere about the plants right along and see they do not suffer for want of water at the root. Light spraying in hot weather several times daily is an advantage.

Cyclamens.

The earliest sown cyclamens should by this time be ready for a shift from 2½-inch pots, and, if they are well rooted, may go into 5-inch pots right away. There is no danger in a large shift to plants that are judiciously watered afterwards, but if this work is left to inexperienced help, with no interest beyond getting the day in, then it is safe to prophesy disaster, for some of the pots will be soaked out with water and others, probably, will not have enough. The correct treatment for them is to place them in a light position, yet shaded from bright sunlight; keep the hose going between the pots to prevent rapid drying and just keep the soil a little moist so the roots will run freely. Light spraying overhead is also effectual in keeping the foliage plump after potting, but it is easily overdone. Keep the temperature around 60° at night, with sufficient air to keep the atmosphere moving, and the plants will soon commence to grow with a will, covering the pots with foliage and making up grand bulbs to flower later.

Decorative Stock.

There are so many small decorative plants that are useful in making up different devices that there is absolutely no reason for the sameness that so often prevails in these at Christmas, Easter and other times. Some of the smaller foliage begonias are excellent for this purpose and easily raised, either by cutting up the stems and rooting them or by laying the leaves on pots of sand and breaking the midribs in various places to induce the formation of young plants to be afterwards potted and grown on. Fittonias again are easily raised from cuttings inserted at any time when room can be spared. There is great variety in the foliage of these beautiful plants and it is difficult to account for their neglect in so many plant establishments. The pretty little Panicum variegatum is another charming edging plant. Cuttings should be inserted thickly in small pots and kept very close and moist until rooted, when they soon grow into neat little specimens for the purpose indicated. Tradescantia zebrina may be similarly treated, though naturally the cuttings need not be so thickly planted. Either of these may, of course, be grown on into larger sizes, but they are especially suitable for small plants for edging. Caladium argyrites is a very telling little plant for the front of a group of plants or basket. The bulbs are too dear to place in the cheaper plant devices, but a stock of them can soon be worked up and it is one of the most decorative plants in existence. Many of the smaller growing aralias, panax and even dracænas and pandanus are easily raised from seed and cuttings and there are numberless others that are just as good. Growers who have a private trade should always be working up stock of these excellent little subjects, as they make a pleasing change from the more ordinarily grown stock, while their culture costs practically nothing.

Basket Plants.

For permanent basket plants there are few better subjects than Asparagus Sprengeri and Boston ferns, and there is always a demand for them. Rather than wait to make them up just before they are needed it is well to keep a number always on hand. It is not advisable to keep a heavy stock of small baskets. They give considerable trouble in watering and are not as effective as larger ones. If there is a call for small ones by all means fill them but, as a rule, the 12-inch size is small enough and larger are even more profitable. Some very effective results may be had by planting Boston ferns and English ivy in the same baskets and these are always good sellers in large and medium sizes. For a 14-inch basket, plant three or four 4-inch Boston ferns and fill in around the edge with ivies out of small pots. They will soon grow into shape and keep on improving. Asparagus Sprengeri should be nearer the size of the basket or more plants should be used as this takes longer to grow into effective specimens. Line the baskets with sheet moss and let the soil be good. Fill in carefully and firmly so that the soil does not swell out when watering and see that each basket is thoroughly soaked before suspending where they are to grow. Usually this will be in houses devoted to other ferns and possibly there will be sufficient shading for them but, if not, arrange for this and keep them lightly shaded and in a comparatively close atmosphere until they are again established and growing freely. Baskets made up this way and well established will give far more satisfaction than if made up just before use and they pay best in the end.

Flowering of Century Plant.

ED. AMERICAN FLORIST:

Enclosed is a photograph of a century plant in flower. This specimen was planted about 14 years ago and stands in the well kept grounds of Mrs. W. H. Anderson at Phoenix, Ariz. The flower stem is 30 feet high, having attained this height in about eight weeks. The stalk, where it leaves the plant, is about 10 inches in diameter and as straight as an arrow. Around the plant are a lot of suckers and all are in bloom. Some few years ago another specimen flowered here and then died, but so far this one shows no sign of dying.

Agave Flowering at Phoenix, Ariz.

ARTHUR MELLOR.

Antidote for Poison Ivy.

ED. AMERICAN FLORIST:—

Trusting that it will be of help to some of your readers I wish you would publish the following absolute cure, or antidote, for poison ivy: Providence has provided two plants which generally grow in close proximity to the poison ivy, at least in our neighborhood. They are a sure cure for or preventive from poisoning by coming into contact with Rhus radicans and Rhus toxicodendron. The antidotes are Impatiens aurea (Mechlenburg) having a pale yellow flower and Impatiens biflora (Walb) having a spotted flower. Mash the leaves of either of the impatiens and rub on the affected part and it will prevent poisoning or, if the person has been poisoned, use as a poultice. We do not know that the impatiens will act as an antidote to Rhus vernix or poison sumach as we have never come in contact with it and therefore cannot tell from experience.

Pittsburg, Pa. J. W. K. & CO.

CHRYSANTHEMUMS

Cultural Notes.

Keep a lookout for too early buds and rub them off as soon as they appear. There are very few varieties which will make good blooms on buds taken the first half of July and even if they did there is no sale for them as a rule before the end of September. This was illustrated last year when they were ready earlier than the buyers. On the very early varieties take a few buds after July 15 if the plants are big and strong enough to support a good bloom, but if the plants are not ready rub off the early bud and keep the strongest of the top shoots which will soon make another bud. G. T.

Specimen Exhibition Plants.

The specimen plants and standards intended for the fall exhibitions should now be given their final potting. The size of the pots for these plants must first be governed according to the restrictions of the premium list and then according to the present condition and size of the plant under consideration. If the plant is in vigorous growth, with soil well filled with roots, say in a 10-inch pot, a shift from this to the 14-inch size will be about right, with the smaller sizes in proportion. A careful study of the habit and style of growth the plants have attained up to this time can be made, and some idea formed of how the plants are going to shape themselves. Those that have been and are still making extra long growths, though they may be the larger plants at this time, are very likely to be beaten out before the finish by those that are more bushy and not quite as large, but which are putting on a lot of healthy short jointed growths. Plants now making long jointed growths are very likely to have a lack of shoots and a bareness of foliage for a considerable way up above their pots when developed, which detracts from them as fine specimens.

Use a good live soil, containing about one-third well rotted cow manure, but do not make it over fine, only enough to be able to properly work it down between the ball of roots and the sides of the pot. Give plenty of drainage, pot firmly and be extra careful in watering until fresh root action has commenced. A light syringing three or four times a day will be very beneficial. It will keep the foliage in good condition and encourage a quick return to vigorous growth. After repotting the standards they should be staked and supported to prevent any of them getting damaged from syringing or other causes. Also as soon as new growth is fairly started pinching the growths should be followed up again until about August 1. Any plantings of the cut flower stock not completed should receive attention without delay, late varieties included with any others, as it is time for them to be in their permanent quarters. The details as to soil, etc., for planting, advised for the early and mid-season varieties also applies to these, excepting that they can be planted closer; a distance of six inches apart each way or even a little less will be sufficient for the proper development of any of the late varieties that we have had any experience with. Outside of the necessary daily routine of watering and attending to the other necessary details, as keeping the beds free from weeds and the insects from the plants, together with the pinching out of the side growths, the most important work to be attended

Cattleyas Naturally Disposed on Virgin Cork.

Salon Decoration of Cream Roses, Cattleyas, Foliage and Purple Silk.

TWO DISTINCT FLORAL DESIGNS BY CARL OBERHEITMANN, NEWPORT, R. I.

to in connection with the plants already established in the beds is to see that they are properly staked and supported. We use bamboo stakes, tied to a wire at the top, after the same plan as followed in staking roses, and find it works as well as any method. C. W. JOHNSON.

Notes on Sweet Peas.

So far this season has proved a most trying one for sweet peas, and everything else. We jumped from a good snow on May 1 into torrid summer weather and extreme drouth. No rain to amount to anything for almost two months and only clear hot days, such as we would expect in August. Under these conditions Nora Unwin is easily the best, not only best white but best all around florists' sweet pea. It gives us better stems than White Spencer, and the flowers are grand. White Spencer, while more massive, lacks in length of stem. Otherwise it is certainly fine. Among pinks, Countess Spencer and Gladys Unwin are a tie. The best way is to retain both. Mrs. Watkins is a disappointment. While productive and strong, it fades quickly and burns badly and will not be planted again. Phyllis Unwin has the Lawson color, which is unpopular, hence it will be dropped. Scarlets we do not grow as there is no demand for them. In lavender, Mrs. Higginson fills the bill as in former years, as the color is just right. Sales are slow and prices low owing to general depression of business. MARKETMAN.

BUTTE, MONT.—Columbia gardens are in fine shape this year and there is a talk of enlarging the conservatory, already too small for the large palms that are growing very fast.

THE RETAIL TRADE

GARDENIAS placed in the finger bowls, to be worn by the guests during the evening and laid aside when they are ready to leave, are fashionable in some of the best eastern houses.

Two Distinct Floral Designs.

The two distinct and artistic floral designs depicted in the accompanying illustration are the work of that clever decorator, Carl Oberheitmann, of Newport, R. I., whose work we have frequently noted and figured. The orchids are very natural looking with their setting of virgin cork, and the other design is a unique and beautiful color scheme in cream and purple. The silk is purple and the roses are cream colored, well set off by the choice cattleyas and suitable foliage.

Summer Flowers in Chicago.

There is no getting around the fact that the stores have a decidedly summer appearance and that stock in general is far from good. With a few exceptions roses are decidedly poor. There are a few good American Beauty in some of the stores, in others there are none or only small flowers. Killarney is again proving its value as a summer rose, its lovely coloring on the inside of the petals being one of its charms. For a pink rose Killarney is undoubtedly the finest thing, as an all the year round producer, there is. Long after Bridesmaid has ceased to produce good stock Killarney is delighting us with lovely flowers and although there is room for both in winter there is no question as to which is the better for summer use. Kaiserin is not too plentiful though some fine flowers from young stock have been seen already. Richmond is thin but Cardinal is a little better.

As good summer flowers, cattleyas undoubtedly take a very high position. Fine C. gigas and C. Gaskelliana are coming in limited quantities but the best retailers would like to see more of them. The local supply is still much below the demand but the eastern stock shipped in is very good. Dendrobiums are scarce but are not missed as much as cattleyas would be. Sweet peas are plentiful in most colors but have not the substance they had earlier in the season. Lily of the valley is as good as usual, and about the ordinary amount is coming in. The red milkweed, Asclepias tuberosa, is plentiful just now and is perhaps the best keeping flower among the cheaper things. It is bright and effective, stands up well in the hottest weather and if wilted a little at night will pick up in the icebox and look as well as ever the next day.

Carnations are poor, especially the pink shades. There are still some good whites, notably White Perfection, and White Lawson is good in some places. Enchantress is very poor in color but Winsor keeps bright. Among small summer flowers Shirley poppies are very pretty as are Iceland poppies in a few stores. Peonies are practically over; the cold storage flowers have been fairly good but one wholesaler says that another week at most will finish them. Gaillardias are good hot weather flowers as far as standing the heat is concerned, but they are not favorites for hot weather decora-

tions. Candytuft is a great help in make-up work and the outdoor antirrhinums are especially fine this year. Some of the deep reds and sulphur yellows are perfect. Gladioli, of course, are plentiful, but we have not heard of any such slaughtering of prices as occurred last year. The pretty little gypsophila is useful and is especially attractive for mixing with heavier flowers; sweet peas are also very beautiful arranged with gypsophila. Liliums are now mostly confined to L. auratum, of which there are fine stocks. It is one of the showiest flowers on the market in fact. Nasturtiums and cornflowers are showy and bright and there are enough flowers to meet all demands.

WITH THE GROWERS

Wa-No-Ka Greenhouses, Barneveld, N. Y.

This business was established some years ago by C. A. Nicholson and his son, H. H. Nicholson, under the firm name of H. H. Nicholson & Co., and the establishment is devoted exclusively to the cultivation of carnations. In 1905 A. O. Grassl was admitted to equal partnership with H. H. Nicholson, C. A. Nicholson retiring, and the business thereafter was conducted under the name of the Wa-No-Ka Greenhouses.

Since Mr. Grassl's connection with the business, he has devoted much of his time and attention to the production of high class seedling novelties, and today the concern has many seedlings of extreme merit. The process of elimination of seedlings is a most severe one. The result is, that only such varieties are retained and developed as possess good form, good calyx, long, heavy and stiff stems, and are unusual producers. Mr. Grassl, as is generally known, is an expert in carnation culture, and an originator of many desirable novelties. His personal attention is given to the production of every new variety grown on the range. Hence, nothing is placed before the buyers that will not equal or eclipse the best carnation novelties yet introduced. We have already figured the greenhouse plant and the following varieties are now illustrated:

Apple Blossom.—A gorgeous, full, white, with a delicate pink blending in the center of the flower, suggesting the delicate apple blossom of early spring. Flowers borne on long, stiff stems, making a grand display and suitable for every purpose. Is very fragrant, comes early and in great profusion through the season. Calyx does not split, and the flowers have excellent keeping quality and ship without difficulty or trouble. Best grown in night temperatures of 48° to 50°. This variety is distinctly in the bread and butter class, its prodigious blooming quality making it one of the foremost carnations of today. The flowers average three inches through the season. To be disseminated during the season of 1908-'09.

Wanoka.—Named from the Indian word, "Wah-No-Kah", meaning, "Just one of its kind." Being of Indian origin and suggesting the dark skinned race, this appropriate name has been given to the new crimson. It is a superb, well formed and fragrant crimson, of remarkable production, and borne on extremely long and heavy stems which never grow soft. It succeeds best in a night temperature of 50°, but it can be successfully grown in higher temperature if desired. The calyx never splits, the flowers average three inches and are first class shippers. This excellent variety will be disseminated during the season of 1908-'09.

Climax.—A beautiful, well made pink, a marvel in color, being a shade or two deeper than Enchantress, and a color long desired by the growers and the public. The color is permanent and does not fade, as is the case with many other light pink varieties. The flowers do not have the irregular form of Enchantress; they are borne on long, stiff stems and are very fragrant. They average the season through, three inches, and from December to April are three and one-half inches and over. The flowers come very early and the plants yield more per season than any other light pink variety, Enchantress included. The calyx is remarkably strong and seldom splits, the flower is an excellent keeper and ships admirably well. Best grown in night temperatures of 48°—50°. This most desirable variety will be disseminated during the season of 1909-'10.

Poehlmann Bros. Co., Morton Grove, Ill.

A temperature somewhere around 120° under the glass and the sun shining brightly in the early afternoon do not make exactly ideal conditions for looking over such an immense establishment as the two great plants of the Poehlmann Bros. Co. at Morton Grove, Ill., but there is so much to see that is interesting and the whole place is in such excellent condition that it is worth the inconvenience. We were especially struck with the fine flowers being cut at this late date from White Perfection carnation, flowers that would be good for February, let alone July. Winsor, too, is holding up well as are Red Lawson and Toreador. The latter was not at first a great success but it has done so well this season that it will be largely planted again. About 70,000 out of the 200,000 carnations that are to be planted this season are already in and the plants look exceedingly well. It seems certain that many more carnations will be grown inside all the year than have ever before for where there is room, there is no question that this is the most satisfactory method.

Among the newer varieties that are being tried out extensively this year at the A plant are Afterglow and Winona, also J. A. Manda's new pink seedling which is being very largely propagated here. Red Lawson has to go as the color is not as popular as it might be with the retailers but those good standard sorts, Beacon, White Perfection, Winsor, Victory, Enchantress, White Enchantress and White and Pink Lawson are already very largely planted and many more will be. Referring again to Toreador, G. W. French, the carnation foreman here, says it was grand around the new year and he has a very high opinion of it. It may best be described as a much improved Prosperity and is extremely free both in growth and flower.

The American Beauty roses at the A plant are very fine. The young plants are growing very freely with a splendid lot of young shoots springing from the bottom, just the kind of plants that delight the Beauty grower. Many benches are being planted and many others are yet to plant. There are also quite a large number of old plants just set out and still more to be thrown out to make room for young stock. All show the same excellent health and even the benches that are marked to come out are pushing up fine, healthy looking shoots that it seems a pity to destroy. This constant throwing up of good shoots is characteristic of the plants here; young or old there are always plenty and the plants are constantly making good from the bottom.

THE WA-NO-KA GREENHOUSES, BARNEVELD, N. Y.
Bench of Carnation Apple Blossom, in October.

CHRYSANTHEMUMS.

Chrysanthemum planting is still going on and the earlier benches look fine. Each year a weeding out of the varieties goes on until only a comparatively small number is grown but these are the best of their kind. As indicating what Messrs. Poehlmann think the best we

give the varieties chiefly grown in the order of flowering: White—October Frost, Kalb, Virginia Poehlmann, Robinson, Clementine Touset, Alice Byron, White Bonnaffon, Timothy Eaton, W. H. Chadwick, Jeanne Nonin and Merry Christmas. Yellow—Monrovia, Halliday, Col. Appleton, Major Bonnaffon, Chautauqua Gold, Yellow Eaton, Golden Chadwick and Golden Wedding. Pink—Rosiere, McNiece, Dr. Enguehard and Maud Dean. Red—Intensity and Schrimpton. Anyone possessing these few fine varieties in quantity may be sure of getting a good supply of fine flowers in all the popular shades the whole season through. The fine novelty, Virginia Poehlmann, is worthy of note as one of the finest early whites. A house planted last year on July 15 was in splendid order in October and there are no culls; every flower comes perfect. A very strong point in its favor is that it may be planted as close as Ivory and yet produce excellent flowers, large and well filled up. The benches now being planted have plants every six inches in the rows or more correctly two plants are put together at 12 inches apart, as this facilitates cultivation in the earlier stages. It is very free and easy to grow and is a coming variety without doubt.

THE WA-NO-KA GREENHOUSES, BARNEVELD, N. Y.
Bench of Wanoka in September.

PLANT B.

In plant B the roses are looking better than we ever remember seeing any at this time of the year. Not only are the young plants in excellent order but also the old benches. Killarney is a grand sight here. The growths are strong and the foliage excellent in color, both old and new benches. This is also true of Cardinal, which is making excellent shoots and flowering freely, as are Richmond. Mrs. Potter Palmer and other popular kinds. Some new benches of Kaiserin are superb plants with beautiful growths and excellent foliage. The new My Maryland is being tried here and it certainly looks like a grand thing. Both grafted and own-root plants are making beautiful canes and splended foliage. The same is true of a number of benches of Rhea Reid and we have not seen either of these novelties looking as well anywhere. From the early-planted benches of Killarney nice flowers are already being cut and these will shortly be followed by Mrs. Potter Palmer. Adolph Poehlmann has a very high opinion of Killarney and, as handled here, it is certainly the finest pink summer rose in existence.

We noted here a fine arrangement for handling manure. A large concreted bed with sides about one foot high prevents any loss from seepage, all the liquid being caught. Besides this advantage the work of the teams is rendered very much easier, having a hard bottom to travel on. A traveling fork is used to pick up the manure for loading the wagons or unloading freight cars which can be brought close up to the heap. A large wagon can be filled in seven minutes; in fact while the teamster is unhitching his team from the empty wagon and hitching up to the full one this latter is about ready for him. This is a great labor saver as one man at the steam winch, two with the fork and one on the wagons can keep four teams and five wagons going on the short haul between the two plants. We have before mentioned the many labor saving devices here. The soil chopper is now run with an electric motor, the power for this and other work on the place being supplied by two fine coupled dynamos, the engines being 58 h. p., the machines 30 kilowats, giving off power at a voltage of 250. The power for the refrigerating machinery, of which we have before spoken, is supplied by these machines. An addition to the carnation range has been made this season, three houses 27x200 feet and two 27x350 feet, making in all probably the largest range devoted to carnations in the world. Many points of interest have been omitted in this necessarily brief reference but the whole place is in the most perfect order and a great credit to all concerned.

THE WA-NO-KA GREENHOUSES, BARNEVELD, N. Y.
Bench of Carnation Climax in October.

The Use of Bordeaux Mixture.

Florists as a class are slow to get benefit from the use of Bordeaux mixture. They could derive a good deal of help if they would pay some attention to this and work out the details. The one thing which has scared most of them is the bad stain to foliage, but with a little care, this need not bar its use. For instance, chrysanthemum growers would do well to use it in the 4-4 formula from the time the cuttings are potted until the buds show; by adding two pounds of arsenate of lead to each barrel, and using it once in 10 days, no leaf-eating insect will enjoy his meal and the dread leaf spot can be kept out of the house. Bear in mind, use it early and quit in time to clear the foliage for selling.

Carnation growers should spray the young plants inside and out, once in two weeks, and after housing, up to the time that flowering shoots are allowed to develop and then quit. It will produce plants that are a delight to the good grower. A good knapsack pump is generally better than any air compressor and the operator should learn to put his pump in good condition and keep it so. Much of the success depends upon a perfect pump, which means a perfect spray, and don't forget to clean out with clear water, each time before putting away. Bordeaux mixture may be used to shade glass, to disinfect the cellar and cut-flower room and to spray poultry houses and barns; only omit poison for these uses. MARKETMAN.

Foreign Experiments in Manuring Plants.

In organizing the experimental work in floriculture at the agricultural experiment station at Urbana, Ill., the Department of Horticulture had prepared a brief review of such work as has already been done, especially in other countries. Some notes from one sub-topic of that report are here presented in abridged form.

FORMULAS BASED ON PLANT ANALYSES.

Work of this kind as a basis for intelligent and systematic procedure in manuring florists' plants is scarce. A. Hébart and G. Truffaut, widely known French agricultural chemists, reported some years ago having made ash analyses of 19 kinds of ornamental plants as a basis for experiments in rational fertilization. Such experiments were stated at the time to be in progress but the reviewer has not come across later reports on this work. In the article referred to a report in detail is given only for the dracæna.

A. B. Griffiths analyzed chrysanthemums taken just at the beginning of the flowering period. On the basis of this analysis the following alternative fertilizer mixtures are recommended: (1) One ounce of a mixture of equal parts guano and bone meal to 20 pounds of soil; or, (2) the following: Potassium nitrate, one part; sodium phosphate, two parts; iron sulphate, one-quarter part; Epsom salts, two parts; superphosphate of lime, three parts. Apply seven grams[1] of the mixture to two kg.[2] of soil before planting. Water every few weeks with seven grams to 4.5 liters[3] of water until the flowers begin to open. Chemical analyses showed also that the running out of cattleyas grown commercially for cut flowers is due to gradual starvation of the plant and can be remedied by proper fertilization. Blindness of narcissus is due to the same cause.

A unique method of fertilizing pot plants, suggested by G. Truffaut and A. Hébart consists in determining by chemical analysis exactly the amount of the different fertilizer elements required to make the desired growth for one plant and in enclosing these, in the form of chemicals, in a small loosely closed capsule which is to be buried at the root of the plant. The pot is watered with clear water only and the contents gradually dissolve out into the surrounding soil. It is claimed for this method that it avoids excessive or irregular fertilization with liquid manure, gives a more uniform and shapely plant and permits the use of a smaller pot. This method does not appear, however, to have become widely introduced into florists' practice.

FERTILIZING ACCORDING TO GROWTH.

Plants do not require the same quantity nor the same proportion of different fertilizer elements at different stages of their growth. Nevertheless, very few studies have been made on this point with florists' plants. A single example of such is analyses made by A. Hébart and G. Truffaut of chrysanthemums (1) when the buds were just beginning to appear, which was 178 days from planting, and (2) when the plants were in full bloom, which was 64 days later. These analyses showed that during the second period the plants used three times as much nitrogen, five times as much potash, seven times as much phosphoric acid and five times as much sulphuric acid as during the first but longer period of vegetative growth. These analyses emphasize the need of applying different quantities of fertilizers at different periods of plant growth with the elements in different proportions.

GERMAN EXPERIMENTS.

For a number of years the German National Horticultural Society has been conducting a series of fertilizer experiments on several florists' plants which are worthy of more than passing mention. On the committee in immediate charge of this work were, among others, Maercker, prominent agricultural chemist, and Sorauer, widely known writer on plant physiology in agricultural application. The mere mention of these names assures high scientific quality for the work done.

The experiments throughout were under rigid chemical control. The plants used as subjects and reported on thus far are fuchsia, chrysanthemum and hydrangea. The general plan of the experiments was the same with all three but was carried out in most detail with the fuchsia. Notes on the work with this plant will serve to give a general idea of the nature and management of all of these experiments.

FERTILIZER EXPERIMENTS ON FUCHSIAS.

Duplicate series were run in five localities in Germany, with duplicate series in each locality in common potting soil and in sterilized sand. The latter series of course showed the exclusive effect of the fertilizers applied. Observations were made in great detail on the following points: Root development, color and number of leaves, number and quality of flower buds set, growth in height, thickness of branching, general shape of plant, and quantity of water required by the plant on different fertilizers. The nature of the results obtained is indicated by the following:

As to effect on the roots, cow manure made the longest, ammonium sulphate the shortest and nitrate of soda the smallest total growth.

Ammonium sulphate made the largest number of leaves with the largest average size and the deepest color. These plants, however, were latest in flowering.

Cow manure and complete fertilizer gave each the heaviest average weight and development of flower buds. Ammonium sulphate made nearly twice as many branches per plant as did nitrate of soda.

Ammonium sulphate made a growth which varied more from the normal than did any other fertilizer. The leaves were longer and wider but not so thick relatively. The upper epidermis cells were larger but thinner on the outer side. In this observation lies the basis for the well known fact that plants grown on ammonium sulphate are not so resistant as are plants normally manured. On ammonium sulphate the woody tissue is also less developed, wherein lies another basis for the greater tenderness and less resistance of plants thus fertilized.

Plants on ammonium sulphate were

[4]Centimeter=0.3937 inch.
[5]Square meter=1,550 square inches.
[6]Hectare=2.471 acres.

George A. Kuhl.

materially retarded in ripening up their wood. Such plants are liable to suffer more from early cold weather than are those receiving complete fertilizers.

In similar experiments on hydrangeas the diameter of the flower clusters on the best developed plants varied from 12 to 30 cm. while on the checks it was only nine to 24 cm. With this plant, ammonium sulphate gave the best general development for market purposes, though not the greatest nor stockiest growth. And the differences the second year were much greater than they were the first.

EXPERIMENTS ON AZALEAS.

Other experiments carried out with characteristic German thoroughness have been made at the Horticultural Experiment Station on azaleas and ericas by F. Ledien. These plants were selected as subjects because they are among the most sensitive of plants to fertilizers improperly applied.

Varieties are grouped according to vigor to the three groups which are differently affected by the same fertilizer. An essential point in azalea culture is rigorously to keep the soil poor until June 1 in order that a large ball of roots may form. Then follow energetically with liquid nitrogenous fertilizer containing a high percentage of ammonium salts, preferably ammonium sulphate, to which acid calcium phosphate is added, one gram of each to the liter. Water with this daily for about six weeks and then cease the application in order that the buds may ripen up. This is of special importance if the plants are to be shipped long distances. Plants thus treated make most and largest flowers and bloom earliest and with greatest certainty.

EXPERIMENTS ON ERICAS.

The experiments by the same investigator bore on (1) vigor of growth, (2) intensity of green coloring of the leaves and (3) the setting of buds as to the number, quality and earliness. This control of bud growth is stated to be the greatest difficulty in commercial erica culture.

Varieties which bloom in mid-summer, and these comprise the large majority of varieties, need nitrogen to increase their vigor. Those which bloom in the fall need lime to hasten the setting of buds. This setting was hastened as much as 10 weeks in the case of some varieties. Some of these late varieties, when receiving nitrogen, never even began to set buds before cold weather came on.

TESTS OF FERTILIZER MATERIALS.

A number of gardeners' tests with various fertilizer substances and mixtures have been reported. Foussat has made tests of nitrate of soda solution on many kinds of flowers. As might be expected, some kinds of plants show more marked results than do others. Japanese ailanthus responded the most strikingly. In this case the fertilized plants were nearly 2½ times as high as the checks and three times as thick at the collar.

A SUBSTITUTE FOR NITRATE OF SODA.

Bellair, the well known head gardener for the city of Paris, has experimented with many mixtures with a view to finding a fertilizer, which while rich, shall be gentle in its action whereby the violent action of nitrate of soda and its exhaustive effect on the soil can be avoided. He recommends the following: Fresh bone meal, 40 kg.; horn meal, 25 kg.; sulphate of potash, 24 kg.; dried blood, 11 kg.

Jacob Duerst. Dayton, O.
For 30 Years with H. H. Ritter.

For borders and beds apply 50 to 60 grams per square meter in the spring. For potting soils use 1 to 1½ kg. per cubic meter of soil well worked in six months in advance. Horn meal alone gives good average results except on a few specified kinds of plants.

Fresh blood is reported to be a superior fertilizer, especially for gloxinias, Begonia Rex and other foliage plants. It is commended to gardeners located near a slaughter house. Dilute well with water and apply with judgment. This fertilizer is reported as having made prize winning chrysanthemums.

FERTILIZER FOR PLANTS OUTDOORS.

Janson has experimented with fertilizers for flowers in the open, for flower beds, shrubs, trees and lawns and has collected and summarized the experience of practical gardeners. A mixture of 18 parts potash, 17 parts phosphoric acid and 12 parts nitrogen gave fine results. Heavy manuring is noted as reducing loss of time in transplanting. Such plants as orchids and azaleas will not stand more than one to two parts of this mixture to 1,000 of water. More leafy and vigorous growing plants will take from three to four parts to the thousand.

A SPECIAL FERTILIZER FOR BULBS.

Blin recommends the following: Nitrate of soda, 400 kg.; superphosphate, 500 kg.; sulphate of potash, 200 kg.; plaster, 400 kg. per hectare[a].

Plow half of it in and spread the other half on top and work in lightly. When the flower stalks begin to appear cultivate in the following: Nitrate of soda, 200 kg.; superphosphate, 250 kg.; sulphate of potash, 50 kg. per hectare. If the vegetative growth is already vigorous apply only 100 kg. of nitrate of soda.

These rather cursory notes will give the American reader some idea as to what is being done in an experimental way for floriculture in other countries, the nature of the investigations and the methods used. V. A. CLARK.

PEOPLE WE KNOW.

George A. Kuhl, Pekin, Ill.

Many of our growers, wholesale and retail, have gravitated to the florist trade from other businesses and professions and Geo. A. Kuhl, of Pekin, Ill., of whom we publish an excellent portrait herewith, started in the grocery business in this city 36 years ago. This he has run in connection with his greenhouses until last fall, when he sold out the grocery entirely.

For many years Mr. Kuhl has been gradually working up his greenhouse business, but about 12 years ago he went into building rather largely, covering about 60,000 square feet of ground with glass. In addition to a retail store in Pekin, Mr. Kuhl recently opened one in Peoria, in both of which he finds an excellent outlet for the plants he grows so well. In addition, however, to his retail trade he has, by judicious advertising and supplying only the best of stock, worked up a large shipping trade in flowering plants, ferns and bedding stock. Doubtless now that he is devoting his whole time to the business we may look forward to still further developments.

Hugh Seales.

Hugh Seales, Birmingham, Ala.

Hugh Seales of Birmingham, Ala., of whom we publish an excellent portrait, is a native of Ireland, having been born near Belfast, February 22, 1870. His first start in his chosen career was at the famous nurseries of Alex. Dickson & Sons of Newtownards with whom he remained for nine years. He came to the United States in 1890, and obtained a position with W. & H. F. Evans of Rowlandville, Philadelphia, Pa. Other firms he worked for are Chas. D. Ball, Geo. W. Little, Glen Falls, N. Y., Frank Huntsman, Cincinnati, O.; Currey & Co., Nashville, Tenn., and the Brookwood Floral Co., Atlanta, Ga. His next position was superintendent of parks at Atlanta and in 1902 he started in business on his own account.

Mr. Seales has been a very successful grower, having won over 400 prizes. He brought flowers to the Chicago world's fair from Nashville, Tenn., this being the first time that southern flowers were ever in competition so far north. He was probably one of the first growers to successfully tackle carnations and roses in the south and many predictions were made that they could not be grown. Since starting in business for himself Mr. Seales has been very successful but the past season has been a hard one for him; the boiler at his greenhouses burst some time ago and he has had to use charcoal to keep the temperature up in his houses. With 25,000 square feet of glass this meant a lot of work and he is only now getting into proper running order again.

Jacob Duerst, Dayton, Ohio.

In these days of quick changes a continued length of service to one firm for 30 years is an event worth chronicling, and this is the record of Jacob Duerst, who has been with H. H. Ritter, of Dayton, O., for just that length of time. Mr. Duerst is a native of Switzerland and came to this country 30 years ago, since when he has not changed his situation, but gone on improving his position and, incidentally, extending his cultural knowledge until today his employers would be very sorry to part with him and he would be just as sorry to go. We congratulate both Mr. Ritter and Mr. Duerst, of whom we publish an excellent portrait, on the happy relations existing between them, and trust they may continue, to their mutual advantage, for many more years to come.

Good Delivery Wagon.

A good delivery wagon is a great aid to the retailer in keeping his name before his customers, present and prospective. Such a one is shown in the illustration on page 1262. This is the property of J. Aldous & Son, Iowa City, Ia. The body is olive green, the running gear eastern red, a showy and attractive combination. This firm has a good general business, retailing in its city store the products of a glass plant of about 10,000 square feet.

WILMINGTON, O.—G. H. Moores has leased his Locust street greenhouses for a number of years.

URBANA, ILL.—A. D. Hall, director of the Rothampsted Experiment Station at Harpenden, Eng., addressed the soil fertility meeting at the University of Illinois College of Agriculture July 7. Director Hall spoke on "The Accumulation and Depletion of Plant Food."

To Be Done Now.

IN THE GREENHOUSES.

Plant out young gardenias and give them the best of care to ensure a strong and free growth.

Keep the soil stirred around Marie Louise violets to allow the air to reach the roots and make insects uncomfortable.

Prepare the soil and small pots for sowing the mignonette.

Let the young smilax go now if the plants have thickened out well at the bottom.

A moist atmosphere in all plant houses is the most important of all cultural details.

Watch closely for thrips after bringing in any new soil or manure from outside.

Propagate pelargoniums as soon as the growth is sufficiently hardened.

Look out for dry places on the old rose benches as here insects congregate.

Surface watering without seeing that the pots are wet all through has killed more young pot stock than any other detail of mistaken culture.

IN THE STORE.

Early closing, in some cases means losing the evening trade which is most important during the hot months.

Wild daisies and common ferns make a delightfully cool and seasonable decoration.

OUTING OF EMPLOYES OF A. L. RANDALL CO., CHICAGO, AT RIVERSIDE, ILL.
R. Meyer, Their Host, at Extreme Right of Picture. (See Page 1180 Issue of July 4.)

All arrears of bookkeeping should be got out of hand now and stocktaking where this is practiced.

Gladioli should always be purchased partly open unless they are to be used at once.

Pansies, perhaps more than any other flowers, are charming even when the colors neither match nor contrast, but are used promiscuously.

Cycas leaves are especially suitable for large bold designs for funerals.

OUTDOORS.

Feed and mulch the perennial phloxes, especially when growing in the full sun.

Prick out seedling campanulas, pyrethrums, wallflowers and other biennials and perennials before they get crowded in the seed beds.

In the press of work never omit cleaning seedling trees in the nursery beds as they are soon crippled by coarse weeds and insects.

Help the roses after flowering to produce and ripen up a good growth by feeding where necessary.

Cultivate stock geraniums and pick off the flowers if they do not grow freely.

If montbretias are to be lifted at all this season it must be done early before they commence rooting for the fall.

Watch the dahlias and stake or otherwise support them where necessary.

A line of fine rope or cord around a bed of cosmos will prevent its falling about.

Where they are getting too thick for the new growths to ripen, thin the shoots on sweet briars and other single roses.

Clear off cabbage as early as possible, so as to be in time for a fall crop.

Remove annuals from the herbaceous border as fast as the flowers go over and they become untidy.

Twenty Years Ago.

JULY, 1888.

The American Express Co.'s rates were telling very heavily on the florists' business.

The white lapageria was very popular for decoration.

Chicago florists were trying hard to get reasonable water rates.

White forget-me-nots were a novelty sent out by a New Jersey grower.

Support tall, loose growing plants like cosmos and corn flowers with stakes and twine. If they fall over, the flower stems become crooked.

A bundle of asparagus two feet high, 36 inches in circumference and weighing 40 pounds, or a pound each head, was shown in New York.

A bogus gardener was arrested in Philadelphia for selling onions as hyacinth bulbs.

The national flower was a much ventilated question and all kinds of flowers were recommended.

Breaking stones was better than waiting for butterfly dudes to pay up according to one New York florist.

J. C. Vaughan was sending home "Random Notes" from London, Eng.

California florists were complaining of the loss caused by bad packing of goods coming from the east.

Very heavy losses were reported from hail damage.

Many complaints were heard of the want of politeness and ignorance generally of florists' store clerks.

Interesting notes on Natal plants by a resident of Maritzburg were appearing in the AMERICAN FLORIST.

Treatment of Callas.

ED. AMERICAN FLORIST:—

Please advise as to the best way to rest callas and the proper time to start them in fall. W. H. N.

Callas should, before this, be dried off and the pots stood outside in the full sun. If not, get them out at once and give no water. After a few weeks' drying, shake them clear of the old soil and repot, giving one thorough soaking of water to settle the soil and no more until they commence to grow. This matter was more fully treated in our "Suggestions for Cut Flower Growers" in issue of May 9, on the first page.

Why Not Flower Day.

John Miles, a New York millinery importer who lives at White Plains, holds the record as the champion Tag day patron. Saturday was Tag day in that village and he was prepared for the rush. In the morning he drew five hundred silver dollars from a bank, and gave one to every girl tag distributer that he met. When the extent of his generosity became known some doubt was expressed if there would be girls enough to absorb the appropriation, but the entire crew made it a point to see him, and when some of them happened to meet him two or three times, he made no protest.

Whoever originated Tag day was a genius. Tag day seems to bring out all that is best in a person's nature and the rich and the poor give according to their ability. Albany could stand another Tag day in aid of some worthy charity and we would suggest that the ladies who propose to establish the free milk depot in the south end take this means of raising a fund for the purpose. To vary the idea it would be a good plan to give button hole bouquets in place of tags and limit the donation to 5 cents. If 20,000 persons in Albany contributed 5 cents each, the total collection would reach the sum of $1,000, which would be enough to pay the expenses of the depot for at least one year. And it would be hard to find a person in Albany who would refuse to give five cents to such a charity. Besides, the buttonhole bouquet would be worth the money and the managers of the affair would have the satisfaction of knowing that every person who contributed 5 cents did it for value received.

There are enough young ladies in Albany to make Flower day a huge success. Florists and others having hothouses or gardens would no doubt cheerfully contribute enough flowers for the day, so the expense of conducting the affair would be nothing. As a matter of fact, it would be possible to get all the flowers needed in the fields around Albany, and wild flowers would add to the novelty of the plan. It does all of us good to give up a trifle now and then to some worthy charity, and experience has shown that there is no other way of raising a fund so quickly and readily. Flower day could be made so picturesque that it would capture the people beyond any doubt. The girls who volunteered to distribute the boutonnieres could dress as country maids, wearing the picturesque costumes of a past age, or they could dress as typical shepherdesses. We are confident that if this idea were properly carried out, Flower day could be made to net even more than Tag day did. But it is not well to ask too much of the public after the people have already responded so generously. Therefore we suggest that the ladies who propose to establish the free milk depot limit the donations to five cents each.—Albany (N. Y.) Press.

[If the editor of our esteemed contemporary can induce shoemakers to give shoes, grocers to give groceries, clothiers to give clothing, ironmongers to give hardware, publishers to give newspapers, etc., for such a worthy object as Flower day, then he will be warranted in suggesting that florists give flowers. The production of flowers costs money and those who are not called upon to produce them, should learn this without delay and give the florist what is due him. Too often, we regret to state, otherwise sensible persons think the florist should hand out his stock in trade gratuitously to every beggar, including the amiable ladies' aid societies. If you desire to be charitable, Mr. Editor, buy your flowers as you buy other commodities for that purpose and take care that you are not transgressing when you pick the wild flowers.—ED. AMERICAN FLORIST.]

Duty on Palms Entering Canada.

We quote from the Canadian Florist some opinions of leading florists as to the duties imposed upon palms and insecticides, these following a letter from A. W. Annandale, of the Steele-Briggs Seed Co., Toronto, protesting against the duty.

John H. Dunlop, Toronto, Ont.—"We handle but few palms as we find the price charged in Europe is a considerable advance on previous years, also, with the 25 per cent duty, it makes palms very expensive, so much so that customers will not pay the increased price. I find that the duty has not developed the growing of palms from seed. As far as I can ascertain no one has grown any quantity. I know that there are a few grown, but I do not think any increase on previous years. The quantity would not indicate that any grower has taken advantage of the duty to develop this part of the florist business. The feeling at the time the memorial was made to the Dominion Government was that Canadian growers would take advantage of the duty and grow palms from seed and thus divert the large sums of money that are expended in European stock and keep it at home to foster a branch of our business that had not developed to the same extent as other branches."

The Connon Floral Co., Ltd., Hamilton, Ont.—"We do not grow palms from seed, but as we import quite a few every season, we think we might be allowed to say something in the matter, as well as the grower. We consider that the duty is a hardship on the florist. Palms have been high in price lately and, with the duty added, makes the plants so dear that the demand has dropped off considerably. Considering the small number of palms grown in Canada, the duty is doing, on the whole, more harm than good, and we are sure no florist would object to the protection if the growing of palms was general, or likely to become so."

J. Bebbington & Son, Fredericton, N. B.—"We are strongly in favor of Mr. Annandale's suggestion to remove the duty on palms. It is surprising that no person has protested before. We do not see the wisdom of placing a duty on palms. The demand is too small to raise them profitably from seed. We buy 50 palms or more in several sizes for decorative purposes or sales."

Jos. Bennett, Lachine, Que.—"Mr. Annandale's letter would seem to suggest that the florists of Canada should ask to have the duty taken off palms and insecticides. I agree with him in regard to the insecticides, but do not think we should ask for free palms. It is only a short time ago that the florists (or some of them) asked to have a duty put on palms and as the government made the tariff just as they were asked to do by those florists it would look very queer to ask for an alteration so soon. Another thing, that duty will stop some of the firms on the other side sending large consignments over here to be sold at auction, which was often done previously in Montreal. The statement that palms cannot be grown here as cheaply as on the other side is probably correct, but that does not prove that palms cannot be grown in this country with profit to the grower. My opinion is (and that was the opinion of those who asked for the duty) that if grown on a large scale in large quantities or, in other words, if some firm would make a specialty of palms, they would pay to grow. Witness the number of firms in the United States who do it and they don't grow them at a loss or they would stop it."

Miller & Sons, Bracondale, Ont.—"We have just taken into stock a large shipment of palms, on which we have had to pay a 35 per cent higher price than was paid three years ago, 20 per cent duty on the cases and 25 per cent duty on the palms; the latter can be credited to the action of The Canadian Horticultural Association. We cannot understand why this 25 per cent ever was added as we never can expect to grow palms in Canada to compete with the European grown plants. We have tried it and know from experience that what we say is right. We have an actual demonstration in our greenhouses at the present time. Added to the increase in cost is the fact that the demand has greatly decreased and it is with great difficulty that palms are sold at their present prices. If it were not for the decorative work, it would not be profitable to handle these plants.

"We trust The Canadian Florist will stir up the other growers on this question, so that when we meet at Niagara Falls in August, steps will be taken to have this unreasonable duty removed. At the same time, it would be well to advocate the removal of the duty on insecticides and all plants that cannot profitably be produced in Canada."

J. Gammage & Sons, Limited, London, Ont.—"This question is one that must appeal to each one individually. The tariff question is at best controversial. At the meeting of the Canadian Horticultural Association when the resolution was passed requesting the Government to place a duty on palms, it appeared to all present that it was in the interest of the trade generally, and it would seem at this time, were we to make an appeal to have the duty removed, that we do not know our own minds. Personally, I do not believe it would make any difference in the number of plants sold, whether or not the duty is removed. In all cases it is the public who have to pay the duty. Mr. Annandale has advanced the theory that we cannot compete with Belgium growers. In this I do not agree with him, judging from the quality of stock we have received the last two years. I am free to admit that the grower's margin is a small one, but question the possibility of increased profits to either grower or dealer on Belgium stock with or without the duty."

Chas. Grobba, Toronto, Ont.—"For the past few years we have gone into the growing of palms extensively and have met with very good success, the results from which are now showing themselves favorably. While there is a duty on palms, we find it will be profitable to continue to grow them, but should the duty be taken off, it will make so large a difference that it would not pay to continue. The Belgians, who grow most of the palms that are imported here, are under considerable less expense as to wages and so forth than in this country and they can produce their palms accordingly, but with the present duty we find it places us on an equal basis.

"Let the duty remain as it is at present. Here is an industry presenting itself which, up to now, has been neglected by most of us. Why should we be desirous of purchasing elsewhere, stock of an inferior quality to that which we can produce? True, the imported stock may be good when it is first packed for its long journey, but it often arrives in very bad shape and takes a long time before it recuperates. Here is where home-grown stock has its advantage, for it is always in saleable condition, will prove much more satisfactory to the purchaser and there will be little complaint as to the plants dying shortly after they have been taken home, which is often the case when newly-imported stock is sold. So, for those who are interested and to a large extent, we say for the good of all let the duty remain and not lose sight of 'Canada first.'"

THE rivalry between western states in the matter of roses and rose shows continues.

MONEY spent in preventing waste, either of labor or material, is always well spent.

MOSS ROSES are said to be increasing in favor again, especially in combination with sweet peas.

SWEET PEAS are becoming increasingly popular for wedding flowers, replacing the rose in many cases.

Do not fail to allow for expansion in those concrete walls, pavements, etc., now in course of construction.

To the correspondents who have written us with regard to the late Wm. B. Leeds we wish to state tnat the story of his life, so far as we are concerned, is told in the obituary column of our issue of July 4, page 1177.

WE have received the "Proceedings of the Fifth Annual Meeting of the Louisiana Horticultural Society," which meeting was held in Minden, February 20-22, 1908. Besides the president's address and other business matters the book contains the text of a number of practical papers read at the meeting, well illustrated by numerous cuts and runs to 160 pages.

Ladies' Society of American Florists.

The secretary of the Ladies' Society of American Florists, congratulates the members upon their prompt payments of dues. It shows her that all wish to vote and expect to be at Niagara Falls, in August.

MRS. CHARLES H. MAYNARD, Sec'y.

Glass.

Prices of greenhouse glass advanced sharply July 13. Owing to the low prices prevailing this summer many factories have been forced out, and as a consequence good glass in the most desirable sizes is scarce. The demand is strong. Discounts on single strength glass are now 90 and 35 per cent, and on double strength, 90 and 40 per cent.

Society of American Florists.

REGISTRATION OF ROSES.

Peter Henderson and Co., New York, submit for registration, the roses listed below. Public notice of such registration is hereby given and any persons knowing of the previous use of the names selected or of any other reason why registration should not be made, are requested to forward their objections to the undersigned. Silver Moon (Cherokee x Wichuraiana), soft, white, semi double, flowers four inches across, climbing habit. Garnet Climber (Lucullus x Wichuraiana), deep garnet red, double flowers in clusters, climbing habit. Dr. W. Van Fleet (Souvenir du Pres. Carnot x Wichuraiana), light rosy pink, double flowers, climbing habit. Radiance (Cardinal x unnamed seedling), brilliant rosy carmine, fine buds, splendid habit and foliage.

W. N. RUDD, Sec'y.

Handbook of Greenhouse Materials.

The Lord & Burnham Co. has just issued a booklet entitled "Handy Handbook of Greenhouse Materials" which greenhousemen will find very convenient and timely. The materials are classified, grouped and indexed for ready reference. We understand this is the first book of the kind published in this country. On one page will be found paint and putty and on others door hardware, boilers, heating fittings, etc. Enclosed with the book is a small envelope containing a hook on whicn to hang it. Those of our readers who desire copies should address the Lord & Burnham Co., 1133 Broadway, New York. A postal request will suffice, as there is no charge for this publication.

National Council of Horticulture.

Prof. H. C. Irish, secretary of the National Council of Horticulture, has received a letter from F. W. Taylor, chief of the departments of agriculture and horticulture at the St. Louis World's Fair, which is gratifying at this time to all interested in the welfare of the council. The letter is as follows:

Dear Professor Irish—I have been much pleased to note the progress being made by the National Council of Horticulture, and particularly that it has maintained the position which it assumed at the start, of separating itself entirely from any organizations which deal purely with commercial questions.

I was extremely pleased that the National Council of Horticulture was organized at the St. Louis exposition, and I have been watching its movements with a good deal of interest to see if it could maintain its original high aims. I feel that it is doing so, and I trust that in the future it will interest itself particularly in looking after these questions of a general nature, which can scarcely be treated properly by any other single organization.

If, in organizing the department of horticulture at the St. Louis Universal Exposition, I had been able to receive advice, suggestions and support of such an organization, many phases of my work might have been much easier, and I have no doubt that in certain respects better results could have been secured.

I wish to particularly suggest that whenever it is learned that plans for large expositions are under way, the National Council of Horticulture should place itself in communication with the officers of such organizations and do everything in its power to see that horticulture in all its phases is properly arranged for. This means in the construction and arrangement of buildings, in the making up of the lists of awards and in many other ways, a more or less uniform method should be followed. No organization should be so well equipped to supply all such information as this as the National Council of Horticulture.

If at any time there is any way in which I can render any service in any branch of the work in which it is believed that I can be helpful I shall be extremely glad to have you call upon me.

Sincerely yours,
F. W. TAYLOR.

Meetings Next Week.

OUR PASTIMES.

At Chicago.

The following is the programme of sports and games for the Florists' picnic to be held at Morton Grove, July 19, as so far arranged for:

1. Guessing contest: How many seeds in watermelon; guess as often as you wish, 5 cents each guess. First prize, $5 in merchandize certificate on Marshall Field & Co. donated by Geo. Asmus; second prize, $5 in refreshment coupons.

2. Quoits (open to all), contestants to pitch in pairs, two quoits each and two trials each. Successful contestants to be doubled up until winner is found. First prize, silk umbrella; second prize, hair brush.

3. Tug of war, wholesalers versus retailers. Time, five minutes. Five men on each side. Prize, $1 in refreshment coupons to each member of winning team.

4. Forty yard race, girls 10 years and under. Handicap of one yard for each year. First prize, roller skates; second prize, box of handkerchiefs.

5. Forty yard race, boys 10 years and under. Handicap of one yard for each year. First prize, roller skates; second prize, pocket knife, donated by Leonard Kill.

6. Forty yard race, girls 16 years and under. Handicap of one yard for each year. First prize, silver thimble and scissors; second prize, back comb.

7. Fifty yard race, boys 16 years and under. Handicap of one yard for each year. First prize, pocket knife; second prize, scarf pin.

8. Fifty yard race, young ladies. First prize, 5 lbs. candy, donated by Archie Spencer; second prize, bottle of cologne.

9. Fifty yard race, married ladies. First prize, carving set, donated by E. Enders; second prize, silver cake knife, donated by John Zech.

10. Hundred yard race, open to the trade only. First prize, silk umbrella; second prize, box of cigars.

11. Fifty yard race for fat men; contestants must weigh 200 pounds or over. First prize, silver headed cane; second prize, military brush.

12. Hop, step and jump, open to the trade only. First prize, pair gold cuff buttons, donated by E. Enders; second prize, silver match case.

13. Forty yard sack race, open to all. First prize, ball and bat; second prize, glove.

14. Hundred yard race for greenhouse employes only. First prize, box of 50 cigars; second prize, box of 25 cigars.

15. Running broad jump, open to all. First prize, briar pipe, donated by E. Enders; second prize, box of cigars.

16. Three-legged race. Prize, box of cigars to each member of winning pair, donated by the E. F. Winterson Co.

BOWLING.

There was a good attendance of the trade at Bensinger's alleys Tuesday evening, and the following scores resulted:

Asmus	123	162	176	190
Balluff	175	209	112	142
Winterson	157	140	169	155
Reardon	107	126	120	135
Wolf	147	176	127	162
Ayers	86	172	159	111

The ladies scored as follows:

Mrs. Asmus	90	121	96	134
Mrs. Balluff	106	80	80	78
Mrs. Kreitling	95	128	138	116
Mrs. Winterson	116	112	119	114
Mrs. Hauswirth	72	92	93	118
Mrs. McKellar	86	103	150	147

After the regular games, E. F. Winterson, Geo. Asmus and Chas. Balluff bowled a match game. The scores were remarkably even, Asmus rolling 165 and Winterson and Balluff being tied at 166. On the roll-off Balluff won by a single pin.

BASEBALL.

A spirited game was played Sunday afternoon between Kyle's Florists and a Desplaines team. The teams were about evenly matched and the game was remarkably free from errors. The Florists, however, could not break away from the hard luck which pursued them through the previous two games and lost again, 6 to 5 in favor of Desplaines.

Total	625	491	605

F. L. S.

At Birmingham, Ala.

The Florists' and Horticultural Society will give its first annual barbecue and picnic July 22. Cars will leave the city at noon to carry the party to the lakes at Bessemer, where we will have field sports and other amusements. While this is a prohibition city and considered a dry town this is not the reason we are going to the lakes, as our vice-president assured us we would not have to indulge freely out of the beautiful springs that feed these lakes but that there would be enough of liquids to wash down this barbecue and every member cordially invites every florist or representative of any firm that happens to be down our way to join us assuring them that they will have the time of their life. Once you eat a piece of Alabama barbecue and take a drink of this extra pale, you will remember us boys while you live. ALA.

At Springfield, O.

The members of the Florists' Club had a great time at their picnic, which was held July 7 at Eicholtz park. They played all kinds of games and enjoyed a big dinner served by Chas. Kreigbaum. Leman Bradford's team won from Charles Schmidt's team by the score of 8 to 6. The batteries were: Bradford's team, J. M. Good and Carl Glenn; Schmidt's team, Charles Schmidt and Charles Umglaube. The return trip on the S. T. and P. line was made at 8 p. m.

ST. LOUIS, MO.—Several valuable prizes have been offered for the events at the picnic at Normandy Grove, and a bowling match has been arranged between the ladies and men.—W. F.

At Omaha.

The annual picnic of the Florists' Club will be held at Krug's Park, Thursday, July 23, afternoon and evening. Good music and various entertainments are promised. Foot races at 4 p. m., consisting of a ladies' race, men's race, girls' race and boys' race. Prizes awarded. Photographs taken at 5:30 p. m. Supper at 6 p. m. L. H.

At Baltimore.

Quite a party from Washington put in an appearance Saturday for the bowling games, and they were vigorously contested. In the team match Ernst, MacClelland, Shaffer, Cooke, Simmons and Berry rolled against Seibold, Moss, Richmond, Perry, Klutch and Harry Lehr. Each won three games. After the games there was a supper and pleasant social intercourse.

MARINETTE, WIS.—Some extensive improvements have been started at the Vatter greenhouses in this city consisting of a complete rebuilding of the houses. The southeastern portion of the structure has been pulled down and a large and roomy structure is taking its place, built of concrete block. While the total number of houses will be no greater than formerly, they will be larger and better.

Auratum Lilies.... **$1.50 per doz. $12.00 per 100.**

Good Cut Flowers...

In summer it is even more important than at other seasons that you order from those who have the facilities for supplying GOOD stock, for no other kind will pay to ship. Call on us—we have the best the season affords.

We handle **FANCY VALLEY** in large quantities daily. **FANCY FERNS,** new crop, specially good, $1.25 per 100.

MIDSUMMER TRADE FAIR.

Trade has now fairly settled down to midsummer conditions, with little complaint to be made. On the whole the volume of business is probably ahead of that of the same period last year, not up to that of two years ago, which is said to have been the best summer trade seen on this market. The extreme heat of the past few days has badly crippled both carnations and roses which were in very good condition due to the previous cool weather. However, at that, stock seems to be sufficient for the existing demand. American Beauty roses from young plants are now beginning to come in, some showing stems as much as 24 inches long. Very limited quantities of long stemmed stock from the plants continue to come in. The usual line of midsummer roses is seen, although somewhat the worse for the heat. Much the same may be said of carnations. The red varieties plainly show the prevalence of thrips, which simply cannot be kept down at this season. Asters are slow in coming, stems still being short and the flowers themselves mostly of poor quality. Auratum lilies are abundant and about the only lilies now to be had. Cold storage peonies have gone very slowly the past week and very good stock in this line can still be obtained.

NOTES.

Lake Forest, with its county fair and flower show, was en fete July 15. The display of vegetables was remarkably fine and that of flowers and decorative plants much better than that of last year. Peterson's Nursery and Swain Nelson & Sons Co., this city, had nice displays of outdoor stock outside of the Art Institute, where the show was held. The show was well attended both by the local people and others interested in horticulture, there being quite a number of visitors from this city, Lake Geneva, Wis., etc.

Bassett & Washburn are now cutting fine stock from new American Beauty plants placed in the benches as late as March 1. Stems fully two feet long are already obtained. The vacation fever has hit here with Miss Bloom taking an outing at Lakeside, Mich., and Louis Winkleman, who has charge of the American Beauty roses at the store, is also away.

The A. L. Randall Co. reports making regular daily shipments of cut flowers to southern points with little or no complaint on the part of the customers. Fine outdoor auratum lilies are now seen here. This firm also reports a very satisfactory mail order business in supplies and wire work. Wm. Lorman, the shipping clerk, is now on his vacation.

On Monday a bunch of Drop White peonies was discovered among a number of pink varieties placed in cold storage by A. Kennicott & Son. This is a variety that is not supposed to keep well in storage and in fact is moved off as rapidly as possible after picking, but in this instance was found to be in good salable condition.

E. C. Amling says his growing trade demands more counter space, and this he has obtained by a more advantageous disposal of the room at his command and reducing the dimensions of his private office to the space absolutely required by that end of his business.

"THE BUSIEST HOUSE IN CHICAGO."

J. B. DEAMUD CO.,

51 Wabash Avenue,
CHICAGO.

N. C. Moore & Co. narrowly missed a serious fire in their greenhouses at Morton Grove last Friday night. A blaze broke out in the boiler room, but quick action on the part of employes and the local volunteer fire department warded off any trouble to other parts of the establishment.

Howard Evarts Weed, the landscape architect, has been touring Michigan for the American Civic Association. On the evening of July 10 he was in Bay City. His lecture, illustrated with stereopticon views, was entitled: "A More Beautiful America."

Caspar Manheim, aged 62, who died July 6 was laid to rest in St. Boniface cemetery on Thursday of last week. His son, Harry Manheim, of J. A. Budlong's, keenly felt the sympathy of the trade who contributed flowers in profusion.

A hail storm passed over Hinsdale and Western Springs one day last week. Some of the stones were of good size, but, while serious apprehension was felt for a time, very little damage to greenhouse glass resulted.

The H. M. Hooker Co. on Monday received a long distance telephone order from the Clinton Falls Nursery Co., Owatonna, Minn., for a carload of glass.

Miss Eaton, of the Eaton Flower Shop, left Tuesday morning in her automobile for her cottage at Channel lake. She will spent most of the summer there.

Henry Segar is now located at 10232 Church street instead of at 1730 W. One Hundred and Seventh street as formerly.

Several huge bunches of gypsophila are to be seen at the J. B. Deamud Co.'s almost any day now.

John Brod, Jr., H. R. Hughes' right hand man, has gone east to spend his vacation.

Vaughan's Seed Store received a carload of Harrisii lily bulbs July 14.

Nasturtiums were a feature with the E. F. Winterson Co. last week.

The thermometer stood at 97° F. last Saturday afternoon.

Visitors: S. A. Anderson, Buffalo, N. Y.; W. E. Kemblisson, Oskaloosa, Ia.; — Thompson, of R. C. Engledew & Co., Geneva, Ill.; Wm. Feniger, Toledo, O.; H. M. Burt, of Burt & Coggan, Battle Creek, Mich.; Chas. A. Butterfield, Farmington, Mo.; Mrs. T. A. Moseley, Kansas City, Kans.; H. E. Philpott, Winnipeg, Man.; Theo. F. Kienahs, La Crosse, Wis.

Chicago to Niagara Falls.

F. F. Benthey, of the transportation committee of the Chicago Florists' Club, announces that arrangements have been completed with the Wabash R. R. as the official route from this city to the S. A. F. convention. The convention party will leave on Monday, August 17, at 3 p. m., and the fare for the round trip will be $19.50. The party will go direct to Niagara Falls, with the privilege of a 10-day stopover in that city. Those who wish can, without additional charge, take the Gorge route to Lewiston, and thence by boat to Toronto. Parties so desiring can, at Toronto, have their tickets exchanged for all rail, returning to Chicago via the Canadian Pacific to Detroit and thence by the Wabash.

TRADE VERY QUIET.

Business the past week has been as quiet as ever seen here. With the exception of a few small funeral orders there is practically nothing doing. Perhaps this is just as well, as it is long since flowers have been so scarce as they are now. A week later, however, there will be plenty, as asters, gladioli, etc., are coming in. Rose planting has been completed, and several have a bench or two of carnations planted with indoor-grown stock. Chrysanthemums are looking fine, and many have been planted, both pots and bench.

FLORISTS' CLUB MEETING.

The Tri-City Florists' Club held its July meeting at the beautiful home of the president, Wm. Knees, of Moline, Ill. As President Knees has established a reputation as an entertainer, it is not surprising to know that almost every member was present at the meeting at his home. Being ladies' night, the florists brought their wives, and the meeting was given over mostly to a social time. John Staack was present and was shaking hands and receiving the congratulations of the married men and the expressions of sympathy of the single ones. The topic for the evening was "Designs and Summer or Outdoor Flowers for the Use of Florists."

New Orleans.

The Horticultural Society held its annual outing and banquet at Mandeville last Thursday, and all the members expressed themselves as having had a jolly good time. The party consisted of 32 members and invited guests, and they made a delightful trip over the lake of two hours, on the steamer New Camellia. Each of the party was provided with a boutonniere, red for members and white for guests. Among the participants was Prof. A. H. Rosenfeld, who was brought down from Baton Rouge as a special guest by Harry Papworth.

Arriving at Mandeville the party took possession of Mugmer's hotel, where the feast was to be spread. The hotel made a very pretty sight, being gaily decorated for the occasion with flags and bunting of the national colors and the table with ferns and American Beauty roses. After indulging in a few appetizers and telling several stories that probably originated in the Garden of Eden on account of the fruit connected with it, the hungry party filed into the back veranda, where the chefs prepared a menu that could have been better in many respects. After a few well chosen remarks made by several members, the party retired to Paul's saloon, where a pleasant evening was spent in cards, backgammon and other amusements. Unfortunately there is no bowling alley in Mandeville, as Charley Panter, weighing 270 pounds, and H. A. Despommier, weighing 130 pounds, were to have a roll for the championship of the society.

Those present at the outing were: Chas. Eble, president; Henry Cook, vice-president; C. R. Panter, secretary; John Eblen, treasurer; P. A. Chopin, Harry Papworth and Otto Abele, outing committee: A. Alost, C. L. Ory, F. Calongne, J. A. Newsham, H. A. Despommier, F. Faessel, J. Rausch, J. St. Mard, E. Baker, R. Steckler, Jos. Schindler, Otto Werner, Frank E. Brocker, H. Krack, John Eblen, C. W. Eichling, H. Doerscher, R. E. Simons, Paul Abele and J. A. Schalk. Invited guests: R. P. Upton, H. S. Karstendeck, Prof. A. H. Rosenfeld, Bernard Eble and J. E. Tims, of the assessor's office, representing Mayor Behrman. The annual election of officers will be held on the 16th at Kolb's hall and a lively time is expected.

SUMMER CONDITIONS.

The wholesale district has settled down to a period of dullness and the disposition of those whose business is there, seems to be, to accept the situation as gracefully as possible. Nearly all the stores now close at 4 p. m. and for all the business that is being done there seems no good reason why it should not be finished by 1 p. m., leaving one man about each store for possible emergency calls. Vacations are the order of the day and that state of affairs will continue throughout the heated term. The withering heat of the past two weeks has left its mark on most every stock that comes in. There are lots of roses, Bridesmaid in particular, coming in that are simply trash and it seems like throwing good money away to express them here as many of them are not even fit for funeral work. But this is not saying that there is a scarcity of stock for there is enough of fair quality to supply all demands. The use of orchids in funeral work seems to be on the increase and they, with a plentiful supply of lily of the valley, put good material in the hands of the designers. American Beauty and Kaiserin are about the only roses coming in that are worth considering, though there are a few odd lots of other varieties that are passable. The asters are now arriving in appreciable quantities and will help speed the parting with the carnations, many of which have dwindled in size of bloom so that even a large bunch

PHONES, 1664-1665 MADISON SQUARE
ENOUGH SAID

looks like the proverbial 30 cents. In the retail stores, even the small force that has been retained for the summer, have to resort to various devices, not strictly in the curriculum of the florist, to drive dull care away, painting and cleaning up the basements being favorite diversions put forward to fire the youthful heart with love for work.

July 13.—According to the weather bureau, there has never been such a drought in the country adjacent to this city so early in the season since the work of keeping records was begun. From New Jersey, Long Island and Staten Island reports are coming in of vegetable and flower crops literally burning up in the fields. "The asters must have rain soon," said a well-known grower this morning; "they are so dry that they cannot last much longer." Reports on field carnations are equally disquieting.

After a Sunday of intense, blistering heat and which drove the largest part of the population to the beaches or other places where they hoped to keep cool, the market opened this morning, dull and languid, with a very light demand. Gladioli are quite plentiful, but they drag, the same as other stocks. The quality of roses averaged a little better in color, due probably to the cool weather of the latter part of last week.

VACATION NOTES.

Jos. S. Fenrich is now living with his family at Asbury Park, N. J., but he has by no means deserted the wholesale district, simply joined the grand army of commuters.

Maurice Kleinman, buyer for Myer, Fifty-eight street and Madison ave., will in a few days, take his family to Long Branch, N. J., for a month's stay.

Nick Schreiner of Henshaw's is spending his vacation down by the New Jersey shore, presumably at some resort that has well equipped bowling alleys.

Miss Anna Leavitt, bookkeeper for Fenrich, after a short stay at Atlantic City will go to the Catskills for a three weeks vacation.

James Coyle, head salesman at Froment's is spending a month at the Ocean House, Asbury Park, N. J.

John Young is now dividing his time between the wholesale district and his summer home at Bedford.

Miss H. Southwell, bookkeeper at Myer's, has gone to Thousand Islands with a party of relatives.

NOTES.

Geo. Cotsonas and Miss Margaret Luckert were married at Vienna hall, Fifty-eighth street and Madison avenue, at 4 p. m., July 12. The interesting ceremony, according to the rites of the Greek church, took place in the presence of a large number of invited guests. The ceremony was performed under an arbor of oak leaves handsomely decorated with pink and white roses, while the entire hall was elaborately decorated in the same general scheme. The bride carried lily of the valley and her sister, as bridesmaid, pink roses. After the knot was tied a bountiful repast was served. Geo. Cotsonas is well and favorably known as a dealer in decorative greens at 50 West Twenty-eighth street; the bride, a very pretty and sensible young woman, is a member of a respected German-American family residing at 132 West Twentieth street. The decorations were executed by M. Rovatzos, P. C. Capsopoulas and other friends of the groom. Among the guests were Geo. D. Nicholas, W. J. Kleine and wife, Mrs. A. W. Smith, Geo. N. Hart, N. Christatos and wife, N. Lecakes, Phillip Kessler, A. F. Faulkner, AMERICAN FLORIST representative, and many others.

Telephone 1998 Madison Square.

Philadelphia.

FUNERAL WORK ONLY.

Business is now almost at a standstill, there being no large decorations, and very few small ones, for that matter. In the outlying districts, where the principal work is designs for funerals, there is more or less doing all the time. What little demand the city stores enjoy is from the same source. Outside of American Beauty and Kaiserin roses, lily of the valley and a few orchids the stock of flowers is very poor and prices hardly worth quoting. Double white petunias and feverfew are in demand for the funeral work, also gladioli, which are to be had in fairly good quantity. They are largely used for window and hotel table decoration, being quite popular at the resorts. Asters are coming in slowly, a little lot now and again. A continuous supply is promised for next week, and from that time on they will be one of the staples.

IMPORTANT SALE.

The trade feature of the week will be the sale under the hammer of the Wm. Graham Co.'s stock by Receiver David Rust at Horticultural Hall. It has taken more than a week to get the stock together, assort it and have it catalogued. One would hardly believe it possible that such an assortment was required for one firm's business. The business of the company was mainly decorative, and for this it required a large line of electrical goods, including chandeliers, letters and numerals, large and small, lamps of all sizes, in fact, everything that a regular electrical business requires. Bunting and flags, shields, coats of arms and all decorative material of this kind, from the common cheesecloth to the finest silk-fringed flags and gilded banners, are seen here in large quantities. There are also furniture and chairs, tables, couches, sofas, carpets, rugs and curtains, much of the material being of the best. This firm catered to the better class of trade and most of its work was of a very high order. A large lot of the decorative material, such as banners, flags, bunting and painted scenery, was purchased a year or so ago from the Floral Exchange, which closed out this branch of its business. There is also a large lot of ordinary decorative aids and material of the ordinary flower store, vases, pedestals, wire frames and designs, pot covers, etc. Some idea may be formed of the immensity of the stock when, although closely arranged, it occupies the entire space of Horticultural Hall, both upstairs and downstairs. The catalogue consists of 785 numbers or lots, the great majority of which represent, not one article, but a large quantity, as hundreds of yards of bunting, or 50 or more yards of carpets, or a dozen or more expensive electric chandeliers or candelabra, etc. For a collection of such magnitude it is in remarkably good condition, and it is a great pity that it has to be thrown on the market in this manner. It is expected it will take two days to complete the sale.

NOTES.

Godfrey Aschmann, of Tenth and Ontario streets, is sending out something in his line every day. A good deal of the stock sold now is for growing on by florists who do not import themselves, and who take advantage of a little empty space in the summer to grow on such plants as araucarias, palms and fancy ferns to brighten up their places for the fall opening.

Alban Harvey & Sons of Brandywine, Summit, carnation specialists, have a splendid lot of Winsor, over 8,000 plants, all of indoor culture; these are even now of good size and promise a fine crop of choice flowers in the early fall.

Edward Reid is handling quantities of Kaiserin roses; these and American Beauty are his summer specialties and even though trade is dull he says he sells them all.

K.

Boston.

FLOWERS SCARCE AND POOR.

The flower market is very quiet. Flowers are scarce and poor in quality. Gladioli are scarce on account of the continued drought and are bringing $6 to $8 per 100. Sweet peas are very poor and are worth $2.50 per 1,000. Roses on the whole are only fair. Killarney, Kaiserin and Mme. Chatenay bring $8 to $10 per 100. Retailers find business in accordance with the market there being nothing doing except the funeral work.

NOTES.

We regret that Chas. E. Richardson, for many years treasurer of the Massachusetts Horticultural Society, is seriously ill at the home of his son-in-law, Geo. W. Mitton, Salisbury road, Brookline.

W. F. Kenny of Galvin's Back Bay store has taken a summer position as decorator at the Mt. Desert nurseries, Bar Harbor, Maine.

Geo. Dunn, of Galvin's, has taken a trip through Maine and Wm. Henderson, of the same store, has gone to New York for two weeks.

Frank Reynolds of N. F. McCarthy & Co., was married July 8 to Miss Barthelmas, of Brookline.

Visitor: W. Gibson, of Gibson Bros., Newport, R. I. B.

Notes from Boston and Vicinity.

The gypsy moth is now a nightmare to gardeners and assistants. The thousands of trees with a strip of gunny sacking around their trunks provokes a reminder of some of the bathing suits worn at the beaches. The moths hide, or try to, under the sacking, and are picked off in the morning. I note that the operators use a small instrument much like sugar tongs.

A well known grower near Boston recently told the writer that Winsor carnation was the best of its kind ever put on the market. He says that notwithstanding the very hot weather he is still cutting Winsor of good quality and color.

The Welde & Brookline gardens on the Lars Anderson estate, are now very beautiful and new features are being constantly added. Under glass may be seen a splendid crop of grapes and other fruit.

A Fourth of July feature on Boston common was the many small plants and flowers given to the children. The presentations were managed by a committee of ladies and the florists helped out.

Whittet & Co., of Lowell, have a new and beautiful variety of candytuft of a handsome mauve color, and it promises to become popular.

Arthur Mellor, formerly a well known designer of Lowell, is now in Arizona.

Worcester, Mass.

The regular summer dullness has set in and "nothing doing" is the general report. We are experiencing one of the worst droughts that we have ever had. Crops are wilting in the fields and pastures are drying up, keeping down the milk supply.

On July 8 Adin A. Hixon and wife entertained about 200 members of the Worcester County Horticultural Society and acquaintances at their home Maple Shades. It was a reunion that formerly took place at Magnolia, the home of O. B. Hadwen. Secretary and Mrs. Hixon received the guests and they were assisted in receiving by Mrs. Allyne W. Hixon and wife. The guests were invited to inspect the house, greenhouses and grounds of Maple Shades, and everybody wandered around to their heart's content. The veranda of the house was decorated with flags and red, white and blue bunting. Refreshments were served.

The guests found many things of interest in their tour of inspection. One of the most interesting places visited was the old Gates homestead where Mrs. Hixon was born and which was built by her great-grandfather, Simon Gates, in 1749. The property now belongs to Harvlin T. Gates, Mrs. Hixon's brother, who lives in Southern Pines, N. C., and has been in the Gates family for five generations. A visit was also made to the Hixon orchard and gardens. Then the party climbed the hill to get a view of the city, crossed over to the Shearer place to get a drink of spring water, and ended their tour of inspection by visiting the Hixon greenhouses.

COUNTY SOCIETY'S SHOW.

There was a good showing of flowers, fruit and vegetables at the show of the Worcester County Horticultural Society July 9, and the show was well attended. The women of the society did very well with their baskets and there were several pretty ones shown. Fuchsias were called for but there was but one exhibitor, E. W. Breed. James E. Draper had an unusual exhibition, a display of evergreens, which occupied a whole table and contained 32 specimens.

AWARDS.

Cut flowers.—E. W. Breed, first; Mrs. E. Warren, second; Mrs. S. E. Fisher, third; Ida J. Henderson, fourth.

Baskets.—Mrs. Percy G. Forbes, first; Charles R. Fish, second; Mrs. A. E. Underwood, third; Ida J. Henderson, fourth.

Fuchsia.—E. W. Breed, first.

Petunia.—Mrs. A. E. Hartshorn, first; Mrs. P. G. Forbes, second; Roger Perry, third; Mrs. Edward Warren, fourth.

Hydrangea.—Mrs. S. E. Fisher, first; Mrs. A. E. Underwood, second.

Evergreens.—James E. Draper, first.

Silver Sword Fern.—Mrs. J. E. Sinclair, first.

Physostegia.—A. L. Bemis, first. R.

Baltimore.

CHRYSANTHEMUM PLANTS SCARCE.

The vintage of weather given us is not a determinate grade—rather mixed. Days hot, reaching 97°, and nights running down into the 50's, but with very inequitable distribution of heavy showers and tremendous electric disturbances. These factors do not make for the well-being of outdoor stock, and the supplies, which are usually so abundant, are thus far paltry and few. Maman Cochet roses, which began to be considered the main reliance for summer work, have not done well now for two years. Last season was too wet and this one seems too dry to meet the requirements of this variety. The roses from under glass are far more abundant than is usual at this time of the year, due to the carrying over, probably, of so many houses. Carnations are very poor, and ditto is the word for sweet peas. The earlier part of last week's trade showed some little spurts of activity, due to funerals, where the demand created a stir in the market; but towards its end everything fell off as to demand, and great quantities of stock could not be moved at all. Of the funerals mentioned, one was that of James E. Hooper, one of the members of the park board, a useful citizen, a high-minded, honorable man in every relation of life, and one much devoted to the improvement and maintenance of the public parks and gardens. When his obsequies took place, the regard in which he was held was evidenced by the great number of floral tributes which were sent by his friends and admirers. Mr. Hooper's father, the late William E. Hooper, was one of the original members of the commission which established the system of parks of this city. The vacancy in the park board has been filled by the appointment of Milton B. Williams. This gentleman is an officer in one of the city banks and has long taken a lively interest in the public playgrounds of the city.

There seems a lack of chrysanthemums in this section, and supplies are pretty well sold out. James Hamilton, of Mt. Washington, has had a great trade this year, and sold plants by the hundred thousand. S. B.

OUTDOOR ROSES GOOD.

By far the largest item of trade done these hot days is funeral work; all are about equally busy along the same line. Wedding decorations help to dispose of the colored flowers such as outdoor roses which are very beautiful this year. Outside of this very little is doing. The schools are all closed and most of the regular flower using people in the country are at the seaside. A fairly good trade is done by the street vendors with buttonholes. Asters are coming in, such as Early Wonder and Queen of the market, both pink and white. Sweet peas are also making their appearance; a lot of the novelties like the English 10 seeds for a shilling are grown this year. Some promise to be an improvement over the older varieties but one gets few plants from 10 seeds and the flowers of these are hard to judge against a row of 50 feet of the older varieties.

FLORISTS' CLUB MEETING.

At the meeting of the Gardeners' and Florists' Club last Monday night J. Pewtress brought down a collection of sweet peas, all the newer varieties. The method of growing Mr. Pewtress follows to have them in bloom by the middle of June is: He sows the seeds early in the spring in the greenhouse in pots, keeps them dwarf by frequent pinching, gradually hardens them off and plants them out as soon as weather conditions allow. This way Mr. Pewtress claims to have all varieties in full bloom by the middle of June. J. Luck showed a nice lot of outdoor roses. A bunch of Frau Karl Druschki called forth general admiration also Killarney somewhat full blown but grand. Among the collection shown besides those mentioned were Mrs. John Laing, Ulrich Brunner, Mrs. Sharman Crawford, Charles Lefebvre, Kaiserin, Tom Wood, Jacqueminot, Caroline Testout, Alfred Colomb, Eugene Verdier and others. Baby Rambler, Crimson Rambler and Dorothy Perkins were shown at their best. The exhibitor claims these to be all hardy having stood the test of two winters. Geo. Trussel showed a large collection of hardy perennials. We noticed two double delphiniums from Japan which were considered quite a novelty. The judges were A. C. Wilsaire, John Eddy and W. C. Hall, but their awards were not given out.

The Canadian Horticultural Association contingent is discussing the programme, also the mode of travel and the entertainment thereon, prizes for the all night euchre and so on.

J. Piddack of Mount Royal park closely guards some fringed tuberous rooted begonias with which he expects to spring a big surprise in the near future.

S. S. Bain is attending to his business again after a long illness. He will do no building this year but attend to his retail store. LUCK.

St. Louis.

TRADE HOLDING UP WELL.

Warm summer weather with cooling breezes have prevailed all week and the market has kept up well. Funeral work has kept the retailers busy. There has been a good steady demand for all kinds of stock and where good quality has shown itself there has been no trouble to get fair prices. Sweet peas have improved a little though they are still very short stemmed. Some good Harrissi lilies are coming in which find a ready sale. Fancy ferns from the east are now coming in of good quality.

THE FLORISTS' CLUB.

The Florists' Club met Thursday afternoon. Will Young was in the chair, 25 members being present. The nomination of officers was the principal business of the club; also the final arrangements of the picnic at Normandy Grove. The trustee committee had met Wednesday at W. C. Smith & Co.'s store perfecting arrangements for the distribution of prizes and other matters.

The following gentlemen were nominated for officers at the club meeting July 9: For president, W. C. Young and W. Retzer, of the St. Louis Seed Co.; for vice-president, H. Emmans, of Belleville, Ill.; Geo. Angermueller, E. Denker, St. Charles; for secretary, Bentzen; for treasurer, F. H. Weber; J. J. Beneke; for trustees, G. Frow, J. F. Ammann, C. Fulgraf, C. Beyer.

NOTES.

Fred W. Breunig is now the proud father of a fine baby boy. Fred has been very busy and his store is ably managed by Miss Eugenia Stamn, assisted by Miss Rosie Steidl. Fred himself, with assistants, take care of the greenhouses adjoining in which he raises ferns and smilax. His three houses now building at his farm at Columbia, Ill., will soon be finished and will be filled with carnations and miscellaneous stock in time for this winter's use. He is at present cutting from the outside some fine gladioli. Up to now he has had no surplus; when he has he consigns to the wholesale market.

The Big Four has given a rate of $21.40 to Niagara Falls and $4 for berths for any one attending S. A. F. convention. For further particulars apply to John Steidle, state vice-president for S. A. F. at Central, Mo. The train will be the Knickerbocker express leaving this city 1 p. m. and arriving next morning early.

F. C. Weber and wife and daughter, together with the Misses Meinhardt, are having a splendid time in California and they are expected home the latter part of July. F. C. Weber, Jr., is in charge during his father's absence.

Adolph Brix while making a wreath, suddenly became overheated. He is a hard worker and had done more than he should that day. He took a rest and was about again the next day as fresh and spry as ever.

Mrs. Schlueter, a prominent florist in North St. Louis, is doing a very nice trade. She has a greenhouse adjoining the store filled with ferns and other plants.

The council met and passed a bill ordering the park commissioners to issue permits to responsible parties who desire to give picnics at the parks.

J. M. Kalisch has returned from his wedding tour. He has been in Colorado and has gained in weight considerably. He had a splendid time.

John Burke and Geo. Angermueller are going on a fishing excursion. John is very lucky and known as a first class angler.

Geo. and Aug. Hartman, and Mrs. Theo. Richter, Kirkwood, are cutting some choice gladioli.

The Seed Trade.

American Seed Trade Association.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres,; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention, June, 1909.

HARRISII LILY BULBS, owing to the dry season, will be a short crop in the large sizes.

NASHVILLE, TENN.—The Cumberland Seed Co. was incorporated recently with capital stock $30,000.

A BULLETIN on "Clover Seed in the Connecticut Market" has just been issued by the Connecticut Experiment Station.

RETAIL seedsmen report a very poor demand for garden beans this year. A short bean crop would help unload large surpluses.

LAWRENCE, KANS.—Rudolph Kruhm, for the last two years with the Barteldes Seed Co., of this city, is now with the J. Horace McFarland Co., Harrisburg, Pa., in the catalogue department.

MILWAUKEE, WIS.— Henry F. Cochems, Congressman Stafford's opponent for the republican nomination for congress in the fifth district, assails seed and book distribution by the government on the request of congressmen. He says the system has been so abused that the annual cost per congressional district is nearly $10,000.

NEW YORK, July 13.—According to the weather bureau, there has never been such a drought in the country adjacent to this city so early in the season since the work of keeping records was begun. From New Jersey, Long Island and Staten Island reports are coming in of vegetable and flower crops literally burning up in the fields. "The asters must have rain soon," said a well-known grower this morning; "they are so dry that they cannot last much longer."

CHICAGO. — Kentucky bluegrass is quoted this week at $1.20 per 19 to 20-pound bushel in 36,000-pound car lots. On the board of trade July 14 contract prices for grass seed were noted as follows: Prime timothy, $4.20; choice white clover, $15.—Continued drought is now the chief cause of anxiety to local onion set growers.—L. H. Vaughan returned Monday from an inspection visit to his Michigan bean farm. He reports the present prospects entirely satisfactory.—Visitors: W. H. Small, Evansville, Ind.; R. A. Anderson and J. C. Spedding, New Zealand.

RICHMOND, VA.—T. W. Wood & Sons, have engaged the services of Frank Brunton, an expert seed grower, horticulturist, landscape gardener and florist, to take charge of their new model seed farm being established at Milford, on the Richmond, Fredericksburg and Potomac railway in Caroline county. Mr. Brunton served five years' apprenticeship on one of the leading seed and nursery farms in England. He is a graduate of the Royal Horticultural Society gardens in London in argricultural chemistry and plant breeding. He was superintendent of the Shady Hills nursery in Newport, R. I., and has laid out as well as planned some of the finest estates in the north. For the last two or three years he has been in Texas. Unfavorable seasons and a cyclone which carried away his home and came near killing his wife and children caused Mr. Brunton to leave that state, and he has always desired to locate in Virginia.

Braslan Seed Growers' Co.

Growers for the Wholesale Trade Only.

SAN JOSE, CAL.

Wholesale Seedsmen's League,

The ninth annual meeting of the Wholesale Seedsmen's League was held June 22. Those members of the board whose 3-year terms expired by limitation, viz., F. W. Bruggerhof, J. B. Rice and Albert McCullough, were re-elected. The treasurer announced a substantial balance in the bank.

President Bruggerhoff announced that a meeting of the board of directors would be called in the early autumn to elect officers and to consider a very important proposition, upon which the meeting adjourned. The past officers of the board were directed to hold over until their successors are elected.

W. E. Dallwig, Milwaukee, Wis.

Dallwig Twenty-five Years in Business.

Wm. E. Dallwig, as already stated in these columns, celebrated his twenty-fifth business anniversary this year, having started his seed business in 1883. Mr. Dallwig was born at Branch, Manitowoc county, Wis., February 15, 1854. He located at Milwaukee in 1875 and entered the shoe business. In March, 1883, he engaged in the seed business at 34 Juneau avenue in a small way, still retaining his interest in the shoe store. In January, 1886, he disposed of the latter and expanded the seed business, adding bulbs and florists' supplies. The stock has been gradually increased until now it embraces a complete line of vegetable and flower seeds, bulbs, nursery stock, insecticides, tools, poultry supplies, etc.

In 1899 a new building was erected, affording five times the floor space of the old one. The first catalogue, a 4-page folder, was issued in 1886. Five catalogues are now issued, as follows: Retail general catalogue in English, 96 pages; retail general catalogue in German, 84 pages; florists' wholesale catalogue, 48 pages; market gardeners' catalogue, 40 pages; bulb catalogue (fall), 32 pages.

Canadian Seed Crops.

June 24.—"It is rather early to forecast the final outcome of crops," writes the Steele-Briggs Seed Co., "but from general reports conditions throughout all parts of the dominion of Canada from the Atlantic to the Pacific for cereal, clover and grass crops could scarcely be more favorable. As usual, climatic causes may materially reduce the present brilliant prospects in many sections, but unless something very unusual takes place the present outlook warrants us in expecting full average crops of all kinds."

Canary Islands Crops.

From the latter part of November to the middle of April the weather was unprecedented for this latitude. Heavy and continuous rains prevailed to such an extent that all crops have been affected. The tomato crop, which is one of the most important, was a total failure. Persistent damp brought on disease and miles of these plantations were soon destroyed. The crop of wheat, now in full harvest, has been attacked by black rot. The onion seed crop has suffered considerably and a prominent grower estimates (June 9) that the yield will not be more than one-half of that expected.

The Louisville Onion Set Crop.

Louisville, Ky., July 10.—The harvesting of onion sets in this district commenced this week. Recent rains have helped the late planting. H. R. Whiteside, the big set operator and shipper, who last year carried through such a successful deal, will no doubt be equally as active this season, according to a produce publication. The concern has increased its storage facilities at Fourteenth and Maple streets, where the main office is located, and will operate the storage house near Buechel, also the big warehouse at New Albany, Ind. Mr. Whiteside says that from reports furnished by his buyers he estimates the increase in the onion set acreage to be 20 per cent over last season, but owing to dry weather, which has cut the crop somewhat, the total yield will hardly be over 10 per cent greater than in 1907. He approximately fixes 200,000 bushels as a full estimate for the entire Louisville onion set crop, of which 75 per cent is yellow stock, 22 per cent white and 3 per cent red. It is noted that there is some decrease in whites. The sets will run about the same in size as last season.

A grower on the Jeffersontown road who harvested his crop early this week, gathered 450 bushels of sets from 40 pounds of seed planted.

Pea and Bean Crops.

July 11.—N. B. Keeney & Son say that nearly all peas in the northern part of the southern peninsula of Michigan were planted about two or more weeks later than usual, the bulk of the crop being sown three or four weeks later than usual. During May this year the Michigan rainfall was the heaviest on record by the weather bureau for the month of May. Pea crops on low land were injured, but most pea crops made a fine start. However, by June 10 dry weather and hot winds set in and continued for three weeks, with very little, if any, relief. Such of the early varieties as were sown

early, suffered severely and these crops are not likely to recover from the ill effects of the drought, no matter what the weather is later. The drought was broken by a heavy rain July 3, and this has been followed by frequent showers. The later varieties and the later sown crops of the early varieties are being benefited by these rains, but it is too early to tell what these later crops will do, because so much depends upon the weather of the next two to four weeks.

The weather for planting beans was not altogether favorable when the crop was put in, and a good many fields have rather a lighter stand than could be wished for. The weather during the greater part of the past two weeks, with the thermometer today at 90° in the shade, has been too hot for beans and the crop is not very promising just now, but it is too early to make any estimate as to the final outcome.

Dutch Bulb Trade.

Consul-General S. Listoe, of Rotterdam, makes the following interesting statements in regard to the rapidly growing Dutch bulb trade:

An industry characteristic of the Netherlands is the raising of tulip and hyacinth bulbs. Attempts have been made in several parts of the world to grow these, but nowhere can the experiment be said to have been successful, as the proper kind of soil for the propagation of perfect bulbs seems only to exist in the small space of territory between the cities of Leyden and Haarlem. This stretch of country is in reality the bottom of the old Haarlem sea (Haarlemmer meer), which was laid dry about the year 1852, and this sea-bottom dirt, a combination of sand and decomposed vegetables and plants, appears to be the only soil capable of producing the flower bulbs mentioned.

These bulbs are therefore exported to all parts of the world, the United States taking its full share; the demand is constantly increasing, and, in consequence of this fact, an increased area is from year to year set apart and devoted solely to the cultivation of bulbs. The statistics for 1906, the latest available, give this area as 4,058 hectares, equal to 10.027 acres. The exports of bulbs and bulbous roots from the Netherlands in 1907 amounted to 33,610,280 pounds, of which 6,214,120 pounds, valued at $531,098, went to the United States. In 1906 the total exports were 26,180,000 pounds, the shipments to the United States being 5,098,940 pounds of a declared value of $536,242; the relative figures in 1905 were 25,640,340 pounds total, and 4,413,640 pounds, worth $417,611, to the United States.

The best customer for the tulip and hyacinth bulbs of the Netherlands is the United Kingdom, which purchased 13,950,200 pounds in 1907. Germany and Austria together bought 8,728,720 pounds, Norway, Sweden and Denmark 2,307,360 pounds, and Russia 793,100 pounds. As an indication of the growth of this branch of Dutch agriculture, and as a demonstration of the regular increase in the demand for Dutch bulbs, it may be stated that the exports in 1897 were only 12,543,955 pounds. The advance since that time has averaged over 2,000,000 pounds a year.

Premium American PANSY SEED

1908 Grown and Now Ready.

Extra Choice Mixed, 1 pkt., 10c; trade pkt., 20c; 1/8 oz., 50c; 1/4 oz., 75c; 1 oz., $2.75.

MARKET GARDENS.

PENNSYLVANIA, it is said, produces over $15,000,000 worth of vegetables annually.

GROWERS are said to be holding back potatoes owing to the light crop and prices at Chicago having advanced.

Marketing Cucumbers and Tomatoes.

When a man has produced a good crop he is half way to success. The selling end is easily another half and sometimes more. In other words, as great pains should be taken in selling as in growing, so as to get the most for the crop. It will not do to dump greenhouse tomatoes and cucumbers into a bushel basket and try to dispose of them that way. Much better, get some nice, small packages, say peach baskets and crates, and offer the product in these, carefully graded. A five-pound tomato basket and one-dozen cucumber basket are good sizes. Grading is most important; have each basket hold fruit as near alike in color and size as possible.

To pick tomatoes unripe and lay in the sun is a great mistake. Fruit exposed to the strong sun sours and is unpalatable. Tomatoes should be allowed to ripen on the plant until fairly colored, but no further, and then picked in the morning before they are heated and removed to a cool room for packing. A cucumber should be cut, not torn, from the vines, leaving a half inch of stem to each fruit. They should be cut daily, so as to get as near one size as possible. In warm weather they will grow wonderfully fast and daily attention is needed. Both tomatoes and cucumbers will be benefited by a little shade on the glass during July; and often in July they pay handsomely. We have in an emergency sprayed the glass with Bordeaux mixture, which makes a nice shade. MARKETMAN.

Trouble With Cucumbers.

ED. AMERICAN FLORIST:—

What is the matter with my cucumbers? I never saw more thrifty vines and there are plenty of blossoms but no fruit. They are under glass; part of them are trained up to the roof, part laying on the ground but there probably has been only about a dozen fruits on vines in the last month. These have been large and matured in a very short time. Is there anything that I can do to keep them from falling off? I have had trouble in getting young plants started. When once started they grow to perfection very quickly; even lettuce plants this last winter would stand fully 30 days without showing any signs of starting to grow; quite a number would have to be transplanted and then the bed would be very uneven and unsatisfactory. I find that in all young plants and particularly cuttings that come out of the sand I lose nearly three-fourths of them but after they are once started they do very well. Everything does exceedingly well after it is once started. E. G. P.

Ohio.

In answer to "E. G. P." in regard to the non-fruiting of his cucumbers the trouble appears to be improper fertilization. Plants like cucumbers, muskmelons and tomatoes, grown under glass all require to be artificially pollinated either through the agency of bees or by hand. The natural means of carrying pollen from one part of the flower to another, or in the case of cucumbers from one flower to another are lacking under artificial conditions of the greenhouse, and particularly during the winter and early spring months. As soon as the greenhouses are left wide open then there should be no trouble of this sort. Bees gain an entrance and there should be a good set of fruit. In the case of muskmelons and cucumbers the two types of flowers borne are easily distinguished. The pistillate flowers have the young embryo fruit at the base of the flower, while the staminate flower has no such development. A good way of pollenizing the flowers is to pick off the staminate flower, turn back the petals and dip the pencil of stamens, which will thus be exposed, into the cap of the pistillate flower covering the stigma with pollen. By carefully hand pollinating there should be no difficulty at all in getting a satisfactory set of fruits provided of course the pistillate flowers develop as they ordinarily do.

From what has been said of the dying of the young plants I am inclined to believe this is in the method of handling, or the soil needs to be modified in some particular. I believe that in many cases if careful sterilization were practiced in soils to be used in greenhouses, particularly for potting young plants from the seed bed, that much better results would be obtained than is the case at the present time. C.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points July 11, were as follows: Cincinnati, mushrooms, 50 cents to 60 cents per pound. Chicago, mushrooms, 25 cents to 45 cents per pound. New York, cucumbers, $1.25 to $2.50 per basket.

Apples for Export.

"Canned apples are being imported in increased quantities from Canada and are sold at successfully competitive prices with American apples. California apples packed in cases seem to improve each year, and the English demand for them is increasing, owing to the fine condition of the fruit and the excellent manner of packing. Last year the sale of California apples in this country exceeded the sales of any previous year, and the testimony of all the fruit importers in Liverpool is that these apples are almost invariably fairly and properly graded; that the smaller apples are packed separately, and that the cases are so branded that the markings indicate the quality of the fruit. There is no doubt that if greater care were shown in the selection, grading and packing of American fruits there would be a gratifying increase in the English demand."

DOVER, N. H.—Jesse Arlin has returned home from York Beach, where he has been doing a successful business for C. L. Howe, of Garrison Hill.

Tobacco Growing in Ireland.

With reference to the production of tobacco in the United Kingdom, Consul-General Robert J. Wynne, of London, says that, with the exception of Ireland, no tobacco is grown or produced in that country. He transmits a copy of the Irish tobacco act of 1907, which repealed the law prohibiting the growing of tobacco in Ireland, and writes:

In the general report of the Department of Agriculture for Ireland, issued 1907, it is stated that the experiments in the growing and curing of the tobacco crop were continued in 1906. These experiments were conducted under the special sanction of the board of inland revenue, with the object of determining the commercial possibilities of tobacco cultivation in Ireland. In order to facilitate the experiments, which involved a somewhat large expenditure, a rebate of one-third the duty levied on tobacco was allowed to the growers. The experiment at Tagoat, County Wexford, was worked on co-operative lines, 11 farmers cropping about one acre each, the tobacco being cured in one barn.

Curing barns were provided by the department at three centers, viz: Navan, Tullamore, and Tagoat. Experiments were continued at these centers, the area under crop being about 44 acres. In addition to these centers sanction was also granted in five cases where the growers undertook to provide at their own expense suitable accommodation for the curing of the leaf. Thirty-three acres were cropped by these growers. The season on the whole was reported to be favorable to the growth of tobacco, and the crop was successfully harvested at all the centers. The cured leaf will not, however, be marketed for some time, so that the financial results cannot be stated. In order to allow experiments to be carried to a conclusion, the chancellor of the exchequer consented to extend to 10 years the period of five years originally granted, during which the rebate of duty will be allowed on tobacco grown for experimental purposes.

SEATTLE, WASH.—H. C. Pettit, a real estate man, has gone into the flower business in the southeast of the city.

Lilium Harrisii

We offer a selected stock of the original true Harrisii for early forcing. These bulbs have been grown from the original pure Harrisii, and will be found to be splendid stock for early forcing, for which purpose Harrisii is so valuable. We have had the stock inspected, and are assured that it is almost absolutely pure and almost entirely free from disease. This is not stock picked up indiscriminately from different sources, but is grown from one stock, and will be found very superior to the ordinary Harrisii usually offered, both in regard to freedom from disease and purity, and not the late type now so often furnished.

Lilium Harrisii has been deteriorating slowly for years, and in order to get back to the true type of the original Harrisii, we have had our stock grown from the original pure stock, and it will be found very superior to the Lilium Harrisii usually offered. While the stock is A No. 1, our prices are as low as, or lower than, the prices asked for indifferent stock. We have only a limited quantity of this stock to offer, so it will be advisable to place order without delay in order to ensure securing this stock. Bulbs ready for delivery middle to last of July:

6-7 in. bulbs, 350 to the case, $6.00 per 100; $ 50.00 per 1000
7-9 in. bulbs, 200 to the case, 9.00 per 100: 80.00 per 1000
9-11 in. bulbs, 100 to the case, 18.00 per 100; 170.00 per 1000

Full case lots at thousand rates.

Freesia Refracta Alba Bermuda grown, finest selected bulbs ½-in. up, $1.00 per 100; $ 7.50 per 1000
French grown, mammoth size, ¾-in. up, $1.50 per 100; $12.00 per 1000

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.

Pittsburg.

TRADE VARIABLE.

There was but one day during the week on which there was any activity in the cut flower business, and the balance of the week saw very little doing. Roses are still plentiful, but of poor quality, with the exception of Kaiserin, which still continues very good. Carnations were somewhat scarce, with but few good ones in the market. Lilies are of the best. A few asters have made their appearance, but not in any quantity. Gladioli are showing up better, with a good demand for the lighter colors. American Beauty roses are not very plentiful; there is a good demand for the shorter grades, with but few to be had.

NOTES.

Pittsburg Florists' Exchange is handling some very fine lilies. E. J. McCallum of this exchange is remembering his friends by sending them post cards showing points of interest on his eastern trip.

Geo. Marshall of the Pittsburg Cut Flower Co. leaves July 18 for a trip to Atlantic City.

Visitor: J. E. Bonsall, Salem, O.

J.

Glen Cove, N. Y.

The Nassau County Horticultural Society held its monthly meeting in Pembroke hall July 8. President Jaenicke occupied the chair. The minutes of the previous meeting were read and approved of. Acceptances were read from several gentlemen invited to act as judges at the fall show. Two new members were proposed and three elected; also three honorary members. Mrs. H. J. Bucknall, Mrs. J. N. Stern and Mrs. Benjamin Stern Roslyn. A. Mackenzie, chairman of the executive committee, presented a schedule for the fall show, which was approved of. Contributions of special prizes were offered by Stumpp & Walter Co., Peter Henderson & Co., W. E. Marshall Co., New York and W. H. Weeks Sea Cliff, also from several members. It was voted and carried that no member could compete for his own prize, and the committee were asked to have a preliminary schedule ready by next meeting. It was also voted to have a dahlia show in October. A proposal that essays be read and discussed was received favorably and J. F. Johnston consented to have one on "Evergreens" for next meeting. President Jaenicke announced that members were invited to exhibit at Queens agricultural exhibition. The awards of the exhibits for points were: H. F. Meyer, corn, 81. Valentine Cleres, 71. Oscar Adder, rhubarb, certificate of culture; yuccas, honorable mention. An exhibition of evergreens by J. F. Johnston received a vote of thanks. Mr. Johnston made some interesting remarks, especially as to the difference between the hickory and walnut in winter. Mr. Adder told how he grew his rhubarb. The meeting then adjourned.

OIL CITY, PA.—R. C. Reynders, while returning home from a visit to a sick friend July 5 was struck by a train and so badly mangled that he died before reaching the hospital.—J.

LA CROSSE, WIS.—Theo. F. Kienahs is rebuilding two of his houses, 25x125 feet each. When completed he will have 30,000 feet of glass.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-Presdent; George C. Seager, Rochester, N. Y., Sec'y.
Thirty-fourth annual convention to be held at Rochester, N. Y., June, 1909.

THE plume poppy (Bocconia cordata) is at its best now.

NEOGA, ILL.—Houston Clawson, of Clawson Bros., has announced his candidacy for county surveyor.

ASCLEPIAS TUBEROSA, though a native plant, is one of the brightest and best on the herbaceous border now.

THE tamarisk is very beautiful in Jackson park, Chicago, and, now so few good shrubs are in flower, it is doubly welcome.

PROVIDENCE, R. I.—Alexander Johnson, son of Geo. Johnson, of the Elmwood avenue greenhouses, has been appointed city forester.

CORNUS FLORIDA does not thrive well in Illinois, but we know of noteworthy exceptions where the plant is treated to partial shade with a little lime in the soil.

LESS than half the normal crop is the report on the Kansas large fruit made public by Walter Willhouse, secretary of the State Horticultural Society, Topeka.

SPOKANE, WASH.—The Van Holderbeke Nursery Co. has been incorporated, with capital stock $60,000. A. and E. Van Holderbeke and A. Elm are the incorporators.

SYMPHORICARPUS RACEMOSUS, the common snowberry, is a good plant for partially shaded locations and the large pure white fruits make it very attractive in the fall.

MANY of the fine elms in Central park, New York, are said to be in a very bad condition owing to lack of nourishment, the soil being very poor and unable to carry them properly.

CANNAS in good soil and even when well supplied with stable manure do not always thrive. In such cases it would be well to try phosphoric acid, giving the plants plenty of water in dry weather.

CHARLES CITY, IA.—During a heavy thunderstorm here June 27, the large barn at the Sherman Nursery Co. was fired by a bolt of lightning. The loss on the barn is $4,000, but the total loss is $8,000, including horses, etc. The building is to be replaced immediately.

WILLIAMSBURG, IA.—The Williamsburg Nursery Co. has purchased 10 acres of land adjoining Cedar Rapids which it will at once begin to develop. The business will be held here until the new location is fully prepared to handle all trade, which will be about three years from the present time.

MILTON, ORE.—Aaron Miller & Sons, who have been in the nursery business here for some time in partnership, have just incorporated and the name of the new company will be the Milton Nursery Co. All the private lands of the Miller sons and the lands of Aaron Miller in this vicinity have been sold to the company, the sales under private ownership amounting to about $15,000.

Propagating Euonymus Alatus.

In answering this question, presented at the recent Milwaukee meeting of the American Association of Nurserymen, one grower recommended the use of soft-wooded cuttings in summer.

Cornus Brachypoda.

There are several of the Japanese dogwoods that are well adapted for shrubbery planting and probably hardy in most parts of the United States. John Dunbar, of Rochester, N. Y., who sent the photograph from which the accompanying illustration was prepared, says that this and C. macrophylla are hardy with him as far as his experience goes. The habit of the tree and form of foliage are well shown in the picture.

Western Association of Nurserymen.

The semi-annual meeting of the Western Association of Nurserymen was held at the Coates House, Kansas City, Mo., July 8 and 9, the meeting being called to order by President Bernardin at 11 a. m. on the opening day. The attendance, owing to various causes, was comparatively small and in consequence the programme was considerably modified. A committee was appointed with F. H. Stannard, Ottawa, Kans., chairman, to formulate resolutions on nursery tariffs on imported stock. This matter will be brought up again at the winter meeting of the association and later before the American Association of Nurserymen with a view to tariff readjustment. The next meeting will be held in January.

K. C.

Georgia State Horticultural Society.

The thirty-second annual session and exhibition of fruits, plants and vegetables will be held at the high school, Cornelia, August 12-13, beginning each day at 10 a. m. The past work of this society has caused a great development of the fruit growing industry in the state and it is hoped that a large and representative attendance will be secured. Valuable papers will be read by scientists and practical growers of national repute thus affording an excellent opportunity for those who attend to become acquainted with the most modern methods of culture and the results of modern research into all subjects relevant to fruit growing.

As is usual in such cases free discussion will follow the reading of the papers and much useful knowledge is always imparted when growers give their varied experience for the benefit of others. The question box will be another important feature and questions will be received (in writing) by Secretary J. B. Wight at any time during the meeting. The hotel rates are from $1 to $2 per day. The citizens are going to do all they can to give delegates a good time and the chamber of commerce gives a barbecue the last evening of the session. A special train leaves for Talulah Falls every evening at 5:32 returning the next morning, thus affording an excellent oppor-

CORNUS BRACHYPODA.
Growing at Highland Park, Rochester, N. Y.

tunity of visiting some of the grandest mountain scenery in the state.

All fruits and vegetables intended for exhibition should be sent care of I. C. Wade, Cornelia, Ga., the name of sender plainly marked on each package and a list of varieties handed to the secretary. Tourist rates are in force from all over the state or mileage books at two cents per mile may be purchased. Persons who attend the meeting are requested to communicate with the secretary as it is desired to advise the citizens of Cordelia as to the probable number of visitors in advance. The following are the officers of the society: J. B. Wight, Cairo, secretary; L. A. Berckmans, Augusta, treasurer; P. J. Berckmans, Augusta, president.

Andorra Nurseries, Chestnut Hill, Pa.

At the end of the famed Wissahicken drive, Chestnut hill, Pa., the conditions presented by the Andorra Nurseries do no violence to the portion of Fairmount park which is adjoining, says the Philadelphia Bulletin. Indeed, the last half-mile of the most lovely park drive in America is bounded by a part of the Andorra Nurseries, and a sharp turn to the left as one emerges from the shade by the Wissahicken leads into a beautiful tree-bordered nursery road.

At present this road has a special attraction, as it leads to a beautiful Japanese garden, filled with many plants from Japan, including the iris in full bloom. The iris has very large, showy flowers on stems three feet high. The colors are very brilliant and striking, in shades of azure blue, royal purple, pale violet, yellow and white, and many of them closely resemble immense orchids. One could not help feeing repaid for a trip to the nurseries at this time.

Canadian Fig Growing.

Consul A. G. Seyfert, of Collingwood, reports that the culture of figs has proved successful in the Canadian province of Ontario. He says:

"The Niagara peninsula, that part of Ontario west of the Niagara river to the western end of Lake Ontario, is well known as one of the finest fruit-growing sections in the province, if not in Canada, but it may surprise many to learn that fig culture has been successfully conducted near Niagara on the lake for the last 40 years. The climate of this section of the peninsula appears peculiarly suited for the culture of figs. The open waters of Lake Ontario and the Niagara river modify the temperature greatly, and the usually comparatively mild winter, as compared with the same latitude elsewhere, followed by a backward spring—caused by the ice coming down the river from the upper lake—and the dry and warm summer, produce an ideal climate for all kinds of fruit, especially figs.

"The fig is a native of subtropical countries, and is almost unknown in central North America in its fresh state. The theory is that figs will succeed in any country where peaches and apricots do well without protection, if the plants receive proper winter protection. The fig growers of the Niagara district protect their plants in the following manner during the winter:

"As soon as the leaves have fallen and sharp frosts set in, two or three of the branches are bent to the ground in their natural direction and tied loosely with strips of cotton or other soft material and held in place by crotched pegs, care being taken not to injure the bark. When all branches are down the whole is covered with a mound of earth three to four feet in depth. In the writer's experience fine sand is preferable to earth, as it keeps away mice and cut worms, which are injurious to the young wood. In the spring, when danger from severe frost is over, air is let into the mound by holes made with a small pole or the handle of a rake, and during the following 10 days the earth is removed by installments. Care must be taken that the bark is not injured in the process. When the bush is fully exposed it is generally found that bearing wood is covered with small fruit, about the size of a large pea, while the buds show, but are not open. Varieties that have proved most successful at Niagara are White Ischia, Purple Ischia, Brown Turkey and White Genoa."

Helenium Bolanderi.

From the enormous quantity of yellow-flowered composites that have reached us from northwestern America it is possible to select a few that bear the hall-mark of refinement in habit and flower, says the Gardeners' Magazine, and recommend them for more extensive planting than is desirable for the many.

Noteworthy among the heleniums is a very fine species named H. Bolanderi, which is not new or very rare, but which every good judge of attractive border flowers invariably wants once it is seen in good condition. It is, however, wholly neglected by many, who, we feel sure, would appreciate its many desirable features. It makes a sheaf-like bush, a yard high and through, and for many weeks after midsummer it is the richest color note in yellows the border can afford at that season. The flowers range from 1½ to 2½ inches in diameter, and are apparently, but not actually, twice the size of the older Helenium autumnale, of which everyone who had one plant two years ago has now more than enough. The ray florets are pure yellow throughout, and their crimped and undulating margins, often delicately frilled in addition, give an impression of double and treble rows of petals. The cone is a flat-topped sphere of rich mahogany-brown, bespangled with myriads of anthers, the rich velvety sheen recalling some of the darker forms of annual scabious, but is even more beautiful in the perfect foil of the yellow ruff-like petal arrangement. Such a fine plant of easy culture should be grown in quantity for its yield of cut flowers, and particularly in goodly breaks in the flower border, where its color note is distinctly pleasing. It likes a good loam, failing this, hollow-stemmed flowers of short life, cut or uncut, are an inevitable result.

PERTH FLORIST, Mason City, Iowa.

Peoria, Ill.

Local florists are taking advantage of the slight lull in business to carry on a great deal of improving and repairing.

D. W. Augspurger & Sons have purchased an acre of ground adjoining their property. They will begin at once to erect four new houses, one of these to be used exclusively for propagating purposes. They are also improving their houses—tearing out old benches and replacing with new ones. Superintendent M. D. Augspurger stated that they would probably add palms as a specialty. As they have achieved a huge success by specializing ferns of all kinds we may look for something doing by these people in palms in the near future.

James Cole, of Cole Bros., reports business good on the whole but not much indoor business, picnics, excursions, etc., taking up most of the flower lovers' time.

Two new houses are being constructed by Chas. Loveridge. Foreman J. Salmons reported good business.

H. O. R.

GODFREY ASCHMANN

Of Philadelphia, the well known Araucaria Specialist, is not dead, but still alive and more active than ever.

1907 Was the 12th Anniversary since he began the importing and shipping of **Araucarias** He never had such a record-breaking year. **7,000** were imported sold or shipped This, in spite of panic times, has given him new strength in his **Importing Araucaria Business.** His business is now so well established that every person in the trade, from ocean to ocean, has heard of his **Araucarias. This year, 1908, is our 13th anniversary.** What do you think? Will we be behind last year? Oh, no! Don't look like it.

WATCH US GROW.

8,000 were imported this spring and can be seen and inspected growing in our greenhouses, in all sizes and prices, potted up into 5, 5½ and 6 inch pots. They have now sufficiently recovered from their voyage to be shipped safely into every state and territory of the United States, Canada or elsewhere. Now is the time to order. Fill your empty houses now and put something in them that will grow into money for you.

Look! Plants worth 75c now are worth by Sept. or Oct., $1.50 to $1.75 up to $2.00 each.

Araucaria Excelsa, 5-in. pots, 2 years old 3 tiers, 8 10 in. high, 40c; 5¼-in. pots, 2 years old, 3 to 4 tiers, 10-12-13 in. high, 50c; 5½ to 6-in. pots, 3 to 4 years old, 4, 5 and 6 tiers, 14-15-16-20 in. high, 60c, 75c to $1.00 each.

Araucaria Robusta Compacta, 6-in. pots, 3 years old, 3 tiers, very beautiful plants, $1.25 to $1.50 each.

Araucaria Excelsa Glauca, 6-in. pots, 3 years old, 3 tiers, very handsome plants. $1.00, $1.25 to $1.50 each.

Araucaria Excelsa Glauca, specimen plants (something extra), spring of 1907 importation, suitable for lawns and porches, 5 to 6 years old, 7-in. pots, 5 tiers 25 to 30, 35 to 40 in. high same in width, $1.50, $1.75, $2.00, $2.50, $3.00 to $4.00 each.

Kentia Forsteriana, 6 to 7 in. pots, 36 in. high, $2.00 each; 40 to 50 in. high, $2.50 to $3.00 each; 6-in. pots, 30 in. high, $1.50; 6-in. pots, 25 in. high, $1.00; 6-in. pots, 20 to 25 in. high, 75c; 5 to 5½ in. pots 50c.

Kentia Belmoreana, 5¼ to 5½ in. pots, 22 to 25 in. high, 50c, 60c to 75c; 4-in. pots, 20 to 22 in., 35c.

Henry H. Barrows & Son, WHITMAN, MASS.

'Nother Luther Burkank.

Pontiac, Mich., March 25.—Henry M. Linabury, retired druggist, has evolved a fruit tree tonic. Applying principles of chemistry he concocted a solution in which he soaked iron nails about an inch and a quarter in length. When the nails had taken up sufficient of the liquid he drove them into his fruit trees. He declares that last season his trees bore plentifully, while those of his neighbors were fruitless. He has soaked a quantity of nails in the tonic and is now offering them to fruit growers for experimental purposes. He maintains that fruit trees need nourishing as much as the soil, and that the quickest way to get results in the trees is to apply the tonic direct to the trees.

OUTDOOR FLOWERS POOR.

July business to date has been good, funeral work being especially plentiful. The extremely hot and dry weather is very unfavorable to outdoor flowers and carnations and tea roses, although of poor quality, are still in fair demand. Kaiserin, Killarney and American Beauty are good and find a ready sale at good prices.

Mrs. A. Pahud died July 8 at her home on N. Senate avenue, after an illness of three months. Mrs. Pahud was 53 years old and until recently took active part in her husband's business. Mr. Pahud has the heartfelt sympathy of his friends.

The June meeting of the State Florists' Association was well attended. The finance committee for the carnation meeting reported great progress. S. Hitz and Fred Heinz were elected members.

M. Brandlein is planning a number of improvements for this summer, which will place his establishment among the best equipped in this vicinity.

John Bertermann and family will leave for Clark's Lake, Mich., next week. Ed. Bertermann and family will spend their vacation at Elkhardt Lake. J.

FRESH WATER

WITHOUT STORAGE—DIRECT FROM

the source of supply, throughout the nursery, by using the Perry Pneumatic water system. A new and simple solution of the water problem. Write for particulars.

UNITED PUMP & POWER CO.

Old Colony Building, CHICAGO.

S. Jacobs & Sons

Manufacturers of

LOUISIANA GULF CYPRESS

GREENHOUSE MATERIAL

HOTBED SASH AND FRAMES.

Jobbers In.. **BOILERS, PIPE, FITTINGS**

—AND—

GLASS on which we can quote attractive prices.

We furnish everything for building greenhouses, etc.

1365-79 Flushing Ave.. Brooklyn, N. Y.

THE BEST WAY TO COLLECT AN ACCOUNT

is to place it with the

NATIONAL FLORISTS' BOARD OF TRADE

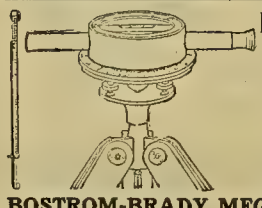
56 Pine St., New York.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

AMERICAN FLORIST ADS ALWAYS DO BUSINESS

Week days and every day. Sundays and holidays,

ALL OVER THE COUNTRY AT HOME AND ABROAD.



Bostrom's Improved Builders' Levels and Farm Levels

For Parks, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level $25.00. Farm Level $12.50.

BOSTROM-BRADY MFG. CO., 130 Madison Ave., ATLANTA, GA.

Use our patent Iron Bench Fittings and Roof Supports.

THE JENNINGS IMPROVED IRON GUTTER.

IMPROVED VAPORIZING PANS

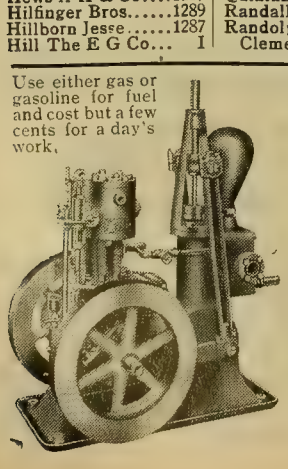
For Tobacco Extracts, etc. Send for Circulars.

DILLER, CASKEY & KEEN,

S. W. Corner Sixth and Berk Streets, PHILADELPHIA.

VENTILATING APPARATUS.

Use either gas or gasoline for fuel and cost but a few cents for a day's work.



Our "Double Acting" Deep Well PUMPING ENGINES

GIVE A STEADY STREAM DIRECT FROM THE WELL.

These machines are superior in design and workmanship, and are the best thing on the market for water supply systems where wells are more than 25 feet deep. We have the other kind too.

Send for our catalogue, which illustrates both.

The Standard Pump & Engine Co.

15 Michigan Street. CLEVELAND, OHIO

Ready Reference Section.

Lenox, Mass.

It must be acknowledged that this city has natural advantages for horticultural work that are not possessed by every town, noteworthy being its many noble native trees, which add grandeur and dignity to the work of the landscape architect and gardener. It is impossible in this article to more than sketch the splendid horticultural features of the locality and the most vivid description would fall far short of an adequate portrayal of what these men have wrought. It by no means follows that the work on the estates not here mentioned is of inferior grade, but it being impossible to see them all at their best in one brief visit, I shall give a few notes of what I recently have seen that impressed me very forcibly.

At the W. D. Sloane estate, where F. Heeremans is head gardener, there is always a fine show of the best in flowering plants. Mr. Heeremans is a noted grower of orchids and those who in recent years have attended the exhibitions of the Lenox Horticultural Society know something of his achievements along that line. His good work is not, however, confined to orchids, as he seems to be a specialist in all he undertakes.

A. J. Loveless, who is in charge of the horticultural features on Mrs. John Sloane's place, is another grower who has achieved a national reputation and whose best efforts are not confined to any one branch of growing. A noteworthy feature of his work at present is a fine crop of fruit that is ripening under glass.

On the Geo. H. Morgan place, Thomas Page, gardener, there is abundant evidence of excellent taste and a thorough knowledge of the principles of the noble art.

The estate of the late M. K. Jessup, J. J. Donoho, gardener, is unique in its beauty. With a natural situation that must have been selected by one who loved nature in both its grandeur and solitude, landscape features have been added that make it a place that has a charm peculiar to itself. The wide expanse of sloping lawn with its splendid background of trees is an impressive sight for those who can appreciate the work of the gardener who makes the most of what nature provides.

On the E. R. Wharton place Thomas Reynolds is head gardener, and the many attractive features speak eloquently of his skilful work.

The George Westinghouse place shows much evidence of the landscape gardening ability of E. J. Norman. With a very fine natural situation, many features have been added that place it among the notable estates, not only of this locality but of the whole country.

The summer residents are now arriving and for the remainder of the summer, not only the gardeners but practically the whole working population will be engaged in ministering to their wants. Before closing I must warn the chrysanthemum experts that if they are going to get the prizes away from Thomas Proctor, of the Patterson place, this fall, they must get busy.

TRADE QUIET.

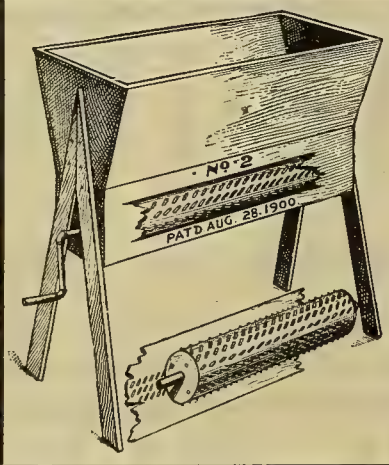
The summer conditions are about all there is to talk about at this time. To say that stock is poor does not describe the situation. And there is a more pronounced scarcity in all lines than ever before. All the tea roses are small with prices in proportion. About the only available flowers one could refer to as being choice are orchids, thanks to nature for giving them the power to ignore the different weather conditions. Carnations are completely off and only shipped-in stock is available, of which very little can be said of the quality. It is a regrettable fact that more of the craft do not realize the value of the summer garden flowers. If no more could be realized from them than a showing it would be profitable to have a good variety. And the wise craftsmen who do specialize them at this time of the year all report remarkably good sales. It is a rare occurrence that the shop windows have a display at this time that could be termed unusual, but one of the local windows held a display last week that even caused comment and admiration. Garden flowers here asserted their importance. The makeup consisted of quite a number of simple vase arrangements of tritomas and the long slender sprays of Eulalia Japonica, with green matting for a background. At last we are experiencing a period of genuine summer weather which comes just about the time we have made up our minds that we have cool resort weather at home and will enjoy the homemade article.

NOTES.

It was decided that a summer at Battle Creek, Mich., would be of benefit to Geo. M. Kellogg but after a brief stay there his condition became worse and Mrs. Lamb accompanied him to his home again where he seems to be making some improvement.

Wm. L. Rock and wife have started on a business and pleasure trip combined, which will take them through the east and also to the lake regions and Canada.

M. E. Chandler has begun cutting on a large field of gladioli among which are many new varieties that Mr. Chandler thinks quite well of.



Florists' Soil Pulverizer

JUST THE THING

To Pulverize Soil, Crush Sod, and Mix Fertilizer. Simple, Durable, Easily Operated.

83-91 Plymouth Place, CHICAGO

MONTPELIER, VT.—The secretary of the State Horticultural Society has written Mayor F. R. Dawley that the society desires to hold its annual meeting here in November and asking if the city will bear half the expense of the hall for a three days' convention. The society is anxious to hold its annual meeting while the legislature is in session, and there is no doubt that the city council will provide a place of meeting.

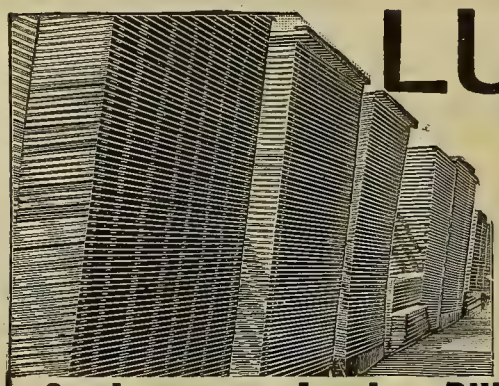
FROM THE BRITISH TRADE PAPERS.

CATALPA SYRINGAEFOLIA PULVERULENTA.—A quantity of well-grown, single-stemmed young plants of a very pretty mottled variety of Catalpa syringæfolia, all in 5-inch pots, were staged in Paul & Son's group (from Cheshunt, Herts.) at the Temple show. In reference to this subject, Paul & Son have written as follows respecting this new form: "This is a fixed sport from C. syringæfolia, which originated here. It appears perfectly constant and does not seem to burn. The older leaves are silver spotted; the younger, towards the top, more gold. It should make a fine ornamental tree or a pot plant in the young stage. It is not yet in commerce."

THE SHOWY-FLOWERING CRAB (Pyrus spectabilis).—Our gardens have been enriched of recent years with a variety of beautiful flowering crabs—some wild species, others crosses with the old Siberian crab. Some of these trees are very pretty gains. But, looking over all, and with some experience of them, we doubt if there is a finer thing among them (if as fine) than the tree here named, and the name is quite justified by its handsome effect in flower. It is as hardy and free as the wild crab, and grows in any soil, even in London. It has been very beautiful at Kew lately.



LUMBER
BARGAIN PRICES.
A wonderful opportunity is offered you to buy lumber and building supplies of every kind at *Prices that will save you big money.* Such a chance seldom occurs. Lumber for your house, church, barn, meeting house, crib, store, factory, and in fact, buildings of every kind. We can furnish absolutely everything needed in construction material. Have your carpenter or builder make a complete list of everything you require, including Lumber, Sash Doors, Nails, Roofing, Siding, Ceiling, in fact, anything you may need in building material or merchandise of any kind.

Send us your Lumber Bill for Our Estimate.
We bought at Manufacturers' Sale over 50,000,000 Feet of all kinds of Lumber and Finishing Material. We are making special concessions, to those who buy at once. Even if you have no use for this lumber at once, it will pay you to buy now. Our prices will save you 30 to 50 per cent.
We cheerfully invite inspection of our Lumber stock and will be glad to have you come to our warehouse and yards at Chicago, see the lumber we are offering, and you will recognize that it is all what we say of it; make your own selection and see it loaded. It is not necessary to come to Chicago; we can easily sell you by mail. We can quickly convince you of the wisdom of placing an order with us. Just send us your lumber bill, and we will easily *"Show You."* On application we will send copies of letters from customers who have bought. They saved money why can't you? Write us to-day. *WE PURCHASED EVERY EXPOSITION, INCLUDING THE $90,000,000 ST. LOUIS WORLDS' FAIR* ASK FOR OUR FREE 500 PAGE CATALOG, No. C. H. 47. IT QUOTES LOW PRICES ON BUILDING MATERIAL, MACHINERY AND FURNITURE.

Des Moines, Ia.

J. S. Wilson, formerly of Vaughan's greenhouses, Western Springs, Ill., arrived here July 4 to assume charge of the greenhouses which he recently purchased. He is now building a new house, 35x235 feet, which is to be planted to carnations.

Wm. Trillow is busy planting his roses and chrysanthemums, besides doing lots of repair work. He reports business as good for the time of year.

Chas. McAniff, formerly manager of Vaughan's greenhouses here, is now foreman at Lozier's greenhouses. T. L.

CORNING, N. Y.—The Corning Floral Co. is the name of a new firm just organized for carrying on a general floral business. Dr. F. H. Starr and Eugene M. Dusinberre, of Geneva, are the two interested partners in the business. They have purchased of W. J. Cheney the greenhouse building on West Pulteney street and removed it to the Reynold's lot near the old location. A new addition will be constructed along modern lines. Mr. Dusinberre has had several years' experience as a nurseryman at Geneva.

Washington.

A meeting of the Florists' Club was held at the greenhouses of F. H. Kramer, in Anacostia, July 7, at which it was decided to hold a picnic to Great Falls, a 4-day chrysanthemum show, beginning November 9 and a trip to Niagara Falls over the Black Diamond route August 17. Dinner was served and the evening was enlivened by musical renditions. The feature of the dinner was the serving of the wines from small flower pots. Banjo solos and music by a local quartet were enjoyed by those present.

Mr. Kramer presided at the dinner and delivered an address of welcome to those present, in which he spoke of the future of the club and of the prospects for the next show. The following committee was selected to arrange for the flower show: George Cooke, W. F. Gude, Geo. Shaffer, Chas. McCauley. Z. D. Blackistone and Chas. McCauley were selected to make the plans for the picnic to Great Falls.

Cincinnati.

FUNERAL WORK ONLY.

People will send flowers to funerals and as long as this custom prevails there will always be something doing no matter if the thermometer does register 90° in the shade. This remark was made by our old friend Bob Kelly last week and is as true as gospel. Outside of funeral work there is very little doing at present and probably it is just as well for stock is showing the effects of the hot weather. Carnations will be within a week or 10 days a thing of the past and the less said about them the better. Gus Meier has been sending some exceptionally good roses to the market which have met with a ready sale. The Ohio Cut Flower Co. is in with a nice cut of Lilium auratum and L. longiflorum which are sold in advance. P. O. Coblentz of New Madison is sending his famous gladioli to Charley Critchell. The quality of these flowers is simply superb and the writer doubts very much if they can be excelled anywhere. These are about all the flowers received at the present writing that are worth mentioning. Sweet peas are about over and the hot dry weather has retarded the growth of all other outdoor stock. Green goods of all kinds are over plentiful with not much demand.

NOTES.

At the monthly meeting of the Florists' Society Saturday night it was unanimously decided to invite the Society of American Florists to hold the next convention in our city. E. G. Gillette was appointed to deliver the speech inviting the members and was also indorsed by the Florists' Society for the next vice-president of the S. A. F. The outing committee reported progress and Ben George, as chairman of this committee, addressed the members stating that people are asking for tickets who never did so before, and impressed all present to buy their tickets from the committee as the society does not get any benefit from the tickets sold by the Coney Island Co. J. W. Rodgers presented the name of J. Chas. McCullough for membership. The rules were suspended and Mr. McCullough was unanimously elected. Keep up the good work. There being no further business the meeting adjourned.

B. Eschner, representing M. Rice & Co., Philadelphia, Pa., was present and he gave us a nice line of talk stating among other things that in his travels he came in contact with a great number of florists who would be delighted to come to this city for the twenty-fifth annual convention and he was quite sure that we would not have any trouble in securing the next meeting. Florists hereabouts, or to be more specific those wishing to attend the convention at Niagara Falls, are very fortunate, being able to obtain a round trip ticket for $7. There will be an excursion leave here about August 15, and those wishing to go can take advantage of the cheap rate, if so inclined.

J. F. Pogur has purchased the store of the Huntsman Floral Co. at 609 Walnut street. Mr. Pogur has been manager of this store for some time, is a good hustler and no doubt will be successful as this is one of the best locations to be had in this city. S.

VAILGATE, N. Y.—Joseph Dunn was the victim of a robbery July 7. The robbers opened a trunk and stole $22 in cash. Two men who had recently been employed by him, are suspected. Besides the cash stolen, which was in silver, the thieves secured two coats and two pairs of trousers.

They Have Extremely Light Framing

and the lighter the framing, the lighter the house, and that means less care and more blooms.

Crocus Gathering.

Come, gather the crocus-cups with me,
And dream of the summer coming;
Saffron and purple and snowy white,
All awake to the first bee's humming.

The white is there for the maiden-heart,
And the purple is there for sorrow;
The saffron is there for the true, true love
And they'll all be dead to-morrow.

—SEBASTIAN EVANS.

SUGGESTIONS FOR CUT FLOWER GROWERS.

Forget-Me-Nots.

It is not too late to make a sowing of forget-me-nots if this has been neglected so far, but no more time must be lost. Get seed of a good strain and sow in a cool frame or outside, covering the seed lightly. Prick the young seedlings out, as soon as they are large enough to handle, in a cool frame two inches apart. Give them the full air right along to keep the plants dwarf and stocky. All this class of stock transplants best if pricked into a frame or protector with a hard, concreted bottom, as they lift with good balls. Plants of this description may be kept in the frames until the early chrysanthemums are over, when they may be benched and treated to a similar temperature to violets and pansies.

Lilies.

The cultural treatment for one batch of lilies is to a great extent the same as for another, but just now and for the next few months is a busy time if flowers are wanted from Christmas on. It is unnecessary to use deep flats or pots when growing for cut flowers. Flats three inches deep will do, and the bulbs may be planted from five to six inches from center to center. Sandy, fibrous loam with a little well-decayed manure will do for compost, and the bulbs should be planted with the points just out of the soil. Give one good soaking of water to settle the soil around the bulbs and place the flats in a cool house, under the benches or anywhere away from the light. If placed outside, a little ashes or some other covering should be used. The bulbs may remain for about six weeks, when probably some signs of growth will appear, and they must be taken to the greenhouses and stood on a light bench to grow on.

Cattleyas

Many of the summer flowering cattleyas will make a second growth now, and whether they flower on this or not, it is important that the growth is made in a good light, only sufficiently shaded to prevent injury to the leaves. Where the plants are attached to shelves or stages they cannot, of course, be moved, but if grown in pots, give C. Mossiæ the benefit of the best position in the house, in company with C. aurea, C. gigas and any others that may be growing. The growth on C. Trianæ will by now be finished, and the plants must be kept as quiet as possible. They must not be over-dried at the root, as this often defeats the end in view and causes them to push into growth as soon as water is again supplied. The embryo flowers are forming in the sheaths and just enough moisture to prevent any check to these is all that is needed. When spraying see that no water lays around the base of the sheath, especially on any plants of which the growth is not quite finished.

Notes on Planting.

The operation of planting is so simple that, on the surface, there would appear to be little that need be said about it, but there are right and wrong methods of planting as there are of most other cultural details. Say a bench of chrysanthemums or roses is to be planted. It is wrong to lay out a lot of plants to dry up on a hot day before the planters get to them. The help should be so arranged that the planters about keep up with the men who are carrying the plants, and, as soon as planted, the bench should be watered or sprayed to keep the plants from wilting. The condition of the stock as to root moisture when planting out is easily known, though not so easily described. A very dry state of the compost tends to wilting and is dangerous, while if the soil is very wet in the pots the balls slide about and it is difficult to firm them properly. We have frequently called attention to the necessity for firm planting. Plants that are very loosely set may make a quick growth at the start, but it is not the class of growth wanted for continued health and free flowering. Plants in a firm soil make a comparatively slow but solid, vigorous growth, and this is the kind wanted. As to the distance for planting various crops, there is certainly a disposition among experienced growers to plant farther apart, especially in the case of roses and other plants that are a long time on the benches. In this connection we may say that growers who have found their plants too close owing to good culture will be wise to give them more room. But we have been in houses

where, even when planted at the ordinary distance, the plants barely covered the benches. It amounts to this, that the better the culture, the wider the plants may be kept apart, and a rose like American Beauty, where it is necessary to get good stems, must have plenty of room. Carnations of some varieties make much more grass than others, and therefore need more room, and are, incidentally, less profitable. It is entirely a matter of circumstances, but in all cases avoid overcrowding.

Pansies.

New pansy seed is now offered, and where there is a demand for cut pansies in winter seed may be sown as soon as procurable. Clear a sufficient space on a bench in a cool house or sow in flats, according to how many are needed. The soil in bench or flats should be well soaked with water and allowed to drip a little. Then sow the seed thinly and cover with only a very thin sprinkling of light, sandy soil. Cover with a mat or board until the seed germinates, but be careful to remove this at once when the plants appear. Treated this way, pansy seed germinates very rapidly, and the resulting plants may be pricked out in frames, where they will be ready for transplanting to the benches as needed. This sowing will give plants for winter flowering, and others for succession may be raised by sowing at intervals during the next two months. The best position for pansies to flower in winter and early spring is on a bench in a light, sunny house as close to the roof as possible, and where ample ventilation can be secured to keep the temperature low.

Violets.

The field plants are making a very vigorous growth this season, and the aim of the grower now should be to secure fine individual crowns rather than a big, sprawling plant. The runners should not be allowed to root all around the plant, but kept cut off frequently with a sharp knife, not pulled out by hand. The single varieties are more difficult to keep in track than the doubles, but all need attention. Marie Louise and kindred varieties are absolutely useless if the runners are allowed to take charge and starve the center crowns. The singles are more free-flowering in the younger growth. The former have only about another month's growth to make in the field, as they should be in the benches at least by the first week in September, so attend to them well for cultivation now. Plants that have been grown on inside, as advised recently, should be kept as cool as possible, and the soil frequently stirred. Avoid over-watering and do not feed the plants yet, unless the soil is very poor. The buds will soon be forming and every endeavor must be made to have the benches absolutely free of insects of all kinds before the flowers open. Spray carefully underneath the foliage, using cold water freely and often, rather than relying on insecticides. Avoid a very moist atmosphere at night even now, though, of course, this is not so harmful as later in the season.

WASHINGTON, D. C.—Mrs. Anna Cammack-Hardesty, daughter of the late John Cammack, one of the few florists who have died worth a million, refuses to contest her father's will, on the grounds of not wanting the notoriety, though it would, if her plea was successful, net her $1,000,000.

THE CARNATION.

KEEP the weeds down, not only on but under the benches.

WHITE PERFECTION is more than holding its own as a summer carnation.

GROWERS have been looking for just such a carnation as Lawson-Enchantress. The name is descriptive, though rather clumsy, as it is an Enchantress flower and habit with the color of Lawson.

Plants in the Field.

The field plants require particular attention just now. First the work of topping or pinching back the shoots must be regularly attended to so as to insure for planting time a symmetrical, well balanced plant. All varieties will not stand the same treatment as regards topping and do their best. Some can be topped closer, later and more often than others. The difference in the growth and habit of the variety under consideration should be studied. Take as examples the scarlet variety, Cardinal, and the white Lady Bountiful. All varieties possessing a character of growth similar to these should be very little pinched. All that is necessary is to keep any shoots that are starting to lengthen out to flower topped back and then not too close back to the body of the plant. Varieties of the Lawson type will stand being pinched closer but even with this style it ought not to be practiced too heavily. The Lawson varieties are among the easiest to keep in trim owing to their tendency to make a short growth which generally carries a bud. By removing these buds the plants can usually be kept in right condition. Next we have the quick growing varieties of the Enchantress style of growth which, if not kept regularly attended to, will very quickly get out of shape. Enchantress and its sports will stand much closer and later topping and be the better for it than any other varieties we know.

Regarding the question of how late such and such a variety may be topped we find that when the plant has attained a fair size and will be planted inside by September 1, it is best if very little topping is done after the first week in August on any varieties with the short stocky habit of growth. When these are subjected to close pinching after this it throws the crop of blooms very late. Enchantress can be topped much later if needed to keep them back but with us we always find flowers from this variety welcome as early as they will come in good shape and, as this variety has them all beaten as to quality on early blooms, we usually stop topping about August 15. Other necessary work connected with field culture is to keep the land regularly cultivated and free of weeds. A crop of weeds allowed to get beyond control will be double trouble to remove, not taking into account the dam-

DESIGN BY J. H. SMALL & SONS, NEW YORK, FOR GROVER CLEVELAND'S FUNERAL.

From the Brazilian Minister: Orchids and Cycas Leaves.

age to the plants. These hot, dry days we are tempted to start watering on the field grown carnations but wherever it is possible to keep the ground in any kind of shape by cultivating our past experience tells us that it is best for the plants if no water is applied other than the rains. Larger plants will result through outside waterings but we have always found that they lack that hardy constitution noticeable in those that have been kept in condition by frequent cultivation and not any artificial watering.

C. W. JOHNSON.

Carnations Going Sleepy.

ED. AMERICAN FLORIST:—

We are having some trouble with our carnations going to sleep and not keeping well. This is unusual at this time of the year with us and we can hardly account for it. During the winter season we lost a few and we thought they would be all right again when the bright weather came, but they are still going to sleep. The plants are looking healthy and have done well all the season. We have picked more flowers than ever before and they have stood up on good stiff stems and have apparently been better than usual, except that some of them will go to sleep. We have been very careful with the watering and the ventilators have been open all the time it was possible to have them open. Do you think the trouble would be in the soil? We have been using half of the old soil, just taking the top half out and filling up with new, mixed with a small amount of manure and a very thin sprinkling of bonemeal. This has been repeated on some benches for four or five years but the stock has apparently done as well on these benches as where all new soil was used and last year all but three or four benches were done in this way. L.

"L" does not state whether any extra manure or sprinklings of bonemeal have been applied since planting time. Any fertilizer put into the soil at planting will have become exhausted before this and would not be the cause of sleepy flowers. If the weather in "L's" locality is anything like it is here it will be well nigh impossible to prevent carnation flowers from becoming sleepy owing to the heat. Poor keeping qualities of carnation flowers can be traced to an excess of nitrogen as one of the primary causes. In the fall of the year, when the plants are growing rapidly, drawing nourishment from the soil at a rapid pace during the clear ideal growing days, it is very difficult to ship carnation blooms any distance without them going to sleep. But after being in the soil for a whole season we should judge the cause of sleepy flowers to be from exhaustion through heat.

C. W. JOHNSON.

Fleas in Smilax House.

ED. AMERICAN FLORIST:—

We are troubled with fleas in our smilax house which appear to feed on the young plants, destroying them. The fleas appear with the hot weather, and this is the second year we have been troubled with them.

Iowa. J. B.

The presence of fleas in the smilax house may be due to allowing animals access at some time or possibly by the introduction of manure in which dead animals have been thrown, or parts of them. The best method of destroying these insects is by fumigating with hydrocyanic acid gas, as fully described in our issue of May 23, 1908, page 877.

THE RETAIL TRADE

Designs by J. H. Small & Sons, New York.

The accompanying illustrations are of designs executed at the New York store of J. H. Small & Sons for the funeral of ex-President Grover Cleveland. They were the tributes of high officials and the people of Brazil. Though the photographs were of the most perfect specimens of the art, they fall short of conveying an adequate conception of the beauty of these designs.

DESIGN BY J. H. SMALL & SONS, NEW YORK, FOR GROVER CLEVELAND'S FUNERAL

Tribute of Respect from the Brazilian Nation: Orchids, Lily of the Valley and White Lilies.

The wreath of cycas and cattleyas over a foundation of leucothoe is a simple but very effective piece of work. It bore on the ribbon the words: "Homage of Baron de Rio Broxico, Brazilian minister for foreign affairs." That of lily of the valley, roses and Lilium longiflorum was from the Brazilian people and the ribbon inscription read: "Tribute of respect from the Brazilian nation."

Wreath of Mrs. Marshall Field Roses.

The illustration on page 1304 shows a beautiful wreath of Mrs. Marshall Field roses over bronze galax, with maidenhair fern used as green. It is the work of that clever decorator, C. A. Schnell, who had charge of this work for John Mangel, Chicago. Incidentally, it also shows what a fine rose this is for make-up work when handled properly by an experienced decorator.

Pond Lilies.

What more refreshing in floral decoration for the table than the pink pond lilies which a noted florist has brought to such perfection that the lily of the woods, so purely white, might well be jealous of these blushing beauties. From palest rose to the deepest carmine are these exquisite blooms, resting among fronds of maidenhair fern. No flowers of the season may compete with the pond lily, for it embodies repose, fragrance, purity, coolness, as well as color.—Boston Herald.

Bouvardia Culture.

ED. AMERICAN FLORIST:—

Please inform me how to grow bouvardias. A. V. B.

We can hardly give the culture of a plant of this kind in answer to a query, especially as it has had a good deal of space devoted to it in our "Suggestions for Cut Flower Growers" that appear biweekly. We refer you to these in back issues but may say briefly that bouvardias are grown from cuttings rooted early in the year and the plants grown on until May or June, according to the locality, when they are planted outside to make a good summer growth, lifted in fall and placed on benches in a cool house. Cool treatment all through and constant picking off of the flowers as they appear is the summer culture. If you have no stock you should purchase some at once but as it is so late in the season you would be well advised to plant on benches in a cool house rather than outside.

G.

THE ROSE.

LOOK out for manetti suckers on the young grafted rose stock and remove them at once.

CUT out any mildew-infested plants at once, as such benches as these are on are seldom profitable now.

GRAFTED stock of Bride and Bridesmaid is more affected by mildew than own-root plants, according to a very well known grower.

MY MARYLAND is evidently a very fine grower. Notwithstanding the hot weather, it has been making splendid new canes wherever noted this season.

CAREFUL cultivators do not wait for signs of injury in the foliage of their plants before altering unsuitable treatment. They watch them too closely for that to occur.

Mrs. Marshall Field.

This fine rose is well maintaining its character as an excellent summer variety. The color is a beautiful rosy pink on the inside of the petals, and it improves as it opens, like the well-known Killarney. At Peter Reinberg's plant it is flowering freely and well, yet notwithstanding the number sent into the wholesale store in Chicago and the dull state of trade generally the flowers are all cleared out by 9 a. m. It is deliciously fragrant and, even in the shortest grades, is splendid for make-up work. It is grown both on its own roots and grafted, but the grafted stock is preferred. It has evidently come to stay as a good summer rose.

Notes in Season.

By the middle of July the young rose stock should be making considerable growth and should receive careful attention daily, as to watering. The soil should be kept in a moist condition using just what water the soil will absorb from day to day, that is, the soil should be in a condition to take water every bright day. Never allow the soil to become soggy or to get extremely dry. We have seen a very promising lot of plants devoured at the roots by eel worms or, in other words, an incurable case of club root brought on by allowing the soil to become too dry. Own root stock is very susceptible to club root and will require more care in watering than the stock grafted on manetti.

Cultivating must be attended to every week and now that the plants are sending up many buds, a great deal of time will be consumed in disbudding. We usually remove the buds when about the size of the tip of the little finger or when the foliage is nearly ripened below the bud, cutting back to a firm eye. To do this very often three or four joints must be removed, but to insure a clean, vigorous growth, this method of disbudding must be strictly adhered to. In order to properly look after the disbudding it is a good plan to go over the plants twice a week. Where grafted stock has been planted, very often a shoot will spring from the manetti and the plants should be gone over carefully, removing these shoots before disbudding. In these separate operations none will be missed and as these suckers retard the growth of the young plants very much they should be removed as soon as they make their appearance, removing them cleanly as close to the bark as possible. Snapping them off even with the soil will only check the growth for a short time. Should a novice be given the job of removing the manetti shoots in a house planted to Richmond he would probably remove some of the strong canes from flowering wood as they have the same appearance as the manetti at a certain stage of growth. Of course there is a great difference to the trained eye, so it would be advisable to have one man familiar with this work attend to it.

In disbudding American Beauty do not remove the buds until they begin to show some color then the bud can be removed taking two or three eyes away with the buds. Keep the plants clean removing decaying or spotted foliage as soon as it makes its appearance. Keep the walks clean and a frequent sprinkling of air slacked lime under the tables and on the walks is a great help in warding off black spot during a cloudy or rainy spell of weather. The watering can be reduced somewhat, the foliage kept dry and a dusting of grape dust over the foliage with the powder gun will be in order, to prevent mildew. This is also a good time to get the roof in good shape, as a little later more time will have to be devoted to the stock. Look over the heating apparatus and the piping. Perhaps there was a house that could not be kept up to the mark during severe weather last winter, or there may have been a bench that could have been benefited by a little bottom heat. Don't let these little things go by until the last minute. Did any of the growers have to replace grate bars when there was a risk in having the houses run cold before the necessary repairs were made? It pays to look after these things in the good old summer time. Don't forget to attend to the fumigating when a cool night rolls around. E.

WREATH OF MRS MARSHALL FIELD ROSES.
By John Mangel, Chicago.

Black Spot on Richmond.

ED. AMERICAN FLORIST:—

I have a house planted to American Beauty and Richmond roses, bought stock, and they have quite a lot of black spot. What is the cause and remedy? The temperature on the average days is 100°, nights, 70°. The floor is entirely cemented, with depressions to hold water. Is standing water at this season of the year bad for the roses at night and would it be best to drain off every afternoon?

G. T.

Possibly the plants had some spot in them when you received them and the amount of moisture given has doubtless increased this. Try running them a little dryer and remove all spotted leaves. Have no water standing about in the house at night and only spray sufficiently to keep the plants plump and prevent burning. Many growers are spraying much less than they were formerly in the habit of doing, considering that when overdone it robs the foliage of a natural protection against insects and fungus. Probably it is impossible to keep them cooler now but later on 70° by night is much too high for roses. G.

Mixing Rose Soil.

ED. AMERICAN FLORIST:—

What is the proper way to mix rose soil? W. H. N.

This subject was discussed in our issue of April 25, page 662, which see.

Lifting and Replanting Roses.

ED. AMERICAN FLORIST:—

In lifting and replanting old rose plants should they be watered before or after planting? S. B. J.

If the plants are really dry they should be watered the day before lifting, but if in the usual semi-moist condition it is better to plant them first and water thoroughly afterwards.

G.

Mildew in Roses.

ED. AMERICAN FLORIST:—

My roses do well with the exception that they are covered with mildew. I spray twice daily, early in the morning and at 4 p. m., as I do not care to spray in the hottest part of the day. I always spray once a week in dull weather. I do not think mildew comes from moisture, but the air. I am not certain about this and want to find out. At this time of year I throw the ventilators wide open. The varieties grown are Bride, Bridesmaid, Liberty, Golden Gate and Ivory. Please give me your opinion.

S. B. J.

You are right in thinking that mildew is in the air, as doubtless the spores are carried this way, but, unless these find a congenial home and suitable conditions for their propagation, they can do no harm, and a moist and cool atmosphere, caused by spraying in dull weather or by the leaves remaining wet over night, produces these conditions. As to spraying in the middle of the day this is necessary in hot weather, especially for young stock; otherwise the plants would wilt under the hot sun in some cases. But when mildew once gets a hold on the plants no amount of care will prevent it from spreading unless the house is fumigated with sulphur. It is usual to heat the pipes well on a cool night and paint these with a sulphur paste as has frequently been described in these columns. Experiments have been made with dilute sulphuric acid spray, but the results so far are not conclusive and the best method of destroying mildew practiced by growers is sulphuring the pipes. Another season take this in hand directly the first signs of mildew appear and never under any circumstance spray roses in dull or wet weather. It is useless and dangerous. G.

STURGEON BAY, WIS.—The State Horticultural Society will meet here August 26-27.

BENTON HARBOR, MICH.—The Pullen greenhouse has been shut down. The place was well conducted and the proprietors had an excellent trade but the business did not warrant further investment, which was necessary for an up-to-date greenhouse establishment.

MARION, IND.—Gunnar Tielman has been appointed head gardener at the Mountain Branch soldiers' home at Johnson City, Tenn., and leaves to take up his new duties August 1. He will endeavor to sell his business here, but if unsuccessful in this he will leave it in charge of W. E. Slack as manager. Mr. Slack has been in Mr. Tielman's employ eight years already.

THE VIOLET.

KEEP the soil cultivated around Marie Louise and other violets that are kept indoors.

KEEP the runners cut out regularly from the field plants to help form strong crowns. Use a sharp knife and be careful not to injure the plants.

THE value of soot as a fungicide, insecticide and fertilizing agent to violets is not nearly as much appreciated as it ought to be. It helps the color of the foliage and, unless used too fresh, can do no harm.

The Violet Industry of Rhinebeck.

SUMMER CULTURE.

Departing from the generally accepted theory that violets should be grown in the field in summer, the Rhinebeck growers plant directly from the sand to the beds. The old top soil is removed to the depth of 10 or 12 inches and the bottom loosened up with a spade or small hand plough. A sprinkling of lime is then thrown on. Some growers first fill in with fresh soil, carefully spreading on the manure later, and spading it in; others prepare and mix their compost outside. Most of the manure used in Rhinebeck violet growing comes from New York by rail, the cost, delivered at Rhinebeck, being not less than $2 per ton. In some instances, wood ashes in small quantities are used in the compost.

Long before planting time the houses have been shaded, the south sides usually receiving a light coat about the middle of February, but about planting time additional shading is put on, the north side also receiving a coat. From the planting time forward, the beds are frequently gone over, the soil loosened, the runners cut out, and a careful watch kept for insects and disease, as there is no immunity from either. Watering from this time on is, as a matter of course, a very important factor. The plants are set in the beds eight and nine inches apart.

There is no fixed rule for a width of bed. In some houses there are side beds 10 feet wide. Over such, to facilitate the care of the plant and picking, a strong board with small wheels attached, is run on a track, the workman moving himself along on the board as the work progresses. In many of the houses the walks are concrete; in others coal ashes are used. Through the summer the ventilators, as a rule, are wide open, though, some good growers believe that a strong draught of hot air, even though it comes from the top, is injurious to the plants. Growers who are near the river, where heavy fogs are more prevalent, are careful to close their ventilators when the fogs come up as they believe them very injurious.

On the question of side ventilation for the houses, William C. Akert, of Akert & Brown, successful growers, has this to say: "When we started violet growing we thought side ventilation would be a great benefit, and tried it. After a fair test we became convinced that the draughts engendered were decidedly injurious to the plants, so we cut off side ventilation entirely and have had better results. From my experience, I am satisfied, that violet houses should be ventilated only from the ridge." Mr. Akert, who is of a mechanical temperament, has invented a syringing nozzle that is much more effective than the common nozzle, in getting the water on the underside of the foliage to kill red spider. Mr. Ackert is also in accord with many good growers in other lines than violets, when he says that in manuring care should be taken not to overdo it.

As a rule, the growers are careful to remove the soil every year, but there are instances where good stock has been grown on the same soil the second year. Alvah Bishop, who has grown violets successfully for eight years, says, that while he does not advocate the practice, he has grown good stock on second year soil and would not be afraid of results in doing it again providing the soil had never previously been in a greenhouse. Mr. Bishop comes out strong on the point, that it is careful and painstaking attention to the little things, or details of the business that makes the successful violet grower.

A TYPICAL RHINEBECK VIOLET RANGE.

As no mention has hitherto been made in this article, of drainage for the beds, it may be stated that the matter of drainage gives to Rhinebeck growers but little concern, as natural conditions seem to be almost perfect in that respect. The top soil is friable and porous while the underlying strata are mostly sand and gravel. About the only work necessary along that line, is the already mentioned loosening up of the bottom before the compost is put in.

Smoking with tobacco stems is about obsolete with the Rhinebeck growers, hydrocyanic acid gas being generally resorted to as a means of fumigation. They add their testimony as to what has already been frequently said and written on this matter, that the work should be done in a cautious and careful manner.

Granted that the Rhinebeck growers have a favorable combination of soil and climate, there remains the fact, that much of their success is due to painstaking industry. Jules Von der Linden, who has the largest and best equipped range in Rhinebeck says, that it is "work, work and more work" that does it. This year Mr. Von der Linden sterilized all the manure used in his compost and thus far is very well satisfied with results, though he does not claim that sterilization is a panacea for all the ills that literally and figuratively, creep into violet houses.

He has one house that is 35x200 feet, his whole glass area being 50,000 square feet. One of his ranges is located at Stattsburg, a town adjacent to Rhinebeck, and his glass area is about equally divided between the two places. His houses are well fitted up, concrete being used in the boiler and packing rooms and in the walks. The only artificial drainage noticed in a round of the various ranges, was at this place, where is a small house of Swanley White violets; the plants are on raised benches with tiling in the bottom.

The office and relative facilities at the Von der Linden range, as well as the growing end of the business, are all thoroughly modern and up-to-date. A young man, Mr. Von der Linden, has imparted the enthusiasm of youth to the conduct of his business and has made a study of the various methods followed by successful gardeners and florists.

Planting Single Violets.

ED. AMERICAN FLORIST:

I want to grow some single violets in a 10-foot house, running east and west. Would they do best on raised benches about two feet from the eaves or lower down? When is the best time to plant? My plants are now in the field. A.

The violets may be planted at any time the houses are ready after the end of August. Sometimes it is advisable to wait for a good rain before lifting the plants from the field, but it is not well to wait after the middle of September, provided, of course, the plants can be handled. The nearer the plants are to the glass, in reason, the better. Two feet would be a good distance and the plants do well on raised or solid benches.

G.

MOUNT VERNON, ILL.—A. N. Chivieron, a truck gardener, shot John S. Thomas Pickett with a gun July 11, the victim dying shortly afterward. Pickett was acting as peacemaker between Chivieron and Henry Goddar, an employe, in a dispute over wages. Pickett came from Chicago. Chivieron is in jail.

WITH THE GROWERS

Peter Reinberg, Chicago.

We have frequently described the immense plant of Peter Reinberg, Chicago, and our readers are well aware of the vast quantity and excellent quality of the stock grown here, and in this note we do not propose giving figures or quantities, but to describe a few of the more interesting points noted on a recent visit. First of all was a very pleasant trip to the new plant a mile or two north of the Robey street houses with Leonard Kill for pilot in his fine automobile. Here Mr. Reinberg has secured 40 acres of choice level land, where, apparently, no grading whatever is needed, the houses being built just on the natural soil.

Anton C. Zvolanek, Boundbrook, N. J.

The carnations in the eight new houses built last year were so satisfactory that three others 27½x300 feet are being built this season, and all will be planted to the popular market varieties, of which some 90,000 field plants will be necessary. This is certainly an elegant range, and as the plants in the field look remarkably well this season, there is every prospect of a very fine show there. The benches for the new houses are built on the ground before the roofs are put on. They are built of pecky cypress, from the Adam Schillo Lumber Co., Chicago, but in place of the 2x3s usually used as supports, second-hand pipes are run along, and thus an excellent and lasting support is provided. Two boilers 18 feet long by 60 inches are used, and these will run the new houses as well as those built last year. A Morehead steam trap is used, and it is worthy of note that there are 22 of these excellent devices in use altogether on the plant, a pretty good testimonial to their worth. A large tank has been provided close to the boilers for liquid manure, but this is at present used for mixing up whitewash for the benches. The old plants are being thrown out and the benches being refilled ready for planting. It does not need much foresight to see here the nucleus of a new and greatly enlarged plant, especially as the property on Robey street is increasing in value so rapidly as to almost prohibit any more greenhouse building there.

MRS. MARSHALL FIELD ROSE.

In looking through the rose houses we were surprised at the enormous number of plants of Mrs. Marshall Field, and a question to Foreman Geo. Collins led to the information that no less than 27,000 of this fine rose have already been benched this season. It appears to be an excellent all-the-year-round variety and stands the hot weather well. In this respect it rivals the well-known Kaiserin, while in winter it is in the Killarney class. A great point in its favor is that it is never attacked by mildew, neither on the own-root or grafted plants. So far the stock of this rose has been kept in Mr. Reinberg's hands, but we believe it is to be disseminated next season, and it is safe to predict for it a great sale. The sale of pot roses here has been very brisk of late, over 50,000 having been sent out within the last few weeks. There is still a fine lot of 2½-inch stock, among which we noted very promising-looking Bride, Bridesmaid and Sunrise.

Among the newly planted roses are nine houses of American Beauty, the plants looking remarkably well and producing many fine, vigorous shoots. Uncle John is a great favorite here, and the plants are making a splendid growth, with the large, vigorous canes characteristic of this variety. Perle is also excellent, and this variety, Bride and Uncle John are already being cut in considerable numbers from the young stock.

My Maryland is evidently going to be a grand grower. The plants here are full of fine, healthy-looking shoots, clean and vigorous, with splendid foliage, and this has been its form wherever we have seen it so far this season. Queen Beatrice is also looking remarkably well and the flowering of these two fine new roses will be looked forward to with interest. Mme. Chatenay is largely planted and the plants are very fine. Whole houses of various roses are being cut back for holding over, and many benches are being mulched with cow manure. In all cases both the newly planted stock and the older transplanted plants are making a good growth and will soon be flowering. Chrysanthemums in all the popular varieties look well, but these are not so much a specialty here as roses and carnations. About 13,000 have been benched so far. Quite a large section is devoted to Asparagus plumosus, which has been a very profitable and good crop this season. Most of the benches have now been cut hard back and rested, and the top soil is being removed and the plants top-dressed with rich soil to give them a good start for fall and winter gathering.

Anton C. Zvolanek, Bound Brook, N. J.

Though yet a comparatively young man, Anton C. Zvolanek at his Greenbrook greenhouses, Boundbrook, N. J., has built up an enduring and world-wide reputation as an originator and grower of sweet peas. Being thoroughly in love with his chosen profession, Mr. Zvolanek has given it his undivided attention and his success is well attested by the orders that come to him for seed from the countries of Europe, the British Isles, Australia and New Zealand. He has also an extensive correspondence with leading growers of these countries, who have become interested in the fine varieties he has sent out and who, like Oliver Twist, want more.

Born in the town of Kusenbuck, Bo-

Sweet Pea Mrs. Alex. Wallace, Lavender.

hemia, in 1862, the son of a farmer, the interest of the boy in horticulture was first awakened by the instructions of his teacher relative to growing sweet peas in the school garden of his native town. Though now thoroughly American in his aims and sentiments, to his honor be it said, Mr. Zvolanek cherishes with fond recollections the place of his birth and the little school house. He came to this country, landing in New York, in 1888, and for several years he worked in horticultural establishments adjacent to the metropolis. In 1900 he leased a range and started in business for himself at Grand View, N. J., and there laid the foundation of his present successful business. About two years ago he bought a tract of land about 40 acres in extent at Boundbrook and erected five greenhouses, comprising 18,000 square feet of glass. There we now find him, not only as the skilled horticulturist, but as the dutiful husband and father and genial host. His family consists of a wife and three sons. Mrs. Zvolanek is the impersonification of good housekeeping, and the boys are being trained in the noble art of horticulture.

The new varieties which Mr. Zvolanek will disseminate this year are Mrs. W. W. Smalley, Miss Helen M. Gould and Mrs. Geo. Lewis. The variety Mrs. W. W. Smalley is a very distinct and attractive shade of pink, the plants being strong and prolific. Miss Helen M. Gould is a beautiful pink and white variegation, besides possessing the other necessary qualifications of a first-class commercial sweet pea. Mrs. Geo. Lewis is possibly destined to become the most noted of these three, a very free bloomer. It is pure white, of the orchid-flowering variety, and is remarkable for the size of bloom and length of stems. The average stem of this variety is 14 inches and there are instances where it has reached a length of from 24 to 26 inches. It is now in its fifth year, has been thoroughly tested and the blooms are much in demand by the leading retailers of New York, as are also the other fine varieties originated by Mr. Zvolanek. In addition to those already named he originated the varieties Mrs. Chas. H. Totty, Mrs. William Sim, Mrs. Alexander Wallace, Mrs. F. J. Delansky, Mrs. Eckford, King Edward, Lady Grisel Hamilton and others. From seed sown September 15, 1907, of Mrs. Geo. Lewis and other varieties fine blooms were being cut January 1 of this year. The following extract from a circular recently issued to the trade by Mr. Zvolanek tersely embodies his views on sweet pea and chrysanthemum culture.

HOW TO MAKE SWEET PEAS PAY.

"I always recommend to raise sweet peas and chrysanthemums to make the most profit. After the chrysanthemums are cut nothing will pay better than winter sweet peas. Clean the house of early chrysanthemums October 20. Sow the sweet peas four to five weeks before that date in 4-inch pots, and plant them right in, and they will give a fine crop from January to June. If roses or carnations are looking poorly and you know it will not pay to keep them in, throw them out and plant or sow sweet peas. It will pay to do so even in January or February. Sweet peas are every year becoming more popular, and the prices for the flowers are always advancing."

Sweet Pea Mrs. Wm. Sim, Salmon.

George Reinberg, Chicago.

The rebuilding of George Reinberg's plant is progressing rapidly, the last lot of 18 old houses having been partially wrecked and 12 fine new structures erected. This leaves six more to have attention, and these will be rebuilt next year. The new houses are each 25x265 feet, are built on concrete footings and are fine, light structures. Taken in hand early in the season, they have been erected and planted, and the young rose stock in them, Killarney and American Beauty, looks exceedingly well. The benches are of cypress, and this was used instead of concrete to save time, it being Mr. Reinberg's intention to take them down as they are worn out and replace them with concrete. Had he waited for concrete this season he would not have been able to get the benches planted early enough for the best results, but as it is the plants are well established and will produce a full crop. White paint has been used all through, inside and out, and this gives increased light in the houses, which cannot fail to benefit the plants.

The orchid department here is getting a very important part of the business. Another large importation was made this spring, and the plants are settling down to work and looking well. The demand for these choice flowers is constantly on the increase and just now C. Gaskelliana is being cut in quantity and finds a good demand. Twelve cases of cattleyas have recently been received and the houses devoted to their culture look very gay. All other departments are in excellent order, as far as could be seen in a very hurried call made recently.

Insecticide and Fertilizer for Sweet Peas.

ED. AMERICAN FLORIST:

Please tell me what to use on sweet peas to keep the green fly off after they begin to flower. I am using nitrate of soda and bone meal as a fertilizer at present, having an immense field of sweet peas. I would be glad to learn all I can of their care and how to force for blooms and long stems. M.

To kill aphis on sweet peas outdoors is a simple process. Use a good spray pump, either knapsack or compressed air, and spray with nicoticide. It is very important to use the proper insecticide, so as not to taint the buds and flowers. Aphides are more resistant outside than inside, hence use more nicoticide in proportion, and apply in the evening, instead of morning, so it will dry more slowly, giving it greater killing power.

As fertilizers, bone and sheep manure are best, with some addition of potash, either as sulphate of potash or wood ashes; and these should be thoroughly worked into the soil before planting. The formula should be somewhat like this: Potash, 10 per cent; phosphates and nitrogen, 5 per cent. I do not recommend top dressing outdoors as a rule. Better apply in the spring when preparing the land. Nitrate of soda is very risky on sweet peas unless used sparingly. Outdoor culture is different from indoor, where the constant syringing and watering carries the fertilizing elements to the roots. Outdoors it may not rain for a month, and top dressing then is ineffective. Bone is too slow if applied when peas are in bloom. A better material would be genuine Peruvian guano, that containing some nitrogen; it is known as Chincha grade. It is safe, quick and very effective.

Sweet Pea Mrs. Geo. Lewis, White.

Corkscrew Boxwoods.

A feature that has attracted considerable attention at the Geo. Wittbold Co.'s place, 1657 Buckingham place, Chicago, is a pair of box trees clipped in corkscrew shape as shown in the accompanying illustration. While perhaps not attractive according to the notions of some aesthetic parties, they do attract the eye of the casual pedestrian and perhaps make a transient customer. A similar novelty displayed for some weeks by John Mangel at the corner of Wabash avenue and Monroe street, Chicago, was a box trained to the shape of a huge porker and many a passer-by stopped to examine the curiosity.

American Rose Society.

The motion and resolution adopted at Chicago to fix the time for the official year on July 1 instead of January 1, places at the head as president August F. Poehlmann of Morton Grove, Ill., and as vice-president Wm. Kasting of Buffalo, N. Y., where the next annual meeting is to be held. The retiring president, Robt. Simpson, of Clifton, N. J., has held office two terms, Frank R. Pierson and Philip Breitmeyer being the vice-presidents. The treasurer, Harry O. May of Summit, N. J., and the secretary, Benjamin Hammond of Fishkill, N. Y., were re-elected. The executive committee is as follows: Peter Bissett, Washington, D. C.; Patrick Welsh, Boston, Mass.; E. G. Hill, Richmond, Ind.; Adolph Farenwald, Roslyn, Pa.; J. J. Curran, Salem, Va.; P. J. Lynch, West Grove, Pa.; Philip Breitmeyer, Detroit, Mich.

During President Simpson's term it has been the determined effort to put the American Rose Society on a solid financial foundation; the invested permanent fund has reached $2,950 with another $50 in sight. For the past two years the secretary has waived compensation. The annual shows lead to considerable outlay and on June 10 a meeting was held at Bronx Park and the treasurer's accounts were audited; this was done so as to bring up to date all and every outstanding liability. Heretofore when a new set of officers has come in there has been a series of bills to be paid. In order to place the American Rose Society clear and above board at the beginning of its new financial year, J. A. Valentine of Denver, Colo., placed in the hands of the secretary the sum of $20; there was an offer made practically to wipe out the whole overlapping indebtedness, and the result as advised in two executive meetings was to write a letter to a number of rose cultivators requesting a contribution of $10. These letters were sent out the last of June and responses have been coming so that without being a burden or tax on any few members, the American Rose Society proposes to start out in its westward move clear-handed. I am assured that the exhibition of the past spring at the Art Institute in Chicago was the richest exhibition ever held of the rose in America. The spring exhibition should be made a great public show for the people of Buffalo.

The next meeting, as a matter of general convenience, will be held at Niagara Falls during the S. A. F. convention when the formal transfer of office will take place from Mr. Simpson to President August F. Poehlmann. The bulletin of 1908 is being prepared; there have come requests for this bulletin from societies and libraries far and wide. The show in June at Bronx Park had from John H. Troy of New Rochelle, N. Y., a variety of choice flowers; W. A. Manda of South Orange, N. J., and Frank A. Pierson put up a whole side table of peonies that were magnificent. Crimson Ramblers are this year in evidence to an extent never before witnessed; in all sorts of places, from the mansion to the humblest cottage, from railroad station to the back yards of small tenements, one of nature's beauties.

BENJAMIN HAMMOND, Sec'y.

Society of American Florists.

NIAGARA FALLS CONVENTION PROGRAMME.

First day, Tuesday, August 18—Opening session, 2 p. m. Address of welcome and responsive address. Annual address of the president. Reports of secretary, treasurer, state vice-presidents, committees and other officers.

Judges will examine and prepare their reports upon the novelties and new inventions in the trade exhibition immediately after the close of the opening session.

Florists Hail Association, 4:30 p. m. Annual meeting.

President's Reception, 7:30 p. m.

Second day, Wednesday, August 19—Morning session, 9:30 a. m. The members of the Canadian Horticultural Association will attend this session. "Welcome to our Guests," by President Traendly. Response by President Walsh. Paper—"Fertilizers and Fertility," J. F. Cowell. Discussion.

The selection of the location of the next meeting (polls open one hour) and nomination of officers for next year will take place at this session.

Ladies auxiliary of the S. A. F., 10 a. m.—Annual meeting.

Afternoon, 2:30 p. m. The members of the S. A. F. are invited to attend the session of the Canadian Horticultural Association at the Clifton house, Niagara Falls, Ont.

Evening Session, 7:30 p. m. Illustrated lecture by J. Horace McFarland—"How Florists May Aid in the Crusade Against Ugliness." The members of the Canadian Horticultural Association are invited to be present at this meeting, and the public will be admitted. Admission by ticket, to be obtained from Secretary Ewing, for members C. H. A.; Secretary Rudd, for members S. A. F. (All tickets not applied for by 12 o'clock noon, Wednesday, will be distributed to the public, and members delaying their application beyond that time must take their chances of tickets being available.)

Third day, Thursday, August 20—Morning session, 9:30 a. m. Paper—"Out-of-Door Roses," W. C. Barry. Discussion.

Election of Officers.—Polls will be open at 10:30 a. m., and remain open two hours.

AMENDMENTS TO CONSTITUTION.

The following amendments to the constitution and by-laws of the Society of American Florists have been recommended by the executive board. To amend:

Article 1. By striking out the words "regularly organized" in the seventh line.

Article 2, section 2.—By inserting after the word "one," in the sixth line, and before the word "state," the words "or more."

Article 3.—(1) By inserting after the word "treasurer," in the fifth line, the word "and". (2) By striking out the words "and the duly accredited delegates of," "cooperative societies as hereinafter provided," in the fifth, sixth and seventh lines.

Article 4, section 2.—By striking out the section entire and inserting in place thereof the following: "Any eligible person may become a member of the society on the payment of $5 and such payment shall cover annual dues for the balance of the calendar year." And "The annual dues shall be $3 per year, payable in advance on the first day of January. Any annual member in good standing may become a life member on payment of $25 and be exempt from all future assessments."

The question box.

Afternoon Session, 2 p. m. The National Flower Show. Address, E. G. Hill. Reports, W. F. Kasting, J. C. Vaughan. General discussion.

American Carnation Society, 4:30 p. m. Special meeting.

Evening.—The evening session will be omitted in order to allow the members an opportunity for an evening view of the falls and other scenery.

Fourth day, Friday, August 21—Morning session, 9:30 a. m. Address—"School Gardens," L. C. Corbett. Discussion. Paper—"State Florists' Associations, Their Value and the Relation They Should Bear to the S. A. F.," Albert T. Hey. Discussion. Paper—"Planting for Winter Effect in the

BOX TREES CLIPPED IN CORKSCREW SHAPE.

By Geo. Wittbold Co., Chicago.

Northern States," George E. McClure. Discussion.

Afternoon and evening.—In the hands of the Buffalo Florists' Club. The bowling contests will be held at Buffalo at this time.

TRANSPORTATION.

From points west and south of Buffalo, and Canadian points, reduced rates have been refused by the passenger associations. There are, however, from nearly all cities reduced excursion tickets on sale to Niagara Falls and return, also to Toronto and return by way of Niagara Falls, with stop-over privileges. Members are advised to consult with their local ticket agents, and also to communicate with the secretaries of florists' clubs in the larger cities, with a view to joining their parties and taking advantage of any special arrangements they may make.

From points in the United States east of Buffalo, including Pennsylvania, West Virginia, Maryland and the city of Washington and vicinity, the territory covered by the Trunk Line Association and the New England Passenger Association, except the Bangor & Aroostook R. R., the Eastern Steamship Company and the N. Y., O. & W. R. R., a reduction of fare and three-fifths on the certificate plan has been secured for those attending the meeting.

The following directions are submitted for your guidance: 1. Tickets at full fare for the going journey may be secured within three days (exclusive of Sunday) prior to and during the first three days of the meeting. The announced opening date of the meeting is August 18, and the closing date is August 21, consequently you can obtain your going ticket and certificate not earlier than August 14 nor later than August 20. Be sure that when purchasing your going ticket you request a certificate. (Do not make the mistake of asking for a receipt.)

2. Present yourself at the railroad station for ticket and certificate at least 30 minutes before departure of train on which you will begin your journey.

3. Certificates are not kept at all stations. If you inquire at your home station you can ascertain whether certificates and through tickets can be obtained to place of meeting. If not obtainable at your home station the agent will inform you at what station they can be obtained. You can in such case purchase a local ticket thence, and there purchase through ticket and secure certificate to place of meeting.

4. Immediately on your arrival at the meeting, present your certificate to W. N. Rudd.

5. It has been arranged that the special agent of the Trunk Line Association will be in attendance to validate certificates on August 20 and 21. A fee of 25 cents will be charged for each certificate validated. If you arrive at the meeting and leave for home again prior to the special agent's arrival, or if you arrive at the meeting later than August 21, after the special agent has left, you cannot have your certificate validated and consequently you will not get the benefit of the reduction on the home journey. No refund of fare will be made on account of failure to have certificate validated.

6. So as to prevent disappointment, it must be understood that the reduction on the return journey is not guaranteed, but is contingent on an attendance at the meeting of not less than 100 persons holding regularly issued certificates obtained from ticket agents at starting points, showing payment of full first-class fare of not less than 75 cents on going journey.

7. If the necessary minimum of 100 certificates are presented to the special agent, and your certificate is duly validated, you will be entitled up to and including August 25 to a continuous passage ticket to point at which certificate was issued, and by the route over which you made the going journey, at three-fifths of the first-class limited fare. These instructions apply only to points mentioned above. They do not apply to western and southern points.

HOTEL.

The managers of the Cataract house offer to reserve for members of the society the entire hotel (except the lower floor, which is given over to the trade exhibition and meetings of the society), provided advance applications enough are received to warrant it. Applications for rooms and inquiries should be addressed to Mr. Isaacs, manager, Cataract House, Niagara Falls, N. Y.

THE TRADE EXHIBITION.

The trade exhibition will be located on the ground floor of the Cataract house, occupying the entire floor of this great hotel, except the room in which the meetings will be held, with which the exhibition rooms directly connect.

Growers of plants, seeds, bulbs, shrubs and trees, dealers in florists' supplies, greenhouse requisites, building material for greenhouse construction, heating apparatus, etc., can here meet the best buyers in the horticultural profession, and no better opportunity for directing attention to the special merits of their goods can be found.

N. B.—Exhibitors are reminded that the duties of the judges are limited to the consideration of and making of awards to novelties and improved devices only. Exhibitors are required to make previous entry of all such exhibits with the superintendent in writing. Full rules and regulations, together with diagrams of the exhibition hall, may be obtained from Chas. H. Keitsch, superintendent, 810 Main street, Buffalo, N. Y., to whom all applications for space should be made at once.

PAYING DUES.

Members who have attended previous conventions and know something of the discomforts of waiting in line for an opportunity to pay assessments and procure badges do not need to be reminded to forward their dues to the secretary in advance and thereby contribute to their own comfort and facilitate the secretary's work. Dues cannot be paid while meetings are in progress, and applicants will be demanding attention before the opening session on the morning of the first day, the possession of a badge and membership receipt for 1908 being absolutely necessary before any individual can sign the roll book and receive invitation cards for any entertainments provided. On receipt of $3 from those who have paid membership dues for 1907, and $5 for all others, certificate and badge for 1908 will be mailed promptly from the secretary's office. Preserve your certificate and bring it to the convention with you. The secretary's address is W. N. Rudd, Morgan Park, Ill.

Canadian Horticultural Association.

CONVENTION PROGRAMME.

The following is the official programme of the eleventh annual convention of the Canadian Horticultural Association to be held at Niagara Falls, Ont., August 19-21, 1908. The headquarters of the association will be at the Clifton hotel.

WEDNESDAY, AUGUST 19.

Opening session at 2:30 p. m.; The Society of American Florists will pay a fraternal visit during this session.

"Address of Welcome," by the mayor of Niagara Falls, Ont., and superintendent of Queen Victoria park.

Response by President Traendly of the S. A. F.

Reports of secretary, treasurer, standing and special committees.

Second session at 7 p. m.: The society will pay a fraternal visit to the convention of the Society of American Florists at Cataract house, Niagara Falls, N. Y., and to hear J. Horace McFarland's lecture.

THURSDAY, AUGUST 20.

Third session at 10 a. m.: Various papers; question box; visit of the delegates to Queen Victoria park.

Fourth session, 7 p. m.: Discussion between retailer and grower, G. Gerraghty, of Dunlop's, Toronto, and W. J. Lawrence, Eglinton, Ont. Paper on "Grapes Under Glass," by T. Pewtress, Pointe Claire, Que. Election of officers. Final reports.

FRIDAY, AUGUST 21.

The delegates will participate in the entertainment given by the Buffalo Florists' Club to the S. A. F., including trip to Buffalo, games, etc. (By generous invitation of the Buffalo Florists' Club.)

RAILWAY RATES.

Arrangements have been made with the Eastern Canadian passenger association (all Canadian railways east of Port Arthur) whereby delegates to the C. H. A. convention purchasing a first-class single fare, to Niagara Falls, Ont., will be returned for one-third single fare, if 50 or more in attendance hold standard certificates, which must be procured from the agent issuing ticket at starting point. These certificates must be handed to the C. H. A. secretary at the convention hall for his signature and a special agent of the Eastern Canadian passenger association will attach a validation paster charging 25 cents therefor.

To Be Done Now.

IN THE GREENHOUSES.

Clear out all old insect or rust infested carnations or the trouble will spread to the young plants.

Watch the ventilation closely in early morning when the cut is in progress.

Spray old cut back roses very freely after transplanting, but water the roots carefully.

Spray grafted roses carefully until the soil is filled in around the union of stock and scion.

Avoid overwatering newly planted chrysanthemums in hot weather. Spray frequently and keep the house as cool and moist as possible.

Prepare for geranium propagation by repairing flats, if these are used, and soil.

Keep the feed going well for indoor cucumbers and see that the roots are kept moist.

Begonia Gloire de Lorraine need not be hurried yet. Keep the plants gently moving.

Be careful not to overwater cyclamens in frames before the roots have taken a good hold of the soil, or the growth will be checked.

OUTDOORS.

Watch grafted shrubs for suckers and remove them on sight.

Look after late sown annuals carefully, as they often prove very useful for cutting in an open fall.

Disbud the outdoor chrysanthemums if fine flowers are needed.

Go over the celery rows and remove side shoots before any soil is put up to the plants.

Where necessary thin the shoots on old pear or apple trees that were regrafted this spring.

Sow a good breadth of spinach for winter use where this crop can be grown.

Keep the cultivation going between the late cabbage plants as long as possible.

Sow all land that is not to be used to a green manure crop for plowing in later.

SALEM, O.—James Cogill, formerly of Alliance, is helping appraise the Templin greenhouses at Calla.

PALESTINE, TEX.—Carl Seidel, grower for G. E. Dilley & Son, took charge there recently. Roses look well and the bedding stock is making excellent progress.

THE AMERICAN FLORIST

1885 TWENTY-THIRD YEAR. 1908

Subscription, United States and Mexico, $1.00 a year; Canada $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

Trade Exhibition at Niagara Falls.

Manager Keitsch reports that a total of 7,463 square feet of exhibition space have been taken. Arrangements have been made with a responsible hauling company to take care of all freight. Those who desire to stop at the Cataract House or the International, next door, should correspond with H. W. Isaacs, International Hotel, Niagara Falls, N. Y., who will act as hotel committee. Mr. Keitsch reports that travel this season is not as heavy as usual and in consequence hotel accommodations will be comparatively easy to secure.

A PLAYGROUNDS CONGRESS will be held in New York September 8-12.

WHEN we get the perfect automatic ventilating gear many of our troubles will be over.

HOW is the stock of stevia? It will be needed next winter and is very little trouble to grow.

KEEP an eye on the ash pile. Careless stokers are often responsible for much waste of half-burned coal.

BETTER transplant rosés than let them go through on benches needing repairs. They may break down at a bad time.

BUILDING CONDITIONS, says the American Lumberman, are at present ideal. From ocean to ocean, from lakes to gulf, the "build now" campaign is indorsed by representative trade and daily publications.

THE full programme of the Niagara Falls, N. Y., convention of the Society of American Florists and that of the Canadian Horticultural Association at Niagara Falls, Ont., will be found on pages 1308-1309 this issue.

Glass.

Glass prices made a further advance of five per cent on July 22. Discounts on single strength glass are now 90 and 30 per cent, and on double strength, 90 and 35 per cent.

National Flower Show.

W. N. Rudd has been prevailed upon to accept the position of manager of the National Flower Show. The selection of a manager was left by the executive committee to the committee on local management of which J. C. Vaughan is chairman, with the recommendation that the services of Mr. Rudd be obtained if possible.

Mr. Vaughan has called a meeting of his committee for Saturday afternoon, July 25, when with Manager Rudd the committee will take up details of the show arrangements. Chairman W. F. Kasting of the committee of 50 will call a meeting of the committee at Niagara Falls during the convention of the Society of American Florists. The meeting will probably be held on Thursday after the discussion of the National Flower Show which is provided for in the convention programme. J. H. BURDETT, Sec'y.

Chicago to Niagara Falls.

For the accommodation of members and their friends from Chicago and points west, the transportation committee of the Chicago Florists' Club has selected and made arrangements with the Wabash railroad for a special train to leave Chicago at 6 p. m. Monday, August 17. This train will consist of strictly first-class standard Pullman sleepers and a Wabash dining car in which evening dinner will be served table d'hote at $1.00 and breakfast on the a la carte plan.

The rate from Chicago to Niagara Falls and return will be $19.50 with a limit of 30 days or longer if desired. Summer tourist tickets can also be purchased at the same rate ($19.50) to Toronto, Ont., and return via Niagara Falls, the Gorge route from Niagara Falls to Lewiston, and the Niagara Navigation Steamboat Co. across Lake Ontario to Toronto. This will practically give a free side trip to Toronto and return, taking in the famous gorge and whirlpool of the Niagara river. These tickets are limited to 30 days and will give a stopover of 10 days in either or both directions at Niagara Falls by depositing tickets with the Wabash agent at Niagara Falls on arrival. Any who contemplate or desire to take this trip across to Toronto should ask for and get their tickets to that point when purchasing the same. Passengers have the option of returning all rail as the tickets read or via Lake Erie steamers from Buffalo to Detroit and thence rail, without extra charge except for meals and berths.

In order that arrangements may be made to take good care of our party, you are requested to inform the undersigned as early as possible whether or not you will attend, and if so what sleeping car space you will require. Tickets can be purchased at the Wabash city ticket office, 109 Adams street, or at the depot, Dearborn station, Polk and Dearborn streets. We anticipate a large party from Chicago and ample provisions will be made so that everyone can have an enjoyable time on this trip, and hope that you will advise us at once if you can join the party.

F. F. BENTHEY,
A. C. SPENCER,
E. C. AMLING,
Transportation Committee.

Freight Rates on Greenhouse Material.

ED. AMERICAN FLORIST:—

We note in your issue an article about the freight rates to the western states. In reference to this, we beg to inform you that several months ago we had already entered a request for the re-adjustment of the rates, our letter to the western classification committee being dated April 13. Our main point, however, was the apparent discrimination by the railway against carloads of greenhouse material containing other items than strictly the wood parts. While they apply C. L. rates on shipments containing bars, vents, etc., they apply L. C. L. rates as soon as glass or pipe are included. The orders of the majority of florists are not large enough to entitle them to the benefit of the lower rates under these rulings, while if the railway companies would change their rulings and allow a carload to be made up of everything going into a greenhouse, even the smaller growers could arrange for car shipments and thus enjoy the advantage of the low rates.

A. DIETSCH CO., Chicago.

Florist Club Outings.

Birmingham, Ala., July 24.—First annual picnic and barbecue of the Florists' and Horticulturists' Society at the lakes at Bessemer.

Boston, Mass., August 29.—Annual picnic of the Gardeners' and Florists' Club to Pine Banks park, Malden.

BOWLING.

Bowling at the Bensinger alleys on Tuesday evening resulted as follows:

Asmus	116	131	112	161
McKellar	108	141	131	119
Winterson	188	142	171	

The ladies made the following scores:

Mrs. Asmus	91	90	109	106	91
Mrs. Kreitling	111	76	77	80	147
Mrs. Winterson	114	127	112	100	103
Mrs. Hauswirth	111	99	106	105	96
Mrs. McKellar	186	129	144	120	122

BASEBALL.

Manager W. P. Kyle, of the Florists' Base Ball Club, presented a very fine line-up. His team had the honor of knocking a semi-pro pitcher out of the box. He was up against the strongest team he had yet tackled and came away with all of the laurels. Here is the score:

	1	2	3	4	5	6	7	8	9	
Chicago Florists	1	4	0	1	2	0	1	2	0	—11
Southwest	4	0	0	0	1	1	3	1	0	—10

The batteries were Sullivan and O'Connor for the Florists, and Fienie and Dugan for the Southwests. The greatest feature was the rooting of H. C. Dunn for the Florists.

FLORISTS' CLUB PICNIC.

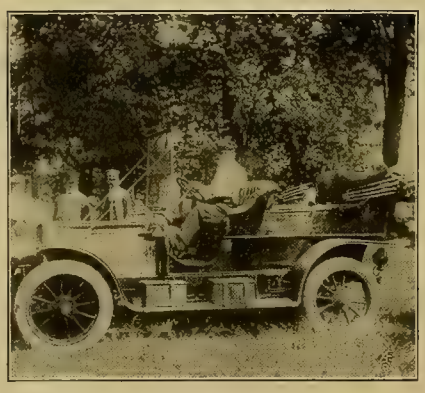
The Chicago Florists' Club's picnic at Morton Grove, Ill., July 19, attracted a large attendance, about 300 persons coming from the city on the morning and noon trains. The picnic was held in Manilla park, as it was last year, directly across the road from the Poehlmann Bros. Co.'s A plant. The day was an ideal one for an outing, being neither too warm nor too cool, and clear skies favored the pleasure seekers. Refreshments were served from various stands in the grove, thus doing away with the necessity of parties and individuals bringing their own lunches. Credit is due to T. E. Waters and E. Enders for the excellent arrangements. Sandwiches, cake, coffee, lemonade, beer, soda, pop, and ice cream were dispensed from convenient stands to holders of the coupons, which were received in exchange at the gate for the regular picnic tickets.

Perhaps the largest part of the crowd came on the 12:40 train. Owing to the late arrival of some of the officials and of so many others who were expected the games did not commence until afternoon. The last was probably the best of all, the ball game between two teams selected respectively by Allie Zech and Otto Goerisch. The feature of the game was the coaching by Leonard Kill and Geo. Asmus, the former being sent by the referee back to his automobile for being out of order on the coaching line in the third inning. Geo. Asmus was ruled out of the game for kicking on the umpire, John Poehlmann being selected to take his position at first base. Nobody knows exactly what the score was, not even the players nor the umpire, but the guesses varied from 13 to 5, to 12 to 6 in favor of Allie Zech's team. The players were as follows:

M. Gabel, c.	Jos. Curren, c.
— Vail, p.	Otto Goerisch, p.
G. Asmus, 1b.	Aug. Poehlmann, 1b.
John Poehlmann, 1b.	Albert Ebeling, 2b.
— O'Connor, 2b.	— Theu, s.s.
Chas. Balluff, 3b.	— Wolf, 3b.
A. Zech, s.s.	— Connor, l. f.
W. Graff, l. f.	E. F. Winterson, c. f.
E. Enders, r. f.	— Peck, r. f.
— Myer, c. f.	

Three automobile parties came to the picnic, Peter Reinberg, Adam Schillo and Geo. Garland, each having piloted a large touring car into the grounds. One of the gayest of the arrivals, however, was that of a big hayrack party, brought from Evanston by Sebastian Fischer of Fischer Bros.

John Zech is still showing great form, winning out in the hop, step and jump. And the children are not far behind the old man. Allie came in first in the 100 yard dash and Carrie Zech carried off the honors in the girls' 40-yard dash.



Chicago Florists' Club Picnic.
President Leonard Kill in His Automobile.

Bassett & Washburn sent down 28 of their employes, not only buying the picnic tickets but transportation as well from Hinsdale. Andrew Benson could be seen prominently in the line-up for the fat men's race.

The committees having charge of the picnic were as follows: Geo. Asmus, manager; T. E. Waters and E. Enders, refreshments; J. H. Pepper, T. E. Waters and H. C. Lenington, programme; J. C. Vaughan, music; Aug. Poehlmann, F. F. Benthey, transportation to grove; Fred Lautenschlager, concessions; John Zech, sports and games; J. E. Jensen, secretary and treasurer. And it goes without saying that President Leonard Kill of the club took a lively interest in all departments.

THE CONTESTS.

1. Guessing contest. How many seeds in watermelon? Prizes donated by George Asmus. J. C. Vaughan, first prize, $5 merchandise certificate on Marshall Field & Co.; Miss Mayme Downs, second prize, $5 in refreshment coupons. There were 1081 seeds in the melon.

2. Quoits (open to all), D. Erickson, first prize, silk umbrella; E. F. Winterson, second prize, hair brush.

3. Tug-of-war. No contest.

4. Forty-yard dash, girls, 10 years and under. Handicap, one yard for each year. Annie Lochman, first prize, roller skates; Mary Milander, second prize, box of handkerchiefs. Prizes donated by Leonard Kill.

5. Forty-yard dash, boys, 10 years and under. Handicap, one yard for each year. Philip Malagar, first prize, roller skates; Orrin Enders,

GOOD STOCK IN SHORT SUPPLY.

The market has seen any quantity of inferior stock but really good material has been very scarce. At this time, however, asters are beginning to come in and should come in larger quantities daily from now on. All colors are seen and stems are of fair length. Roses are improving very slowly; some American Beauty roses of long stems from old plants are seen. Shorter stems from new plants are of excellent quality. Carnations are very poor and while some ship satisfactorily to distant points, the largest part of the stock is unfit for shipment. Auratum lilies on Monday were scarce, but growers began shipping in and the following day saw a good supply. Some very good Easter lilies are also seen. Both lilies have been in exceptionally good demand, as have also gladioli, which are now coming in more freely. This week sees practically the end of the cold storage peonies. The season ends on about the same date as it did last year. There was a somewhat larger supply this year than last, but the demand was equal to clearing up the entire lot. Some late Rose Pink peonies are still to be obtained, there being about 1,000 dozen still in storage the forepart of this week.

NOTES.

At Frank Oechslin's the shipping trade in cyclamens, primulas and Boston ferns is said to be keeping up well. Stock here, now rapidly coming on for fall, is in excellent condition. Chrysanthemums are going from 4-inch to 6-inch pots, and some are even getting their final shift from 5-inch into 8-inch pots. The peppers are a fine and healthy looking lot of plants. In the fern houses quite a stock of Nephrolepis Amerpohli is being worked up.

The Geo. Wittbold Co. is building one new greenhouse at that firm's Lakeview establishment, 25x120 feet. This is the last of an entirely new section of four houses. Cement walls and cement benches are the rule now here throughout. Louis Wittbold has just invented a new instrument for boring holes in the bottom of cement benches.

Knees Bros. are moving from 19 Clara place to Western and Fullerton avenues, where they are erecting a two-story building and four greenhouses, including one 20x25 show house, one 16x25 propagating house, one house 25x60 and another 25x50. In the new place Wittbold cement benches are being installed.

G. H. Pieser, president of the Kennicott Bros. Co., returned last week from 10 days of trout fishing at Basswood, Mich. He came sooner than he had intended on account of the illness of Mrs. Pieser. This firm still has a limited quantity of Late Rose peonies in cold storage.

The A. L. Randall Co. is receiving large shipments of asters, gladioli and auratum lilies. It is said here, too, that more ferns than ever before are being handled this year. The ferns are coming from northern Michigan and, it is claimed, keep better than those picked further south.

Fred G. and H. H. Hunt under the firm name of Hunt Bros. have taken over — Ahrenfeldt's greenhouse establishment of 20,000 square feet of glass at Park Ridge. Chrysanthemums and carnations, including the new salmon pink seedling of A. E. Hunt, of Evanston.

N. J. Wietor arrived home Sunday from his fishing trip with an exceptionally fine coat of tan. John Sinner, who accompanied him, arrived here a few days previous in good fit condition to put in a few warm days working in the greenhouses.

Chas. McCauley, secretary of the Florists' Club of Washington, was here last week looking into a proposition having in view the conversion of an important private place in a suburban town into a commercial establishment.

August Kohlbrandt, of E. C. Amling's, and Harrison Kennicott are at Alden, Mich., whence they sent to Mr. Amling on Monday a 40-pound box of fish just to show the kind of luck they were having.

H. Kellner, 740 Grand avenue, has a patent pending on what he calls the hold-fast, a substitute for the toothpick and wire in floral work. Speed and ease in application are the merits claimed for the novelty.

Chas. McKellar's right hand man, Earnest Farley, is back from a visit to his old home at Indianapolis. Cattleya Harisoni and C. Eldorada are the orchids now being received by Mr. McKellar.

Chas. Morawek, 1564 W. Sixteenth street, on Tuesday had Albert J. Richards and Edward J. Lewis indicted by the grand jury charged with stealing ferns from his greenhouses.

C. A. Schnell has left John Mangel and this clever decorator would be glad to hear of a suitable position. Mr. Schnell's work is well known here and in eastern cities.

The mother of Wm. F. Schofield, 184 N. State street, had the misfortune last week to fall down stairs. She is now in the hospital with a broken rib.

Miss Celia Then was in the Flower Growers' Market last week taking the place of her sister Josepha who had a touch of grip.

H. O. Bock, son of Joseph Bock, Burlington, Ia., has been in the city getting heating plans for a new range of three large houses.

Another shipment of Bermuda lily bulbs for Vaughan's Seed Store is due to arrive in New York on Friday.

E. C. Amling is now receiving some fine Augustus gladioli, which he says are selling well.

Chas. Balluff and wife left Tuesday for three weeks of fishing at Butte des Mortes, Wis.

Bassett & Washburn are again cutting plenty of Easter lilies.

Visitors: Chas. McCauley, secretary Florists' Club of Washington, D. C.; Arthur Waldman and wife, St. Louis, Mo.; H. Bunyard, New York; W. A. Hartman, South Haven, Mich.; Harry Balsley, Detroit, Mich.; W. G. Matthews' son, Dayton, O.; Wm. A. Schaefer, Platteville, Wis.

Lake Forest, Ill.

The second annual floral and horticultural exhibition of the Horticultural Society at the Art Institute July 15 was a grand success. It was successful from the viewpoint of the visitor and from the more practical view of the gardener and horticulturist.

Every available space in the building was filled and Durand Art Institute never presented a more attractive appearance. The exhibition of last year was a school and that there were apt pupils at it was shown in the better classification and arrangement of this year's show. The judges on flowers were Wm. C. Egan, Highland Park; E. A. Kanst, Chicago, and John Tiplady, Lake Geneva, Wis. On vegetables, Robt. J. Sampson and Axel Johnson, Lake Geneva, Wis., and C. J. Reardon, Hinsdale, and these had great difficulty in some cases in making their awards. Lager & Hurrell, Summit, N. J., put up a choice display of orchids. Vaughan's Seed Store, Chicago, made a fine display of hardy herbaceous perennials and greenhouse plants. Arthur T. Boddington, New York, had cold storage lily bulbs on display. Peterson's Nursery and Swain Nelson & Sons Co., Chicago, made fine exhibits of nursery stock.

The Vaughan's Seed Store gold medal for the largest and most artistically arranged vase of flowers was won by Carl Gepper, gardener to Mrs. Taylor. Highly creditable displays in various classes were also made by J. W. Scharfenberg, H. C. Peterson, Emil Bollinger and others.

Wm. P. Longland, Axel Johnson and Robt. Sampson, Lake Geneva, Wis., made fine displays of vegetables and fruits not for competition.

STOCK POOR.

Very hot and sultry weather has had a very bad effect on stock and shipments received showed it. Carnations are getting poorer daily and even stock which was of fair quality a week ago now arrives in a sleepy condition. Roses, too, are poor; some good Bride can be seen and American Beauty is fairly good and clean up sales of these are made daily. Gladioli are now arriving in much larger quantities, but as yet have cleaned up well, the light colors selling at $4-$5 while the dark colors are cleaned up at $2 per 100. Asters are small and white ones are scarce mostly all with short stems and yellow centers. Most of the retailers are now repairing and fixing up their stores for the coming season. Many are taking and giving their employes vacations. Funeral work has been steady all week and stock has held up well being cleaned up if in any way of fair quality.

NOTES.

George Angermueller and wife leave Sunday for a three weeks' vacation. They are going to the northern lakes by way of Chicago. Fred Alves and Al Gumz, assisted by C. N. Wors will have charge and look after George's interests during his absence.

W. Osseck returned Friday from his wedding tour; he and his wife are looking fine. They visited New York, Niagara and other eastern resorts. Will Smith is glad that his partner has returned to share the work.

E. W. Hicks has leased his greenhouses to Albert Senger who also runs greenhouses at Cote Brilliant avenue. At Hick's place he intends to grow bedding plants and a house of carnations for cutting.

Miss Hilda Dammann, Young's cashier, has gone on her well earned three weeks' vacation. She will spend her time at Atlantic City and other eastern resorts.

Young & Sons are busy painting and papering their store on Fourteenth and Olive streets. They expect to have several changes before the season opens.

Andrew Meyer, Sr., has a house full of Nephrolepis Whitmani and one of N. elegantissima. He expects them to be in fine shape for the fall trade.

Oscar Heile now visits the wholesale district accompanied by his little four-year-old granddaughter of whom he is very proud.

Ed. Kalisch is going on a fishing excursion up the Mississippi in his gasoline launch. He will be gone about a week.

F. C. Weber and wife are expected home by the end of the month; from latest reports they are having a splendid time.

Mrs. Theo. Faller, who recently sold her greenhouses to Grimm & Gorley, has opened up a retail store on Euclid avenue.

Joe O'Rourke is no longer in the employ of Wm. C. Smith & Co. This firm reports increased sales of wire goods.

Annie Bernhardt at Seigel's is away on her vacation. She visits St. Paul, Milwaukee and Chicago.

John Connon and wife have just returned from the east. They also visited Canada.

Adolph Ahner's violets are looking fine. He expects to have a good crop this winter.

Otto Bruening at Bernings has returned from his vacation.

Visitor: W. A. Hastings of A. H. Hews & Co., of Cambridge, Mass.

W. F.

POST FALLS, IDAHO.—Wallon & McKay, who are preparing to erect new greenhouses on the south side of the river, have a crew of men at work erecting a 6,000 gallon water tank. It is being placed on a tower 40 feet high.

Traendly & Schenck,

WHOLESALE FLORISTS,

Alexander J. Guttman,
THE WHOLESALE FLORIST OF NEW YORK
34 WEST 28th STREET
PHONES, 1664-1665 MADISON SQUARE
ENOUGH SAID

New York.

A PLAGUE OF MOTHS.

The drought was broken July 14 by a heavy downpour of rain accompanied by hail, thunder and lightning. Though large stories have been told as to the size of hailstones, no damage to glass, worthy of mention, occurred in this vicinity. Though the rain has done much good in practically saving the aster and other crops, the effects of the long continued drought are very noticeable in parks and public grounds where watering was not, or could not be done, the grass being about ruined. Sweet peas are very much injured in quality. With the exception of gladioli and lilies, all stocks, both indoor and out, are now rather shy, but the demand is light and there is little inconvenience. To add to the discomforts of the heat, a host of white moths have spread themselves over the city during the past week. The same pest was reported from Boston a week ago, so they seem to be travelling by easy stages. They have, in some localities, been erroneously reported as the brown-tail moths, but are an altogether distinct variety. Old residents of this city say that there has not been a visitation of this species since 1862. In the hope of destroying them before they lay their eggs, the park department has resorted to vigorous spraying of the trees where they most abound.

July 20.—The market opened this morning with a very light supply of stock, but a correspondingly small number of buyers. The weather has settled back to its old gait of heat and drought and a day's rain is needed. There is an average supply of asters but the best are not yet in. Sweet peas are very short.

NOTES.

John A. Scollay has just closed a contract with the trustees of Plymouth church, Brooklyn, for the complete reheating of the church, class and Sunday school rooms with hot water. One Scollay hot water boiler will be installed for the work in place of the hot air furnaces which have long been used. This noted church which has long since become a household word throughout the English speaking world, through its late famous pastor, Henry Ward Beecher, is well known to many readers of the AMERICAN FLORIST. Its present pastor is Rev. Newell Dwight Hillis, formerly of Chicago.

The Plaza hotel has taken the lead in fine window box and veranda decorations. Between the immense marble pillars of the veranda, there are a number of large boxes, over 10 feet in length, filled with palms, Ficus pandurata, dracænas, pandanus and other foliage plants, and the effect is very striking. In addition to these, there are many well filled window boxes on the ground floor windows of the hotel.

During the storm of July 14 a defective gutter caused an overflow of water in the building occupied by the wholesale stores of Walter F. Sheridan and Frank S. Hicks & Co. No great damage was done but there was, for the time being, some lively steps taken to get matters straightened out.

Ralph M. Ward has recently purchased a handsome villa at Boundbrook, N. J. There is considerable land attached and Mr. Ward is already at work trying out bulbs and other flowering plants.

Chas. H. Totty and wife sailed on the Carmania, July 24, for Liverpool and have planned to see considerable of the old country within the next two months.

Andrew Scott, nephew to Alex. McConnell, and buyer for his store, sailed for Europe on the last trip of the Mauritania. He will be absent about six weeks.

B. S. Slinn, Jr., has just returned from a two months' visit to Europe.

TRADE FAIR FOR THE SEASON.

There is little that can be said encouraging about the state of trade except that while the volume of business is small it is quite up to that of a year ago at this time. What little good stock is offered seems to find buyers at fair prices. Leaders in the market are American Beauty and Kaiserin roses, asters, lily of the valley, Lilium auratum, Album Roseum and longiflorum lilies. There are a few fair carnations. Bride and Bridesmaid, Killarney and a few Richmond roses are still seen in most stocks but they run very small. Green goods are plentiful, hardy wood ferns now being offered at 75 cents to $1 per 1,000. Gladioli must not be forgotten as they make a very showy addition to the stock. The very dry weather which we have been experiencing for the past three weeks in some localities where rain of any consequence has not fallen for a month, promises, unless relief comes immediately, to almost entirely ruin the crop of asters and other outside flowers. Asters, besides suffering from the drought, are dying in large quantities from a disease called dry rot which starts at the top of the plant and goes down to the root. In some cases from one-third to one-half of the crop has been affected and there seems so far to be no remedy. Outside carnations, while still looking healthy, are small, having made but little growth. Inside culture will get quite a boost as compared with the results outside this season.

NOTES.

G. D. Clarke, in charge of the fern department of the H. A. Dreer nurseries at Riverton, is justly proud of two houses of Adiantum Farleyense; the plants are in splendid condition, coming on in the various sizes suitable for the fall trade. When asked for the secret, he answered: "Nothing mysterious about it, just give them a chance in houses in which one can control light, heat and air." There is heat on here at all times—hot water—so as to have just little or more as required. Cybotiums are grown here as nowhere else in the country. The firm has a great demand for this fern, always having a lot coming on into special sizes for orders. Two other leaders are Cocus Weddelliana in large sizes and Phœnix Rœbelenii in quantity, 75,000 in from 2-inch to 8-inch pot specimens. A great future is predicted for this palm when it becomes more generally known.

In speaking of the drought Leo Niessen who has a fine lawn and garden at his residence in Olney, says that he has spread about an inch of peat all over the garden and finds it very beneficial, the plants seeming to thrive very much better where this is used than where the surface of the soil is open. He says the effect is to shade the ground and keep it moist.

The sale of the decorative material and stock of the Wm. Graham Co. in Horticultural Hall last Wednesday and Thursday was fairly satisfactory, something over $2,600 being realized. The principal local buyers were J. J. Habermehl's Sons, Julius Wolff, J. Keegan, and John Gracey. It is thought that the creditors will soon receive their first dividend.

The Leo Niessen Co. is handling some very choice white and purple asters. Mr. Niessen says the aster supply is getting better every day and all that is needed now is a heavy rain and there would be plenty of good stock. New crop American Beauty roses are also coming in nicely; they are in good demand, being the only rose of quality available.

E. J. Fancourt, Chas. Meehan, and Wm. K. Harris, Jr., were fishing in Great Egg Harbor bay off Ocean City last week. K.

JOHNSTOWN, PA.—Herman Neissner is adding a new greenhouse this season.

Boston.

FUNERAL WORK PLENTIFUL.

The market still continues quiet, the largest call for flowers being for funeral work, of which there has been quite a lot this week. The quality of stock is poor in general owing to the drought of the past three weeks. Kaiserin and Carnot are the best roses to be had, and the best are bringing from 10 to 12 cents while the inferior grades are from two to four cents. Gladioli are scarce and the growers are getting eight cents for them. The first asters came in this week and are poor in size and quality, but are bringing $1 per 100. Lilium longiflorum is very good and brings six to eight cents.

NOTES.

The Master Plumbers' Association held its annual convention here this week giving a banquet and ball at the Somerset hotel July 16, and quite a large number of palms and cut flowers were used in decorations..

The Horticultural Society had an exhibition of sweet peas July 18, in Horticultural Hall and many beautiful varieties were displayed.

Cards are out for the wedding of James Travers, the shipper at Galvin's which takes place August 4. B.

Massachusetts Horticultural Society.

The following is a partial list of awards at the sweet pea exhibition of the Massachusetts Horticultural Society, July 18-19.

Sweet peas, display of 30 distinct named varieties, filling 30 vases.—E. Jenkins, first. Twelve varieties, named, six sprays of each—E. Jenkins, first; Joseph Thorpe, second; Thomas Howden, third. Fifty sprays, white—E. Jenkins, first; Thomas Howden, second; W. A. Riggs, third. Fifty sprays, light pink—Thomas Howden, first; E. Jenkins, second; W. A. Riggs, third. Fifty sprays rose colored—Thomas Howden, first; W. A. Riggs, second; Col. Frederick Mason, third. Fifty sprays, blue or purple— E. Jenkins, first; Thomas Howden, second; Mrs. Lester Leland, third. Fifty sprays, lavender—E. Jenkins, first; Thomas Howden, second; Col. Frederick Mason, third. Fifty sprays, red or crimson—Thomas Howden, first; E. Jenkins, second. Fifty sprays, any other color—E. Jenkins, first; Thomas Howden, second. Fifty sprays, any other color—E. Jenkins, first; W. A. Riggs, second; Col. Frederick Mason, third. Hardy herbaceous flowers, 30 bottles, distinct species and varieties, not less than 10 genera—Blue Hill Nurseries, first and second; Bellevue Nurseries, third.

Gratuities: Mrs. Lester Leland, sweet peas; Col. Frederick Mason, sweet peas; Wm. Whitman, sweet peas; Frederic J. Rea, herbaceous plants; Wm. Whitman, phloxes and herbaceous plants; George Hollis, display of phloxes; Harvard Botanic Garden, display of gloxinias; Mrs. Frederick Ayer, Asparagus Sprengeri.

R. & J. Farquhar & Co., received honorable mention for Rudbeckia fulgida, and an exhibit of new lilies from North China, and a vote of thanks for a display of herbaceous plants.

Pittsburg.

STOCK VERY SCARCE.

Notwithstanding the fact that the retailers are doing very little business the scarcity of stock was very noticeable, especially carnations, for which there was a good demand, with so few to be had that everyone had to be content with less than he needed, as there seemed to be nothing to use as a substitute. There were very few asters and this made the scarcity of carnations even more noticeable as roses did not seem to fill the bill. Lily of the valley, while very plentiful early in the week, has been very scarce the last few days. This lack of stock did not bring any great increase in prices, however, due to the poor quality of that which was available. Gladioli are fine and coming in more plentifully; these find a very ready sale.

NOTES.

Pittsburg Florists' Exchange is receiving some very fine early asters. E. T. Grave, Richmond, Ind., and C. Betscher, Canal Dover, O., are shipping fine early gladioli to this exchange.

J. B. Murdoch & Co. are handling some very fine Killarney and Richmond roses.

Pittsburg Cut Flower Co. is handling some nice American Beauty roses.

J.

Albany, N. Y.

H. G. Eyres is spending all his spare time with his family at his summer home at Canaan near the Massachusetts line. Fred A. Danker hies away from time to time to Kinderhook lake to troll for bass and pickerel; others, both florists and their employes, are looking for their annual respite of two or three weeks in the mountains or by the sad sea waves.

Beginning Saturday, July 11, the local florists agreed to keep their stores closed on Saturday afternoons until September 5, inclusive. So far the agreement has been generally kept and it is expected that it will so continue.

R. D.

Origin of Flower Names.

It is interesting to know how certain flowers got their names. Many were named after individuals. For instance: Fuchsias were so called because they were discovered by Leonard Fuchs. Dahlias were named for Andre Dahl, who brought them from Peru. The camellia was so called for a missionary named Kamel, who brought some magnificent specimens of the flower to France from Japan. He called it the rose of Japan, but his friends changed it to camellia. Magnolias were named in honor of Prof. Magnol de Montpelier, who first brought the beautiful tree to France from Americca and Asia. Because they trembled with the wind is the meaning of anemones. The Latin word to wash is lavare and lavender received its name because the Romans put the flowers into the water when they washed, to perfume their hands.

European Horticulture.

FROM THE FRENCH TRADE PAPERS.

THE FRENCH FEDERATION OF FLORISTS' SOCIETIES has already carried through two horticultural excursions, one last fall, to England, which was a great success; that of this spring, to the principal horticultural centers of Holland and Belgium, lasting five days, at an expense of $30 for the round trip from Paris. This included Antwerp, Brussels, Ghent, Haarlem, Boskoop and the Hague—surely a great itinerary.

PELTARIA ALLIACEA.—A hardy perennial certificated by the French National Society of Horticulture in 1906, and most highly recommended for white masses in the border in May and June, following Alyssum saxatile and the arabis. It grows one to two feet high, sends up numerous stiff stems crowned with large panicles of small white flowers which give the effect at a distance of a mass of white. It is very hardy; should be sown in spring. Transplanted and set in place in the fall, it will bloom the following year, and is recommended for giving the maximum of effect for a minimum of care.

BROOKLYN, N. Y.—Merle L. Thorpe has taken over the business of the Handley Floral Co. after two years of successful management of the concern.

FLOWERS VERY SCARCE.

Business is quiet, little activity being expected at this particularly dull portion of the year when the entire demand seems confined to the demands of the hospital and the cemetery. This city is noted for the number and excellence of its hospitals and the patients are the recipients of numerous floral tokens of sympathy and hope from their friends, and the business which accrues in this way makes no inconsiderable proportion of our summer trade. Aside from all commercial aspects, how appropriate it seems to send to the sick and suffering Nature's messengers of consolation. Florists should omit what is commonplace and inappropriate. Let the message of interest and sympathy be spoken clearly in the material, the arrangement, the delicacy of the creation. Put aside the garish and the bizarre, and in the simplest bunch or the most elaborate offering, let good taste, natural combination, choice material, always prevail over the pretentious and the showy. The excessive dry weather continues. There have been a few showers, but they are not general nor copious. Outdoor flowers are scarce, and such subjects as asters seem drying up, and if they give any bloom promise short stems and inferior quality. Carnations and sweet peas are over, and, practically, sole reliance is on the few asters which are home-grown, the gladiolus, which adapts itself to so few uses, and some little hardy stock. Pasture lands and lawns are brown, the leaves of some varieties of trees are already falling, the vegetable gardens and truck patches are drying up, springs and water courses are shrinking, and a generally uncomfortable feeling is caused all around by the insufficiency of moisture.

The semi-annual meeting of the Florists Exchange was held on Monday, but there was no business transacted except the receipt and adoption of the report of the auditing committee appointed to examine the books and accounts of the corporation. The result of the six months' business has already been foreshadowed in these notes. All hands are encouraged by the showing made in such dull times.

GREENWICH, CONN.—Alexander Mead & Son have bought the greenhouses of John Cooke at the corner of Lafayette place and Lake avenue. They will use the land for building purposes and the fixtures for their business.

PITTSBURG, PA.—The floral bed in West park, in the shape of a silver dollar and showing clearly the head of the goddess of liberty is the pride of James Moore, assistant superintendent of the north side parks. Mr. Moore began the bed about June 1, and it took six men three days to build it and set it out. The goddess is entirely made up of different varieties of echeveria, with a background of alternanthera.

CUT FLOWERS OR DESIGNS will be Delivered for the Trade on Wire or Mail Orders in Best Qualities and Prices.

Cincinnati.

STOCK SCARCE.

Stock is very scarce at this writing and from present indications will remain that way for some time to come. There is plenty of business to take up all flowers coming in and at times it takes some tall hustling to get enough flowers for orders. One redeeming feature is the fine lot of lilies such as L. auratum, L. longiflorum, Album and Rubrum, that Wm. Speck is sending in, for without these it is pretty hard to tell what could be used for a decent funeral bunch. Roses are very poor and very few to be had that are worth mentioning. Contrary to predictions carnations are holding up first rate and some very good flowers are to be had for this season of the year. Gladioli are fine. Coblentz, of New Madison, and Graves, of Richmond, Ind., are sending blooms to this market which would be hard to beat for quality. Green goods of all kinds are plentiful and we do not have to turn down any orders for these. Alfred Murphy is hitting the market about right with asters. While the stems are short the flowers are good, and Al. is getting the money. Strange thing with this boy, we never hear much of him but as soon as the market is shy of flowers he comes along with something that manages to help more than one store man out of a predicament. Would we had more growers like him.

NOTES.

Wm. Murphy reports carnations at Murphyville to be in good shape and the growers in this section are busy getting their houses ready for the coming season. Will grew three-fourths of his stock in pots this year and has all but three houses planted. He hopes to house 60,000 plants this year and will begin cutting from some of the new stock shortly.

Geo. Corbett, College Hill, has all his carnations benched and is now preparing to install a Kroeschell boiler. His violets are looking well, and we can look forward to a fine lot of stock from this place the coming season.

Charlie Critchell is now the happy daddy of a bouncing baby boy and is about the proudest and happiest florist in these parts. Mother and son are getting along very well. S.

Davenport, Ia.

Chas. Hummel has begun the erection of one new house and the rebuilding of his old. Mr. Hummel is building the walls of concrete.

Ludwig Stapp's large new house is ready for the glass, and things in general are up to the high grade that is always found here.

Harry Bills has completed his new modern greenhouse and is building benches and getting ready to house carnations.

Three new houses, two 17x100 and one 10x100 feet, will soon be built at Central park. T. E.

PHILADELPHIA, PA.—When arrested by Acting Detective Emanuel July 16, for the larceny of several hundred dollars worth of goods from the store of his employers, H. Bayersdorfer & Co., Wm. Brookland, 213 Carpenter street, implicated Michael Tranchitella, 904 Carpenter street. He said Tranchitella, who was a customer of the firm, had him take a package of stolen materials to him nearly every night since last October and had paid him for them. Detectives who searched Tranchitella's house said they found none of the stolen goods. He was held for receiving stolen goods and Brookland for larceny.

The Seed Trade.

American Seed Trade Association.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention, June, 1909.

ST. PAUL, MINN.—L. L. May and family moved this week to their country home at the nurseries.

OMAHA merchants have subscribed $50,000 for the National Corn Exposition to be held in that city next fall.

MRS. E. M. PARMELEE, Sheboygan, Wis., and daughter, will sail from New York for Europe on S. S. Minnehaha, July 25.

CHICAGO.—Onion sets and seed at Budlong's look well. This firm formerly grew cucumbers extensively for pickling but has been compelled to abandon this crop owing to blight and is growing potatoes instead. — On the board of trade July 22 contract prices for grass seed were noted as follows: Prime timothy, $4.20; choice white clover, $15.—A. H. Goodwin, J. C. Vaughan and L. H. Vaughan are in the pea and bean districts inspecting crops.—Visitor: Walter Retzer, St. Louis, Mo.

A LETTER has been received at an American consulate in Canada asking for the names of firms in the United States who are growers of and dealers in fancy seed peas, with a view to making arrangements to extend their business into Canada. The party making the inquiry states that he can put such firms into communication with a first-class farmer and experienced seedsman who would do business for them on a commission basis. The name can be had on application to the bureau of manufacturers, Washington, D. C.

NEW YORK.—F. H. Henry, of the firm of Henry & Lee, returned July 10 from a trip to Bermuda, whither he had gone to look after the firm's business interests. He reports a very short crop of Bermuda lily bulbs, caused by a drought that set in about the end of April and has continued throughout the season. Nine to eleven bulbs will not average more than 10 per cent of a crop, with seven to nine but little better. A well known Bermuda grower says that in his 18 years' experience he has not seen such a light crop.—Mrs. H. H. Berger and daughter were to sail for home, from Europe, July 16.—The Peter Henderson Co. has very attractive window displays of water lilies and other aquatic plants. —Visitor: Hjalmar Hartman, Copenhagen, Denmark.

Nebraska Seed Crops.

Fremont, July 16.—The Western Seed & Irrigation Co. states: "Generally speaking nearly all crops of corn and vine seeds are in a rather unsatisfactory condition, on account of the excessive rains, which have drowned out a good share of the crops in spots, and have also prevented the growers from getting into their fields to cultivate the crops at the proper time. The consequence is that a large share of the crops are spotted, and in rather a backward, weedy condition, so that we do not look for much, if any, surplus, but believe there will be many short crops, especially of the late varieties of sweet corn, and all varieties of Flint corn.

"A large percentage of the cucumber has been planted quite late, on account of the excessive rains, which delayed that operation, and many of the crops are in a weedy condition and also backward. The same will apply to quite a number of musk and water melon, also pumpkin and squash crops, which had to be replanted, on account of poor stands, and the crops being drowned out. We therefore do not look for any surplus crops of vine seeds to speak of in Nebraska, but do look for a number of shortages.

"We therefore believe that the chances for nearly everything in the line of sweet and field corn, also vine seeds, will be in good demand, and that the prices will range considerably higher next fall and winter."

ANOTHER VIEW.

Waterloo, July 16.—The J. C. Robinson Seed Co. says: "In our immediate section we have had too much wet weather, and some lands overflowed. Crops of all kinds are very backward. Corn is not what it ought to be at this season, and many fields very weedy, farmers not being able to cultivate on account of rains. Cucumber crops look fairly good, but not as far advanced as usual. Musk melon crops poor, and the melon aphis showing up in some fields. We look for a light crop of musk melons. Water melon crops are doing fairly well.

"Bugs are destroying some crops of winter squash, while summer varieties are late and backward, and some acreages lost by high water. Pumpkins at present promise a fair crop. Acreage of all varieties has been reduced by high water flooding the ground. While our soil is of such character it responds very promptly to favorable conditions, we do not regard prospects as very bright, at present."

Massachusetts Seed Crops.

July 16.—J. J. H. Gregory & Son write: "Everything is suffering for want of rain; hardly an inch has fallen for 45 days. Potatoes are a complete failure. Corn has been curling badly for the past week. Onion and carrot are now in bloom; the heads are small and if we do not have rain soon the crop will be very light. Beet seed and squash never looked better and seem to stand drought better than anything else.

"Market gardeners in this vicinity are having a hard time. Crops are drying up. Low lands seem to suffer, even though the soil appears moist. The hot dry winds apparently take the life out of all plant life."

Peas and Beans.

Grand Rapids, Mich., July 22.—Alaska peas are being harvested this week and this work will be completed next week; the crop is fair. Wisconsin farmers have grown Alaska heavily on speculation because of the high price last spring. The shortage of Horsford's and Abundance should make canners' demand for Alaska good, as they are in position to buy freely.

Medium beans for October delivery are selling at $1.75.

Imports.

During the week ending July 18 imports were received at New York as follows:

Vaughan's Seed Store; 220 cases lily bulbs.

COSMOS ROEMER.

F. Roemer's Early and Large-Flowering Hybrids.

Henry & Lee; 55 pkgs. bulbs.
Wm. Hagemann & Co.; 44 cases bulbs.
F. R. Pierson Co.; 44 cases lily bulbs.
P. Henderson & Co.; 25 cases lily bulbs.
Schulz & Ruckgaber; 20 cases bulbs.
R. M. Ward & Co.; 17 pkgs bulbs.
J. Roehrs & Co.; one case plants.

To order, 16 cases; 20 pkgs. plants, 2268 bags cloverseed; 1027 cases lily bulbs. 380 bags grass seed, 154 bags sunflower seed, 297 bags seed.

COLLEGE POINT, N. Y.—Mrs. Magdalene, wife of Henry Meinz, died on July 12 after an illness of several weeks. Mrs. Meinz was born in Germany, and she has made her home here for the past 35 years.

Vaughan's Flower Seeds
For Summer Sowing.

If you have not received our complete list of **Pansies, Primroses,** and **Perennials,** kindly write for the same.

Calceolaria Hybrida.

Our mixture is composed of the choicest selection of the tigered, marbled, spotted and variegated varieties and we know will give entire satisfaction. **Trade Packet** (1000 seeds) **50c.; 3 trade pkts for $1.40.**

Gloxinia Hybrida.

Vaughan's Columbian Mixture is made up by ourselves from the choicest spotted, tigered, edged, marbled and splashed sorts of the upright and horizontal type. **Trade pkt.** (1000 seeds) **50c, 3 pkts for $1.40.**

Mignonette, New York Market.

This is an extra choice strain of Mignonette for greenhouse culture. Our seed is greenhouse grown, raised by a most careful grower. **Packet,** (about 1000 seeds) **50c.; 1/8-oz. $1.50.**

Vaughan's International Primula Mixture.

This mixture is composed of the most salable colors of single Chinese Primulas. We have taken special pains to make this mixture as complete as possible and unreservedly recommend it. **Packet of 250 seeds, 50c.; 5 pkts. 1250 seeds, $2.00; per 1-16 oz. $2.50.**

Pansy—Vaughan's Cut Flower Mixture.

This mixture is put up by our ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers who have realized big returns from the sale of the flowers. Pansies are as easily grown as violets, require less care and bring better returns. **Trade pkt. 50c.; 1/8-oz $1.00; 1/4-oz. $2.00; 1-oz. $8.00.**

Vaughan's "Giant Pansy Mixture."

This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain with its delicate veinings. **Trade pkt, 25c.; 1/8-oz. 60c., oz. $4.00; 1/4-lb. $14.00.**

Vaughan's International Pansies.

Nothing Better. The World's Best.

We import from all the best European sources and personally inspected the fields of French and German specialists of their finest strains. We buy every year novelties of known merit to improve the mixture. This is the reason it is always complete, always the latest and always the best mixture AS WE BELIEVE. We add to all the Pansy Mixtures which we now buy more than fifty per cent of the choicest named kinds obtainable, each in rightful proportion. We thus know what it will produce. This is one of the SPECIALTIES which has established and held the reputation of Vaughan's Flower Seeds and this is one which we maintain most carefully not alone as to quality but in vitality and germination. **Trade packet, 50c.; 1/8-oz. $1.50; 1/2-oz. $5 00; Oz. $10.00.**

VAUGHAN'S SEED STORE,

14 Barclay St., NEW YORK. **84 and 86 Randolph St., CHICAGO.**

MARKET GARDENS.

A POTATO 12 inches long and weighing four pounds was a great attraction at the Worcester County Horticultural Society's show July 3.

Notes in Season.

This is the time of the year when the crops of asparagus, rhubarb and parsley are made, or spoiled. Because asparagus and rhubarb are cut in the spring, or winter in the greenhouse, they are often neglected in midsummer. The coming crop depends entirely upon the growth now making, hence give them the needed attention. Of first importance is suppression of all weeds, then shallow cultivation to prevent the crusting of the ground—and next fertilization. Asparagus and rhubarb are gross feeders and a top dressing of manure or fertilizer is always in order. This is especially necessary where young rhubarb is wanted for forcing purposes. This can be advanced rapidly by ample feeding and cultivation. Never allow rhubarb to go to seed; cut the flower spikes out as soon as noticed.

Parsley that is intended for winter cutting should not now be cut from, as such would be very harmful to plants. Just keep them clean and well cultivated, to get a good healthy growth by September 1, which is housing time. Renew stocks of lettuce and radish seeds. By planting a few at once they can be tried out to prove vitality and purity so that no heavy losses will occur later on by sowing valuable space to poor seed. Those who grow tomatoes for early winter should sow seeds now. MARKETMAN.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points, July 18, were as follows: Chicago, mushrooms, 25 cents to 45 cents per pound. Cincinnati, mushrooms, 50 cents per pound. New York, cucumbers, $1 to $2.25 per basket.

TO THE TRADE

HENRY METTE QUEDLINBURG, GERMANY.

GROWER and EXPORTER on the VERY LARGEST SCALE of all CHOICE VEGETABLE, FLOWER and FARM SEEDS. (Established 1787.)

A fresh sample brick, enough for a trial bed, together with illustrated book on "Mushroom Culture," will be mailed postpaid upon receipt of **40c** in postage stamps. Address **American Spawn Company, St. Paul, Minn**

Secret Commissions in England.

A public meeting of the Secret Commissions and Bribery Prevention League was held in London, May 27, Sir Ed. Fry taking the chair, supported by a number of influential persons of various trades and professions. In the speeches made it was shown that the society, though new, had already done much good work, in educating the public, giving advice to those applying for it and in other ways. Stress was laid on the preventive aspect of the work and it was shown that the mere existence of the society had a wholesome effect in discouraging breaches of the law. It was also pointed out that now that the society had been incorporated and was in a position to undertake legal work, it was able to undertake prosecutions and in other ways follow up information received respecting illegal practices. Various resolutions supporting the aims and objects of the society were put to the meeting and unanimously carried.—Horticultural Advertiser.

NOTE THE ADDRESS:

JOHNSON'S, LTD.,

44 Bedford Row, London W. C., Eng.

Lilium Harrisii

We offer a selected stock of the original true Harrisii for early forcing. These bulbs have been grown from the original pure Harrisii, and will be found to be splendid stock for early forcing, for which purpose Harrisii is so valuable. We have had the stock inspected, and are assured that it is almost absolutely pure and almost entirely free from disease. This is not stock picked up indiscriminately from different sources, but is grown from one stock, and will be found very superior to the ordinary Harrisii usually offered, both in regard to freedom from disease and purity, and not the late type now so often furnished.

Lilium Harrisii has been deteriorating slowly for years, and in order to get back to the true type of the original Harrisii, we have had our stock grown from the original pure stock, and it will be found very superior to the Lilium Harrisii usually offered. While the stock is A No. 1, our prices are as low as, or lower than, the prices asked for indifferent stock. We have only a limited quantity of this stock to offer, so it will be advisable to place order without delay in order to ensure securing this stock. Bulbs ready for delivery middle to last of July:

6.7 in. bulbs, 350 to the case, $6.00 per 100; $ 50.00 per 1000
7-9 in. bulbs, 200 to the case, 9.00 per 100: 80.00 per 1000
9-11 in. bulbs, 100 to the case, 18.00 per 100; 170.00 per 1000

Full case lots at thousand rates.

Freesia Refracta Alba Bermuda grown, finest selected bulbs ½-in. up, $1.00 per 100: $ 7.50 per 1000
French grown, mammoth size, ¾-in. up. $1.50 per 100; $12.00 per 1000

VAUGHAN'S SEED STORE
CHICAGO. NEW YORK.

Newport, R. I.

GRAND FUNERAL DECORATIONS.

The season began with the Fourth of July, and business since has been increasing. The most important event of last week was the funeral of the late Rear Admiral C. M. Thomas, who was formerly in command at the training station here, and lately in charge of the division of the Atlantic fleet in its trip to the Pacific, and who died at Del Monte. Calif. The remains were brought home and given the most imposing naval funeral and the best floral display ever seen here. All the florists had their hands full to execute the designs in time. The most striking piece was the admiral's insignia, sent by the officers and men of the receiving ship Franklin and the training station at Norfolk, Va., where the admiral was in command a few years ago. The design was faithfully carried out in a field of blue delphiniums, white anchor in the center, and two yellow stars on either side.

Other beautiful pieces were as follows: Naval war college, wreath of white sweet peas and orchids. Colonel and Mrs. D. A. Kane, anchor of white stocks and orchids. Commodore and Mrs. E. Simpson, wreath of Pink Rambler roses and white sweet peas. Rear Admiral and Mrs. Luce, basket of white roses and snapdragon. Major and Mrs. T. K. Gibbs, wreath of lily of the valley and pink roses. Rear Admiral and Mrs. Chadwick, palm arrangement with lavender larkspur and ribbon. Brigadier General and Mrs. Ennis, open laurel wreath. B. Norman and wife, wreath of lavender sweet peas. Newport naval training station, wreath of mixed sweet peas grown at the station. Mrs. Thomas (mother of the admiral), pillow of white roses and white snapdragon, with words "My Son" in purple flowers. Mrs. Keim, wreath of white roses, with the word "Brother." L. Spencer, Jr., and wife, flat bunch of lavender and white sweet peas. Miss Julia Sands, bunch of Pink Rambler roses. Mrs. A. L. Sands, wreath of white roses and orchids with lavender ribbon. Captain and Mrs. C. McR. Winslow, wreath of white lilies and orchids. Rear Admiral and Mrs. Ramsay, large piece of white roses. Camp Thomas, Spanish war veterans, a beautiful anchor.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-Presdent; George C. Seager, Rochester, N. Y., Sec'y.
Thirty-fourth annual convention to be held at Rochester, N. Y., June, 1909.

THE past season was one of the best in the history of the trade in California.

AT the meeting of the Western Association of Nurserymen J. H. Skinner of Topeka, Kans., said that a hole the size of a silver quarter in a box will allow the useful wren to pass through for nesting purposes, but will exclude the robbing and murdering English sparrow.

THE Texas Nurserymen's Association met July 8 at College station, when some interesting papers were read by various members of the trade. Officers were elected as follows: J. B. Baker, Fort Worth, president; R. H. Halbert, Arcadia, vice president; J. S. Kerr, Sherman, secretary-treasurer.

SPOKANE, WASH.—There is every probability that a very fine show of apples will be the result of the many good prizes, amounting in all to $25,000 at least, to be given by the National Apple Show Association here in December. H. J. Neely, of this city, is secretary of the association.

TOPPENISH, WASH.—The delegates in attendance at the convention of the Pacific Coast Association of Nurserymen, which was recently in session at North Yakima, were the guests of the Washington Nursery Co., July 9, on a tour of inspection. More than 30 growers from the northwest looked over the young trees. One of the most interesting features was the inspection of 1,000,000 young grafted trees in variety, all growing in one block.

INSPECTOR ENGLE is planning his annual inspection of nursery stock all over Pennsylvania, which will be started August 1. Including nurserymen who deal exclusively in berry stock, the nurseries to be inspected now number between 160 and 170, a slight increase over last year. Rigid examination is made of all stock to make sure that no trees or bushes are infested with any plant disease or with parasites, so that the growth in the state at large may be in danger.

THE South Dakota Experiment Station has issued a bulletin entitled "New Hybrid Fruits" which describes in detail many promising new fruits raised at the station and gives good illustrations of them. The native sand cherries and plums have been crossed and recrossed with European and oriental varieties and, although the work may be said to be only in its infancy, yet the fact has been demonstrated that it is possible to produce fruits combining the hardiness of the native stone fruits with some, at least, of the good qualities of the more tender varieties. The record is very interesting, and should be in the hands of all who are connected in any way with fruit growing.

Raspberries Failing to Fruit.

At the recent Milwaukee meeting of the American Association of Nurserymen this was attributed to frozen pollen and unripened fall growth.

Alexander Cumming.

Alexander Cumming, the new superintendent of the Hartford, Conn., streets, of whom we publish an excellent portrait, is a native of Scotland. He was born at Inverness, the capital of the Scottish highlands, and served his apprenticeship with Munro Bros., of that city. He afterwards had considerable experience in nursery and landscape work in several London and Liverpool (Eng.), establishments, also in the park system of Glasgow. He was for 10 years with the nursery and landscape firm of Thos. Imrie & Sons, of Ayr, and crossed the Atlantic in 1890 when he located at Toronto, Canada.

Here he had charge of extensive improvements on the government lands having complete direction of the construction of new roads, boulevards and walks,

Alex. Cumming.

extensive planting of trees and the laying out and grading of the Military cemetery. He later was employed in the Toronto parks and left here for Philadelphia where he became superintendent of a large suburban tract which was being developed by a private company. Eight years in Philadelphia have been followed by four years as park forester in Hartford an office Mr. Cumming has filled very efficiently. The recommendations he brought with him have been fully borne out by his reputation and doubtless the Board of Street Commissioners has chosen its superintendent wisely.

Rose Conrad Ferdinand Meyer.

One is constantly receiving excellent accounts of this grand hybrid rugosa rose, and all who know it must admit that it is a very fine variety, worthy of extensive planting, according to a correspondent of the London Garden. As an individual bush it is fine, especially where the last year's wood has not been pruned back very hard; but it appears best in a large mass in the wild garden, or anywhere in the garden where a bold, tall mass of color and beautiful foliage is desired. I believe Dr. Muller first raised a seedling from a cross between Gloire de Dijon and Duc de Rohan, and this seedling was employed as pollen parent upon the rugosa rose Germanica, a variety of Dr. Muller's raising, so that we have quite a mixed parentage. There can be little doubt that this sort of crossing and recrossing has given us some of our best recent novelties, and I believe Gruss an Teplitz originated in the same way.

[W. N. Rudd has frequently reminded us that this is an exceptionally fine rose for the west. He says, however, that the plants should not be pruned, best results being obtained if the strong canes are bent over and fastened in that position each season. When treated in this way the stems break freely, affording vigorous growth and abundance of bloom. —ED. AMERICAN FLORIST.]

Peonies Not Flowering.

Among the questions at the recent Milwaukee convention of the American Association of Nurserymen was one concerning the failure of peonies to bloom. One answer was that it takes some varieties several years to become acclimated and another that sometimes the buds are frozen in a very early stage of their development.

Uniform Inspection Needed.

North Yakima, Wash., July 8.—Nurserymen of the Pacific coast, representing 120 members from seven states, in an annual session here today declared themselves in favor of a uniform system of inspection and quarantine of infested fruit trees and nursery stock. They declared that the present system of allowing the deputy inspector of each county the final word results in losses aggregating thousands to the nurserymen, such loss being needless and due largely to incompetent county officials. The nurserymen declared also in favor of equal enforcement of the laws regarding spraying, fumigating, etc., against the orchardist as well as the nurserymen.—Seattle Post-Intelligencer.

The Yellow Peonies.

In the issue of The Garden for July 4 there is an excellent colored plate of Pæonia Delavayi with the following interesting note:

For a number of years admirers of the brilliant peony, than which there is no more handsome ornament to the flower garden, have desired one with yellow flowers. The species which for long most nearly approached that color was P. Wittmanniana, but it has not been found one of the best of growers with many, and it has also proved somewhat shy in blooming in many gardens, while its color is not bright enough to meet the desires of those who sought for a really yellow flower in the race. We owe, however, largely to the researches of the Abbé Delavay in Yunnan the introduction of some species which give us flowers of a truer yellow, and these plants, first sent to France, have found their way into the British Isles, although only to be met with in the gardens of a few of the most enthusiastic seekers after new flowers. P. lutea, which was found in Yunnan in 1882, was sent to the museum of natural history in Paris, and has since been distributed, although still scarce and expensive. It has good yellow flowers, but it is in this respect surpassed by the variety Major, which has more intense coloring.

Still another yellow peony has been introduced, but under the cumbrous name of P. Mlakosewitsii, one sufficient to debar the plant from any garden were it not for its pleasing flowers. This, like the others named, has been cultivated in the garden of W. E. Gumbleton, Belgrove, Queenstown, to whom we are indebted for the flowers of Pæonia Delavayii, illustrated in the colored plate, one of the latest to be introduced and also one of the best of its color. Mr. Gum-

bleton is one of the most discriminating of flower lovers, and as he has made a special study of the yellow peonies for some years, it must be gratifying to him to have this species figured from flowers grown by him. The colored plate speaks for itself and shows the beauty of this species, which, like several others, comes from China. These yellow peonies require much the same cultivation as the ordinary herbaceous and tree peonies, and prefer a rich soil and an open position, although they will also thrive in one which is shaded or semi-shaded.

Hydrangea Petiolaris.

The species of hydrangea are frequently represented in gardens by a couple of examples only, these being the common H. hortensis and the Japanese H. paniculata. These, again, are more seldom represented by type specimens than by their sterile varieties. There are, however, several other species, examples of which might well be given positions in both large and small gardens, and H. petiolaris is one of them.

A native of Japan, H. petiolaris has occupied a place in scientific collections, either under the above name or one of its several synonyms, for a considerable period, says the Gardeners' Magazine, but it does not appear to have ever been widely grown. The botanist Maximowicz, called the same plant H. scandens, an appropriate name, had not Siebold and Zuccarini previously adopted that of H. petiolaris. It is of scandent habit, growing very much after the fashion of the common ivy, trailing about the ground, or attaching itself to a support, and ascending to a considerable height by means of aerial roots. The leaves are large, more or less cordate and acuminate, with serrate margins and long petioles. The larger ones are often six inches long and four inches wide. The inflorescences are in the form of large cymes six inches or so across, the center flowers being numerous, cream-colored, and fertile, whilst a few of the outer flowers are conspicuous by reason of their sterility and well-developed white bracts. The flowering period extends for some six or eight weeks during June and July.

For planting against a wall it is an excellent subject, as it attaches itself to the support naturally, and is of neat appearance. A much better method of culture to adopt, however, is to turn a large butt of a tree upside down, so that the roots stand out in an informal manner and plant several plants around it. In a couple of years' time the branches will cover the roots and form an effective feature. Such an example may now be seen at Kew in the hydrangea collection.

A plant often confused with this is Schizophragma hydrangeoides. Hydrangea and schizophragma are closely allied, but quite distinct genera, and there is really no reason why the hydrangea should be set out for the schizophragma, as is frequently the case. H. petiolaris is, however, a somewhat variable plant, and extreme forms look very different from the type.

Rosa Laxa as a Rose Stock.

This species of rosa was believed to be superior to R. canina as a seedling stock, and as such recommended originally by growers in Zurich. In Germany it was soon discovered that in the matter of stem formation it was superior to R. canina and its varieties; but it was found that R. laxa answered admirably when budded at the collar. The plant is a much quicker grower in good soil than R. canina, so that seedlings pricked out in the spring months were fit for budding in August. All varieties budded on it grow with much vigor. Any essential influence or alteration by the use of R. laxa as a stock has not been observed in forced plants, so that it may be assumed it is in this respect similar to R. canina.—Horticultural Trade Journal.

PETERSON NURSERY,

Lincoln and Peterson Avenues, CHICAGO.

A Valuable Hybrid Peony.

Through the courtesy of Rene Rouhard, of the nursery of the museum of natural history of France, I have been able to see what promises to be a valuable break in peony hybrids. In 1900 L. Henry crossed Peony Ville de St. Denis with the new P. lutea, and the resulting cross has now flowered for the first time in Paris. It produces flowers both on the terminal and the lateral shoots, thereby following the habit of P. lutea. The flowers produced on the terminal shoots are large, well formed, double, and yellow in color; but that on the lateral shoot is as interesting as it is beautiful, writes R. H. Beamish in the London Gardeners' Chronicle. The shape it has assumed is that of a large, double, yellow begonia, tipped with rose, and on the first examination it can hardly be distinguished in shape from the latter flower. If only this form can be definitely fixed, we shall at once obtain a valuable and original addition, in shape as well as in color, to our herbaceous peonies. The Jardin des Plantes is to be sincerely congratulated upon the success of the first attempt of this cross.

Rosa Wichuraiana.

The word Wichuraiana is derived from the discoverer's name, Herr Wichur, who was a German botanist. He accompanied the Prussian expedition to China in 1859-61, and during that expedition the species was discovered. This botanist was suffocated in the year 1866. In the "Index Kewensis" R. Wichuraiana is mentioned there as R. Luciæ. It was not until about the year 1895 that an American, W. A. Manda, took the species in hand and hybridised it with other roses, which produced such sorts as Manda's Triumph, Pink Roamer and, later on, Gardenia and Jersey Beauty. Evergreen Gem came to us from the United States. The well-known Dorothy Perkins originated also in America, its parents being the species and the hybrid perpetual rose, Mme. G. Luizet. The species is a very low, trailing plant, with bright glossy foliage and large clusters of pure white single flowers opening in August. It is very readily hybridised, and is capable of vast improvement in the hands of the skilful hybridist.—The Garden.

SPOKANE, WASH.—The Inland Nursery & Floral Co. recently announced a quarterly dividend of seven and one-half per cent, the net earnings of the company for the three months being $3,750.

Preserving Roses.

To preserve Portland roses entire, so that in color and appearance they will remain the same in December as in June is the task to which Colonel A. W. Miller, of the Portland (Ore.) chamber of commerce, has set himself. Colonel Miller is the curator of the permanent exhibit maintained on the second floor of the chamber of commerce building and he preserves in liquids large quantities of fruits each year so that tourists and visitors from all parts of the country may view them as they pass through Portland and wonder at the perfection of the fruits grown by this state.

Colonel Miller has hit upon the plan of preserving roses so true to the life, says the Oregonian, that rose shows may be held next winter by the chamber of commerce for the edification of tourists. The work is a labor of love with Colonel Miller and while he admits that as yet the art is in the experimental stage, he feels confident that within a short time he will have learned the secrets of preserving flowers in liquids so they will show to the best advantage after the flowering season has passed.

Colonel Miller had a large red rose immersed in a jar of preserving liquid recently and the flower looked singularly lifelike and natural. The color and form was as perfect as if the rose were still on the bush, swaying in the June breezes. It is probable that by the time winter comes, the chamber of commerce will have a choice collection of roses on display, showing this more dainty product among the prunes, apples, salmon and other things in the jars of formaldehyde in the permanent exhibition.

SANTA BARBARA, CALIF.—The Horticultural Society met at the Richardson place on Palm avenue, Montecito, July 10, by invitation of E. R. Waugh. A paper on "Cut Flowers or Plants for Winter" was read by Stanley Davis.

Hot Water and Early Flowering.

Prof. Hans Molisch has recently been experimenting on the effect of hot water as a means of inducing forced plants to flower earlier than their normal period, and he has obtained some interesting and suggestive results. He finds that when the stems of lilac, for example, are plunged for six hours in water heated to 30° to 40° C. (i. e., 86° to 104° F.) under appropriate conditions, that the plants push their buds some 10 days earlier than those not so treated, says the London Gardeners' Chronicle. It seems that whilst the plants have to be experimented on during the resting season, it makes a difference whether this is done early or late in the winter. Very little effect is produced if the treatment is given just after the fall of the leaf in autumn, and, again, if it is delayed until February or March, when the season for the unfolding of the buds is approaching, retardation may be the result. Molisch obtained the best results by treating the plants in December or January, and says that different temperatures are required by different species. Thus for lilac and forsythia, 86° F. is the best, whilst about 100° F. is the optimum for silver birch and chestnut. It is very remarkable, that the effect of the treatment is strictly localized. Thus if a lilac be taken, and certain branches only of the plant be immersed in the hot water, it is found when the plants are forced in the spring that these branches are the first to bear leaves and flowers. Of course, it has long been known to practical gardeners that the branch of a vine trained under glass shoots much earlier than the remainder of the vine if this be grown outside. Possibly, the two cases are analogous, though the results obtained by Prof. Molisch are more striking. The matter is obviously worth full investigation, as it presents an interesting problem in vegetable physiology.

YOUNGSTOWN, O.—C. A. Sigle sailed from New York for Germany July 18. He intends visiting relatives there for a few months.

HARTFORD, CONN.—The fall show of the Horticultural Society will be held September 23 and the chrysanthemum show November 4-5, both in Unity hall.

GODFREY ASCHMANN

Of Philadelphia, the well known Araucaria Specialist, is not dead, but still alive and more active than ever.

1907. Was the 12th Anniversary since he began the importing and shipping of **Araucarias** He never had such a record-breaking year. **7,000** were imported sold or shipped This, in spite of panic times, has given him new strength in his **Importing Araucaria Business.** His business is now so well established that every person in the trade, from ocean to ocean, has heard of his **Araucarias. This year, 1908, is our 13th anniversary.** What do you think? Will we be behind last year? Oh, no! Don't look like it.

WATCH US GROW.

8,000 were imported this spring and can be seen and inspected growing in our greenhouses, in all sizes and prices, potted up into 5, 5½ and 6 inch pots. They have now sufficiently recovered from their voyage to be shipped safely into every state and territory of the United States, Canada or elsewhere. Now is the time to order. Fill your empty houses now and put something in them that will grow into money for you.

Look! Plants worth 75c now are worth by Sept. or Oct., $1.50 to $1.75 up to $2.00 each.

Araucaria Excelsa, 5-in. pots, 2 years old 3 tiers, 8-10 in. high, 40c; 5¼-in. pots, 2 years old, 3 to 4 tiers, 10-12-13 in. high, 50c; 5½ to 6-in. pots, 3 to 4 years old, 4, 5 and 6 tiers, 14-15-16-20 in. high, 60c, 75c to $1.00 each.

Araucaria Robusta Compacta, 6-in. pots, 3 years old, 3 tiers, very beautiful plants, $1.25 to $1.50 each.

Araucaria Excelsa Glauca, 6-in. pots, 3 years old, 3 tiers, very handsome plants, $1.00, $1.25 to $1.50 each.

Araucaria Excelsa Glauca, specimen plants (something extra), spring of 1907 importation, suitable for lawns and porches, 5 to 6 years old, 7-in. pots, 5 tiers 25 to 30, 35 to 40 in. high same in width, $1.50, $1.75, $2.00, $2.50, $3.00 to $4.00 each.

Kentia Forsteriana, 6 to 7 in. pots, 36 in. high, $2.00 each; 40 to 50 in. high, $2.50 to $3.00 each; 6-in. pots, 30 in. high, $1.50; 6-in. pots, 25 in. high, $1.00; 6-in. pots, 20 to 25 in. high, 75c; 5 to 5½ in. pots 50c.

Kentia Belmoreana, 5¼ to 5½ in. pots, 22 to 25 in. high, 50c, 60c to 75c; 4-in. pots, 20 to 22 in., 35c.

Clematis, the true Jackmani, 6-in. pots, 3 feet, 35c to 40c.

Begonia Gloire de Lorraine, 3-in. pots raised from leaf cuttings, ready to shift into 4 5 in. pots, 25c.

Cannas, 4-in .....5c **S. Sage,** 4-in.....5c
Geraniums, 4 in.....5c

Asparagus Plumosus Nanus, 2½-in., $3.00 per 100.

Whitmani Ferns, 4 in., 20c; 5½ to 6 in., 40c to 50c.

Boston Ferns, 4-in., 20c; 6-in., 40c to 50c.

Scottii Ferns, 4-in., 20c; 5½-in., 40c.

Cycas Revoluta (Sago Palm), 5 up to 20 leaves to a plant, 6 to 7 in. pots, 10c per leaf.

Bay Trees, just received, per steamer Manitou, 6 ft. high from top of tub, 30-in. crowns, $12.00 per pair.

Victoria Asters, 2½-in. pots, separate colors, $2.00 per 100.

Solanum, or Jerusalem Cherries. We carry the best improved strain called the Multiflorum, always laden with big berries. Price: 2½-in. pots, $4.00 per 100.

All goods must travel at purchaser's risk only. Cash with order, please.

Formerly Garfield Park Flower Co.

San Francisco.

BUSINESS QUIET.

At present there is very little business going on in the city or vicinity; in fact everything has been exceedingly quiet for a long time. Except for the closing exercises of the schools and a few funeral orders, the retailers have lately had a very restful time, for which they are not at all grateful. Prices have gone up a little lately as the supply has shortened up considerably especially of roses and carnations. Sweet peas are still coming in in large quantities and are finding a ready sale. Lilium auratum is to be seen in all the windows also a few L. album and L. rubrum. Gladioli are very fine this year also irises and both are being disposed of at fair prices.

NOTES.

At the last two meetings of the Pacific Coast Horticultural Society, F. Ludemann presented a paper on "Rhododendrons and Ericas," which was very interesting and instructive, drawing a large attendance at both meetings.

D. Raymond of the Garden City Pottery Co., San Jose, reports an order from Australia for 500,000 flower pots. The business has increased so much lately that the company is obliged to enlarge its pottery capacity.

John R. Sievers, of Sievers & Jaques, 1625 Van Ness avenue, has purchased the entire interest of J. R. Jaques and is conducting the business himself.

N. Armonino has enlarged his plant, by the addition of one house 25x100 feet in which he will grow Asparagus plumosus.

H. Plath intends taking a trip to Europe this coming fall, returning in time to take in the National Flower Show at Chicago.

N. Peterson who has been spending his vacation in Lake county has improved very much in health from his outing.

E. W. McLellan is erecting two large greenhouses on his place at Burlingame, one to be 350 feet long.

Cleis & Jacobsen are reporting quite a rush of funeral orders lately.

BOWLING.

The series of five matches to decide or select the team to represent the Florists' Club in the national tournament at Niagara Falls is being bowled on Thursday evenings. The first match was rolled on the club alleys July 9 and resulted in some very good scores. There are 10 contestants which makes two teams of five each, one captained by Robertson and the other by Yates, two of the best bowlers in the club.

The second match was bowled July 16, on the Olympic alleys on Arch street below Broad street. Here the alleys were strange, none of the men having bowled here except on trial games a year ago. There was a slight falling off from the averages made on the home alleys where the five high men made 191 average while here it was 181, a very good showing. In the first match Robby's team won with a margin of 75 pins. Yates' boys however, captured the second in a close finish by the narrow margin of five pins. The scores follow:

FIRST MATCH, CLUB ALLEYS.

	1st	2nd	3rd	Total
Robertson	184	157	215	556
Connor	226	221	213	660
Graham	147	180	171	498

Grand total	872	864	863	2599

LADIES' BOWLING.

The ladies bowling team of the Florists' Club has been taking quite an interest in the game throughout the winter, meeting about twice a month for a social game. As the convention loomed up the sending of a team to compete with the ladies' clubs of other cities was arranged as a matter of course, as quite a few of the members have made good strides in the game, as an inspection of the following scores made in the matches which are now being rolled on Thursday afternoons in July will show. The team is to be selected from those having the best averages of the month.

JULY 3.

	1st	2nd	3rd	Total

Chestnut Hill, PHILADELPHIA, PA.

At New York.

GREEK-AMERICAN OUTING.

The outing of the Greek-American Retail Florists' Association was held at Witzel's Point View Grove July 16. The weather was exceptionally cool and clear and the affair, thanks to the good management of the promoters, was a great success. Though there was a large representation of Greek florists and their families, there was also a large number attended who are not of that nationality. There were baseball games, foot and sack races and dancing, every one having an opportunity to enjoy themselves according to their inclination. George D. Nicholas, N. Christatos, M. Rovatzos and others were untiring in their efforts to show everybody a good time. Two good meals were served, the first on arriving at the grove and another just before the start was made for home. A good band of musicians enlivened the trip on the steamer to and from the grove and furnished music for the dancers. Short after dinner speeches were made by Rev. Peter Lazaris and Geo. D. Nicholas, both speakers being enthusiastically applauded.

BOWLING SCORES.

	1st	2nd	3rd
Donaldson	179	191	169
O'Mara	143	144	157
Scott	145	137	166

Chadwick	179	193	201
Zangen	125	118	143
Shaw	134	156	146

At St. Louis.

The picnic given by the Florists' Club at Normandy Grove July 15, was a success, notwithstanding the morning opened with dark, angry clouds, which bespoke a rainy day. By 10 a. m. the clouds had dispersed and did not appear again till about 3 p. m. At least 300 persons attended the picnic. Charlie Schoenle and Wm. C. Smith together with Frank Filmore and Charlie Beyer formed a reception committee which did itself proud and never seemed to tire of attending to the wants of the visitors. Will Young, our president, was plainly in evidence. The sporting events were the feature of the day including the ball game. A good band brought in by Chas. Beyer gave great satisfaction and the dancers made merry; that everyone had a good time was the universal verdict.

The ball game was a very exciting affair and the five innings were played hard, each side being determined to win. The wholesalers were a confident bunch with George Schriever, their pitcher and Fred Alves their catcher. So were the retailers with Oscar Huettamann the pitcher and Hermann Weber the catcher, son of F. C. Weber. Oscar was wild and Hermann handled his shorts bravely. He was so badly bruised upon his arm he had to retire in the fourth inning. The umpires, Fred Ammann of Edwardsville, Ill., and Henry Ostertag, gave general satisfaction. Fred was behind the bat and Henry at the bases. Owing to a very close decision in the fourth inning given by Henry Ostertag who declared a retailer out at second a report was circulated that the wholesalers had bought up Henry Ostertag. Of course this could not be proved but the following day a great many flowers were seen coming from the wholesale houses to Henry's store. In fact the reports went so strong the retailers claimed he was to receive flowers for the remainder of the week gratis.

NOTES.

F. C. Weber and wife were much missed. Fred and his brother Hermann represented them together with John Steidle, Theodore Miller and their families.

The ladies' egg and spoon race was a very exciting affair and had to be run three times by the two contestants, Mrs. Charlie Beyer and Mrs. Henry Riessen.

Willie Smith when wanted could be found with the ladies. They were all after him, especially the single ones.

Pilcher was very noisy and made lots of noise during the game. He was ordered off the field for his loud coaching.

Mrs. Chas. Schoenle and her husband worked hard for the success of the picnic.

Billy Winters, Fred Ude and others from Kirkwood took in everything.

Robt. Windler seemed to enjoy the outing and took in everything.

C. A. Kuehn was a great rooter at the ball game.

Frank Filmore and his father look as young as ever.

BOWLING PRIZES (MEN).

First prize, box of cigars, donated by John Stahler, won by C. A. Kuehn. Second prize, case Budweiser, donated by Chas. Beyer, won by Theodore Miller. Third prize, pipe, donated by Chas. Schoenle, won by Wm. Guy. Fourth (booby) prize, merry widow handkerchief, donated by Chas. Schoenle, won by Frank Vennemann.

(LADIES.)

First prize, box perfume, donated by Alex. Siegel, won by Miss Miller. Second prize, doily, donated by Mrs. Chas. Schoenle, won by Mrs. Beyer. Third prize, decorated cake, donated by Pechmann catering company, won by Mrs. Guy. Fourth (booby) prize, merry widow handkerchief, donated by Mrs. Chas. Beyer, won by Miss McNeinne.

One hundred yard dash.—A. Hartman, first, cuff buttons; Miss Minnie Beyer, second, parasol.

Boys, 12 to 16, 100 yard dash.—E. Rourke, fountain pen.

Egg and spoon race.—Mrs. A. Riessen, canary bird and cage.

Hop, step and jump.—Fred Alves, umbrella.

Young ladies, 50 yard dash.—Miss Winters, gold hat pin.

Boys under 12, 50 yard dash.—Clarence Bentzen, ball and bat.

Two hundred and twenty yard run.—A. Hartmann, hat.

Boys and girls potato race.—Willie Fitzgerald, catching glove, and Miss Winters, parasol.

In the baseball game, Wholesalers vs. Retailers, the former won by 9 to 8, five innings played.

W. F.

SHREVEPORT, LA.—Major Foote and Congressman Watkins arrived here July 7 and at once began the distribution of free seed to the Louisiana flood sufferers. More than 16,000 have already made application. Sorghum, millet, June corn, peas and turnip seed will be given out.

Papyrus in Place of Wood.

Why is it that, among the expedients for substituting other products than wood for the making of paper, the present age ignores papyrus? Probably the earliest paper, as well as the cheapest and most endurable, was made from papyrus. Paper made from wood fibre is wasteful and perishable. Herculaneum furnishes specimens of writing on papyrus in perfect preservation, while it is difficult to keep a file of modern newspapers for a decade. But paper was by no means the only product of papyrus. Mats, sails, boats and baskets, as well as coarse food, were made from these Egyptian rushes. Considering the matter of baskets alone, think of the almost incredible amount of wood consumed in fruit baskets, large and small, of this fruit bearing country, baskets which, with characteristic unthrift, are, as a rule, used but once. The fibre of papyrus would serve this purpose again as it did centuries ago. Why cannot some of our southern marshes be turned into papyrus plantations, so utilizing land, making a new industry and sparing our forests?—New York Tribune.

European Horticulture.

FROM THE GERMAN TRADE PAPERS.

VIOLA CORNUTA G. WERMIG.—The revival of interest in Viola cornuta, as now witnessed in all parts of Europe, bids fair to make it a close rival to the pansy in the near future as regards exrapid advent and development promises to win for it a goodly share of the favor hitherto claimed by its near relative of still greater renown, the violet. The new variety of Viola cornuta, G. Wermig, several years after its origination near London and before it found its way into Germany or elsewhere, proved highly profitable stock in the hands of its grower, who encountered no difficulty in readily disposing of its fine deep violet blue flowers at Covent Garden market as fast as they could be picked and bunched. German growers describe this sort as the most effective for bedding and outdoor display, a constant and prolific producer of perfect, gracefully formed and charmingly hued blooms; all are unanimous in their praise of the "summer violet."

A NOTEWORTHY NEW PRIMROSE.—Among greenhouse plants of recent introduction none, it is claimed, exhibits in so great a degree decided improvement over older forms of its kind than the new variety of Primula Sinensis, Morgenrote. As its name suggests, the flowers are of a color but rarely met with in Chinese primulas, a pale salmon, shading off gradually into a soft, delicate rose. Add to this a splendid habit of growth of the most free flowering of plants ever beheld, and the opinion as expressed by one who has grown it, seems justified when he says that Morgenrote is an acquisition destined to occupy as exalted a position among primulas as that now held by Gloire de Lorraine among begonias.

PLANTS, 1½c. All from 2-inch pots.

Swainsona alba, Coleus, Feverfew (dbl. white), Shasta Daisy (two kinds), Smilax, Celestial Peppers, Geranium (Ivy, Nutt, Dbl. Grant, Gen. Grant, Buchner, Viaud, etc.); all above, 2 and 2½-in. stock, at 1½c. Chinese Primroses, 2-in., 2c.

Cash or C. O. D.

BYER BROS., Chambersburg, Pa.

The Best Fifteen Hardy Annuals.

A writer in one of the English papers gives the following as the best 15 hardy annuals:

Bartonia aurea.—A most beautiful decorative plant, with fine foliage and large golden yellow flowers, 18 inches. Sow in autumn or spring, and thin out and stake two feet apart.

Candytuft.—Varieties: Little Prince, white, six inches; White Spiral, 12 inches; Carmine, 12 inches. Sow in autumn or spring in drills one foot apart; thin out same distance. No stakes required.

Centaurea Cyanus (Cornflower).—Various colors. King of Blue Bottles, 12 inches; Victoria, blue and rose, nine inches. Culture, same as candytuft.

Chrysanthemum.—Striking varieties in many beautiful colors are found in C. carinatum and C. coronarium, both single and double forms, one foot to three feet; Dunnettii, dwarf double, yellow, crimson and purple, 12 inches; Morning Star, primrose; Evening Star, yellow, 18 inches. Sow in autumn or spring, and thin out at a distance apart equal to the height. No stakes.

Coreopsis.—Varieties: Tinctoria, yellow and brown, three feet; Drummondii, 18 inches; Dwarf crimson, nine inches. Culture, same as last.

Eschscholtzia.—Brilliant, Poppy-like flowers. Varieties: Golden West, golden yellow; Mandarin, orange, shaded crimson; Rose Cardinal, rose; all 12 inches. Culture, same as candytuft.

Godetia (œnothera).—Brilliant salver-shaped flowers. Whitneyi, carmine; Duke of York, crimson-carmine; Duchess of Albany, pure white; 12 inches. Culture, same as last.

Gypsophila elegans.—Mauve; grandiflora alba, white; 18 inches. A combination of elegance and grace. Culture, same as last.

Larkspur (Annual Delphinium).—Producing fine spikes of flowers in shades of pink, blue, mauve, purple and white; these are admirable subjects for beds or borders. Stock-flowered, three feet; Rocket-flowered, 12 inches. Culture, same as chrysanthemum.

Lavatera.—Magnificent, profuse blooming plants with flowers like single hollyhocks; rosea splendens, rose; alba splendens, white; three feet. Thin out three feet apart. No stakes.

Nemophila insignis.—Bright blue, six inches. Invaluable for edgings, ribbon borders, and carpeting beds. Thin out six inches apart.

Phacelia campanularia.—Without a doubt the most brilliant blue-flowered annual. One of the earliest and longest in bloom; nine inches. Sow in spring and thin out 12 inches apart.

Poppy.—The Shirley poppies are almost endless in variety of shade and coloring; two feet. Sow in autumn or spring two feet apart, and thin out a like distance.

Sweet pea.—The "Queen of Annual Flowers." Varieties: Dorothy Eckford, white; Romolo Piazzani, blue; Countess Spencer, pink; John Ingman, rose; Coccinea, cerise; King Edward, crimson; Queen Alexandra, scarlet; Frank Dolby, light blue; Lady G. Hamilton, mauve; Black Knight, maroon. So much has been written concerning the culture of the sweet pea that it would be superfluous to mention more than that autumn or spring sowing may be practiced in deeply trenched and well-manured ground. Thin out four inches to six inches apart, stake when two inches high with tall stakes, six or eight feet.

Viscaria cardinalis.—Brilliant crimson flowers, surpassing even Linum rubrum; 12 inches. Sow in autumn or spring and thin out 12 inches apart.

Toronto.

TRADE FAIR.

Business is of the very ordinary variety, and there is not much doing in anything. The very warm weather had the effect of reducing roses to a very inferior grade and there are not many coming in at that. Kaiserin, Bridesmaid and Bride are about the only varieties one can procure. Carnations are nearly off the list and excepting in light shades there are few to be had. Lilium auratum and L. Harrisii are plentiful and orchids can be had in quantities. Outdoor flowers are very good and help fill in to a considerable extent.

Wm. Bowers, lately with J. H. Dunlop, has been presented with a piece of jewelry by his former fellow employes; as it was so entirely unexpected the pleasure of giving was so much more enjoyed. William has the heartfelt best wishes of his former colleagues now that he is in business for himself.

The new range at Grobbe & Wandrey's is about completed and several benches have been planted with Boston ferns. This firm is cutting longiflorum lilies from cold storage bulbs and they are turning out so successfully that it will be gone into more extensively.

J. H. Dunlop and family are at Rosebank for the summer; at the greenhouses the men are busy replanting the rose benches. In the field the carnation plants look well and are greatly benefited by the recent rains.

D. J. Sinclair and family are in Muskoko spending their holidays. D. J. is an enthusiast of Isaac Walton's so we expect some good yarns on his return about the big ones that all got away.

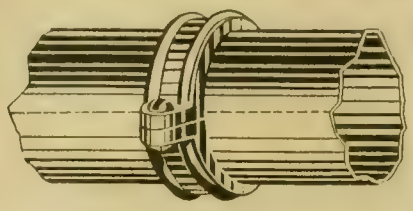
The Dale Estate, Brampton, is sending in asters grown indoors. They are fine large blooms with good long stems and are welcomed by the storemen.

The store windows are mostly decorated with green predominating which has quite a cool effect in this weather.

H. G. D.

ELIZABETH, N. J.—John Kenna, aged 75, an expert landscape gardener, died here July 11. He was a native of Ireland and had resided here 36 years. His death was caused by inflammatory rheumatism. He leaves a widow.

Stuttle's Patent Pipe Clamp



Especially adapted for joining old boiler tubes now so generally used in hot-water heating of greenhouses. Also it is invaluable for utilizing old cast-iron pipes which otherwise would be consigned to junk pile.

Easy to put on in any position and even more easily removed.
Cheap as the cheapest joint in use and 100 per cent superior.

SWEET PEAS SCARCE.

After a cool and rainy June the good old summer time has set in and dull business prevails. Good roses have been scarce for the last four weeks. Most of the growers have replaced the old roses with young plants and new stock will soon make its appearance. Carnations keep up pretty well and good stock can be had right along. Outdoor stock has suffered, especially sweet peas; good sweet peas are a rarety in this vicinity. Asters are coming in now and they will be welcome.

NOTES.

Herman Bros. of Council Bluffs, Ia., have finished their new range of houses and are busy planting. They have put up 23.000 square feet of glass which gives them now 50,000 square feet, all up-to-date houses.

Hess & Swoboda are about to erect a store building and packing room combined with a good large cellar for their cut flowers.

The Florists' Club will hold its annual picnic July 23 at Krugs park and a good time is promised.

J. C. Vaughan, Chicago, called on us on his way home from the Denver convention.

Chas. McAniff of Des Moines, Ia., spent a day here recently.

TRADE FAIR.

Business conditions the past week were fair, considering the season. Roses are obtainable in large quantities and are of good quality. The demand has been fair. Carnations are very small but have a fair demand, the supply being good. Sweet peas are about burned out, and the season has been a very poor one for them. Daisies have had a fair demand, the quality being good. Other stock is in satisfactory supply, with some demand.

F. L. S.

St Paul.

Holm & Olson had a very fine window display during the Shriners' meeting, a desert scene with the vegetation of that region, agaves, aloes, cacti, etc., and a number of camels going in the direction of a brook in which rippled the effervescent waters of France and California. This fine store is apparently doing a very prosperous business.

Mrs. Aug. Swanson has been very busy of late and expects soon to take a much needed vacation.

THE ALLIED TRADES

Durability of Cypress.

During the present excavations throughout the older portion of New Orleans, for the new sewer system, quite a number of unknown or forgotten burial grounds have been traversed and many coffins, constructed of cypress, in a perfectly sound condition, have been unearthed. Some of these, from the coins and buttons found, undoubtedly contained the remains of Spanish soldiers, but until July 8 no coffin had been found bearing a date or other means of identification. It so happens that nearly all coffins contained metal name plates and those found were so badly corroded that nothing could be deciphered. On July 8, during excavations at St. Louis and Basin streets, a coffin was brought to light which contained the inscription, "Hendric Miller, 1803," carved in the wood. This coffin, except for the discoloration of the wood, was as sound as the day it was made.

The interest in this centers in the oft repeated story of the durability of cypress and the fact that the hand forged nails, of which the coffin was constructed, were not rusted where they were driven into the wood. These facts should set at rest the theory sometimes advanced, that cypress contains an acid which will rust nails, making the wood unfit for shingles or other outdoor uses.

Greenhouse Heating.

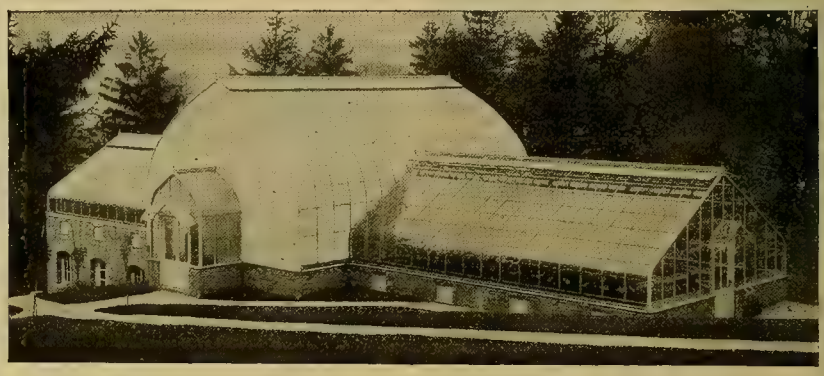
ED. AMERICAN FLORIST:—

I have a greenhouse 11x55 feet which I wish to heat with hot water. The sides are 2½ feet high, with double glass and concrete walls. Kindly tell me what size flow and return pipes to use and how many. I want the return pipes under each bench and wish to maintain a temperature of 65° in zero weather.

W. J. L.

Just how much of the walls consists of glass is not stated, but at the most it cannot be more than 30 inches, and for that area there should be no difficulty about heating the house with hot water, using two 2½-inch flow pipes and ten 2-inch returns. If the house is somewhat protected only nine returns would be needed.

L. R. T.



THEY HAVE WIDE GLASS

and wide glass means more light—and more light means better plants, better blooms.

The catalog tells why they are the lightest, simplest, strongest, most durable, most attractive and productive houses built, and cost less to maintain.

The ideal construction for private estates, parks, public institutions and florists' showrooms
